Meanwhile the mobilization has at least caused some very serious effects in this unhappy country. Money, as I have said above, is not to be had; famine seems likely to make itself felt very shortly; robbery is already very prevalent; many families whose young men have been called up are left without any means of support; and to make matters worse the Government has commandeered large quantities of provisions and clothing without payment.

The Christians here sympathize with England and her Allies. The Jews are neutral. Most of the Moslems appear to have been won over to the German side. They speak of them as "True Believers," and pray for their triumph.

MONTENEGRIN VICTORIES.

Sir J. Roper Parkington, Consul-General of Montenegro, has received the following telegram from the Minister of Foreign Affairs at Cettinje:—

"Our troops operating in Bosnia, after the brilliant capture of the fortress of Fotcha, the key of Serajevo, and after taking the entrenched camp of Gorazhda, marche dvictoriously northwest on the left bank of the river Drina, en route for Serajevo.

"On September 17 the entrenched position of Jabuska was captured, and on September 18 the town of Rogatitza fell.

"The *moral* of our troops is excellent, while the Austrian army appears demoralised and hurriedly retreats before our soldiers, abandoning cannon, quick-firing guns, ammunition, and stores of all descriptions, and our army is now some fifteen kilometres from the capital of Bosnia."

THE TROUBLES OF DIARBEKIR.

(From a Correspondent.)

Diarbekir Amida, The Black City, a place of 45,000 to 50,000 inhabitants, a city of no mean dimensions, and a great emporium for trade, had a call from the fire fiend on the 19th and 20th of the present month. There is a great deal of wood used in the construction of the buildings, and hence the great conflagration. On the date referred to above fire started in two or three places simultaneously, resulting in the destruction of 1,186 shops, four large khans, five bakeries, and a few dwelling houses. The shops were occupied mostly by Christians, but belonged mostly to Moslems. The losses are estimated to be very high, but the exact amount cannot be given. But in this as in everything the officials behaved in a truly Turkish way. They placed zaptiehs at the doors of the shops to prevent (?) looting, allowing not even the owners to remove anything from the shops, and meanwhile the backs of the shops were being broken through, and looting was carried on with a high hand, the city at the time being full of raw recruits gathered from all parts of the country, who improved their opportunities as the fire burned. There were quite a number of those men from a neighbouring city who are noted for that kind of work, and they made hay while the sun was shining. They are reported as having returned home already, bringing their booty with them, so that they are enacting the rôle not only of looters, but of deserters also. Some of them may crawl back without letting it be known that they have taken leave; for big threats have been made against those who do not report themselves in the course of the next ten days. Then if they have not reported they will when found have to wear a collar of hemp. A great many such threats have been made before, but none have been carried out so far, so that people begin to doubt whether they are meant at all. But should one be called upon to swing that would be all that would be needed.

It has been reported from the central office that the Baghdad Railway was to be finished as far as Ras-el-Ain and to be opened officially in the very near future. This must be intended as a "blind" for foreign eyes, for the work has been brought to a complete standstill because of the war, and when it will be resumed again remains to be seen. We had been hoping it would be completed to that point soon, but our hopes are now off to the war, and whoever goes to war we have no certainty of their returning.

Mobilization is being carried on here with a high hand; men from twenty to forty-five are being rushed to the colours, and the Government is using every means possible to bleed the country of all its resources, men, money, and animals. It is filling its coffers with the exemption fees of the people, as no one who can possibly raise the money (£43) will leave their homes. The time of payment is limited to eight or ten days; if in that time it is not paid the fee will be raised to £86, but as the time expires another ten days is added; and it has been thus extended four or five times until no money is left. While the Government is taking everything and giving no money in return business has come to a standstill.

The building of the new hospital at Omdurman, with funds chiefly given in memory of Dr. A. Chorley Hall, marks an important stage in the development of the C.M.S. Mission in the Anglo-Egyptian Sudan, says the parish magazine of All Saints', Cairo. This hospital forms a most appropriate memorial, not only of Dr. Hall, who founded this medical mission, but to General Gordon, whose monument is situated across the river at Khartoum. Nothing could have been more in keeping with the wishes of the great Christian soldier than the maintenance of a medical mission destined to help the bodies and souls of the people for whom he gave his life.

LETTERS FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 8.

War-Born Rumours.

It is daily becoming more difficult to find topics of interest to the average reader upon which one may write. Even the promising subject of naval and military movements in this part of the world is now barred; for the Regent has signed a decree forbidding newspapers published in Egypt to give any news relating to the movements of troops or of warships and military transports, and it has been intimated to correspondents of foreign papers that this prohibition must be taken as applying to them also. No one can complain with any justice at this; for Egypt is such an important point in the Imperial chain, and the country is plagued by so many spies in the pay of the Teuton, that the utmost secrecy as to movements and intentions is imperative. And right well the secret is being kept. No one knows where the much-talked-of Indian troops are, nor is any one certain from one day to another exactly where the different units of the Army of Occupation are stationed. As a natural result the most varied and most extraordinary theories and rumours are current in both European and native circles; but it would serve no useful purpose, even if one were allowed so to do, to narrate any of these stories, for by the time this letter appears in print events will have proved their falsity.

Return of More High Officials.

The last P. and O. steamer brought back all those high officials who are not required in London for the transaction of work necessitated by the present situation. Amongst those who have been retained are Mr. Boyd-Carpenter, in connection with the Educational Mission; Mr. Henry Higgs, who, as already announced, is a member of the Commission that is seeking some means of financing the cotton crop; and Mr. Hopkins, who has been arranging for the return of officials on leave; whilst amongst those who have just returned are Sir Malcolm McIlwraith, the Judicial Adviser; Sir Murdoch Macdonald, Under-Secretary for Public Works; and M. Roussin, of the Ministry of Finance, all of whom have found waiting for them many delicate problems that have been created by Egypt's present political and economic condition.

Feeling in Egypt.

Mr. Ronald Graham, Adviser to the Interior, has been making a tour of Lower Egypt in order to obtain a first-hand information regarding the situation of the fellaheen, and to explain to them, where necessary, what the Government is doing to help them and to alleviate any hardships that they may be suffering. He has, so far, visited Damanhur, Mansura, and Tanta, and from what can be gathered the peasants are quite satisfied and have complete confidence in the Government. It is interesting to note that at the meeting of notables at Damanhur, Abdel Latif Bel El Sufani, who is a well-known Nationalist, made a speech assuring the Adviser that the Egyptians were animated by the most friendly sentiments towards England, and that all that had been said to the contrary was a calumny. As a matter of fact, as I have said in previous letters, the masses, especially those in the provinces, are quite contented in their present political position, the only thing that worries them being what is to happen to their cotton crop. It is the town element that has displayed Germanophile proclivities. Since the curbing of the vernacular Press and the removal of the "agents provocateurs" the pendulum has shown a welcome tendency to swing the other way, and if only the Government would go one step further and prohibit all discussion of a polemical nature in the local press—especially any articles like those published recently in some of the vernacular organs—we should return to a fairly normal state of affairs.

Temporary Government Servants.

Much heavy weather has been made over the intention imputed to the Government to dismiss all temporary officials, which intention obtained a great deal of credence owing to the numerous dismissals that had already taken place. I have been at some pains to ascertain exactly what the Government's line of policy is, and I find that matters are not nearly so bad as the general public appears to believe. In the first place, no temporary officials who are doing necessary work will be dismissed. The heads of departments are taking the opportunity of weeding out the wasters, and of putting on pension those officials who have earned a pension by good work in the past, but whose services are to-day not indispensable. None of these will be replaced. Then, whilst new works, *quâ* new works, will not be undertaken, existing contracts will be proceeded with, and where, in order that the country may benefit by the works just completed, fresh work must be started, such work will certainly be carried out. In these cases, as also in the case of part of the Sudan enterprises, no effort will be made to hasten completion. There is, unhappily, no longer the same need to hurry, and the main idea is so to arrange the work that employment shall be given to the maximum number for as long a period as possible. In short, no wholesale dismissal of employees, such as was feared, is contemplated. Each case will be treated on its own merits. and in no circumstances will any step be taken that will inflict individual hardship. I have received these assurances from an authoritative quarter, and am glad to be able to correct the false impression that got abroad.

The "Out-of-Works" Problem.

With so many private enterprises either shutting down or curtailing their personnel, there is naturally a large number of men out of work. For a proportion of these work has been found by the municipalities. The remainder have made representations to the authorities, and steps are being taken to assist them in one way or another. A series of demonstrations were made in Cairo last week, and one or two shops in the Muski and other native quarters were pillaged. Inquiry has elicited the fact that the demonstrators were not bonâ-fide unemployed, but were hooligans and roughs, who took advantage of the present condition of affairs to add to the difficulties with which the Government is confronted. A large number of arrests were made, and steps have been taken administratively to deal with these vagabonds in a manner that will act as a salutary deterrent to them and their comrades. The authorities have also taken action in regard to the Berbereen, who are always a turbulent element, and all who cannot produce satisfactory evidence of permanent employment are being sent back to their villages in Upper Egypt.

Egypt and the War.

Another batch of French reservists left Cairo on Saturday for the front. They were accorded a most enthusiastic send-off, and although the scene at the station was not as wonderful as that which was witnessed on August 14, when the first contingent left, it was very inspiriting. According to correspondence received from France and Syria, a great many Lebanese have volunteered for service with the French colours. This is not surprising, for the inhabitants of The Mountain have never forgotten the debt they owe to France. German reservists still continue to leave, though it is daily becoming more difficult for them to obtain passages. They are, perhaps, after all better out of the country than in. By every mail we hear of more Anglo-Egyptians who have gone to the front—several reservists and Territorials have been summoned home by cable—and we out here have now an additional interest in the progress of the Allied armies.

Cairo, September 10.

The German and Austro-Hungarian Agencies.

It has been a matter of no little surprise to most people that, albeit Egypt had declared herself to be in a state of war with Germany and Austria-Hungary, the diplomatic and consular representatives of those countries still remained at their posts; in fact, continued to carry on their duties. The truth was that these persistent officials declined to recognise the validity of the decrees containing the declaration of war, and the Egyptian Government did not feel justified in taking further action immediately. It was an absurd position, born of Egypt's peculiar political situation: the German

Digitized by Google

and Austro-Hungarian agents persisting in dealing with their nationals just as if they were still their countries' accredited and accepted representatives, and the Egyptian authorities looking calmly on, but refusing to maintain official relations. To-day, however, this anomaly comes to an end, for the entire diplomatic and consular staff of these two countries is leaving this afternoon by the Italian steamer. The American Agency has undertaken to look after German interests, and—strange as it may seem in the light of what was thought might happen at any moment—the Italian Agency will take charge of Austro-Hungarian interests.

No official statement as to what has prompted this change of attitude on the part of the German and Austro-Hungarian Agencies has been vouchsafed, but the following is the generally accepted version. Last Wednesday a British officer called on the German Chargé d'Affaires and the Austro-Hungarian Agent, and informed them that the General Commanding the Army of Occupation would be glad if they would arrange to leave Egypt with their staff within a period that will expire to-day. Both officials declined to recognise the authority of the British Government in such a matter and to accept the letter containing confirmation of the General's message which the officer tendered, and both applied to the Egyptian Government for protection. The Minister for Foreign Affairs declared that this was not a matter which concerned his Government, as it could not prevent the British military authorities from carrying out their decision. The German Chargé d'Affaires and the Austrian Agent thereupon announced their intention to leave to-day with their staff and their consular officials.

As for the British military authorities' reasons for intervention, there appears to be little doubt that they had come to the conclusion that the presence of these representatives of hostile Powers was conducive neither to the maintenance of order nor to that complete control of information regarding British naval and military movements in and around Egypt which is considered so necessary nowadays. Ever since war broke out in Europe there have been signs that information was being received from and sent out abroad through channels that were not known to and, consequently, not under the control of the Anglo-Egyptian authorities. In addition, the general feeling of the people, as I recorded at the time, underwent a change, the suddenness of which aroused suspicion. The substitution of Germanophile for Anglophile tendencies was undoubtedly due to intrigue by Turkish and German emissaries, who took their orders and drew their inspiration from the German and Austro-Hungarian Agencies—though in the case of the latter there is reason to believe that the complicity was by no means so flagrant; whilst it is pretty certain that the same Agencies were not foreign to the leakages of information that were taking place. The British military authorities, therefore, took the decision referred to, and subsequent events have justified them; for the active search they have made during the last week in the houses and shops of various German and Austrian residents has brought to light much useful and interesting information, and has, it is understood, shown that the arrangements made had been both extensive and complete. Several Germans and Austrians are under close supervision, and some of the former nationality are under arrest, one prominent tradesman having been caught under suspicious circumstances quite close to Mustapha Pasha Barracks at Alexandria.

Egyptian Opinion and the War.

Already, as reported in one of my earlier letters, another decided volte-face has taken place in the general feeling, and during the past week various expressions of goodwill towards Great Britain have been voiced. In the first place, six Moslem physicians have offered their services to the British forces in whatever place it may be decided to send them. Next, a large meeting of Egyptian officers and of officials of the War Office and of the Sudan Government was held with the object of devising some means whereby they could show their devotion to and respect for England and those Anglo-Egyptian officers who are now at the front. It was decided to open a fund in aid of the wounded, towards which the officers and officials would contribute a certain percentage of their salaries.

It should be mentioned that various rumours, put about by the interested agents referred to above, have been circulated of late as to the disaffection of the Egyptian Army. They were, of course, gross fabrications. Before his departure from the Sudan, a deputation of Egyptian officers waited upon the Sirdar to assure him of the loyalty of the Army and to express regret for the false information that had been circulated in that respect.

Several articles have also appeared in the local Press demonstrating that Germanophile tendencies no longer predominate. *Al Moayad* has protested in most vehement terms against the allegation made in a contemporary that nine-tenths of the Egyptians sympathised with Germany. *Al Mahroussa* has produced a most humorous and sarcastic article having for its theme the German Emperor and his oft-asserted belief in his divine right. And *Al Mokattam* has printed—and the majority of its contemporaries have copied—an open letter addressed by Colonel Ali Sami Bey, a former aide-de-camp to the Sultan Abdul Hamid, to the Kaiser, to whose suite he was attached when he paid his memorable visit to Stamboul and Syria. In this letter, which has been circulated throughout the Moslem world, Sami Bey recapitulates all the promises made to Turkey by the Kaiser, whom he calls "an Emperor without a conscience," taxes him with insincerity and with abuse of the confidence that the Turks blindly reposed in him, and warns his fellow-Moslems no longer to put their faith in a perfidious nation like the Germans!

The Mahmal.

After much discussion and wavering it has practically been decided that the Mahmal and Holy Carpet shall be sent to the Hejaz this year. Instead, however, of proceeding via Haifa and Medina to Mecca, the caravan will follow the old route via Jeddah and will not visit Medina. The reason for this change is the unsettled state of affairs and the fact that it has not been possible to pay the usual cereal tribute to the Bedouins who live on the route. Even now it is not certain that the caravan will be immune from attack.

EGYPTIAN OFFICERS AND THE WAR.

Apropos of our correspondent's reference to the meeting of sympathy held by Egyptian officers, the following translation of a circular issued to members of the Egyptian Army will be of interest. We are indebted for it to *The Egyptian Gazette*:—

"A large number of the Egyptian Officers on the Active List of the Egyptian Army, of the Officials of the War Office, and of the Sudan Government, and Egyptian Officers on the Pension List, have considered it their duty to express their sympathy and feeling towards their brother British Officers, a good many of whom served in the Egyptian Army and fought with them side by side in the Sudan Campaigns, and who furthermore contributed freely towards the Red Crescent Society in the Balkan Wars. They have, therefore, met and decided to share in the contributions for the assistance of the British sufferers in the present war. For this purpose they have appointed a Committee composed as follows:—

"President, Lewa Mohammed Pasha Zuhri, Under Secretary of State for War; Secretary, Miralai Ibrahim Bey Rafat; Treasurer, Marc Bey Bialobos; Members, Miralai Musa Bey Fuad, Miralai Mahmoud Bey Fuad, and Yuzbashi Mustafa Eff. Hilmi Ayb. (Representing the Egyptian Officers on the Active List).

"Marc Bey Bialobos and Mahmud Bey Abbasi (Representing the Civilian Officials of the War Office).

"Said Pasha Shoucair and Naum Bey Shoucair (Representing the Civilian Officials of the Sudan Government).

"The above Committee has begun its work by laying down a sort of scale for the contributions by which it is intended to express our sympathies and feelings towards old brethren, as a token of gratitude for the good they have done previously for us."

The *Gazette* adds that according to the native Press the officers intend to give 5 per cent. of their pay.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, September 9.

Turkey's Intentions.

The Russian victories in Galicia have had a cooling effect upon Turkey's warlike disposition and on similar tendencies on the part of Bulgaria, and they have therefore served to some extent to calm Greek public opinion. But in spite of Turkey's declaration of her peaceable intentions and of her assurance of strict neutrality, which were renewed the other day by Ghalib Bey, and in spite of similar assurances offered by the Bulgarian Minister immediately after the Austrian defeat, people here are by no means quite at ease, especially while the Bucharest negotiations are pending. Nobody can believe that Turkey will continue to remain in a state of mobilization and yet do nothing. It is believed that in the long run she will yield to German pressure and attack Russia, but it is thought rather unlikely that she will attack Greece, by land, at any rate. For if the assurances given by Bulgaria to Russia as well as to Greece are to be trusted it would be sheer madness for Turkey to attempt an attack on Greece by way of Bulgarian Thrace against the will of Bulgaria, since in falling out with the latter country she would risk losing Adrianople and very likely a great deal more besides. But, on the other hand, it is feared that in case of any hitch in the negotiations regarding the islands, Turkey, with her fleet reinforced, may attack Greece by sea. In this state of uncertainty people here look on Roumania as the only country capable of imposing a policy of inaction upon Bulgaria and thus preventing Turkey from taking action against Russia or Greece. In this way, it is pointed out, Roumania could assure the peace of the Balkans, and all that would be required of her would be diplomatic action, not any employment of force; and in view of these facts Roumania's failure to take action is regarded as highly selfish, since it will leave her friends and co-signatories of the Treaty of Bucharest at the mercy of Bulgaria. Such being the case, military preparations are being pressed forward with redoubled energy, so that in case of need mobilization may be effected rapidly.

Anti-German Feeling.

Greek feeling towards Germany has been greatly exacerbated by the German strengthening of the Turkish fleet by means of the two cruisers, their crews and officers, and by the forwarding of considerable sums of money. There is a tendency to make this a peg on which to hang complaints against the timid policy of the Triple Entente, which, acting against its own interests, gave Turkey time to make preparations, instead of at once making a *casus belli* of the incident, as she will almost certainly have to do later on, when it will be much more difficult.

German Propaganda.

In order to counteract the instinctive dislike of the Germans which has always existed in Greece, and to counteract and undermine the sympathies of the Greek people for the Triple Entente, the Germans here, their Legation, and more particularly a certain Baron von Schenk, who represents Krupp, and has lately become the correspondent of the Wolff Agency, have organised a systematic propaganda, and have succeeded in winning to their side two or three journals. These are organs of former political parties, of which some, such as the Theotokists, are supporters of the Triplice; and they have not scrupled to declare themselves friendly to Germany chiefly in order to be "agin the Government," which is well-disposed to the Triple Entente. The aforementioned Baron, having organised a German Press Bureau here, sends out daily communiqués in which, as M. Deville, the French Minister, has well said in one of his *démentis*, the Germans treat the truth as ill as they treated the Treaties of neutrality and those Russian ladies who were unfortunate enough to pass through Berlin. And the Germanophile journals, acting under the influence of these suggestions, sacrifice everything in order to upset public feeling in favour of the Triple Entente. They represent that they have it from official sources that the latter wishes to win over Turkey and Bulgaria at the expense of Greece, that Great Britain has pressed Greece to give way in regard to the Islands, and that Russia is urging her to surrender Kavalla to Bulgaria. Finally, they represent that it is Germany that is preventing Turkey from attacking Greece, and conclude that Greece ought to maintain strict neutrality throughout the war, even if Serbia should be attacked by Bulgaria. All these assertions have been denied in an official communiqué, and the Ministerial journals declare that it is absolutely false that the Triple Entente has given Turkey or Bulgaria any promises of compensation at the cost of Greece in order to keep them neutral, and that if Germany is in fact restraining Turkey from attacking Greece, it is only in order to keep its army intact for use against Russia. The same journals declare that Bulgaria is still under the influence of Austria-Hungary, who seeks to embroil her with Serbia, and they urge that in the event of these efforts proving successful Greece must take part in the fighting in order to protect Serbia. The Government communiqué adds that Greece decided of her own accord to make concessions to Turkey in regard to the Islands, and that Great Britain only declared that if she thought such concessions would serve her interests she was free to make them. As for the maintenance of absolute neutrality by Greece, which the Opposition journals lay down as the best policy for this country to follow during the crisis, the Ministerial *Patris* states openly that if Turkey should declare war on Russia and Bulgaria should either attack Serbia or remain neutral, Greece, if asked to take action by the Triple Entente, certainly could not refuse in order to oblige Germany, who would not be in a position to compensate her for her neutrality. Moreover, such an attitude would expose her to great risks during and after the war, since it would involve the hostility of the Triple Entente, and Turkey and Bulgaria would both demand all sorts of compensation. Another Ministerial journal, the *Nea Himera*, recalls that Germany has always shown herself unfriendly to Greece; that it was she who imposed financial control upon Greece; and that she has consistently favoured Turkey at the expense of Greece. To report the reply of the pro-German papers would be profitless; for these arguments have, after all, only an academic interest. It would be very hard to root out from the Greek people their traditional sympathy with the Powers of the Triple Entente, who have been this country's protectors.

A Reuter's telegram from Constantinople states that two employees of the Ministry of Posts and Telegraphs were on Monday publicly hanged in the square in front of the Ministry on account of their alleged complicity in the conspiracy which led to the murder of Mahmud Shevket Pasha in 1912.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galimani, 224, Rue de Rivoli, and at Railway Bookstalls.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.

NEAR EAST BOOKSHELF.

SERBIAN FOLK-LORE. (1)

One of the many pretty pictures seen by the writer in the valley of the Morava to the north of Nish (where also, by the way, unless memory fails him, he saw the first minaret east of Buda), has been vividly recalled by a passage in Mr. Petrovitch's intensely human and most commendable work on the folk-lore of his country and countrymen. Referring to Peroon, the Russian God of Thunder, he states that the name is preserved in the name of a plant, *peroonika* (iris), which is dedicated to the god. "There is hardly a cottage garden (he writes) in the Serbian villages where one does not see the iris growing." It was this reference that recalled the marshes of the Morava last May in a mass of golden bloom, the while in cottage gardens beside the loitering train variegated armies of iris stood in rank and file. Truly the iris seemed to be as much the national flower of Serbia as the narcissus is that of the Jura, the red carnation that of Spain, and the Kazanlik rose the most famous flower of Bulgaria.

But it is not merely to the flowers and lyrics of Serbia that Mr. Petrovitch introduces us in the unique volume under review. There are other themes, more stirring to the warlike Southern Slavs, and it is mainly to these that the author would wish us turn. They are, in a word, Serbia's most noted contributions to the literature of the world—deeds of valour sung by bards in the olden days and handed down orally to our own times by countless generations of rustic minstrels; national epics of cyclopean magnitude that have kept alive the soul of a people and enabled it to stand up against the foe to-day with the fearless ardour of Belgians defending their own homes; heroic ballads that celebrate the prowess and virtues of knights whose names, but for popular lore, would long since have been forgotten. To these must be added folk tales properly speaking, the wonderful tales that children learn and never forget, and that form such an important feature in the life of every nation. It is to the epics, however, that we shall, together with the author, devote most of the space at our disposal.

Serbia's national hero, and the central figure of the country's greatest epic, is Prince Marko—a Cid Campeador, a Roland, a Bruce, a King Arthur. He and his piebald charger, Sharatz, are as familiar to the Serbians as are Tell and the cross-bow to the Swiss. Historically speaking, he is a lesser personage than either Stephan Nemanya, founder of a dynasty in 1169, or Doushan the Powerful, whose son, Tsar Ourosh, was Prince Marko's contemporary. But popular legends are woven around heroes without regard either to facts or chronology, and thus it comes as no surprise that we should be shown a princely knight *sans peur et sans réproche*, after the manner of our brave Launcelot or the goodly Bayard. Why precisely Marko should be the national hero none can say, though Mr. Miyatovich in his preface to the volume under review puts forward some interesting theories. He lived in the tragic days of Kossovo (1389) and the great advance of the Turks. Someone doubtless had to personify that dark period of Serbian history, and Marko, for reasons beyond us, though perhaps they may be found in the superior genius of the first troubadour who sang his fame, was the hero chosen. Beside his, the other epics, as set forth by Mr. Petrovitch, dwindle to a secondary magnitude, though they do not lose in interest therefore. Their perusal is to be recommended to all who take an interest in folk-lore and in the national strivings of a people fighting on the side we are fighting on in the great European war.

There is one aspect of the development of Serbian epic poetry that is deserving of quite special mention, and that is that whereas in most modern countries there is a marked tendency for the heroic art in question to die a lingering death, in Serbia it seems to be as much alive to-day as it was in the Middle Ages. This is proven in the first place by the great vitality of the old epic songs, and in the second by the creation of new epics to commemorate the Serbian victories during the late wars. For, as Mr. Petrovitch tells us, "the untiring Serbian bards have now turned their attention to the exploits of modern heroes at Monastir, Koumanovo (why does the author spell words having the broad *u* according to French orthography with *ou*?), Perlep, Scutari, etc., and they will thus immortalise for the delight of future generations the final triumph of the Serb over the oppressor of his race." Regarding the vitality of the old epics, it is undeniable. The history of Serbia is the chanted history in decasyllables of Prince Marko and the knights of yore; where history books would have failed to keep the national spirit alive in times of oppression, these songs succeeded in doing so, and thus right nobly did they fulfil their mission, and further criticism, especially by a foreigner, is of little avail. Proofs, moreover, of their vitality are not lacking. "In the Balkans-Turkish War, 1912-13, a *gouslar*, when not fighting, would take his *gousle* (a musical instrument) and recite to his comrades heroic poems of which the greater number related to Marko." It is extremely doubtful whether the *Chanson de Roland* or tales from the Knights of the Round Table are being recited in the Allies' camps in the Champagne to-day. But more extraordinary still during the late war was the attack by the Serbs on a hill near Prilep, where used to stand Prince Marko's castle, now in ruins. The men, narrates Mr. Petrovitch, were ordered to wait until the artillery should have prepared the way. But suddenly, unexpectedly, the men made a rush *en masse* for the hill, and could not be stopped. Soon they were storming it at the point of the bayonet, and the artillery had to stop firing lest they should kill their own comrades. A few minutes later the Serbian national colours were fluttering on the donjon of Kralyevitch Marko's castle. When asked after the engagement why they had broken loose and refused to listen to their officers' orders, the men replied, unflinchingly: "Kralyevitch Marko commanded us all the time: 'Forward!' Did you not see him on his Sharatz?" Call it auto-suggestion if you wish, but if those rough men had not been nurtured on their epics of the Kossovo period as a child is fed by its mother, the hill would never have been stormed against superior orders.

In conclusion, I should like to state that both Serbia and English-speaking races owe Mr. Petrovitch a deep debt of gratitude for having brought these heroic poems and folk-tales to the notice of the British public. Admittedly, there is no finality in the work thus ably undertaken, but it opens new vistas for the novelist, poet, artist, and musician, which it is to be hoped will be taken advantage of when peace has been once again restored on the Continent. The illustrations which are included in the present volume are good, but would it not have been possible to have procured the services of a Serbian artist, in collaboration with Mr. William Sewell and Mr. Gilbert James?

(1) "Hero Tales and Legends of the Serbians." By Woislav Petrovitch. Attaché to the Serbian Royal Legation to the Court of St. James; with a Preface by Chedo Miyatovich, formerly Serbian Minister to the Court of St. James, and 32 Illustrations in colour by William Sewell and Gilbert James. London: George G. Harrap and Co.)

With Poor Immigrants to America. By Stephen Graham. (Macmillan and Co. 8s. 6d. net.)

W. N. WILLIS'S GREAT BOOK,

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 48-50, Waterloo Rd., London.

TANGIER TO TEHERAN.

In a speech which he made at the German Sportsverein before leaving Cairo, Herr von Pannwitz, the acting German Chargé d'Affaires, quoted a remark made to him by the British Commissioner of the Caisse de la Dette Publique: "Our two countries are at war, but that does not prevent us from remaining friends as before." But I am afraid that the war has broken up not a few friendships in Egypt, as in other countries. For instance, at a well-known club in Alexandria, quite a lively "scene" was brought about by a member speaking not quite respectfully of the French Army. Asked to retract his words, he refused. Thereupon he received a blow on the nose, and a quarter of an hour's free fight followed. How many members actually took part I cannot say, but I gather that the proportion of "casualties" was distinctly high. An amusing feature of the business was that neither of the principals could claim nationality of any of the European belligerents. And, incidentally, I notice that the police could not interfere because the club is an international one, and, thanks to the Capitulations, some fifteen Consuls, or their representatives, would have had to be present!

***

Mr. Lloyd George's tribute to the Serbian nation was timely. It will, I have no doubt, effectually dispel much popular ignorance and misunderstanding of Serbia in these islands; for Mr. Lloyd George always appeals to a vast audience. Sir Valentine Chirol will have the gratification of knowing that his "Plea for Serbia," published in last week's issue of THE NEAR EAST, has not fallen on deaf ears. I hope that this sympathy will bear fruit in an organised effort to afford Serbia that practical help of which she stands in so great need, to alleviate the sufferings of her soldiers in the field and their women and children.

***

Apropos of Mr. Lloyd George's speech, I cannot refrain from mentioning some curious slips which appear in the report. The Chancellor is reported as having spoken of the "Grand Duke," whereas Archduke is the proper title of the heir to the Austrian Crown. In another place I read that it was Frederick the Great who formed regiments of gigantic soldiers. It was Frederick's father, Frederick William I. who had a mania for tall soldiers. His agents scoured the Continent for specimens and trepanned any unfortunate man whose inches were likely to gladden the royal eye and unloose the royal purse-strings. It is curious how closely the Kaiser resembles his namesake and ancestor. There is the same love of domineering over subordinates, the same susceptibility to the influence of favourites, the same peculiar piety, the same eccentricity and megalomania. Compare for instance, the craze for tall soldiers with the Kaiser's weakness for innumerable uniforms and residences.

***

The Censorship continues to afford amusement—one cannot be cross with so fatuous an institution, patriotism and one's sense of humour alike forbid. The latest revelation as to its efficiency comes from one of His Majesty's oversea possessions. It appears that the authorities very wisely decided that no messages were to be cabled unless passed by the Censor. Orders were at once issued to that effect, and everyone trembled and obeyed. The authorities then went to lunch, for no man should embark upon a war unfed. Presently messages began to accumulate, all manner of cables, from the most harmless statements as to personal health or price of commodities to the Empire-shaking revelations of unprincipled journalists. This went on for two days, until one, greatly daring, ventured to remind the authorities that they had imposed a censorship without appointing a Censor! It appears that the authorities were not best pleased—being authorities—at having what ill-mannered folk would call a shortcoming pointed out to them. They adjourned to lunch once more, cogitated deeply, and then appointed as Censor a gentleman whose place of residence was three days' journey from the scene where he was destined to exercise his inexorable functions. Great men the authorities.

***

Another Censor story—by the way, some one ought to collect Censor stories against the winter evenings—is to the effect that in another portion of his Majesty's dominions the officials of one Government department sat up all night for quite a long time working out a scheme for getting some German schoolgirls back to the Fatherland. Every detail was settled, and the young women were instructed to apply to their parents by means of the post through a neutral country for the wherewithal to buy their fares. They did so, and the Censor, after sitting up all night in his turn to cope with the matter, decided that it would be safest to put the letters asking for money in the waste-paper basket. Yet I know a Censor, in fact, more than one, and in private life they are eminently reasonable men, and they all say that all the other Censors are also, privately, eminently reasonable men!

CORSAIR.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

"BUSINESS CONDITIONS IN SALONIKA."

To the Editor of THE NEAR EAST.

SIR,—I am a constant reader of your valuable paper, and am very much interested in the letters sent by your correspondent at Salonika. Permit me, however, to remark that he shows a *mentalité spéciale* whenever he is describing anything that has been done after the capture of Salonika by my countrymen. I take, as an example, his letter dated July 25. He condemns the steps taken by the syndicate of the insurance companies in Athens, although he himself states that "Salonika has long been notorious by reason of its fires; but since the Greek occupation these have been much less frequent," fearing to say, instead of "much less frequent," "very rare."

His second point, entitled "The Fire Brigade," is also pitiful, and does show complete ignorance on the part of your correspondent. He must be aware that similar duties and taxes are imposed by every European town or country, either directly or indirectly.

His second and third subjects are entitled "Banking Hours" and "Transit Trammels." As to this, I would inform your correspondent that war has broken out between several countries, divided in two "camps," that most of the "desirable" people of this Greek town are on the side of the Entente, and that very soon Salonika will recover "the good old prehistoric days" and the "Transit Trammels" will soon be dispersed when our good friends the Serbs are victorious. As to his last paragraph, I beg, as I feel my duty, respectfully to inform "Your Own Correspondent" that Salonika is, and shall always remain, a Grecian town, and has no need of using any Latin characters at all.—Yours, etc.,

GEO. N. LIONDA.

31, Passage Benroubi, Salonika.

CONDITIONS IN THE HOLY LAND.

To the Editor of THE NEAR EAST.

SIR,—In your issue of August 7 "An Occasional Correspondent" endeavoured to describe the present conditions in Jerusalem. His letter, indeed, gives in miniature a picture of the state of things in the whole of Palestine, but as it is so scanty and brief I would take the opportunity, if space will allow, to make some further observations on the same subject for the benefit of those interested in the Holy Land and concerned for the welfare of British interests there.

The country ever since the outbreak of war has suffered acutely, both morally and financially. All the banks have "taken holiday"—a disaster more felt here than anywhere else owing to the natural poverty of the land and people. Business of every kind is at a standstill. Missionary work either has ceased or is about to do so, which implies, of course, the closing of schools, hospitals, and all other vital institutions.

The country, moreover, is threatened with serious internal disorder. A general mobilization from the age of 20 to 45 has been ordered. All the men of the country are thus "filtered" out, no excuses being accepted—not even physical deformities. The soldiers thus collected are quartered in camps here and there. The invalid, deformed, and healthy are huddled together in squalid tents, and as the Government is unable to support them merchants' shops are plundered, cattle and beasts of burden stolen, and the country is thus on the verge of anarchy. Most of the soldiers are clothed in their native peasant dress, the Government having no uniforms to supply to them. They have to buy their own food, and the poor Christian soldier at Nablous is left to the mercy of his convent for food and shelter.

In your issue of April 3 there appeared an interesting letter by a lady correspondent testifying to the great influence of Germany at the Porte. I quite agree with her opinion that the Turks have been disappointed and have lost faith in Great Britain owing to the blundering of diplomatists. May I say, too, that this German influence has taken root in the country and is also bearing fruit? Public sentiment here is "pro-German" and "anti-British." German officers are training the armies. The simple, uneducated Moslem peasant is much impressed by the sounding bells of a German church or the towering height of a German church steeple. A local paper of some note has ventured to say, "If Germany wins, we win; and we are vanquished if she loses."

On the other hand, the great majority of the people, both Moslems and Christians, with the exception of a few fanatics, condemn the policy of the Government and cherish a kind of hate towards the Government itself. It is to be feared this intense dissatisfaction will in due time ripen into open revolt or, perhaps, into disloyalty to the Government at the critical moment. I have often heard it repeated by many, some of whom are enlightened Moslems, that they would gladly welcome the acquisition of the country by a European Power. The eyes of many are looking towards Great Britain. In the meanwhile, *spero meliora*.—Yours, etc.,

ECHO.

Jerusalem, September 5.

THE BRITISH CLUB AT CONSTANTINOPLE.

Constantinople, September 16.—A meeting held to-day at the British Club in favour of a movement on the part of the Colony for supplying volunteers to the British Army was characterised by much enthusiasm. Up to the present twenty-three young men have volunteered their services, and handsome donations have already been subscribed to the fund.—Reuter.

The British Club at Constantinople, an unpretentious building, a little lower down than the more "aristocratic" Club de Constantinople, and on the opposite side of the street as you go from the British Embassy at Pera in the direction of the bridge at Galata, has been, ever since its inception, a temporary home and meeting-place in a strange country for hundreds of British people, men some of them who have become famous in various paths of life, including dragomans and consuls and consuls-general who have looked after British interests on the Bosphorus and in territories subject to the jurisdiction of our industrious Levant Service. At times, doubtless, the club, proudly flying the Union Jack from its prominent staff, rose to heights of patriotic fervour forgotten by most of us who were not there at the moment. Such acts, and they must have been many, belong to the past and will have been recorded elsewhere. Reuter's message last Thursday throws a sidelight on a topical subject, and therefore it is only fitting that it should be duly commemorated as chronicling a patriotic act worthy to rank with the generous offers which have, ever since the war began, crowded into London from our Dominions and Colonies "over the seas." Thus will not only British men and women feel proud of their fellow-subjects in Constantinople, but members, both past and present, will feel proud of their club.

The British colony in Constantinople is not a very large one, but, nevertheless, twenty-three young men have volunteered for service in the Empire's cause (nineteen of them I see by a later dispatch have already left for home), and donations have been subscribed to a fund. I would be willing to hazard a guess as to the names of some of the volunteers and of some of the generous subscribers, but prefer to leave them unwritten until the full report of the meeting has been sent home. The enthusiasm at that meeting must have been great; the gentleman presiding would not have been obliged to use words of eloquence to fire the patriotic spirit of his audience. Events have been following each other rapidly at the Golden Horn: the spreading of false news about British and French defeats and German victories which have poisoned the minds of many sane Turks; the return of the "Goeben" and "Breslau" of ignominious notoriety, the arrival of German sailors to man all Turkish boats, the relegation of the British Naval Mission to office work (and tardily to be recalled by the British Government), the threat concerning the Capitulations, and a hundred other minor incidents which will have convinced the young men that the Empire had need of soldiers and more soldiers, and that their time in Turkey was hopelessly wasted. So, from Pera and Galata, from Scutari and Moda and the shores of the Gulf of Ismid, from up the Bosphorus, and from offices down at the Golden Horn the British colony will have travelled to the British Club on Wednesday of last week, and there the resolutions, the bare facts of which have been cabled out to us, will have been passed unanimously. They will be carried out efficiently. For the majority of King George's subjects in Constantinople are shrewd organisers whose position and well-being is largely due to their particular genius. Moreover, and supposing that prior to the war they were split up into factions, as so frequently happens among British people abroad—I do not say they were, though I may have my opinion on the matter—present circumstances will have effaced all such puny differences, and the colony will show a united front against the common enemy, the intriguing Austrian and the unabashed Teuton, who are doing their best to poison the mind of the Turk against their only true friends, the British. Yes, the enthusiasm at the meeting must have been great, and the walls of the British Club—doubtless the members and their friends were all gathered in the reading room on the second floor where London papers spread out on tables have often been the solace of the exile from home—will have resounded to the cheers with which volunteers and donators responded to the appeal from the chair. Passers-by in the street will have paused; among them there will have been many who sympathised with the patriotic fervour of our Colony. For not for one moment must it be imagined that Constantinople is anti-British, or that the Turks hate us as the Germans would have us believe. No; there are some who, for motives not to be analysed, have been induced to side with our enemies; unfortunately they are in power, and so they lead the man who must always be led in the opposite direction to where he ought to go and where instinct tells him he ought not to go. This man will have hailed the meeting at the club with frank delight, just as there are others, even in the Ministries on the height of Stamboul, near St. Sophia and near the palace of the Grand Vizier, whose sympathies were and are with the British and their righteous cause.

British events have always been made the most of in the British Club at Constantinople. There was the visit last June of H.M.S "Inflexible," anchored in the roadstead off Seraglio Point. Such a happening, extraordinary within recent years, was not to pass unnoticed by the committee, and to celebrate it it was decided to organise a field day for the crew. The greatest enthusiasm prevailed throughout the day: there were prizes and joviality galore, and the British Colony made holiday. I happened later into the club when the accounts were being audited; judging by the consumption of lemonade, sandwiches, and beverages of a robust nature, Jack Tar and his friends must have been right royally entertained, and the reputation of the club for generous hospitality kept up to its traditional level.

The Club de Constantinople, a little higher up the street, is, as I said, more "aristocratic." Its leather chairs and lounges are softer and more commodious, its table more recherché, and its silence more diplomatic. It is the symbol of cosmopolitanism, whereas in the British Club the national, Imperial spirit predominates. However, the majority of the British members of the former are members likewise of the latter, from patriotic motives, and on occasions like Wednesday's meeting they are bound to have turned up in force—a goodly array, including perhaps members of our Naval Mission, to be released on the following day from their official posts at the Golden Horn, and those other naval officers who took service with the Ottoman Government in a confiding moment and whose position, if they are still at Constantinople, is a most anomalous one.

As for the members of the British Club and their friends, who does not know them? Their paths in life are varied, from the old-timer whose career in the Balkan provinces of Abdul Hamid was chequered and adventurous to the new man whose first experience of Turkey was an unhappy one; from the careful resident whose shekels have multiplied to the less fortunate but no less patriotic individual whose yacht on the Sea of Marmora remains a dream; from the business man who has kept alive the best traditions of British trade in a community that has been largely influenced by questionable Teuton methods, to the sturdy workman but recently arrived at the Golden Horn from England in order to build an arsenal for Turkey's fleet. English, Irish, Scots, and Welsh—with the Scots, perhaps, in the ascendancy—they will all have forgotten parish politics in the broader issues of the Empire and flocked to the memorable meeting of the British Colony at the British Club in Constantinople on Wednesday last.

C. R.

***In view of the national sentiment in Servia against the use of the letter "v" in the English rendering of the name of that country, the words Servia and Servian will in future be printed in THE NEAR EAST as Serbia and Serbian in conformity with the general European usage.

THE PRESS ON THE NEAR EAST.

Serbian National Ideals.

Mr. G. M. Trevelyan, the well-known historian, in a letter to *The Times* of September 18, writes of the Serbians "as one who last year travelled in their country as a guest of their State and armies." The following is an extract:—

A race of peasant proprietors, they have no feudalism like that of Hungary, no military caste like that of Germany, no despotism like that of Russia. In actual personal intercourse they are kind, self-respecting, cheerful, attractive. Only, like all the other races struggling for power in the Balkan Peninsula, including the Austrians, they have sometimes been cruelly severe on members of other races whom they have conquered. But in this war they are going out, not to conquer Bulgarian or Albanian, but to free their brothers of the south Slav race from the tyrannous dominion of Austria-Hungary. Last year, when I was among them, they looked forward to this as the grand national object, and they regarded the then impending war with Bulgaria as an unfortunate but necessary prelude to the war of liberation against Austria. They complained with justice that Austria compelled them to fight Bulgaria in the south because she denied them their legitimate racial boundaries to north and west. The young men in Serbia, many of them, spoke of themselves as belonging to the "Piedmontese party," and books about Piedmont's part in the Italian *risorgimento* were the commonest "serious literature" in the Belgrade shops, and lay on the table in the waiting-room of their Foreign Office. Serbia is indeed now engaged in a war of liberation similar to that undertaken by Piedmont for the other Italian provinces. And Russia is playing the part of Napoleon III.

The Porte and Berlin.

The United Service Gazette (September 17) has an interesting article on "The Position of Turkey." We quote below:—

British sympathy has always been on the side of Turkey, as she well knows, and as she now has an opportunity of more firmly cementing that friendship to her own advantage, we hope she will realize the importance of having the Mistress of the Seas on her side rather than against her. She can secure this desirable consummation by resisting the cajoling of Germany and deciding to strictly observe all the conditions of neutrality. So long as the "Goeben" and the "Breslau" are retained in Turkish waters and are not allowed to emerge, Turkey has a weapon in her grasp which will stand her in good stead later, and secure for her in years to come against any possibility of an attack from her powerful neighbour in the Black Sea. The lying reports as to the battles said to have been gained by Germany in her war with England, France, and Russia have been disseminated in Constantinople with one object only—to embroil the Porte in the failure of the Kaiser to dominate Europe. Turkey's Ambassadors in London and Petrograd can supply their Government with correct details as to how the war is going, and it is to be hoped that the Sultan's advisers will avail themselves of such accurate information before they accept the shadowy protection of Berlin and Vienna. If Turkey wants a guide as to the path she should take, she cannot do better than follow the attitude adopted by Italy—another country which has cause to appreciate the friendship of England, and whose neutrality we are pleased to find is being strictly maintained. Turkey's abrogation of the Capitulations is a step which affects the rights of all the Powers, but we have yet to learn at whose instigation this move was taken. It is one that might have been better postponed until the war was over.

Parties in Constantinople.

A writer in *The Liverpool Daily Post* makes the following observations on "German Influence in Turkey":—

I am assured by a correspondent at Constantinople that there is discord among the pro-Germans, despite their successes in securing the withdrawal of the British Naval Mission. This arises from the attitude of the Young Egyptians, whose Mahommedan leaders have now made Constantinople their headquarters. They assert that while they have been made a cat's paw by Enver Bey there is no intention on the part of Germany to release Egyptian autonomy and freedom from what is described as "the British yoke." As a fact, Enver Bey himself is supremely indifferent to the Egyptian ideal, his sole desire being that Egypt should make for a great Turkey. The Young Egyptians are at a discount in Constantinople—a curious fact, in view of the popularity of Englishmen and, in particular, of English subjects of the Porte with the general body of Turks. I am quoting a letter from an English official of the Porte when I say that "the responsible Turkish mind of Constantinople has not yet been won to the German purpose."

The Baghdad Railway.

Sir A. Conan Doyle, writing in *The Daily Chronicle* of September 18, under the heading of "The Devil's Doctrine," says:—

Where were the sane Germans? Why was there no protest from them? Perhaps there was, but we never heard of it amid the beating of those great Pan-German drums. Did the whole nation, for example, really agree in so hare-brained a scheme as the Baghdad Railway? Think of the insanity of such a project as that. Here is a railway representing very many millions of German capital which is built in the heart of Asia Minor, as far removed from any sort of German protection or effective control as if it were in the moon. The next step, vaguely thought out, was that German settlers were to be planted along the line of the railroad, but upon that being advanced the Turks, who had smiled most amiably at the actual railway construction, put down their slippers in the most emphatic manner. The net result, therefore, would seem to be that Turkey holds a hostage of a great many millions of German capital which, so long as Germany behaves herself, may or may not return some interest; but if Germany goes against Turkish wishes could at once be confiscated. Apart from Turkey, Russia in the Caucasus and England in North-West India regard with a good deal of interested attention this singular and helpless German railway which projects out into space.

German and Austrian Officials in Egypt.

In the course of an article, under the heading "Situation ridicule et dangereuse," which appears in *The Bourse Egyptienne* (August 26), after reference to the position of the "Germanic" consulates in Egypt (which have now been satisfactorily dealt with), the writer, Dr. Ed. Vignon, draws attention to the retention of the services of German and Austrian subjects in the Administration. We quote below:—

Mieux encore, par suite de la stagnation des affaires, de l'arrêt des travaux administratifs, l'Etat a licencié, licencie ou licenciera les employés non cadrés. Ces derniers sont pour la plupart anglais. Il résultera donc du fait, que les administrations de l'Etat où figurent quantité d'Allemands et d'Autrichiens cadrés, classés, seront entre les mains, sous la direction, à la merci de fonctionnaires allemands ou autrichiens, ennemis actuels de l'Angleterre, et par conséquent de l'Egypte, et qui tiendront en leur pouvoir des services de l'Etat contre lequel leurs pays sont en guerre ou en hostilité.

Attitude of Roumania.

The following is an extract from a message of the Bucharest correspondent of *The Times*, under date of September 17:—

At the beginning of the great war King Charles, whose sympathies are strongly German, was disposed to second the Central Powers, to whom Roumania was bound by definite engagements. In view, however, of the attitude of several political leaders, especially M. Take Jonescu and M. Filipescu, as well as that of the Government, which is bound to take into account popular feeling, his Majesty agreed to the policy of neutrality. It now seems doubtful whether this decision can be maintained, especially should the successes of the Entente Powers be continued, and military measures are generally regarded as impending. In these circumstances great importance is attached to the prospective policy of Bulgaria. It is generally recognized here that a complete rearrangement of frontiers in the Balkans more in accordance with the principle of nationalities must follow as the result of the European conflict, and that the Treaty of Bucharest is already obsolete. It is understood that concessions to Bulgaria, especially in the direction of Macedonia, must form part of any arrangement possessing the elements of stability, and a desire to cultivate friendly relations with the neighbouring State is generally expressed.

GERMANS IN TABRIZ.

A Reuter's message from Petrograd, dated September 21, states:—"The *Südslavische Korrespondenz*, an Austrian organ, having circulated the report that Russian troops in Tabriz were resolved to lynch the German colony, numbering some sixty people, and the German Consul in that town, it is semi-officially explained that since the beginning of the war the Germans in Tabriz, as well as the German Consul, Herr Litten, adopted a provocative attitude and invented news offensive to Russia. This fact, in conjunction with the German brutalities towards peaceful Russians, and German atrocities in the theatre of war, created great indignation in the Russian colony and Russian troops. The Russian Consul took steps to prevent effect being given to this feeling. An armed Persian guard was placed round the German Consulate, but an unknown man succeeded in entering the building and threatened Herr Litten with a revolver. The Consul thereupon betook himself to the American hospital. The feeling against the Germans being still very strong, the Consul-General has recommended the Germans to leave Tabriz. It is, however, completely untrue to say that Russian troops even threatened the Germans."

THE BALKAN MAP.

Reuter's Sofia correspondent reports that at the invitation of the Bulgarian English-Speaking League, Mr. Noel Buxton, M.P., chairman of the Balkan Committee, delivered a political address in one of the public halls of the capital on Sunday evening, in the course of which he said that he had come to Sofia at the request of highly-placed personages in England who wished to be accurately informed on the situation in Bulgaria and on Bulgarian public opinion. The British, he said, were anxious that each Balkan nation should find its natural position. Bulgaria, Mr. Buxton said, who had legitimate national aspirations, must also benefit within the measure of her rights in the redrafting of the Balkan map. If Bulgaria should lean in favour of Great Britain and her allies her rights would not be ignored.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian Old style.	—	Moslem.	Jewish.
1914. Sept.	1914. Sept.		1332. Julkada.	5675. Tisseri
25	12	Friday	5	5
26	13	Saturday.....	6	6
27	14	Sunday	7	7
28	15	Monday	8	8
29	16	Tuesday	9	9
30	17	Wednesday	10	10
Oct.				
1	18	Thursday	11	11

Saturday is the birthday of H.H. Princess Sybil of Reuss, niece of her Majesty the Queen of the Bulgarians.

Sunday, Julkada 7, is the birthday of H.H. Kameran Mirza, the Amir Kebir, great uncle of his Majesty the Shah of Persia, and son of the late Nasr-ed-Din Shah.

Monday is the birthday of H.R.H. Prince Felix of Bourbon-Parma, half-uncle of H.R.H. the Crown Prince of Bulgaria.

Monday, Julkada 8, is the birthday of H.I.H. Refia Sultana, daughter of the ex-Sultan, who married Damad Ali Fuad Bey.

Tuesday is the birthday of H.R.H. the Duchess of Cumberland, sister of her Majesty the Queen-Mother. Tuesday is also the birthday of her second daughter, H.R.H. the Grand Duchess of Mecklenburg-Schwerin, and of the Grand Duchess's younger son, Duke Christian Ludwig.

Wednesday is the birthday of H.R.H. Prince Hubert of Prussia, grand nephew of her Majesty the Queen of the Hellenes.

It is announced from Nish that H.R.H. Prince George of Serbia, elder brother to the Crown Prince, has been wounded. According to a later report good progress had been made towards recovery.

H.H. Prince Frederick Charles of Hesse, brother-in-law of her Majesty the Queen of the Hellenes, has been severely wounded.

It is reported from Berlin that H.R.H. Prince August Wilhelm of Prussia, nephew of her Majesty the Queen of the Hellenes, has been wounded.

The death in battle is reported of H.H. the Prince of Schönburg-Waldenburg, the elder brother of Princess William of Wied, the former Mpreteresha of Albania.

It is reported from Copenhagen that H.R.H. Prince Adalbert of Prussia, nephew of the Queen of the Hellenes, has died of wounds while in hospital. The report has not been confirmed.

Last Sunday Lord Kitchener paid a visit to Shorncliffe Camp, where 17,000 recruits are receiving training.

The appointment of Mr. Madjaroff to Petrograd will remove from London one of the few diplomatists to cultivate the traditional appearance of members of his profession. He is to be congratulated upon the good fortune which calls him to his new post, undoubtedly the most important in the Diplomatic Service of his country. The Minister and Madame Madjaroff were never conspicuous figures in society, and it must be remembered that they were plunged in mourning by the loss of their son in the Second Balkan War.

H.H. the Agha Khan is staying at Claridge's Hotel.

Prince Emanuel Bibescu has arrived in London from Paris.

Major-General Sir John Maxwell, K.C.B., D.S.O., etc., has taken over the command of the Army of Occupation in Egypt, not Major-General H. B. Watkis, C.B., as previously announced.

Lady Maxwell, having turned her house, No. 7, Grosvenor Place, into a hospital for wounded officers, would be glad of any gifts of fruit or game which friends would care to send them.

Mr. Olney Arnold, American Diplomatic Agent to Egypt, has returned to his duties from Munich, where his anxieties were considerably augmented by the dangerous illness of his son. Luckily the latter is now on a fair way to recovery, and is expected to follow his father within a few weeks.

Sir William Willcocks leaves this week in the P. and O. s.s. "India" for Egypt.

The marriage of Mr. Genadieff, formerly Bulgarian Minister of Foreign Affairs, took place in Sofia on September 1. Dr. Radoslavoff and his wife were the witnesses of the marriage. Mr. and Mme. Genadieff left for Constantinople on their wedding tour.

Great sympathy is felt for Lord Edward Cecil, whose official duties as Adviser to the Ministry of Finance necessitate his presence in Egypt, during this very anxious time, when the name of his young and only son has been posted as among the missing.

Judge Tuck and his wife, who hope to sail for Alexandria on October 3, have been spending the greater part of their summer at Oxford, to which University their younger son has been attached. Thoroughly in sympathy with English life and traditions, both Judge and Mrs. Tuck and their family have been very closely in touch with the anxieties of the last few weeks, and Miss Carola Tuck has thrown herself heart and soul into the work of the local relief committee, to which she has been acting as hon. secretary.

The engagement is announced of Mr. Louis Hall Rickards, of Alexandria, to Winifred Picard, youngest daughter of the late Mr. John Picard and of Mrs. Picard, 9, Vicarage Gate, Kensington. The marriage will take place quietly on Tuesday, October 6, at half-past two o'clock.

According to a Vienna report, General Radko Dimitrieff, the former Bulgarian Minister in Petrograd, who volunteered for the Russian Army and was given a command, has been seriously wounded at the battle of Tomaszow. This has happily not yet been confirmed from Russian sources.

It is reported from Nish that Lieut.-Colonel Plunkett, the British Military Attaché in Serbia, was slightly wounded in the left leg while watching the battle at Leshnitza.

Mrs. Llewellyn Phillips, of Cairo, whose nursing qualifications make her services of exceptional value, has joined the Red Cross Society and been nominated matron to the Duchess of Westminster's Hospital. Mrs. Phillips has already left to take up her duties with this hospital.

Mr. Owen Richards, one of the best known surgeons of Cairo, has also left for the front, accompanied by his wife, who for some little time previous to her marriage was head of the nursing staff of the Anglo-American Hospital.

The death is announced of Colonel Abel Straghan, C.B., late Highland Light Infantry, at Norwood, in his eightieth year. Colonel Straghan served during the Indian Mutiny and in the Egyptian Expedition of 1882, including the battle of Tel-el-Kebir. For his services he was mentioned in despatches and received the medal with clasp, the bronze star, the Third Class of the Order of the Mejidieh, and was made a Companion of the Bath.

Amongst the list of officers killed we regret to notice the names of Major the Hon. A. H. Maitland and Captain A. Horne, both of the Cameron Highlanders. Major Maitland, who was the third son of the thirteenth Earl of Lauderdale, served with the Nile Expedition, 1898, and was present at the battles of Atbara and Khartoum, receiving the Egyptian medal with two clasps and the Khedive's Star. He also took part in the South African War from 1900-1, and received the Queen's medal with five clasps. Captain Alexander Horne also saw service in the Nile Expedition, 1898, and served throughout the South African War of 1900-2.

Lieutenant-Colonel Sir E. R. Bradford, Bart., Seaforth Highlanders, whose name is in the official list of killed issued by the Press Bureau, had a very distinguished career. He was with the Seaforths as a captain when Earl Kitchener moved by way of the Atbara River to Khartoum, and in South Africa, where his staff services were so valuable that he won six clasps.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).

Major Hugh Moore Hutchinson, D.S.O., Connaught Rangers, who is amongst the wounded, saw active service in Sierra Leone and South Africa. In 1904-5 he was attached to the Egyptian Army and commanded a battalion in the Sudan, receiving the Third-Class of the Order of the Osmanieh and the Fourth Class of the Mejidieh.

We regret to announce the death of Major-General William Tweedie, C.S.I., which took place last Friday, at Dunbar Terrace, Dumfries. He was for many years H.M. Consul-General at Baghdad and Political Resident for the Government of India in Turkish Arabia. His military and administrative career, which was long and distinguished, began in 1857, when he entered the H.E.I. Company's Army. He served during the Indian Mutiny, from 1857 to 1859, being severely wounded at Benares; in the Abyssinian Expedition of 1868; and in the Afghan War of 1879-80. In 1881 he was made a C.S.I. In 1885 he was appointed Resident (June 5) and Consul-General (August 27) at Baghdad, and left Baghdad November 4, 1891.

Lieutenant-Colonel Harold Mavromichali Biddulph, of the Rifle Brigade, whose name is in the list of wounded, went to Egypt in 1898 and took part in the battle of Khartoum, receiving the medal with clasp. He also served in the South African War.

Major-General James Woodward Scott, C.B., late R.M.L.I., who died suddenly at Chudleigh, Devon, on Wednesday of last week, served in the Egyptian Expedition of 1882, and commanded the Royal Marines at the occupation of Port Said. He fought at Tel-el-Kebir, Kassassin, and other actions, being mentioned in dispatches, and receiving his brevet of lieutenant-colonel, bronze star and medal with clasp, and the Fourth Class of the Order of the Osmanieh.

Miss Nellie Hadden, the well-known animal-painter, who spends so many months every year in Helouan, is holding an exhibition of sketches, etc., at the Dudley Galleries, 169, Piccadilly, from October 1. With her is associated Miss Alice Fowler, whose drawings will be shown under the title of "In the Dear Homeland," while Miss Hadden's will be chiefly confined to subjects connected with the annual pilgrimage of the Bedouins to the Mosque of the Sheikh Abou Serea, in the desert lying between Helouan and the Red Sea. The two artists hope to give half the proceeds of their exhibition to the National War Fund.

The P. and O. s.s. "Medina," which left London last Saturday for Australia, took a large number of passengers for Port Said, amongst whom were the following:—Judge Amos, Dr. D. M. Beddoe, Lieut.-Colonel and Mrs. R. Bird, Dr. and Mrs. Cuffey, Mr. C. G. Crawley, Mr. and Mrs. F. G. Davidson, Mr. and Mrs. E. B. Ireland, and Mr. E. Moss.

APPOINTMENTS, PROMOTIONS, ETC.

It is announced that Mr. Madjaroff, the Bulgarian Minister at the Court of St. James's, has been appointed to succeed General Radko Dimitrieff as Bulgarian Minister in Petrograd.

Colonel the Hon. W. Lambton, C.M.G., M.V.O., D.S.O., military secretary to Sir John French, has been granted the temporary rank of brigadier-general.

Mr. Kymbritis, Hellenic Consul-General at Genoa, has been transferred to Trieste vice Mr. Mavroudis, who has received an appointment in the Foreign Office in Athens.

Mr. Dendramis, Hellenic Vice-Consul at Bourgas, has been appointed Secretary of Legation in Bucharest.

Mr. George W. Young, Deputy American Consul-General and Interpreter at Constantinople, has been appointed American Vice-Consul at Harput.

Mr. Nedkoff, who has recently been appointed Bulgarian Consul-General at Salonika, has now taken up his duties.

Mr. Frederick Ogden de Billier, of Washington, D.C., has been appointed Secretary of the American Legation in Athens.

Mr. S. Pinkney Tuck has been appointed American Vice and Deputy Consul at Alexandria.

DOMESTIC ANNOUNCEMENTS.

BIRTHS.

LEIGH-CANNEY.—On September 20, at 33, Buckland Crescent, Hampstead, N.W., the wife of Dr. H. E. Leigh-Canney, of a daughter.

MOLESWORTH.—On September 20, at The Hermitage, Stockton-on-Forest, York, the wife of the Rev. John Hilton Molesworth, British Chaplain in Cairo, of a daughter.

DEATH.

LIDDELL.—On September 18, at 2, Hungershall Park, Tunbridge Wells, Anna Gertrude, wife of Major J. S. Liddell, of Cairo.

VICE-ADMIRAL A. H. LIMPUS, C.B.

The Gazette announced on Tuesday that Rear-Admiral A. H. Limpus, C.B., till recently Naval Adviser to the Ottoman Government, has been promoted to be Vice-Admiral and absorbed in the Establishment.

Vice-Admiral A. H. Limpus, C.B., born in 1863, joined H.M. "Britannia" training ship in 1876, and served as cadet and midshipman in H.M.S. "Euryalus," "Alexandra," and "Bacchante." He was promoted to Lieutenant in 1885, and to Commander in 1898. Previously, in 1884-85, he served at Suakin and received the Egyptian medals and the Khedive's Bronze Star. As Commander he went through the South African War, was specially mentioned in dispatches, and promoted to Captain. In 1900 he commanded H.M.S. "Terrible" in China (China Medal, 1900), and ten years later he hoisted his flag in H.M.S. "Jupiter" as Rear-Admiral in the Home Fleet, Portsmouth Sub-Division, and later in H.M.S. "Prince George" and "New Zealand." In 1911 he was created C.B. and awarded the Coronation Medal at the review of the Fleet at Spithead. In 1912 he was appointed Naval Adviser to the Turkish Government, and was recalled by the British Government on the 14th inst.

Perhaps the most interesting, as certainly the most conspicuous, episode in Admiral Limpus's career was his stay in Constantinople as head of the British Naval Mission. Until quite recently his personal popularity among the Young Turks was great, and the relations between the Mission and Djelal Bey, Minister of Marine, such as to guarantee Governmental support for the naval reforms which it was proposed to carry out under Admiral Limpus's initiative and instructions. As soon as the present war broke out, however, a gradual and most disappointing change took place in the attitude of the Young Turks towards our Mission, until latterly, under the evil influence of Liman von Sanders, and as a result of the Goeben and Breslau incidents, the position of the members became unsupportable. The tardy recall of the Mission puts an end to a most unfortunate incident in Anglo-Turkish relations, and one that will be keenly felt by all the more enlightened Turks, who feel that their Empire is being rushed to its doom by a "more German than the German" clique at the Ottoman Ministry of War.

The departure of Admiral Limpus and the British naval officers under his orders will be keenly felt by the British colony at Constantinople, where they were all well known and exceedingly popular. But, at the same time, and in view of the unworthy behaviour of the Young Turks towards the mentors whom they had themselves asked the British Government to provide, there is not a member of our colony who will not have been glad to see the undignified situation brought to an end, and who will not have sympathised with our officers' eagerness to be somewhere in the fighting line instead of submitting to German intrigues at the Golden Horn.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

EGYPT AND THE WAR.

The art of waging war as it is understood to-day in Germany is not restricted to field operations. Just as non-combatants in the military zone receive the attention of bomb-throwing airmen in order that they may be impressed by German prowess, so it seems to be hoped in Berlin that the alienation of the sympathy of neutral States will add to the embarrassment of the Triple Entente and its Allies in this war. Hence the systematized efforts to prejudice public opinion all over the world in favour of Germany. In such a comprehensive scheme it was unlikely that Egypt would be overlooked. Its peculiar relationship to Great Britain, the traditional difficulties of the administration, and, above all, the Emperor William's weakness for posing as the champion of Moslem communities, opened up possibilities which German diplomacy could not afford to ignore. The ground might not be as favourable as Turkey, where Government sympathies could be relied upon to second German efforts in a Press campaign and the dissemination of German war news, but Egypt could be worked in conjunction with the Ottoman Empire, and Turkish emissaries might possibly be obtained to second the efforts of German agents. Within the limitations imposed upon them, the representatives of Germany and Austria-Hungary appear to have done their best in Egypt. Attempts to poison the minds of the Egyptians against the British were supplemented by fictitious or biassed war news, while any opportunities that the country afforded of adding to the knowledge of the German General Staff regarding British naval and military movements are supposed to have been taken advantage of to the utmost. Thanks to the anomalous position in Egypt the German and Austro-Hungarian representatives were able for a time to defy the Egyptian Government, and no doubt they imagined that they were on the way to reaping a satisfactory harvest. Their activities, however, were summarily terminated by the British military authorities, against whose action the Egyptian Government expressed itself unable to offer the two agencies any protection. With the removal of the two diplomatic and consular staffs, German machinations, it is hoped, have been deprived of official encouragement and a *pied à terre*. That the step was not taken too soon is proved by the fact that it has since been found necessary to place certain German residents under arrest, while others, together with some Austrians, are under close supervision. It is characteristic of spy work as practised by Germans in countries removed from the theatre of military operations, that it appears to offer no practical advantage to off-set the universal exasperation caused by the practice. But inasmuch as the German authorities set store upon their spies' activities, it becomes incumbent upon the Governments concerned to defeat their intentions.

In the case of Egypt it is by no means apparent that the success achieved by the German and Austro-Hungarian representatives was commensurate with their efforts. Stories of disaffection in the Egyptian Army received a good start before any contradiction overtook them, but the Emperor William's troops and German diplomacy are welcome to any encouragement they derived from these manifestly false reports. Against such stories may be set the rebuff which German emissaries are said to have met with in their attempt to persuade the Senussi to create a diversion in Germany's favour by raising the standard of war. The tenor of the message may well be imagined, for William II. would not miss the opportunity of professing in suitable phraseology his Imperial solicitude and disinterested endeavours for the welfare of Islam. If report may be believed, the Senussi were equal to the occasion. They are understood to have replied that they could not recognize that the German Emperor had any part or lot in Islam, and they saw no reason for taking up arms against the British. The decision of the Senussi corresponds with the general attitude of the Egyptians. In spite of the efforts of the German and Austro-Hungarian staffs, public opinion in Egypt is on the side of Great Britain. If under the stimulus of false news certain Germanophil tendencies developed, they have since given place to openly expressed sympathy with the cause of British arms. German professions, it has to be remembered, which appeared to receive strong support from the opening phases of the great struggle, have lost much of their virtue with the ill success of Germany's troops. The course of the war, indeed, has been singularly unpropitious to German intrigue abroad, for just at the time when even the moral support of other countries would have provided a useful stimulus at home, German agents are found to have overreached themselves, leaving their intended dupes wholly unconvinced. If any doubt existed regarding the attitude of Egypt, it would be dispelled by the columns of the native Press, to which reference is made in our Cairo Letter this week, above all by the significant open letter to the German Emperor written by Colonel Ali Sami Bey, a former aide-de-camp to Sultan Abdul Hamid, and a member of the Emperor's suite on the occasion of his Eastern tour.

The truth is that Egypt has left behind her for at least two years the time when German intrigues would have had a chance of achieving any conspicuous success. Nevertheless, as the universal financial stringency is being felt on the banks of the Nile, it is well that steps should be taken to explain the situation to the fellaheen. If messages have been conveyed to the Senussi it is probable that German activities will not have been confined to the town element. The tour undertaken by the Adviser to the Ministry of the Interior will enable many misconceptions to be removed and at the same time will afford proof of the Government's desire to alleviate any hardships from which the people may be suffering. Rumour is a many-headed monster which assumes the most fantastic shapes in times of war. The fact that reorganization is taking place in Government departments and that the programme for public works may be subjected to modifications is in itself sufficient to give rise to many reports; coupled with retrenchment in business and private circles it may present itself to the mind of the fellaheen as a very ominous portent. Egypt has now an opportunity of testing the stability of the progress it has made during Lord Kitchener's régime. At the same time, some indication will be given of the degree to which the Administration as a whole has been able to absorb and apply the spirit which he introduced into the machinery of Government. The country, however, as we have had occasion before to point out, cannot be said to have lost Lord Kitchener entirely as its British Agent. He remains for the present in Great Britain, and we may well imagine that his duties as Secretary of State for War leave him, even with his well-known capacity for work, little time for other matters. But Lord Kitchener is a member of the British Government which exercises supervision over Egyptian affairs, and we may feel confident that with the prospect of returning to his former post he contrives to keep an eye on what is taking place in Egypt. For the moment military matters there are an important consideration, and fall wholly within Lord Kitchener's province. Indeed, it is possible that with his present powers he may be able to round off the policy which he was engaged in carrying into effect as British Agent. The Egyptians are not the only people liable to be misled by a display of weakness where a strong line of action is intended, and possibly if we take more pains to show our strength in Egypt we shall save the natives from the temptations of uncertainty and ourselves from the effects of the encouragement we have hitherto given our enemies to interfere in a sphere which is our own.

CONSULAR POST OFFICES IN TURKEY.

Last week in discussing the incidence of the Capitulations in Turkey it was pointed out in THE NEAR EAST that in the case of the consular post offices, at least some concessions might be made to Turkish *amour propre* without at the same time damaging the interests of all concerned. Indeed, it has been part of the policy of THE NEAR EAST to advocate the suppression of the consular post offices ever since the Ottoman Postal Administration was so greatly improved under Oskan Effendi. It is undeniable that many consular post offices were first established and have since been maintained from reasons of international rivalry and a desire to gain prestige in the eyes of the native population. In certain parts of the Ottoman Empire before the recent wars this policy was carried to excess, particularly by the Italians, who sought to make of their postal privileges an engine of political propaganda, especially in Albania. Coupled with the political aspirations which originally prompted the opening of the offices in remote and unfrequented centres was a desire to make them, if possible, self-supporting. In many cases the amount of postal business transacted locally was wholly inadequate to justify the existence of the office on purely financial grounds, consequently recourse was had to the ever-open purse of the stamp collector. New issues of stamps were put on the market, and varieties deliberately, and, except from a philatelic point of view, needlessly multiplied. For example, the Italians found that stamps overprinted "Albania" were inadequate, and four separate sets were issued for Janina, Durazzo, Valona and Scutari, each comprising stamps from 5 centesimi up to 10 lira! In this way a certain revenue was coaxed from the pockets of the stamp collector, the whole of which was pure gain to the consular postal administration, and enabled it to maintain its prestige-hunting campaign without loss to its revenue. Both the Russians and, in a minor degree, the French, yielded to this insidious temptation. The Russians issued separately overprinted stamps for no less than twelve different post offices in Turkey, and in one case, the Mount Athos office, actually had two sets simultaneously in use—one overprinted in Latin, and the other in Cyrillic characters. France at one time had five separate issues for use in Turkey besides special stamps for Crete, Port Said and Alexandria. The Austrians and the Germans both have two issues in use, one with the value in Turkish currency and the other with the value in French money. The latter appears to be an extension of the issues otherwise peculiar to Crete to the Syrian ports and Jerusalem for the benefit of the Western pilgrim and tourist traffic. Of all the Powers maintaining consular post offices in Turkey, Great Britain is the only one to limit their number strictly to commercial needs.

The consular post offices, like the Capitulations under which they grew up, are of ancient standing. The Venetians and the Neapolitans had services of their own working from Constantinople, while the Austrians and the Russians began a postal service of regular couriers to and from Constantinople as early as 1721. Postal arrangements were made by France in 1812, Great Britain in 1832, Greece in 1834, Germany in 1870, Egypt in 1870, and Italy in 1873, and again in 1908. Roumania failed to establish a consular post office in 1896, although stamps overprinted in Turkish currency were actually prepared and were on sale on board a Roumanian ship moored alongside the quay at Galata from the middle of March until the end of May in that year. The Porte has on several occasions, notably in 1874, 1880, 1888, 1901, and 1908-9, made determined efforts to rid itself of the incubus of the consular post offices, and in 1881 succeeded in persuading the Egyptians and the Greeks to suspend their services, while the Italians followed suit in 1883. The other Powers have, however, hitherto steadily declined to forego their lucrative postal privileges, although the efficiency of the Ottoman Administration of Posts and Telegraphs is greatly superior to that of several countries which are not cursed by the competition of foreign post offices operating within their own territory. It is a curious commentary upon the political nature of most of these establishments that the Austrian Government in May, 1909, agreed to suppress five of its offices which existed in Ottoman towns, where no other foreign post office was in operation. Had the existence of consular offices been justified by the inefficiency of the Ottoman Postal Administration it would have been precisely in such towns that the presence of a foreign agency would have been most needed. In point of fact, however, these particular offices, having no foreign competition to meet were willingly closed by the Austrians as there was no question of a loss of prestige involved, as would have been the case in a town where another Power still kept its office open.

Austria.

The Austrian Post Office was transferred from the Embassy in Constantinople to a separate building in 1748, and the other offices were opened and closed or maintained as follows, up to July 31, 1914:—

	Opened.	Closed.	If now in Turkey or not.

From this it will be seen that Austria, on July 31 of this year, maintained 15 post offices in the Ottoman Empire and an equal number in the provinces lost to Turkey as a result of the Balkan War. Of the latter 10 will probably be suppressed, as Austria-Hungary has now recognised the annexation by Greece of her new provinces. It is, however, obvious from a perusal of this list how in the past Austrian post offices have supported Austrian policy in the dominions of the Porte. It is only fair to Austria, however, to acknowledge that her consular post offices have enjoyed a high reputation for efficiency and trustworthiness.

Russia.

The Russians opened a public post office in Constantinople as long ago as 1748, and in 1799 manifested their political interest in what were then known as "the Principalities" by establishing offices in Jassy and Bucharest. Later, in 1856, the Russian company of Navigation and Trade was made responsible for the Russian postal service throughout the Levant, and opened numerous agencies which are largely patronised by the Russian pilgrims on their way to and from Mount Athos and the Holy Places in Palestine. On July 31, 1914, Russian post offices were working at the following places (those marked with an asterisk being provided with special issues of stamps):—Constantinople*, Alexandretta, Beyrout*, Chios, Dardanelles*, Ineboli, Jaffa*, Jerusalem*, Kerassunde*, Latakia, Mount Athos*, Mytilene*, Ordou, Rizeh*, Salonika*, Samsun, Sinope, Smyrna*, Tireboli, Trebizonde* and Tripolis. Of these, Salonika is now in Greece, and will probably shortly be suppressed together with the Russian Capitulations in Crete and Macedonia.

France.

Originally started in 1812, the French Consular Post in Turkey was suspended between 1827 and 1835, after which it was considerably extended. At one time or another it has maintained the following offices (those with special issues of stamps being marked with an asterisk):—

Post Office.	Opened.	Closed.	If now in Turkey or not.
Constantinople	1812	—	—
Alexandretta	1856	—	—
Beyrut	1855	—	—
Dardanelles	1855	—	—
Gallipoli	1855	1872	—
Jaffa	1855	—	—
Latakia	1855	—	—
Mersina	1856	—	—
Mytilene	1855	1872	Greece
Rhodes	1855	1887	—
Smyrna	1855	—	—
Tripolis	1855	—	—
Braila	1857	1875	Roumania
Galatz	1857	1875	Roumania
Meboli	1857	1876	—
Kerassunde	1857	—	—

Galata	1879	—	—
Stamboul	1867	—	—
Vathy*	1893	—	Greece
Jerusalem	1900	—	—

In addition to these the French maintain Consular Post Offices in Crete*, Alexandria* and Port Said*.

Germany.

The Germans only began to turn their attention postally to the Levant in 1870, and did not overprint their stamps until 1884, when it became necessary to do so to prevent the difference in exchange from being exploited to the detriment of the postal service. At first they were content with two offices—Galata and Pera, but in 1898 one was opened at Jaffa in honour of the German Emperor's pilgrimage to Palestine, and in 1900 further offices were opened in Stamboul, Jerusalem, Beyrout, and Smyrna. Stamps overprinted with French currency were issued in 1908, in imitation of the Austrian issue for Crete, and are on sale in Jerusalem.

Italy.

The Italians, who had the longest tradition of all in favour of a postal service of their own in the Ottoman dominions as being the heirs of Venice and of Naples, did not open an office in Constantinople until 1873. The following is a list of the Italian offices, the asterisk showing those for which separate sets of stamps are issued:—

	Opened.	Closed.	Reopened.	If now in Turkey or not.
Constantinople*	1873	1883	1908	—
Beyrout	1873	1883	—	—
Smyrna*	1873	1883	1908	—
Canea*	1900	—	—	Greece
Tripoli-in-Barbary*	1901	—	—	Libya
Scutari*	1901	—	—	Albania
Durazzo*	1902	—	—	Albania
Janina*	1902	—	—	Albania
Jerusalem*	1908	—	—	—
Valona*	1908	—	—	Albania
Salonika*	1908	—	—	Greece
Pera	1908	—	—	—
Stamboul	1908	—	—	—

All the Italian offices were closed during the Turco-Italian War 1911-12, but, with the exception of that at Beyrout, which had been closed since 1883, and that in Tripoli-in-Barbary, which had been annexed by Italy, they were all re-opened on December 1, 1912.

Great Britain.

Great Britain instituted a consular postal service in 1832, but it was not until 1854 that it was used for public correspondence. In 1885 overprinted stamps were issued in consequence of difficulties with the exchange.

	Opened.	Closed.	Reopened.
Galata	1832	—	—
Scutari-in-Asia	1854	1857	—
Smyrna	1872	—	—
Beyrout	1883	—	—
Stamboul	1884	1895	1908
Salonika	1900	—	—

Of all the consular post offices conducted by the Powers in Turkey the British seems to be the most closely connected with business requirements, and less of a political advertisement than most of its rivals. As Great Britain has now recognised the annexation of Salonika by Greece it is probable that the post office in that city will now be closed.

Greece.

Among other countries which established consular post offices strictly for business purposes were Greece and Egypt. The former had a number of offices:—

Constantinople	1834	Jassy	1857
Smyrna	1834	Galatz	1860
Salonika	1835	Larissa	1860
Dardanelles	1835	Sulina	—
Arta	1852	Samos	—
Janina	1852	Canea	—
Prevesa	1853	Candia	—
Bucharest	1857	Mytilene	—
Braila	1857	Volo	—

All these offices were closed in April, 1881, and no less than ten of them are now to be found in Hellenic territory, only three remaining in Turkey.

Egypt.

The Egyptian Government, in spite of its political subordination to the Porte, maintained a number of post offices in Turkey. These were opened in 1866 in Constantinople and at Beyrout, Chios, Jaffa, Mersina, Mytilene, Salonika, Smyrna, Tripolis, and Volo. In 1870 others were established at the Dardanelles and Gallipoli, but all were closed by agreement in August, 1881.

THE WAR.

PRESS AND PUBLIC OPINION.

Serbian Valour—Mr. Lloyd George's Tribute.

Speaking at the great meeting held in the Queen's Hall last Saturday afternoon, Mr. Lloyd George paid an eloquent tribute to Serbia. It came after his denunciation of the attack on innocent Belgium. We quote part of it below:—

But Belgium was not the only little nation that has been attacked in this war, and I make no excuse for referring to the case of the other little nation—the case of Serbia. The history of Serbia is not unblotted. What history in the category of nations is unblotted? The first nation that is without sin, let her cast a stone at Serbia—a nation trained in a horrible school. But she won her freedom with her tenacious valour, and she has maintained it by the same courage. If any Serbians were mixed up in the assassination of the Grand Duke, they ought to be punished. Serbia admits that. The Serbian Government had nothing to do with it. Not even Austria claimed that. The Serbian Prime Minister is one of the most capable and honoured men in Europe. Serbia was willing to punish any one of her subjects who had been proved to have any complicity in that assassination. What more could you expect?

What were the Austrian demands? She sympathised with her fellow-countrymen in Bosnia. That was one of her crimes. She must do so no more. Her newspapers were saying nasty things about Austria. They must do so no longer. That is the Austrian spirit. You had it in Zabern. Serbian newspapers must not criticise Austria. Serbia said: "Very well, we will give orders to the newspapers that they must not criticise Austria in future, neither Austria, nor Hungary, nor anything that is theirs." She promised not to sympathise with Bosnia, promised to write no critical articles about Austria. She would have no public meeting at which anything unkind was said about Austria. That was not enough. She must dismiss from her Army officers whom Austria should subsequently name. But these officers had just emerged from a war where they were adding lustre to the Serbian arms—gallant, brave, efficient. I wonder whether it was their guilt or their efficiency that prompted Austria's action. Serbia was to undertake in advance to dismiss them from the Army—the names to be sent on subsequently. Can you name a country in the world that would have stood that?

It was a difficult situation for a small country. Here was a demand made upon her by a great military Power who could put five or six men in the field for every one she could; and that Power supported by the greatest military Power in the world. How did Serbia behave? It is not what happens to you in life that matters; it is the way in which you face it. And Serbia faced the situation with dignity. She said to Austria: "If any officers of mine have been guilty and are proved to be guilty I will dismiss them." Austria said: "That is not good enough for me." It was not guilt she was after, but capacity.

Then came Russia's turn. Russia has a special regard for Serbia. She has a special interest in Serbia. Russians have shed their blood for Serbian independence many a time. Serbia is a member of her family, and she cannot see Serbia maltreated. Austria knew that. Germany knew that, and Germany turned round to Russia and said: "I insist that you shall stand by with your arms folded whilst Austria is strangling your little brother to death." What answer did the Russian Slav give? He gave the only answer that becomes a man. He turned to Austria and said: "You lay hands on that little fellow and I will tear your ramshackle empire limb from limb." And he is doing it.

"Slav *v.* Teuton."

In the September number of *The United Empire* Mr. Ellis M. Cook writes on "Slav *v.* Teuton." He distinguishes between Teutonic and Germanic as follows:—

The Teutones were a Germanic tribe which at one time had devastated Gaul and were defeated by Marius in 102 B.C. In later times we find a tribe of this name dwelling between the Elbe and the Baltic—that is, in what is now Mecklenburg Schwerin, but the protagonists of Teutonism were the Knights of the Teutonic Order, a sort of organisation of robber chiefs who were powerful in the thirteenth and fourteenth centuries, and who conquered territory stretching from Pomerania to Memel, on the Baltic—the nucleus of the region which was later on to become Prussia. It is not fanciful, therefore, to say that while the word Germanic comprises a number of peoples, for instance the Dutch, and even the British (with a strong admixture of Celtic and Scandinavian), the word Teutonic is more correctly applied to the Prussianised Germany of modern times.

Referring to the Teutonising of Germany and the incompatibility of the Teutonic and Slav ideals, he writes:—

The really strange feature of the Teutonising of Germany is that the fundamental, permanent and priceless features of German life and character seem to have been so easily and so rapidly subordinated to the harsher Teutonic aims and ideals. Old Germany gave us Goethe, Schiller, Lessing, Hegel, Kant, Fichte, Wagner, Mozart—poets, musicians, philosophers. Modern Germany is not behindhand in practical science, but the outstanding names are Bismarck, Moltke, Treitschke, and the Emperor William. This has been accomplished chiefly through the characteristic Prussian method of thorough organisation. Education on a uniform basis, with military training as a part, has been spread all over the country, and the army of teachers, organised also on strict lines, has been the channel for the new doctrines. Europe and America have gasped with admiration before the symmetry and system of German organisation. Only those who place liberty of thought, a generous atmosphere and a love of abstract truth before mechanical perfection have wondered—and are still wondering—if Germany may not have to be freed from Teutonism before she can resume her place in the world as a leader of thought. However that may be, this military Teutonising element is essentially antipathetic to the Slav—dreamer and democrat. He can fight for an ideal; he will die for a dream. He will not submit to being thrust wholesale into a sausage machine, to come out the other end neatly measured, labelled, and looking like every other sausage. The Slav and the Teuton are hereditary foes, on racial grounds, but that racial animosity is founded on a real difference of ideals, on a mutual incompatibility. German and Slav might settle down side by side—they have mingled much and have much in common, but the Teuton comes with his brutal drill-sergeant methods and the inmost soul of the Slav revolts.

Chivalrous Maoris.

The British Australasian (September 17), in a note under the heading of "Maoris for Egypt," says:—

Whatever may be said of the employment of coloured troops against Europeans, the Maoris, if they are in active service, will be found to be chivalrous as well as formidable foes. Is there any white army whose traditions include the supplying of food to a besieged enemy, as the Maoris did to the English forces in the New Zealand wars, in order that the latter might be in better trim for fighting? The Maori warriors' idea of conquering an enemy was to conquer by hard fighting; to overcome him by starvation was regarded with scorn.

Indian Border Tribes' Loyalty.

The following is extracted from the Editorial Notes of *The Mail* (August 23), published in Bombay:—

. . . . The loyalty of the semi-savage borderers has often been a subject of doubt and sometimes has been upset by unruly tribes, yet if truth is to be told they are as firm and loyal as the inhabitants of any other province. . . . The writer has many friends among the Border Chieftains, particularly the Nawabs of Landi and Usman Zai, and found them all, without exception, loyal and devoted to the Government. Of course, they do not hold the polished views of Colonel Sir Aslam Khan, but in their own way they are second to none in their loyalty to Government. We only hope that the Government would be pleased to accept their offer and let the world see that the Mohammedans are bound in life and in death with the "greatest Mohammedan Government in the world."

Indian Moslems and Turkey.

The following are extracts from *The Hablul Matin* (August 26):—

. . . . Should it please the Sultan to declare war against Britain or by his support of Germany force Britain to draw the sword against him, the eighty millions of Indian Moslems will assist England to the best of their power. That would be their plain duty. . . .

Such is the crisis with which we are brought to face at the present moment. The anxiety which is felt in London regarding the attitude of Turkey is shared by the Moslems of India. They should make clear their position. Public meeting should be held to make an open declaration of the duties of the Indian Moslems, in case such an emergency should arise. The Indian Moslems ought to assure Government of their unflinching loyalty. And at the same time, the Turkish Government should be informed that an unfriendly attitude on their part towards England would cause pain to the Islamic community in India. The Indian Moslems feel a real interest in their brethren in faith in Turkey. They honour the Sultan as the Calipha. But their paramount duty is to their Gracious King-Emperor, George V., under whose benign protection they live.

NEAR EAST IN PARLIAMENT.

HOUSE OF COMMONS.

Egyptian Prize Courts. September 18.

The Deputy-Speaker announced that the Royal Assent had been given to the Bill for establishing Prize Courts in Egypt, Cyprus, and Zanzibar.

Egyptian Civil Servants.

The Royal Assent was also announced to the new Superannuation Act, which—as explained in THE NEAR EAST last week—provides for the superannuation of Civil servants lent to Egypt and such places by the Home Government.

The House was subsequently prorogued.

"Kitchener of Khartoum" will be published next Monday by Nisbets in association with *The Daily Express*. It is a new biography by the author of "King Edward the Seventh."

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

I referred recently to the Ottoman Government's intention of issuing a series of £T1 notes. These have now been printed—that is to say, all save the Turkish script—and have been forwarded to Constantinople. I saw one of them yesterday, and must compliment the engravers and printers, Messrs. Waterlow and Sons, of London, on the excellence of the work they have turned out. The obverse of the notes shows a background of brown with subdued green and red markings, in the form of rays, emanating as it were from the Sultan's *toughra* which crowns the design; the reverse is of a simpler composition. The whole has a very pleasing effect, and the notes will easily stand comparison with the current Turkish £T5 notes, which are well known for their artistic execution.

***

The Egyptian Government's decision to reduce next year the acreage under cotton, and to induce the fellaheen to plant cereals in its stead, will be welcomed by all who understand the real nature of the present war. Whether, once peace has been restored, the natives will return to their national "one-crop" remains to be seen; cereals admittedly will never be so lucrative as cotton, but perhaps after all the Government will facilitate the cultivation of other crops, such as tobacco. Incidentally, it may be pointed out that rotation of crops improves the latter; so much so that the enforced restriction of the cotton acreage will not affect, for later cotton crops, the land to be sown in the meantime with other crops.

***

In the meantime, authorities on cotton questions are writing letters, more or less interesting, to the daily Press. Foremost among these is a strong plea by Sir Charles W. Macara, in *The Times*, for the creation of a cotton reserve. Sir Charles has been advocating this step for years, and had it been carried out sooner, it would have been instrumental to a certain extent in guarding against a further dislocation of the cotton trade next year. Another interesting article is one which appeared recently in *The Egyptian Gazette*, from the pen of Mansur Shakour Pasha, whose view is that comparatively little assistance from the Egyptian Government would relieve the situation. The question is a moot one. It is based on the assumption that the manufacturing communities of the world will not feel the effects of the war—an assumption to which I can hardly agree. But, nevertheless, people interested in the cotton question should read the article.

***

The following cable from the U.S. Chargé d'Affaires at Berlin, reproduced in the "Daily Trade and Consular Reports" (Washington) needs no further comments. It is addressed to "American cotton producers," but doubtless spinners will not be slow to take advantage of Germany's crippled industry. The cable states:—

"German textile production reduced 60 per cent. Immediate further reduction probable. Local orders during last few weeks at standstill. A few foreign orders filled. Import of Russian raw material stopped. Only large sales made for military purposes. Much labour withdrawn from mills. No transport facilities now available. Warehouses at ports overloaded with goods. Impossible to export."

***

Is oil going to play an important rôle in the European war? Considering that Germany's imports at the present moment are nil, whereas her annual consumption is not far short of 2,000,000 tons, of which about 1,500,000 tons are imported, it is likely that she will feel the pinch of shortage before long, and, as a belligerent specialising in all branches of the motor industry as applied to militarism, will labour under a decided disadvantage. The Allies need have no such fears as concerns their supplies—that is, as long as we command the seas. Austria, on the other hand, is hardly better off than Germany now that the Galician fields, together with huge stores, have fallen into the hands of Russia, already a big producer. In the circumstances, and in view of the almost universal use of oil and its derivatives in a modern military State, I should be inclined to hesitate before denying the influence of the oil supply question on the outcome of the war.

***

Roumania's position as regards oil supplies is an interesting one, as so many of her fields are controlled by foreign capital. Our capital invested in them is small, but not so that of Germany, which controls the Steaua, one of the three large producers which together produce about two-thirds of Roumania's total output. According to the *Moniteur*, work on the Steaua's fields is proceeding normally in spite of mobilization, etc., but this is, I am inclined to believe, an innocent exaggeration. There is no doubt that Roumania's output has been considerably curtailed, as is shown by the Government's decision to prohibit the exports of residues, and it stands to reason that it should be so. Transport facilities in the country were never too good, and must be much worse now that the Army has been partially mobilized. Exports are well-nigh impossible, either through the Bosphorus or up the Danube, and as for storage tanks, they are only able to hold a minimum output. Of course, it is possible that Germany has during the past few weeks been secretly importing oil from Roumania by rail across Austria in great quantities, which would account for the Steaua's "normal" working. But if Russia's advance in the direction of Serbia continues much longer the rail journey will be as precarious as the Danube waterway, and Germany's supplies will automatically cease. Similarly, it is quite on the cards that the Roumanian people will realise before it is too late that their only enemies are the Teutons—more particularly the Austrians—and that their only policy is to join hands with the Entente Powers and free themselves from the economic thraldom to which they have been subjected by Berlin and Vienna.

***

The "economic thraldom" above mentioned does not apply to Roumania alone, but to all Near Eastern States, including Turkey, in a minor degree. May it perish! Bulgaria, by having her loan scheme thwarted in the eleventh hour, is freer than any of the other States—a circumstance for which she may be thankful. Serbia will soon be able to snap her fingers at Austria, and will be in a position to regain her economic freedom. Turkey, on the other hand, will doubtless emancipate herself—as soon as the Hohenzollern Power has been smashed—from a tutelage which was none of her seeking, but which was imposed upon her in a dark hour. As for Roumania, she may be relied upon to play her own trump card at the right moment, to the discomfort of the numerous Bleichroeders and Bankvereins, who will withdraw into their shells and leave Roumania free to work out her own salvation.

***

The economic hold which the Teutons acquired over Near Eastern countries is the real secret of their commercial successes to the south and east of Semlin. "Trade follows the bank," as I have frequently asserted, and nowhere has the truth of this usage been more noticeable than in the Near East, where Teuton banks have made a point of interesting themselves in trade, industries, tenders, engineering constructions, etc., rather than in what, for lack of a more comprehensive title, we can call *la haute finance*. True, they dabbled now and again in speculative undertakings, but as a rule they were decidedly *ventre à terre*, unimaginative, inclined to usury on long-term operations, and shunning everything that involved risk. Nevertheless, their dividends were good, the Fatherland's trade was furthered by their methods and, thanks to their system and to the official support they received from home, they were gradually able to weave a solid net around the country where they were established. That is the *ante bellum* state of affairs; what will it be like when the war is over? There is no saying. This much is true, however, that if we wish to compete successfully with German trade in the Near East, it does not suffice to organise a campaign here at home as is being done in a most laudable way by the Board of Trade at the present moment. We must have—and I cannot insist on this too frequently—an organised British banking system in the Near East which will devote itself primarily and principally to backing up British commercial and industrial interests in a way suited to local requirements.

COMMENTATOR.

WAR ON GERMAN TRADE.

War on German Trade.

BOARD OF TRADE EXHIBITION.

TOYS AND GAMES.

The first of the useful series of sample exhibitions organised by the Board of Trade was inaugurated yesterday at 32, Cheapside, E.C., and will close this evening. It was devoted exclusively to toys, and the samples were of German and Austrian make, ticketed according to wholesale prices.

In some respects the exhibition was a revelation to the man-in-the-street (we need not insist on the origin of toys sold by hawkers in the streets and other toys which we have been in the habit of buying for our children under the impression that they were British-made), but its great usefulness will be more apparent to the British manufacturer. Not only will he be able to pass in review the class of goods (and prices) manufactured by Germany, but he will be able to get in touch with the firms who, previous to the war, were big importers of German toys, and who now will be obliged to look to other sources for their stock-in-trade.

Regarding more particularly the Near Eastern market, the cheap (bad, but attractive) samples on view were of the greatest interest to our representative. These (small dolls in gaudy attire, painted tin mechanisms, celluloid articles, and dolls' kitchens, etc.) are the articles that are wanted in the Near East, and a good trade can be done in them if we are able to place on the market an article competing in price and gaudiness with the vile German stuff exhibited.

The second exhibition, to be opened in a few days, will be devoted to earthenware and china.

The Board of Trade bulletin in toys and games recently published gives the following particulars with reference to the Near Eastern market. The following countries imported from Germany (1912) and Austria (1913) toys to the amount of :—

	From Germany. £	From Austria. £
Greece	1,800	400
Bulgaria	2,800	100
Serbia	1,600	300
Roumania	18,400	1,600
Turkey	23,000	2,200
Egypt	13,300	3,200

or approximately £70,000 worth of toys per year, the greater portion of which can be supplied by Great Britain.

Egypt.

The following table shows the value of the imports of toys and games from the undermentioned countries during 1912 and 1913 :—

	1912. £E	1913. £E
United Kingdom	9,207	10,744
Germany	16,327	15,598
France	13,107	12,338
Austria-Hungary	2,744	3,601
Total from all Countries	44,114	44,099

It will be seen that during the two years under review the combined contributions of Germany and Austria-Hungary amounted to nearly double that of the United Kingdom. While the total exports remained stationary, Austria-Hungary's share of the exports showed an increase of 30 per cent. in 1913, as compared with 1912.

A report by the Austrian Consul at Cairo for 1912 states that the cheapest kinds of toys find a ready sale in his district. Attempts which have been made during the last few years by some of the larger retail stores in Cairo to push the sale of better class goods have met with some success. As Nuremberg goods are the most popular in the Egyptian market, other kinds of toys for which it is desired to find a sale should resemble them as much as possible; cheapness is, however, the deciding factor.

According to a French Consular Report on Egypt for 1912, there should be a good sale for cheap mechanical toys and for games, such as chess, draughts, dominoes, etc. In a country like Egypt, where there are numerous races and religions, each celebrates with much enthusiasm its respective feasts, such as New Year's Day, and it is not unusual for large stores to keep open their toys and games department all the year round.

Turkey.

A German Consular Report on the trade of Trebizond states that in that district Germany and Austria-Hungary supply 80 per cent. and 20 per cent. respectively of the imports of toys from abroad.

A French Consular Report on the trade of the vilayet of Trebizond states that 32,910 kilog. of toys, valued at 30,194 frs., were imported into that district in 1910, being a slight increase on the figure for the preceding year. The greater part of these were of German origin (Sonneberg and Nuremberg).

CO-OPERATION AMONG FIRMS.

A correspondent writes suggesting that in order to make the campaign against German trade a success it will be necessary for firms to send out representatives to the various markets where it is intended to carry on the war. He suggests that four or five firms should, together, send out one man who would act in their interests. By sharing expenses a remunerative business would result. The correspondent, who knows Persia well, offers his services for that country. Firms interested in the proposal can obtain further particulars from the Editor of THE NEAR EAST, Devonshire Square, E.C.

THE WAR AND NATIONAL INDUSTRIES.

Enquiries addressed by the Board of Trade to nearly all the principal manufacturers show that employers covering 75 per cent. of the workpeople included in the returns received have not been specially affected by the war; these employers report since the middle of July a total reduction of staff of only 1.3 per cent. Employers of the remaining 25 per cent. covered by the returns report that they have been affected by the war, and have reduced their staffs since the middle of July by 27 per cent.

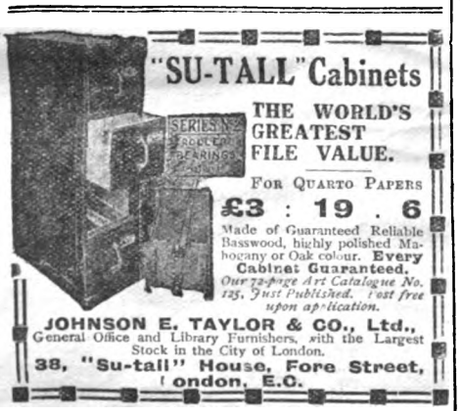
The two industries most affected are the cotton industry and the construction of vehicles, each of which as compared with July 17, show a contraction of about 19 per cent. in the numbers employed. In the cotton industry another 40 per cent. are working short time.

Other industries showing more than an average reduction of staff are furniture, engineering and tin plates. In the latter, however, though the percentage reduction is still above the average, there has been a very marked improvement of employment since the middle of August.

While coal mines working for export have been affected, the great majority of the coal mines report themselves as unaffected by the war, and at the same time report that they are working reduced hours, which is, of course, the common summer practice. So, too, the short time in the cotton trade can only in part be attributed to the war.

BOARD OF TRADE BULLETINS.

The following bulletins were published during the past week:—Iron or steel bars, rods, angles, shapes, or sections; jewellery and trinkets; artificial flowers; baskets and basket wares; rubber tyres for motor-cars and motor-cycles; umbrellas and sunshades; boot polishes. Applications for copies of any of the above or of those published in our previous lists should be addressed to the Director, Commercial Intelligence Branch, Board of Trade, 73, Basinghall Street, London, E.C.



AN OPPORTUNITY FOR BRITISH MANUFACTURERS.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, September 7.

Now that Germany and Austria are at war, and the British Government is endeavouring to acquire for home manufacturers as much as possible of the trade done by those two countries, their attention might well be drawn to the drug imports into Egypt. Hitherto Germany has enjoyed almost the lion's share in this line, and there is no reason why British manufacturers should not step into the shoes of their Teutonic competitors. At present, owing to the war, there is a distinct shortage in supplies, and there is a fear that Italy may seize this opportunity for extending her trade in this branch as, thanks to her neutrality, she is doing in other lines. The obstacle in the way of the British manufacturers appears to be the prohibition that has been placed by the Home Government on the exportation of drugs of every description.

TRADE ANNOUNCEMENTS.

Greece.

The Board of Trade are in receipt of information to the effect that a law was published in the Greek Official Gazette of July 30/August 12, which prohibits the importation into and manufacture and sale in Greece of stilettos, daggers, knives wholly or partly double-edged, closed knives of which the blades are supported by a spring or any other contrivance, and weapons of the nature of swords of any size contained in sticks or clubs. Holders of stocks of such weapons are allowed a period of two months within which to export them. The law also prohibits the manufacture for commercial purposes, and importation and sale of firearms of all kinds, and of all kinds of swords, bayonets, lances, and pointed knives, without Government permission.

Cyprus.

The Board of Trade are in receipt of a copy of a Proclamation dated August 17, which amends a Proclamation of August 6, whereby the exportation of goats, barley and oats from Cyprus is now permitted. The original Proclamation of August 6 (as above amended) provides for the prohibition of the exportation of the following :—Wheat, rye, vetches and other grain, lucerne, chopped or long straw and grasses, cattle, sheep, pigs, turkeys, geese, ducks, pigeons, and poultry and other animals or birds used for food, and, without express permission, horses, mules and asses.

COMMERCE AND CABLING.

It is announced that, with the view of reducing the cost of cable telegrams during the present censorship, the Postmaster-General has arranged with the Eastern and Associated Telegraph Companies that, as a temporary measure, the text of full-rate extra-European plain-language messages (including signatures), written in English and exchanged between Great Britain, the Oversea Dominions, and Colonies served by their system, and Egypt, will be counted and charged as if written in groups of ten letters to a word.

Figures and commercial expressions, such as "c.i.f.," "f.o.b.," etc., will continue to be counted separately as at present. Any surplus group of letters immediately before a group of figures or commercial expression or at the end of the text will be counted as one word.

Telegrams will continue to be written and signalled as at present, but senders will assist the telegraph service and avoid delay to their telegrams by marking every tenth letter in their outward telegrams before handing them in for transmission.

The following is an example of a telegram as handed in with every tenth letter marked by sender :—

PARKER, BOMBAY. 17/23 words.*

Capetown te/legraphs ad/vise Smith d/raw Newyork/ advance Mau/retania rem/itting/ 3500/ for you and S/mith next mo/nth offer/ 4000/ FOB/ Bombay. Atki/nson.

*Chargeable number of words 17
Actual number of words 23

It is proposed to extend this arrangement to other Colonies and extra-European countries.

The Finances of Turkey.

Alarming Outlook.

Probable Budgetary Deficit of £T16,000,000.

(BY OUR FINANCIAL CORRESPONDENT.)

CONSTANTINOPLE, September 4

Turkey, while declaring her neutrality, has mobilized every available man under the age of 45, and, although the mobilization seems to be slacking off and the older men are being sent back, Turkey is paying a heavy price for thus playing with fire.

Trade Stagnant.

Everything that may or may not be useful to a field force—horses, carriages, carts, harness, foodstuffs, wool, leather, indeed, every available commodity—is being requisitioned, to be paid for nobody knows when. Even the cargoes of foreign ships in transit or in port, and, in some cases, the property of foreign shopkeepers, are not spared. No trade exists, imports and exports having ceased, and the post and telegraph services with Europe have been almost entirely interrupted. Trade in Constantinople itself is almost stagnant, and there have been meetings of commission agents and shop owners who are without the means of paying the salaries of their employees and have not the heart to dismiss them.

In an ordinary year the revenue of the Turkish Empire amounts to, roughly, 32 million pounds. The war in Europe, the mobilization in Turkey, the monetary crisis, the impossibility of lifting the crops owing to the want of men, transport and credit, and, lastly, the prohibition of the export of cereals, which, in many cases, have been seized by the military authorities, have all had such an unfavourable effect that it may be estimated that, adding the deficit of two millions already allowed in this year's budget, the total deficit at the end of the year will be £T10,000,000.

Military Exemption Tax.

The mobilization can, on the other hand, be credited with having produced an additional revenue in the form of the military exemption tax extracted from those unwilling to serve in the army. It is stated that by this means the Government have been able to raise one and a-half million pounds, and, while this figure cannot be vouched for, it is apparent that the Government have been able to profit considerably from this source. The authorities have, time after time, prolonged the delay in which those wishing to buy themselves off are allowed to do so. The expedients by which the sum is raised are many and wonderful. The money may be borrowed from local money-lenders at the interest of 20 per cent. for six months, or, if one is lucky enough to have money in the savings banks (which it is now impossible to touch), the Government will take a voucher from the bank for the necessary amount. A batch of Government officials sent in a petition asking that the money should be deducted from the salaries never paid to them, but this proposition was summarily rejected. One cannot help thinking that if one and a-half million pounds have been collected from those unwilling to serve there must be a great number of people in that frame of mind, and one must also reflect that those who, by hook or by crook, were able to pay the money must find themselves in very hard circumstances after having paid it, and that they will not be a source of very great economical strength to the country.

The supplementary War Credit is three and a-half millions, and the price for the "Goeben" and "Breslau" (worth when new £2,600,000) is to be £4,000,000, should the sale ever be concluded. Adding these sums to the above ten millions, and deducting the one and a-half millions produced by the military exemption tax, we get a total deficit of, say, £T16,000,000.

Rush on Banks.

At the first suspicion of war there was a rush on the foreign savings banks, who closed their doors when they had paid out most of the small gold reserve which they keep at Constantinople to meet their liabilities. These banks now open for about two hours a day, and their depositors are able, after a terrific struggle in a crowd, to withdraw a tiny percentage of the money due to them. Any money thus withdrawn is undoubtedly being hoarded, and this has had the natural effect of creating a shortage of cash in circulation.

In order to lessen the tension a forced paper currency is decreed, and the Ottoman Bank is withdrawing £T100 and £T50 notes, and is issuing an equal value of pound and half-a-pound notes. This measure will not much alleviate the monetary crisis. In addition to this, the Mint is turning out a large number of nickel coins, and this money may now be obtained in great abundance, whereas a month ago it stood at a premium. The banks are all in need of gold, and depositors only receive a very small percentage of their deposits.

It must be remembered that in the autumn of this year the second half of the 1914 loan was to have arrived. The Ottoman Bank group was to supply, roughly, £T12,000,000. This assistance, of which the Government are in sore need, cannot now be expected, and borrowing on the money markets of Europe is not to be contemplated for years to come.

Military Adventures.

From the above considerations it seems apparent that unless all ideas of war and mobilization are abandoned without loss of time the Ottoman Empire may find itself at no distant date in serious financial straits. At a moment when the Turks should be strengthening their internal situation in order to be able to resist foreign "spheres of economical influence" they are draining the strength of the country in pursuit of military adventures, heedless of the fresh debt mounting quickly day by day.

It is to be hoped that the prudent and better informed members of the Cabinet and Turkish statesmen will succeed in maintaining Turkish neutrality, and will induce the military party to "put some water in their wine." The sad thing is that had Turkey remained quiet in the general clash of arms and applied itself to making the most of its unusually magnificent harvest, and to carry out its reforms which were seriously projected and commenced, the nation would have emerged from the crisis with renewed strength.

GREEK INSURANCE.

Our Athens correspondent writes that permission has been granted by Royal Decree to the National Bank of Greece to insure all merchandise exported from Greece against war risks at the rate of 5 per cent.; the policies to be guaranteed by the State.

Near East Markets.

EGYPTIAN CIGARETTES.

(From Our Own Correspondent.)

Alexandria, August 21.

Egyptian cigarettes are famous throughout the world, and yet the leaf used in their manufacture is not grown in Egypt, where, indeed, the cultivation of tobacco is prohibited. The "Egyptian" cigarette is made from a mixture of tobacco coming from Macedonia, Asia Minor, Bulgaria, Greece, Russia and Bosnia and Herzegovina; and the art of selecting and blending the various leaves from all these regions so as to obtain the perfect production that the Egyptian cigarette is universally admitted to be is peculiar to the Nile Valley. Hence there has grown up here an important industry in the manufacture of cigarettes for export.

Unfortunately, the outbreak of the European war has completely paralyzed this export business, and its prospects at the conclusion of the war do not look at all promising. Germany has decided to establish a monopoly in the manufacture of cigarettes, and factories for the making of "Egyptian" cigarettes have been established all over America, and in Norway, Belgium, Switzerland, Italy, and other countries.

In face of such competition, and of the heavy taxation imposed by the Government, it looks as if the Egyptian cigarette industry is destined to extinction. Could not the Government afford some protection to the industry instead of crushing it under revenue charges? It would also be advisable to introduce the cultivation of tobacco into Egypt, which at present relies upon a single product—cotton.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for week ending September 4, 1914:—

Our opium market is at a standstill, nevertheless some efforts have been made by buyers to try and secure goods, by means of payment after the moratorium, or by cheque on London, but all efforts have proved fruitless. With cash in hand one can buy the article at 200 ps. to 230 ps. per oke as to quality, but with payment under any other condition we doubt whether 300 ps. will tempt sellers to part with the little existing stock out of the bank's hands. The probable position is therefore as follows:—14s. to 16s. for 10 per cent. to 11½ per cent. goods cash payment, or 19s. to 21s. for payment by cheque in London, or after the banks open and the exchange on London advances again to normal conditions. The arrivals from the interior are 1,162 cases, against 2,760 at same date last year.

HERACLEA COAL.

The British Consul at Constantinople (says *Syren and Shipping*) reports that the Société Ottomane d'Héraclée sold in 1913 425,903 tons of coal, screened and washed, the average price f.o.b. at Zoungouldak being £1, an advance of 4s. on the 1912 price; 166,570 tons were supplied as bunker coal at Zoungouldak and Constantinople, and the rest was distributed amongst various customers as follows: — Constantinople, 160,585 tons; Smyrna, 56,720 tons; Beyrout, 4,463 tons; Salonika, 2,311 tons; Panderma, 2,186 tons; Karabournou (Derkos), 4,841 tons; Daridja, 13,384 tons; Roumania, 14,843 tons. The other mines on the Heraclea coalfield produced about 400,000 tons—viz., at Zoungouldak, 43,000 tons; Cozlou, 177,000 tons; Kilimli, 98,000 tons; Aladja Aghzi, 7,000 tons; Candilli and Tchamli, 68,000 tons; Amasra, 6,000 tons; Tchatal Aghzi, 1,000 tons. The average price of this coal was about 15s. 6d. f.o.b., an advance of 3s. 6d. on the 1912 price. The steady rise in price should be noted. In 1911 the company's coal fetched 12s. 6d., and the other 6s. to 7s.

The Syrian apricot crop is roughly estimated at about one-half that of last year, but no reliable estimate is to hand, says a French Consular report. Last year's exports (from Beyrout) amounted to 800-1,000 tons of apricot fruit and 350-450 tons of dried apricots and apricot jam.

PRODUCE REPORT.

London, September 24.

Sugar.

The market generally has been steady this week, although supplies were limited. The report that the Italian Government authorised the exportation of 100,000 tons of sugar per month to England, and that a hundred thousand quintals has already been shipped at Genoa, had not any noticeable effect on prices. English refined is in steady demand at late rates. Foreign granulated continues quiet but steady, and first marks, on the spot, have changed hands at 32s. 6d. Cane sugar has a fairly good demand at steady rates. Crystalised Trinidad was sold at from 28s. to 29s., and Demerara syrups at 16s. 3d. to 18s.

Coffee.

The spot market is inactive, although the withdrawal of the embargo on exports to Holland was expected to create more animation. Prices, however, are steady, common grades being fully up to the level of values ruling at the close of the public sales. In the terminal market there has been some settling of existing contracts on the lines of the plan issued last Monday by the London Produce Clearing House and on the basis of those prices.

Dried Fruit.

Sultanas are again lower; rain-damaged fruit sold at 23s. to 24s., and ordinary to fine sound at 26s. to 40s.

Valencias, new crop, arrived on Monday, and a good business was done in quarter-boxes at 36s. to 48s., common to fine.

Seeds.

Linseed has been quiet during the week and in buyers' favour, but to-day met with rather more attention. London, spot, Bombay, offered 47s.; Calcutta, spot, afloat, Sept.-Oct. and Oct.-Nov., 46s. 6d. asked. Rapeseed, Ferozepore spot, 50s. 5d., and bold Ferozepore ditto 52s. Cottonseed is dull; London, spot, Egyptian, nominally £7 15s.; loading (new crop), £8, sellers; Hull, spot, Egyptian, £8; Bombay, spot, £5 19s. 6d., sellers. Canary seed: Turkish, spot, scarce and firm at 125s. per 464 lbs., ex store Liverpool.

Oils.

Linseed oil quiet; spot pipes 26s., and spot barrels and month 26s. 6d. Rape oil quiet and unchanged; refined spot in barrels 36s. Cotton oil is weaker. Crude Egyptian spot pipes, 30s.; refined pale pipes 28s. 6d., and sweet barrels 35s. 6d. Olive oil is scarce, and held for £55 10s. for Levant and £55 for Spanish per ton, ex store.

Oilcakes, etc.

Linseed cakes, exceedingly quiet, and, with the exception of a small retail consumptive demand, there is little or no business passing. Best London made, however, maintain their price of £8 15s. to £9. Cotton cakes.—Only a limited quantity of Egyptian remains in store, for which holders ask £5 7s. 6d. to £5 8s. 9d., while steamer parcel, just arrived, offers at £5 5s., ex ship, with English makes again the turn easier at £5 7s. 6d. to £5 10s., and Bombay £4 15s. Decorticated cotton cakes.—No offer on spot, but there are sellers of new crop's prime meal for Oct.-Dec. monthly shipments at £7 10s. per ton.

Corn.

Wheat.—The market is very dull, and prices are tending in a downward direction. Choice white Karachi afloat, loading and Sept.-Oct., is held for 47s. Maize.—For combined Danube-Bulgarian, loading, 31s. is required, and a composite cargo of Danube-Bulgarian maize and Danube barley, loading, offer at 31s. and 26s. respectively. Barley is quiet and unchanged, with a part cargo of Black Sea, afloat, offering at 25s. 9d. Novo Russisk, arrived ex store, is quoted 26s., and a parcel of Novo Russisk arrived, ex store, sold at 25s. 6d. and 25s. 3d. Oats are quiet, with values nominal.

The districts of Karlovo and Kazanbik exported during the month of July 226 kilos of attar of roses, valued at 434,265 frs.

SHIPPING NEWS.

MINING THE DARDANELLES.

On September 18, in the House, Sir J. D. Rees asked the Under-Secretary for Foreign Affairs whether the Ottoman Government had given any explanation of the alleged setting adrift of mines from the Dardanelles. Mr. Acland, in reply, said the Ottoman Government informed his Majesty's Ambassador in August that the reason for the detention of certain ships in the Dardanelles was that some mines had been detached from their moorings, and the vessels had been prevented from continuing their voyage until the mines had been picked up.

GREECE AND BRITISH SHIPPING.

It is understood that the Greek shipping companies are now inquiring in the United Kingdom with a view to the purchase of secondhand tonnage on a fairly large scale. As a matter of fact, it is considered not at all improbable that they will come into the market as likely buyers of many of the German and Austrian ships now lying at British, French, Russian, and Belgian ports.

ACCIDENT IN THE BLACK SEA.

A Lloyd's telegram from Trebizond states that the British steamer "Belgian King," after leaving Trebizond on Monday for Constantinople, sank near Cape Kureli. There were 120 passengers and crew, of whom 98 were saved by the Russian steamer "Princess Eugenie." The vessel was also carrying 3,000 sheep and 400 oxen.

The "Belgian King" is ex the "Connemara," ex the "Château Leoville," and was built at Sunderland in 1881. She is owned by G. B. Hunter, and is valued at £15,000.

A GREEK DENIAL.

Mr. W. E. Fordham, writing for Messrs. A. A. Embiricos and Co., of 14, St. Mary Axe, E.C., sends the following letter respecting the coaling of the German cruiser "Emden":—

"A rumour having come to our knowledge that it has been circulated that we are interested or concerned in the coaling of the German Fleet in Indian waters, we will thank you to note, and to give publicity to the statement, that there is not the slightest vestige of truth in any such suggestion or rumour, and further, that we are not, directly or indirectly, interested or concerned in any arrangement whatever for the supplying of coal or anything else to the German Fleet, in Indian waters or in any other part of the world.

"The rumour has caused us the greatest pain and indignation, and anyone making such a statement is guilty of a gross libel, and we shall feel deeply indebted to anyone who will give us such information as shall lead to our finding out the source from which this rumour emanated.

"The report that the 'Emden' had taken charge of the 'Pontoporos,' belonging to the National Steam Navigation Company (Limited), of Greece, in which we are interested, and which steamer has on board a cargo of coal shipped at Calcutta for Karachi, may possibly have led people to credit the rumour referred to above.

"It is hardly necessary for us to state, in view of the disclaimer we make in this communication, that the 'Pontoporos' did not, of her own choice, seek the company of the 'Emden' or is acting otherwise than under compulsion."

The Greek currant crop (writes our Athens correspondent is estimated this year at 335,000,000 lbs.

Egyptian Cotton Question.

(From Our Own Correspondent.)

Cairo, September 7.

The regrettable situation created by the Committee of the Alexandria Merchandise Bourse, to which I referred last week, has been happily ended by the intervention of the Government on the advice of Lord Edward Cecil, the Financial Adviser. The latter, since his return from leave a short time ago, has been endeavouring to persuade the Committee to reserve its decision closing all cotton contracts outstanding on August 6 at $15\frac{3}{8}$, and on Thursday last a decree was promulgated suspending the Committee, cancelling its decision, maintaining all contracts open on August 6, subject to any private liquidation that the parties concerned may arrange, and empowering the Ministry of Finance, subject to the previous approval of the Council of Ministers, to take whatever steps might be necessary in regard to the Merchandise Bourse of Alexandria.

Ministerial Commission.

At the same time a Ministerial Arrêté was issued creating a Commission, which will give its advice on matters concerning the Bourse, whenever the Minister of Finance requires it. The Commission consists of the following eleven members:—Mr. A. King Lewis, Director-General of Customs (President), Messrs. W. R. Carruthers (manager in Alexandria of the Anglo-Egyptian Bank), B. Hornsby (acting sub-governor in Alexandria of the National Bank of Egypt), S. R. P. Carver (of Messrs. Carver Bros. and Co.), E. Delta (of Messrs. Choremi, Benachi and Co.), H. Masson (manager in Egypt of the Credit Lyonnais), Costi Pilavachi (of Messrs. Pilavachi and Co.), P. Augustino, A. M. Gandur, Michel Sinadino, and Mahmoud Bey El Dib.

In a communiqué the Government explains the reasons for the step it has taken. It based its decision on the conviction that the temporary dislocation of the cotton market resulting from the outbreak of war was too great, and the interests involved too widespread to be left to the Committee of the Bourse, as hitherto constituted. According to it the Committee, whose decision was taken before the general moratorium was declared, at a time when it was obvious that Alexandria would have to close like the other Bourses had done, and there was every reason to anticipate that the banks would lend financial assistance for the settlement of August 10, came to the conclusion, that the best way of avoiding a catstrophe was to impose a forced liquidation of all cotton contracts at the price of $15\frac{3}{8}$ per cantar.

Status Quo Ante.

Since August 6, the general moratorium has been proclaimed, and the other measures taken by the Government have relieved the financial strain. A further study of the situation made it clear that the Committee's decision was of a nature to hamper the negotiations, which were being carried on with representatives of other cotton markets and that many interests other than those of the members of the Alexandria Bourse were involved, with which interests it was exceedingly doubtful whether the Committee could legally deal. The Government, therefore, considered it wisest to restore the *status quo ante* August 6, to consider the Alexandria Bourse as purely and simply closed, and to seek a solution with the aid of an Advisory Committee of local business men, who, without being bound by any decision taken, would study the situation afresh. Thus, an end has been put to a situation which threatened to give rise to no end of liquidation, which had aroused the greatest indignation locally and at home, and which certainly would not have encouraged people in England to give the assistance which this country is now seeking. The Government is to be congratulated on its intervention, and on the very strong representative Advisory Commission that it has appointed.

The production of gold (says the *Statist*) may be said to be almost confined to the British and Russian Empires amongst the belligerents, and to the American Continent amongst neutrals.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, September 23.

Traders in our market during the past week have had most undesirable conditions to put up with. Spinners and manufacturers, however, are beginning to get accustomed to the continued idleness experienced on 'Change. There is plenty of matter to occupy the thoughts of business men, and the subject of the war has been much discussed in all its phases as a secondary to trade affairs. Still, this prolonged period of waiting is by no means a light matter to those in an awkward position, and many people are passing through a harassing time, unrelieved by any semblance of fresh activities. One factor in the discouraging situation is with regard to the raw material rates at Liverpool, which have persistently kept up to a level that hampers progress and makes buyers mark time. Trade in cloth for Egypt is in a bad way, and from day to day the absence of favourable advices from the other side has been marked. Remittances from that part of the world are coming in worse than ever. Manufacturers have been waiting in vain for fresh business. As to the Levant there is nothing of a healthy nature to report and business has been most unsatisfactory. Deliveries against old contracts have continued to be taken freely for India, although various rumours have been spread about at different times which have made shippers concerned about the dangers met with in Indian waters. China trade has been blocked all along the line and no signs of improvement have shown themselves. Curtailment of production, especially in Burnley, has continued on an increasing scale, and producers are at their wits' end to keep machinery running. There is practically nothing to choose in yarns between American and Egyptian qualities as to which have been in most demand. Business as a whole in both home and export sections may be described as dull and featureless.

COTTON GROWING RESTRICTION.

Reuter's correspondent, cabling from Cairo on Tuesday, said that at a meeting held at the Ministry of Agriculture the previous evening the Minister explained that, as probably only four million cantars of the present cotton crop was likely to be sold, in order to avoid depreciation the next crop should not exceed this amount. Therefore, a law would be promulgated reducing the area under cotton by a million feddans. The cultivation of cotton in Egypt would be absolutely forbidden except in certain regions, and any infringement of the law would be punishable by imprisonment. The liberated area would be devoted to the growing of cereals.

The Egyptian Ministry of Agriculture (a Press Association Foreign Special message from Cairo says) has issued a circular to the fellaheen, pointing out that a large portion of the possible profits of the cotton crop is lost to each cultivator every year through the ravages of the boll worm and the pink boll worm. Yet if all growers of cotton were to co-operate and did their best to follow out instructions, neither of the two worms could become abundant enough to do much damage. By killing one worm in June they will have prevented the damage done by 100 in July, by 5,000 in August, by 500,000 in September, by 50,000,000 in October, and by 5,000,000,000 in November.

Cabling from Cairo on September 23, Reuter stated that a decree had been published limiting the cotton cultivation for 1915 to 1,000,000 feddans, representing a reduction of 740,000 feddans.

Reuter's correspondent at Constantinople wires that some 800 houses in the Jewish quarter of Hasskeui, on the Golden Horn, were destroyed by fire on Wednesday night, and about 3,000 Jews of the poorest class are homeless.

NEWS FROM ALL SOURCES.

The Cairo correspondent of *The Oil News* cables that the new well Gemsah No. 10 is easily capable of producing 1,000 tons a week, and that the oil is absolutely pure. The well is flowing of itself.

The depleted forests of northern Syria furnish very little lumber for building or other purposes, as a consequence of which it is practically all imported. None is imported direct to Aleppo from the places of origin (says our correspondent), but it is brought in shiploads to Alexandria, Beyrout and Tripoli, from where it is distributed in wholesale lots to interior points. Importers at those seaports have connections in Roumania, which furnishes the major portion, and in Russia.

Roumania is not at present engaged actively in hostilities, but its army is almost completely mobilised, and a great decline has taken place in the production of crude oil (says *Petroleum World*). Large stocks have been accumulated by the Government, but export is stopped by reason of the practical closing of the Dardanelles and the insecurity of Roumanian oil traffic through the Mediterranean. Small quantities are, however, being sent across the Black Sea into Asia Minor.

The July output of Roumanian oil amounted to 144,000 tons, or a decrease of about 5,000 tons as compared with the June production.

The work of erecting the breakwater in the Eastern Harbour at Alexandria is to be continued, says *The Egyptian Gazette*.

The Egyptian Ministry of Finance has issued a circular informing all Ministries and Departments that no promotion or increase of salaries can be granted during the present financial year and requesting them not to make any new appointments without the previous consent of the Ministry of Finance.

The Sudan Government, says *The Egyptian Gazette* (September 9), has ordered its store of coal at Port Sudan to be removed to Guelbit, a distance of 80 miles from the coast.

A parcel post convention has been concluded between the United States and Greece, and took effect May 9, 1914.

In Ispahan the existing telephone system is to be enlarged so as to include the towns of Sehdeh and Najafalead at a distance of 15 and 20 miles respectively from the capital.

Mr. Frederick Peabody Crane has entered upon his duties as manager of the affairs of the Standard Oil Company of New York in the Turkish Black Sea coast. His headquarters will be Samsoun.

Mr. Selim Tawil, who trades under the style of Selim Tawil and Co. at 6, Hall Street, Manchester, has entered into a deed of arrangement with his creditors, under which his liabilities are given at £4,228, as against assets £1,243. The debts are owing principally to Manchester houses.

Sherif Tidjani, whose father is reported to be the head of 3,000,000 African tribesmen, has volunteered for the French cavalry.

The Rumanian Government have prohibited the export of coal to Austria.

TURKEY'S CORN SUPPLIES.

Reuter's Agency reported from Constantinople on September 15 that, the Turks having recently requisitioned a consignment of Russian flour, the Russian authorities have retaliated by seizing during a voyage in the Black Sea 45,000 sacks of Roumanian flour destined for Constantinople. The Roumanian Government has, moreover, prohibited the export of corn, which is a very serious matter for Turkey, inasmuch as Roumania is the only country from which the Turks draw their food supplies.

Engineering Notes.

A Mechanical Milk Drying Process

Makers of the Kourouk Kaimac in Asia Minor will be surprised to hear that what they can do with the help of a saucepan and a hot metal tray by their fireside an inventor has succeeded in doing by a special mechanical process. The process is entirely mechanical, and is in no way based on previous vacuum pressure, or spray systems. The apparatus consists of a drying chamber built of bricks, insulated wood, and metal lining, within which is passed an endless travelling steel band about 20 ins. in width. Through the top of the drying chamber a vessel is inserted, wherein the milk is vaporised before supplying it to the band for final drying. In this vessel the vaporisation rids the milk of two-thirds to three-fourths of its original content of water. A revolving cylinder, dipping into a cup of the partly vaporised milk, conveys the liquid to the slowly moving metal band, the milk film being thus passed into the drying chamber, where it is subjected to superheated circulating air, and when scraped off from the band by a keen-edged knife contains only 2 to 5 per cent. of water. The degree of desiccation may be regulated by controlling the temperature of the heated air, and to some extent by varying the velocity of the steel band.

Mechanical Hammers.

Ironworkers in the East will be interested to hear that the difficulty they often experience in turning out comparatively heavy forgework, owing to the want of more powerful hammering, can now be overcome without much outlay. The Oriental blacksmith is a clever worker. With his ordinary forge, anvil, hand-hammers and a few odd tools, he often turns out most ingenious mechanical devices for local industries; and to his skill is due the crude, but useful, imitations of agricultural implements, light machinery, presses, etc., of European design which one can see in many villages at work. But any forgings requiring a heavier blow than that which is possible with a sledge-hammer he cannot tackle. The same may be said for a great number of workshops throughout the East. They know of the existence of steam and other mechanical hammers, but their price prohibits their use in such cases. It will, therefore, be of interest to such ironworkers to have information concerning a new mechanical hammer which may meet their requirements. It is made in various sizes. The first, a 5-cwt. hammer, is worked by the depression of a foot-rail, or treadle, in front of the anvil. Motion is conveyed to the hammer by means of parallel arms by which the hammer is always held in a vertical position, and this feature allows any reasonable height of tool or thickness of iron to be worked. The weight of the blow may be varied by means of a lever attached to the bottom of the springs, or the hammer may be thrown back out of the way almost to a vertical position if required. A second, heavier size hammer, gives a 9-cwt. blow; and the hammer-head will move anywhere over the face of the anvil, thus enabling punching, swaging, heading, or any similar work to be accomplished. A light or heavy blow may be delivered. Another size is a double or treble headed hammer, power-driven, giving a 33-cwt. blow; this is a type favoured by boltmakers and others who have work to do requiring two or three separate operations, in dies or swages. Means are provided for the exact adjustment of the dies, and a jingler block is fitted to enable work to be done which requires heading. To this hammer is also attached a guillotine for the cutting of hot metal, the blades of which are of special steel. Another size, also power-driven, is a four-headed hammer, a tool with which it is possible for four sets of dies to be worked as required. In our opinion these power-driven types may well be adapted for the cutting of a certain kind of light mule and donkey-shoe, extensively used throughout the East; and also of a variety of iron fittings used for native agricultural implements.

PALESTINE RAILWAYS.

The U.S. Vice-Consul at Jerusalem reports:—The enormous tourist traffic in Palestine, which increases annually, has caused the Hejaz Railroad officials to study the situation with the idea of creating a network of railroads in the interior of the country. In order to exploit the valley of the Jordan the Hejaz Railroad has formed an exclusively Ottoman company, which will undertake to connect the Adjlun Mountains, east of the Jordan, with the plateau of the Hauran. The preliminary survey, which was finished last year, traced a twenty-two mile line, joining the two most important points of the country—Deraca, situated on the principal line of the Hejaz, and Bosra (Eski-Cham). Deraca is at the junction of the lines Hamah-Damascus and Damascus-Medina. Bosra, situated in the midst of the Hauran, is the centre of the important trade in wheat, which is exported from this region to the Mediterranean border.

A shorter line, opened to commerce on January 1, runs from Haifa to Acre, 109 miles in length. This line branches off, three miles from the principal Haifa-Damascus line, near Belad and Sebah, ancient Arabian towns, and traverses the plain of Acre. After crossing the Kison River, which empties into the Mediterranean at Haifa, the line encircles the sand hills along the coast until arriving in the suburbs of Acre. This city is the seat of government of the district, but has neither political nor economic importance. Large ships seldom visit this place, though in summer time a large number of sailing vessels arrive from Egypt to purchase water-melons, which abound in this region.

A third branch of the Hejaz Railroad is the line Affoule-Nablus-Jerusalem, still in process of construction. While the line Haifa-Acre did not present any technical difficulties outside of two bridges of 164 ft. and 102 ft. in length, this portion of the line is constructed entirely in mountainous territory, with heavy grades and sharp curves.

At the junction Affoule the Jerusalem line branches out. From here one has a view of the Carmel, the city of Nazareth, Mounts Hermon and Tabor, as well as the lesser chain of the Adselloun Mountains. The line then enters the plain of Jesriel for 10½ miles until Djenin is reached. Here it penetrates a narrow and tortuous valley and begins a climb (18 to 26 per cent. grade) to the summit of the mountains of Galilee. From here the line descends on the other side, turning south-east and arriving at the second station in course of construction.

BULGARIAN NOTES.

(From Our Own Correspondent.)

Sofia, July 26.

Trade in June.

The trade returns for Bulgaria during the month of June (O.S.) show the following totals:—Imports, 31,200,000 frs.; exports, 18,100,000 frs. As compared with the corresponding figures for May, the imports have remained stationary and the exports have diminished. The exports, consisting exclusively of grain and grain foods, have been greatest through Bourgas, Varna being second. Through Bourgas 345 truckloads of wheat and maize were exported, and through Varna 270 truckloads.

Increased Duties on Alcohol, etc.

The Bill for increasing the duties on alcohol, oils, sugar products, beer, tobacco, etc., was adopted by the Chamber, sanctioned by the King, and is already in force.

New Insurance Company.

A new Bulgarian General Insurance Society, "Orel," has been founded here, with a capital of 2,000,000 frs. (£80,000). Among the members of its Board of Administration are Mr. R. Fanta, of the Balkan Bank, as President, and Mr. M. Jeneff, former Minister of Finance, as Vice-President.

BULGARIAN INSURANCE COMPANY.

On December 31 last the paid-up capital of the above company was 1,500,000 frs., the life funds, etc., stood at 10,573,308 frs., and deposits, etc., at 5,397,941 frs.

The figures for the last five years are as follows:—

	Premiums. Frs.	Losses. Frs.	Funds. Frs.
1909	8,870,883 ..	5,799,509 ..	5,447,736
1910	9,370,238 ..	5,433,251 ..	6,329,216
1911	9,516,440 ..	6,707,310 ..	6,399,065
1912	12,183,010 ..	7,125,393 ..	7,457,652
1913	15,868,747 ..	9,724,190 ..	9,505,844

It will be seen, says *The Policy Holder*, that the year 1909 found the company with reserves equal to 61 per cent. of the premium income. In 1911 the percentage stood at 66 per cent., whilst last year the figure worked out at 54 per cent. So a period which many thought would spell absolute disaster leaves the office still in an excellent position.

THE BRITISH MORATORIUM.

On Wednesday night the decision of the Government in regard to the question of extending the moratorium was announced.

After consultation with the various interests concerned, the Government have decided that the time has arrived for bringing the moratorium to an end with as little delay as possible.

There will be no further extension of the moratorium relating to bills of exchange (other than cheques or bills on demand). There will be no further extension of the general moratorium in so far as it applies to (*a*) debts due to and by retail traders in respect of their business as such, and (*b*) rent.

As regards other debts to which the general moratorium applies, there will be an extension of one month, *i.e.*, from October 4 to November 4. This extension will be subject to the condition that the interest due under past proclamations is paid.

On November 4 the general moratorium will come to an end as regards all debts.

In reference to the decision not to extend the moratorium relating to bills of exchange, it is to be borne in mind, as announced in the Press on the 5th inst., that arrangements have already been made by the Government under which the Bank of England will advance to acceptors where required the funds necessary to pay all approved pre-moratorium bills at maturity.

The Engineering Editor of "The Near East" will always be pleased to answer inquiries from readers respecting any machinery or appliances described in these pages.

THE POSITION IN THE CITY.

(By Our City Editor.)

An Encouraging Outlook.

Although business is completely removed from normal there are definite signs that it will gradually revive. The announcement that the Government intends to abolish the moratorium on November 4 is excellent news. It is quite impossible to carry on the business of the country whilst there is a moratorium, and now that the Bank of England will advance money to meet pre-moratorium bills there is no reason why trade should not be pushed upon honest lines. Certainly a moratorium cannot be considered honest.

The banks will no longer be able to protect their deposits, but they can, of course, borrow money from the Government if they care to pay the usual deposit rates for the loan. The fact that they can obtain whatever money they need will prevent another run. During the past month all the banks have been gradually building up their gold reserve; and, although cash in hand may in some cases include money borrowed from the Government, there is no doubt that the stock of gold at all the joint stock banks has largely increased.

War Loan Speculations.

Everybody in the City is now wondering when the Government will issue a war loan, and upon what terms they will borrow the money. The war up to the present has been financed by means of Treasury bills, of which 56 millions have been issued, and a portion of the war material has been paid for in £1 and 10s. notes. Apparently the Government have issued about 27½ millions of the new paper money, and as the banks have only taken a million and a-half of this money the rest may be considered as part of a war loan.

New York Exchange.

An attempt is being made in the United States to reinstate exchange between New York and London, and a gold pool is to be formed for that purpose. The money asked for by New York City was readily subscribed and the notes are now at a premium.

The Stock Exchange shows no signs of reopening. The decision to put a fixed minimum price on all gilt-edged securities has had very little effect, and has certainly stopped business. It has proved itself a very unpopular suggestion. Nevertheless, there is a fair amount of trade being done in oil shares and the securities of armament companies, as compared with a few weeks ago. But none of the big brokers are paying their office expenses.

Germans in the House.

There is still a very strong feeling in regard to the German firms in the House. It is said that one Anglo-German went to Berlin on the proclamation of war with the intention of enlisting in the German army. He, however, changed his mind and came home again, and the story goes that his partner was so disgusted that he brought the matter before the Committee. It is also said that some of the Anglo-German firms have refused to comply with the orders of the Committee and present their accounts, and *The Financial News* calls upon the Committee to expel these members. There is not a shadow of doubt that the Anglo-German financial group in London is working in sympathy with the Germans, and not with the English.

Dividend Prospects.

The Johannesburg Consolidated report shows almost as good a profit as last year, but the directors decline to pay a dividend. Probably the bulk of their spare cash is locked up in loans on the Stock Exchange, and until that money is released no dividend is possible. The Pearson and Knowles report was fairly satisfactory, and it is pleasant to think that the Partington Company, a subsidiary, was able to materially help the parent company at the outbreak of war. The Sheepbridge figures are good, and the balance-sheet shows a very strong position. Associated Portland Cement cautiously passes its dividend. Its earnings are sufficient to pay 5 per cent., but the commitments for the current year are heavy, and the directors no doubt feel that with a debenture service calling for £280,000 a year there will be some difficulty in meeting even the preference dividend if the war continues.

COMPANY REPORTS.

Ottoman Railway.

The report to hand shows a balance carried forward of £98,763, as against £36,533 a year ago, but included in the former amount is an outstanding sum of £38,686 due from the Ottoman Government for the transport of troops, the non-receipt of which sum materially diminishes the cash resources of the company. The earnings on revenue account for the past half-year amounted to £197,938, compared with £148,747 in the corresponding period of 1913. The expenditure amounted to £86,419, compared with £79,008, and the net profit to £111,518, compared with £69,739 in the corresponding period of 1913. The balance of net revenue, including the sum brought forward from last half-year, amounts, after defraying all fixed charges for the half-year and providing for dividend on the preference shares and reserves for locomotives and waggon renewals, to £98,463, which the Council propose to carry forward. The prospects of the present season were very good, but owing to the war and prohibition of the export of grain from Smyrna the transport of produce and the circulation of passenger traffic have been seriously checked.

Mr. E. T. Boxall.

An adjourned meeting was held on Monday at Bankruptcy Buildings of the creditors of Mr. Edward Thomas Boxall, export merchant and director of companies, of 64, Cornhill, E.C., whose statement of affairs showed gross liabilities £176,147, expected to rank for £71,463, and net assets valued at £71,094. The creditors resolved that the meeting be further adjourned until October 12 to enable the debtor to submit an amended scheme, and that, in the event of the debtor being adjudged bankrupt, Mr. Oscar Berry, chartered accountant, be appointed trustee of the estate with a committee of inspection.

COMPANY RESULTS, &c.

Ottoman Four per Cent. Loan.—Messrs. N. M. Rothschild and Sons publish the numbers of 223 bonds of the Ottoman Four per Cent. Loan of 1891, amounting to £64,000, which have been drawn and will be paid off at par at their offices on October 10.

Egyptian Delta Light Railways.—The receipts for the eleven days ended August 31 amounted to £E4,431, against £E6,346 during the corresponding period of last year.

Egyptian Delta Light Railways.—Coupon No. 34, falling due October 1, 1914, on the 5 per cent. debentures should be lodged at the Bank of England, London, E.C., for payment.

Egyptian Markets.—The receipts for the week ended September 10 amounted to £603 (increase £34); aggregate to date, £34,244 (decrease £1,579).

Anglo-Egyptian Oilfields.—Gemsah production for last week, 1,870 tons (previous week, 1,130 tons); Hurgada production for last week, 140 tons (previous week, 110 tons).

Anglo-Roumanian Petroleum.—Production week ended August 22, 188 tons.

Roumanian Pipeline and Trading Company.—A resolution was passed on August 11 and confirmed on September 8 to the effect that the company be wound up. Liquidator: A. E. Rigden, 54, New Broad Street, London, E.C. A meeting of creditors was called for September 24 at 12.

Suez Canal.—The traffic receipts of the Suez Canal for the 20th inst. amounted to 70,000 frs., against 370,000 frs. last year.

COUNCIL OF ADMINISTRATION of the OTTOMAN PUBLIC DEBT.

The Council of Administration of the Ottoman Public Debt give notice that on and after the 14th September, 1914, SIX MONTHS' INTEREST at the rate of Four per cent. per annum will be PAID against Coupon No. 22 of the Unified Converted Debt. The payment of this Coupon will be made in all the towns mentioned on the Coupons up to the 13th February, 1915, after which date they will be payable in Constantinople only.

Constantinople, 1st September, 1914.

NOTES OF THE WEEK.

Those who have been looking for some decisive victory on the Aisne, a great success crowned by a spectacular surrender of troops, have so far been disappointed. The present warfare in France is officially compared to the operations of a siege, and the numbers of men engaged are so considerable that the length of the battle must be reckoned in days rather than in hours. Still, to the close observer it is apparent that there has been a substantial advance during the last seven days of the battle. A French official *communiqué* published on Tuesday kept so well within the truth that many folk thought that the Allies must have actually retreated. Their spirits were, however, raised next day when it was announced that the Germans were industriously bombarding positions some miles to the north of the line indicated in the *communiqué*. In these days of a censorship which is almost hypersensitive on the subject of military events in France and has on several occasions decided that it is dangerous to reproduce in London what has already been officially published by our Allies in Petrograd and Paris, it is difficult to be more explicit. We are perforce compelled to limit our comment and to confine our statement to the bald announcement that in the Battle of the Aisne the German counter attacks, although fierce and determined, have been consistently repulsed, and that the actual line of battle is being prolonged.

On the eastern frontiers of the Teutonic Allies the military situation is curiously uneven. In the north what is believed to be the main German Army has, under the eye of the Emperor William, emerged from East Prussia and overrun the northern extremity of the kingdom of Poland. It is understood that vast masses of Germans have been pushed forward into this new theatre of war, but so far they have been entirely unable to force their way across the Niemen, behind and on the higher bank of which the Russians are "holding" them, apparently with no very great difficulty. It seems that the Russian strategy is to profit by the existence of this great natural entrenchment and to expect a German offensive under conditions eminently favourable for the defence. In this way a comparatively small force of men may be considered as containing a numerically superior German army, while the weight of the Russian numbers is being usefully employed elsewhere.

So rapid and successful has been the Russian advance against the Austrians that to all appearance the whole kingdom of Galicia and Lodomeria, with the exception of Przemysl and the Cracow district, has passed under the control of the invaders. In this quarter the magnitude of victory is not expressed in figures of killed or captures, but in geographical terms. The Russians have swept all opposition before them, and have traversed the passes of the Carpathians. Once more after an interval of sixty-five years they have invaded Hungary. When last the soldiers of the Tsar, under Prince Paskevitch, passed into the basin of the Tisza and the Danube it was at the invitation of the Emperor Francis Joseph himself, and it was to that invasion that he owes his present Apostolic Kingship of Hungary. The Magyars had declared the House of Hapsburg to be "false and perjured," and had excluded it "for ever" from the throne. This was in April, 1849. At the end of September in the same year the Russian general was able to report to Tsar Nicholas I., "Hungary lies at the feet of your Imperial Majesty." Is history to repeat itself?

If the Russians have swept through the passes of the north, the Serbians have once again seized Semlin, and thereby invaded Hungary in the south. The most recent attempt of the Kaiserlichs to penetrate into Serbia appears to have failed as completely as those which preceded it, and the Serb forces seem to have reached a point in Bosnia within twenty miles of Serajevo. We have from time to time remarked upon the lack of recognizable movements in the campaign of the Drina, and suggested an explanation. Now, however, it is possible that the Serbian Army is at last in a position to undertake a substantial invasion of Bosnia. Those who are impatient with what they term the slowness of development on the part of the Serbian offensive should remember the efforts put forth by the Serbs in resisting attack, the extraordinary geographical difficulties of the country into which King Peter's army hopes to press, and the fact that the Serbian peoples had had over twenty months of war and mobilization

Digitized by Google

as a preliminary to the campaign in which they have been engaged with numerically superior adversaries unexhausted by previous warfare.

Having reached the Balkans, we pass from countries actually engaged in war to those about to embark upon the great adventure. Of these it is possible that there will be three. The Russian victory of Lemberg was of assistance to the Roumanians in deciding upon which side of the fence to descend. We understand that they have decided, and with a worldly wisdom, acquired doubtless by careful observation of Balkan affairs, they are engaged in arranging necessary and important details with their prospective Allies. On another page we publish a map and an article explanatory of Roumanian territorial ambitions towards Transylvania. Should those ambitions be gratified and an ethnic rectification of frontier in the direction of the Bukovina be secured it is obvious that the doctrine of the Balkan balance of power demands a revision of the boundaries laid down by the Treaty of Bucharest, even if racial requirements did not render it imperative in the interests of future peace.

The Italians are believed to have arrived at the parting of the ways, and it is probable that the absence of the Marchese di San Giuliano from the Councils of the Cabinet will enable that body to abandon the policy of which he has been the most strenuous exponent. It may be that a reconstruction will be a necessary preliminary to the declaration of war against a hated ally which can now not long be delayed. Or Signor Salandra may take the opportunity of being temporarily in charge of the Consulta to take the first step towards the liberation of the Trentino. In any case the pretext is at hand—Italian fishing boats have been destroyed by Austrian mines. A determined statesman can readily find a plausible excuse in connection with so unfortunate an incident for declaring war if he so wish.

And, lastly, there are the Turks. For some time past their neutrality has been of a remarkable description. They have been assured of a comfortable future in the event of their keeping the peace. They have equally been assured as to their fate in the event of their adopting an opposite policy. One would imagine the path of an Ottoman statesman at the present moment to be unusually clearly defined. Yet apparently the Porte is assailed by doubts. Some of these doubts have induced it to mass large numbers of troops in positions where they can be useful only in the event of an attack upon Egypt. Others have led it to abolish *motu proprio* great numbers of international agreements, and to behave in certain other ways in a manner indicative of a lack of reasonable consideration for the just rights of neighbours. From certain quarters warnings of great weight and no uncertainty have been addressed to the Turks. In our opinion, however, it is not entirely the Turks who are to blame in this matter, unless it be indirectly. It is possible that many Ottoman statesmen would like to be able to control their own national affairs in the interests of their own country. Unfortunately these men are nearly powerless in the presence of the garrison of armed Germans who beset the Porte at the present moment and by strengthening the hands of the war party seek to impel the Empire of the Osmanlis to embark upon a fatal policy of adventure solely in order to "create a diversion" and alleviate to some small degree that pressure from the Allies which Germany begins to find inconvenient. It is the old story of Sindbad the Sailor and the Old Man of the Sea. Let us hope that the Fate which guides the destinies of the Guarded Realms will permit the analogy to be carried further. It will be remembered that Shehèrazade allowed Sindbad to get rid of his vindictive burthen.

In view of the ill-advised activity of the Turks, who, at the behest of alien advisers, have filled Syria with their soldiers, for whose subsistence the countryside has been swept bare by the requisitioning officers, it is of the first importance that the Army of Occupation in Egypt should be maintained at its present strength. What that strength may be is for the Turks to find out. All that it is prudent for us to say in the present circumstances is that more Egyptians have seen more of his Majesty's soldiers of all arms during the last three weeks than has ever been the case before, and we are convinced that it is widely recognised that the Army of Occupation stands as a shield for all those amenities which render existence in Egypt more tolerable for all classes than is the case in the direct Ottoman provinces. It is nearly four centuries since Yawuz Sultan Selim first carried the horse-tails to the banks of the Nile, and there is nothing in the history of those four centuries to tempt the mass of the Egyptian population to hope for another Turkish conquest.

As we have repeatedly pointed out of late, the Consular post offices in Turkey have in most cases lost their *raison d'être* with the recent improvement in the Ottoman postal administration, and it is not surprising to learn that the Powers have made up their minds to abandon these privileges which have outlived their usefulness, and now only serve as irritating advertisements of foreign prestige and international rivalry. While heartily approving of the proposed change, which indeed, we have for some time past advocated, we cannot but regret that the date selected for the first public step towards the suppression of the Consular post offices should coincide with the date appointed by the Turks for the "abolition" of the Capitulations. It would have had a better effect upon Turkish public opinion had some other date been chosen, as it is unfortunate to do anything which might seem to recognize in any way the action of the Porte in that connection.

Yet another branch of Ottoman activity may be found in Albania. A cleverly manipulated propaganda was set on foot to persuade the Moslem beys and their adherents that the rule of a Christian Prince must necessarily mean enslavement for true Mussulmans. Indeed, to the type of mind which can only conceive personal liberty as being synonymous with the right to oppress *rayahs* a regime which postulates the equality of creeds must of necessity appear repulsive. Left to their own devices, the Moslems decided to ignore the International Commission of Control, which had no means of enforcing its decisions, and proceeded to give effect to the policy advocated by Ottoman intriguers. A Moslem, son of the ex-Sultan, Burhan-ed-Din Effendi, has been elected Mpret of Albania, and the wholesome rule which was devised for the purpose of avoiding *odium theologicum* in the infant Principality by placing a Protestant to rule over a mixed Moslem, Orthodox, and Latin population has been violated.

It is unfortunate that a Moslem Mpret should have been set up, not because we have any objection to the foundation of a new Mohammedan dynasty—even in Europe—but because the election of a ruler professing one of the local religions will be eagerly seized upon as an excuse for separatist propaganda on the part of the Orthodox and Latin minorities. A recrudescence of the Epirote movement is inevitable, and it is possible that the Montenegrins may seek to fish in troubled waters to the end that a Catholic Maltsor state may be established between Orthodox Montenegro and Moslem Albania under the rule of a cadet of the House of Petrovitch. In any case it appears that Burhan-ed-Din Mpret is likely to find the area of his dominion somewhat curtailed even within the exiguous territory provided for his luckless predecessor.

At the moment of going to press we learn that reference is permitted to the landing of British Indian troops in France. A considerable force has made the voyage under favourable weather conditions from Egypt, and has been successfully debarked upon the territory of our Ally. Should any bitter memories remain among the French of our former struggles in India the arrival of a Sepoy Army under the British flag to help France rid her soil of a barbarian invader will go far to obliterate them.

CONSTANTINOPLE LETTERS.

(From Our Own Correspondent.)

Constantinople, September 8.

Turkey and Her "Guides."

The Government continues to ingeminate peace as vigorously as the deceased Lord Falkland. The Grand Vizier has constantly assured the British Ambassador and the Russian and French Ambassadors that he does not dream of war. Turkey, his Highness has repeated, is animated by a most pacific spirit, and her preparations are purely defensive. Other members of the Cabinet re-echo their chief's declarations, and no doubt can arise that these declarations are perfectly sincere—sincerer certainly than Talaat Bey's declaration on his word of honour on August 9 that Turkey had no intention of giving asylum to the "Goeben" and "Breslau" or of purchasing these ships.

Yet with all this a series of incidents goes to prove that Turkey is being forced on to the brink of the precipice half conscious of the danger, half willing to be led by her cynical guides. Till now no German of the crews of the warships which I have mentioned has left. Anyone with eyes can see them in Yanni's Bierhalle, some clothed in the Turkish red and white, some still wearing the German blue with the fez. Khaki-clad soldiers in trams now and again betray an amazing familiarity with German patois, which is explained by the fact that 600 of these mercenaries have arrived here since the European war began, and are now stationed at the Bosphorus and Dardanelles, and also at Makrikeui and Chatalja. Big guns—not the famous 42-centimetre mortars it is true, but 30.5 c.m. coast defence pieces from the house of Krupp—have arrived at Constantinople viâ Roumania and Bulgaria. More German officers have come. Also, *alles geht ganz gut!*

Outrage by Officers.

There are other quaint incidents. Russian residents are being ejected by the police without warning or notice. They are detained in the "lock-up" at Galata Serai, which Mr. Clerk, the British Adviser to the Ministry of Justice, has suggested should be burnt as grossly insanitary, and are then "dumped" on board the first steamer bound to Russia. Shots have been fired by officers at an English house. On Saturday last occurred a tragic incident at Floria or Galataria, near San Stefano, in which a number of Europeans were beaten, men and women indiscriminately, by a party of armed officers, one shot dead and two at least wounded. The officers, who belonged to the air-battalion, wished publicly to destroy a French flag belonging to the French proprietor of the hotel where the outrages took place. After this chivalrous performance the French Ambassador made very strong representations to the Government, which replied that it would open an inquiry into the affair and take the necessary steps. But will it be able to punish the guilty persons? Few of us think so, though we hope it may. Such occurrences, combined with the "tail-twisting" exercised by the police, an inefficient force, and the attitude of the Gendarmerie do not encourage residents to take a roseate view of their prospects when, as will soon be the case, the Porte has denounced the Capitulations.

Anti-English Feeling.

Of course, there are pro-Turkish apologists who maintain that all this is natural enough, that the Turks are much incensed with the Powers for having declared that no combatant in the Balkan War should be allowed to extend its territories at the expense of the beaten side, for having guaranteed Turkey's territorial integrity and allowed that integrity to be violated, and with England in particular for having seized the two ships building for the Porte in British yards. But one really fails to see what good Turkey can get by so openly showing her feelings. Why, too, is the public not incensed against Austria and Germany? Why does practically the whole Turkish Press call down the Divine displeasure on the Entente Powers, sneer at all successes of the forces of the Entente, on the few occasions when it publishes them, and harp whenever possible on the Panislamic string? None are so blind as those who won't see.

The Berlin Touch.

The foreign advisers to the Government have in some cases received unlimited leave on half-pay. The German Ambassador, whose tales of the annihilation of three-quarters of the British Army and the capture of the remainder are said to have drawn tears to the eyes of a neutral Ambassadress, has now let it be known that the Turcos captured in Belgium by the Germans will be sent here, to "the centre of the Caliphate," Germany having no quarrel with poor Moslems forced into war against their will! The Turkish newspaper *Tasvir I Efkiar* expatiates at great length concerning the humanity, nobility, and courtesy of the Deutscher as compared with the attitude of other Powers, piratical brigands all, who live by oppressing poor Moslems in India and Africa.

In the writer's opinion the situation is as bad as ever. "Incidents" may bring about a conflict between Turkey and the Entente. Otherwise the pinch will come when the Government has to make up its mind to demobilise after spending four millions for nothing, or to risk war. In that case there is danger that its mind will be made up for it by the soldiers.

September 20.

Germans' Latest Intrigues.

There is no real change in the situation save that the departure of Admiral Limpus and his staff may be taken as proof that the British Government has found the situation created by the presence of over 2,000 German soldiers and sailors quite impossible. At present there is no talk of a rupture; but the Russian colony, which has had to undergo a vigorous course of "tail-twisting," which it has borne with ursine patience, is beginning to leave Constantinople. The Turkish proverb, "Don't fool with the tame bear," is evidently disregarded in these stirring times. Meanwhile the Germans are in great evidence here. They have purchased more than half the Press, their sailors, still wearing "Goeben" and "Breslau" on their ribbons, can be seen everywhere, and the other day a British member of the dockyard staff, who while examining the keel of a ship called, "I say, Johnny, come and look at this," to what he imagined to be a Turkish engineer, received the reply, "Türkisch verstehe ich gar nicht!" All this explains the anxiety which the Russians feel. They believe that if the Turkish Fleet goes out into the Black Sea, even with the best and most pacific intentions, there will be ways of creating an incident which will lead to hostilities. And there they are right. Can anyone trust the 1,500 Germans on board the four German-built destroyers and the "Goeben," "Torgud Reis," "Barbaros," and "Breslau" not to provoke an incident? The Turks have no real control over the "Goeben's" officers and men. For one thing they cannot run her, and the Germans, knowing that fact, have to be left in charge. This being so, one cannot doubt that the appearance of a "Turkish" squadron in the Black Sea is likely to have disastrous results.

Effect of Russian Victories.

There is no sign whatever of demobilization. Things remain as they are—great masses of troops camped all along the coast between Ismid and Constantinople, other masses at the Heads and the neighbouring forts, and 200,000 men in Thrace. Till now something like 600,000 men have been got together. They are insufficiently equipped, but there can be no doubt that large quantities of warlike stores from Germany were shipped here during the first week of the war, and it is believed that more are on their way through Roumania. But if the latest news from Bucharest is reliable these consignments may yet be seized; for telegrams from Roumania give the impression that the defeat of General Conrad von Hötzendorf in the seventeen days' battle of Galicia by the Russian armies under the Grand Duke Nicholas has made the Roumanians understand that now is the time to move. In this connection it is worth noting that every account from Russian sources of the course and results of the great battle gives prominence to the remarkable services rendered to the Slav armies by the Bulgar General Radko Dimitrieff, whose victories at Kirk Kilissé and elsewhere in the Balkan War are still fresh in our memories.

Pan-Islamic agitation continues, but there is reason to believe that the Turkish agitators who were sent to Egypt have found that country a rather unfruitful field for operations. Some, it is here averred, have been mysteriously wafted away to obscure oases where they may intrigue to their hearts' content without doing harm to anyone. In any case the German and Turkish extremists do not seem to have made much of a success of their scheme for the "revolutionizing" of Egypt. The Turkish Government is said to be disposed to leave that flank alone, for the present at any rate.

The Capitulations and the Courts.

The foreign communities remain uncomfortably silent as to their prospects under the Capitulations. The Ministry of Justice continues to prepare for the new regime, but how on earth the work can be done in time no one knows. Moreover, the personnel is insufficient to deal with foreign cases. I am not concerned to discuss whether it is competent to tackle them at all. The fact remains that there is a shortage in most of the courts, and that the Law's delays are more marked here than ever since the mobilization, most of the younger men having been called out, and every court being thus deprived of a certain number of junior officials. Talaat Bey assures us that the police have received orders to deal politely and tenderly with Europeans, but similar orders were issued during the anti-Greek troubles in Anatolia. Then it was a case of "Quis custodiet ipsos custodes." And in any case, even if the police display the most thorough urbanity to us all, what of the gendarmerie and the military authorities? The perpetrators of the crime at Floria, near San Stefano, remain, as far as we know, unpunished. Yet everyone knows their names.

The British Volunteers.

A meeting held at the British Club here resulted in over £T750 being subscribed in a quarter of an hour for the payment of the expenses of twenty-six British volunteers who are to leave for the front. More has since been subscribed. The British colony has "played up" well, and it will continue so to do.

THE GERMANS IN CONSTANTINOPLE.

The following interesting details concerning recent happenings on the Bosphorus are extracted from a series of letters sent home by a prominent member of the British Colony, and have been kindly placed at our disposal by the recipient.

Writing on September 2, he said that "we are drifting to war, but goodness knows with whom. First it was Great Britain, then Russia, and to-day it is Greece." Two hundred and twenty Germans, the writer adds, arrived at Constantinople on August 31, and were said to be gunners who have been lent to or enrolled by the Turks.[1] At Samsun there are 105,000 Turkish soldiers (three army corps?), and landing stages have been erected on both sides of the Black Sea entrance to the Bosphorus. The mobilized army numbers 1,200,000 men, and the gravest problem for the authorities is how to feed and clothe them.

On the 5th the spirit shown was "more conciliatory." The writer refers to the mobilizing and requisitioning going on on the Asiatic side, blankets and shoes having to be deposited at Scutari. In villages the crier announces that all eligible men have to enlist immediately; those refusing to do so will be hanged on the morrow—a penalty which makes the writer point out that the Government will require "a lot of rope."

In a letter dated September 8 reference is made to a further batch of 300 Germans who arrived on the 6th. The total number of Germans already "lent" to the Turkish fighting forces is estimated at 3,000, and arrangements are being made whereby German and Austrian subjects who, for some reason or other, cannot return to their own country to enlist, can do so in the Turkish Army.

An affray[2] occurred at San Stefano on Sunday, the 6th, the victims being a Frenchman and a Greek. The Frenchman had a small café, on which, together with the Turkish flag, the tricolour was flying. Some Germans came up and ordered the owner to pull down the French flag, which he refused to do. They left and promptly returned with some Turkish and German military, and the flag was pulled down.[3] On the same day the military authorities commandeered for three hours the Shirket boats which ply between the Asiatic and European coasts, and transported an army corps from Scutari to Pera. On the 8th, that is, two days before the news became public, the writer was joyfully informed by a journalist that the Government was going to abolish the Capitulations,[4] with the result that the mixed courts would disappear and many "foreigners" would be mobilized.

The letter of September 10 gives some vivid accounts of the proclamation of the abolition of the Capitulations. It was hailed as "the dawn of a new era," and the day was promptly acclaimed as Independence Day. Flags were flying everywhere—in Pera, Stamboul, and Galata, enthusiastic crowds surged through the streets and were harangued by "Moslems and orators," whose great theme was that England had crushed down Turkey; that Turkey had been paying her cash to England; that this was now going to stop; that Turkey was going to be free and would in future manufacture all her own requirements. In Stamboul the Committees ordered all shops to be closed and flags to fly for three days, during which a general holiday was to be celebrated. One heard a lot of talk about Lafayette and other "revolutionary" heroes, but (adds the writer) perhaps it was just as well that all this happened, as it gave the inflammable populace an outlet for its feelings and diverted its attention from the war.

In the meantime "the outlook in the interior is black, and financial ruin stares everyone in the face." A gentleman who

[1] According to a Roumanian paper to hand, a special train, composed of German carriages and full of German sailors, passed through Bucharest on August 29 bound from Germany, via Rustchuk, to Constantinople. In view of popular opposition, the Roumanian Government issued a *communiqué* stating that the Germans were not sailors but workmen for the Baghdad Railway, but the *communiqué* added that, in order to allay uneasiness, the Government had decided not to allow in future the passage through Roumania of groups composed of more than twenty individuals. From all accounts a similar special train took the Germans across Bulgaria, and in answer to a protest by the Entente Powers the Bulgarian Government asserted her neutrality and her ignorance of the real character of its occupants. No stipulation was, however, made regarding the further running of special trains. It will therefore be possible for Germans to travel across Roumania in groups and then unite in Rustchuk, which is most likely what happened in the case of the Germans who arrived in Constantinople on September 6.

[2] Our Constantinople Correspondent refers to this incident in his letter on page 703.

[3] The British flag has on one occasion met a similar fate. On September 11 we published a letter from our Constantinople Correspondent, in which he referred to the pulling down by the crowd of a Union Jack and its being trampled upon in the presence of police officers. This occurred in Galata, and we now understand that the flag was flying on the premises of the Economic Stores.

[4] On September 8, or two days before the abolition, the usually well-informed correspondent of the *Journal des Balkans* stated that "he had been informed by a letter from Constantinople that the German and Austrian representatives declared at the Porte that their Governments renounced in future all rights enjoyed by their subjects under the Capitulations. This *démarche* has created a sensation, because it is only too evident that Germany and Austria wish to oblige Turkey to provoke the Entente Powers."

Digitized by Google

had returned from the interior beyond the head of the Gulf of Ismid gave the writer a pitiable picture of the country. Not a male between the ages of thirteen and forty-five was to be seen anywhere, old men and women were employed in making roads, everything that could be requisitioned had been taken, crops were rotting because no one was allowed to touch them, barley and grain could not be harvested, much less transported by rail to Constantinople, where, *per contra*, famine prices exist.

The next letter, September 12, referred to the abolition of the foreign post-offices in Turkey, and stated that the officials of the German and Austrian post-offices were to be retained by the Turkish Government.[5] It was announced that a drastic reform in the Customs tariff was to be introduced, beginning with wines, spirits, fine cloths, and high-class boots, the tariff on which will be increased by about 100 per cent.

Apart from this, the situation appeared more hopeful. The majority of people are sick of Turkey's last adventure, and only ask to be left alone. However, the minority rules. The spirit of the half-starved, underfed soldiers is anything but warlike, and dissatisfaction is rife. It is, apparently, worse in the Smyrna district than elsewhere, and it is no secret that many of the soldiers intend throwing down their rifles and going over to the enemy on the first opportunity. As for war with Great Britain, the impression on September 10 was that it would not take place.

On September 14 the idea of a war either with Greece or Russia had become remote, but an original view of Turkey's attitude was gleaned by the writer from a Turk of some standing and authority. "Turkey by mobilizing," he said, "obliges Russia to keep 400,000 men in the Caucasus, and we are therefore able to help Germany as efficiently as though we went to war."

But Germany's ascendancy in Constantinople goes even further. The correspondent says that "there can be no doubt" that Germany is placing big contracts for vegetables, flour, rice, etc., in Stamboul, that these provisions go to Germany viâ Philippopolis, Rustchuk, and Bucharest, and that in return Turkey receives guns and ammunition. On September 12 fourteen wagons of guns and ammunition arrived at Constantinople, having come from Germany viâ Bulgaria.

In the last letter received in London, and dated September 15, it is stated that the forts at Therapia are manned and officered by Germans, and that the headquarters of the German military have been established at Kavak.[6] All belated Austro-German troops, referred to in a previous letter, have been ordered to assemble at these places, which are held by about 30,000 men.

It is suggested, moreover, that the Ambassadors representing the Allies are not "taking a true view of the position," nor do they realise the "gravity of the situation."

[5] Reuter's Constantinople correspondent, cabling on Monday, stated that the French and Russian post-offices will close on October 1, but the staffs will be transferred to their respective Embassy buildings, where they will continue to receive European mails up to October 25 and extra European mails to November 26. The Austrian and German will be closed completely.

[6] The Austrian official *Gazette* announces the promotion of Colonel Pomian-Kovsky, military attaché at Constantinople, to the rank of "plénipotentiaire militaire" at the same Embassy. It is also announced by the *Jeune Turc* that the commandant of the "Goeben" has been appointed an Admiral in the Turkish Navy.

TURKEY AND THE WAR.

A correspondent has sent to *The Morning Post* some extracts from a letter dated September 15, and received on Saturday by a British firm. The writer says:—

"Although there is a large party in favour of war, mostly the military, pushed on by the Germans, there is also a party in favour of strict neutrality. The leaders of the latter party are the Heir-Apparent and the Minister of Marine, and a great number of the older, well-educated Turks. In the event of war being declared it would not be at all surprising to see them go for each other. When we hear of German victories a lot of bunting is displayed and the Germans talk very loud, and we then hear that the Turks are going to war. When, however, victories are reported on the other side the Germans do not show themselves and things seem very quiet. The "Goeben," while at anchor has lately been seen flying a Turkish flag at the peak of the mainmast and the German flag on the maintopmast. We do not know how many Germans there are on board, but one of her pinnaces was seen yesterday manned by German officers and sailors in their own uniforms."

ALBANIAN LETTER.

(FROM OUR OWN CORRESPONDENT.)

DURAZZO, September 23.

From Bad to Worse.

Things are going from bad to worse in Albania, and to-day the country is in a state of chaos. Since the departure of Prince Wilhelm anarchy has reigned in this unhappy country.

When the Prince left it was understood that the International Commission of Control would carry on the administration of affairs, the Prince himself having, in fact, announced in the proclamation he issued before his departure that he would provisionally hand over this duty to the Commission. But these anticipations and hopes have not been realized: for one thing, because there is no agreement either between the Ministers (and consequently between the Powers) or between the delegates of the Commission of Control; and for another because of the absolutely contradictory views and opinions held by the leaders of the insurrectionary movement. A few days later the foreign representatives in Albania left Durazzo as a measure of protest. The Commission of Control still remained, but rather in the character of mere spectators.

The Reactionaries.

Meanwhile, the rebels lost no time in asserting themselves everywhere and endeavouring to organize their so-called Committee. For the time being their headquarters are at Shiak, a small village near Durazzo, and the cradle of the reactionary anti-dynastic movement. Up to the present Shkodra, Mati, Luma, and the Malissia of Dibra and of Hasi remain outside the jurisdiction of the revolutionary party; and as far as one can judge by the present state of affairs they will remain loyal to the Government and Prince William. It may be remarked that except for the majority of the inhabitants of the Shkodra district, who are Catholics, the population of these loyal districts is purely Moslem.

Insurgents' Divided Councils.

What the insurgents will do remains to be seen. What is certain is that they are by no means agreed amongst themselves. Already misunderstandings and rivalries have broken out amongst them. They have not even got a single purpose. For whilst some of them desire to have the Ottoman Prince Burhan-ed-Din as their ruler, others want Prince Fuad, of the Khedivial family; others, again, want a foreign prince, but not Prince Wilhelm. A meeting will take place shortly at Durazzo, where all these parties will be represented and will choose their ruler.

On the other hand, Essad Pasha Toptan is openly carrying on his intrigues with the Greeks on one side and the Serbs and Montenegrins on the other. It is even reported that Montenegro is working hard to get a Prince of its own Royal house elected.

Exodus of Royalists.

In spite of all these various tendencies the reactionary spirit is not strong in Albania itself. At Durazzo and Valona wholesale arrests have been made, so that the number of Nationalists and Royalists now held as prisoners by the rebels in the various towns amounts to several hundreds. This persecution by the rebels has driven many Liberal-Nationalists to go into voluntary exile. A good many still remain in Albania, but only at Shkodra or in the Malissia. The others at first chose Brindisi and Bari as their places of refuge; but now Italy has just refused hospitality to them, having requested them to leave these towns. It is generally said here that Italy, being strongly in sympathy with the rebels, and opposed to Prince Wilhelm, could not bear to see these refugees, who still remained loyal. Now, therefore, a new centre is being formed at Lausanne, where a League for the Defence of the Independence and Integrity of Albania has just been founded. It is reported that several branches of the league have been established already. But what the near future has in store for the country nobody can say.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 14.

The Khedive.

Contrary to what was announced in the local Press, H.H. the Khedive has not left Constantinople for Cairo. The news got round probably owing to the fact that the Khedivah Mother's palace has undergone a "spring clean" after having been shut up all the summer, and it was known that her Highness's anxiety for her august son's health had kept her by his side ever since the attempt made on his life. It is understood, however, that it is considered wisest that the Khedive should not return to Egypt just at present, and that for reasons of health he may shortly pay a visit to Switzerland.

The Case of Prince Omar Toussoun.

Arrivals from Marseilles bring back an interesting story as to the reason why Prince Omar Pasha Toussoun, the Khedive's cousin, has not returned to Egypt, as he intended to do. Some two weeks ago the Prince sent instructions to his Daira in Egypt that all correspondence, etc., was henceforward to be sent to him at Marseilles. This aroused a certain amount of comment in native circles, as it seemed strange that he did not avail himself of the opportunities that were then offering themselves to Egyptians to return to Egypt, and all manner of rumours came into circulation. From the information given by recent arrivals it now appears that during his stay in Paris the Prince frequented circles that were under the suspicion of the police. When he wanted to leave Paris he was only allowed to proceed as far as Lyons. Later he was given a permit to travel to Marseilles, but on arrival there he was met by a police official, who informed him that he would not be allowed to leave Marseilles, and that he must take up his residence at a certain small hotel. The Prince not unnaturally demurred at this, and insisted on going to one of the larger hotels. Eventually this was allowed, but it was intimated to him that he would be under supervision. At the hotel he is said to have uttered threats against the French authorities, and to have behaved in such a manner that the police had publicly to intervene, and searched him and his baggage. One of his friends was also placed under supervision and forbidden to leave for Egypt.

Native circles freely assert that there is a good deal more behind this enforced detention than has been allowed to transpire. Prince Omar Toussoun, who is one of the wealthiest landowners in this country, is well known for his pronounced pro-Turkish and Pan-Islamic sympathies, and his name was frequently mentioned in connection with the running of contraband cargoes of arms, ammunition, and provisions across the western frontier of Egypt during the Tripoli War. He was also one of the prime movers in the raising of the Ottoman War Fund and the Egyptian Red Crescent Fund.

Egypt and Indian Loyalty.

The cable giving particulars of the remarkable demonstration of loyalty made by India absolutely dumbfounded the Egyptians. It is impossible to exaggerate the effect it has had. The natives never realised that British rule was so popular throughout the Empire, and the solidarity which the latter—even those parts of it inhabited by Orientals—has displayed has come as a terrible revelation to those who fondly imagined that their anti-English and anti-Christian feelings found there an echo and sympathy. But more surprised still are the Egyptians to find that of all the Moslem peoples throughout the world the Turks—and their Egyptian dupes—alone display antagonism for France and England and sympathy for Germany. The news and letters that arrive from well-nigh every country where any important Moslem community exists show that the latter is in every case heart and soul in favour of the Entente, and eager to give practical testimony of its good-will. So far few comments on the matter have been published in the vernacular Press, but these will certainly not be long in appearing, for there is no mistaking the impression that has been made.

The British Command in Egypt.

This week Lieutenant-General Sir J. G. Maxwell took over the command of the Army of Occupation from Major-General the Honourable Julian Byng. It is with very great regret that we learnt that the latter had left Egypt, though there was not one of us who did not rejoice with him at the reason which necessitated his departure and which will give him a further opportunity to enhance his already brilliant reputation. Sir John Maxwell's return to Cairo has given general satisfaction. The choice is considered a very wise one at the present juncture; for, in addition to being very popular with Thomas Atkins, he enjoys great influence with the "Gyppies," who still cherish affectionate recollections of him in his Egyptian Army days.

German and Austrian Spies.

The German Chargé d'Affaires and the Austrian Agent embarked, as arranged, with the entire diplomatic and consular staff on the s.s. "Catania" on Thursday. By the same steamer the military authorities deported M. Hugo Hackh, a well-known German piano dealer, who was arrested under suspicious circumstances near Mustapha Pasha Barracks at Alexandria, and who has been forbidden to return to Egypt until the conclusion of the war. The search for wireless apparatus and spies continues most actively. It is understood that one or two of the former have been run to earth, though the authorities are not unnaturally reticent on the matter. Two suspicious characters, an Austrian and a German, have been arrested in Upper Egypt, and have been handed over to the Italian and American Agents respectively for deportation.

INDIAN TROOPS IN EGYPT.

The Indian troops that have been sent to Egypt for garrison duty have evidently created a favourable impression on the native population. On the 19th ult. the troops in Cairo were paraded through the streets of the capital, and some of the Press comments on the military promenade are interesting. Both the *Moayad* (the Nationalist organ) and the *Watan* (Coptic) devoted leading articles to the unusual event. We are indebted to the *Egyptian Gazette* for the following brief extracts:—

The *Moayad*:—"The inhabitants of Cairo witnessed yesterday morning an unprecedented scene in the streets of their town, the scene of the Indian troops reviewed. Both natives and Europeans looked with keen interest and amazement at these young and middle-aged men of India, in military uniforms with turbans on their heads and modern rifles on their shoulders, ready to fight in defence of England which is holding them under her control. . . . . There is no doubt that the Indians have shown all possible proofs of loyalty to Great Britain in this crisis of the war. Have they been wrong or right in this attitude?"

The journal goes on to point out that they are on the right side, because "The fundamental point in the programme of British policy is to grant independence to those nations with which England has colonial or occupational bonds, on the condition that they will remain friendly and loyal to her when the necessity arises."

The *Watan*:—"The British Army, compared with the armies of the other great Powers, is small, but it appears that this small army will not fail to stand against the biggest of armies. The British troops are almost in constant active service in different parts of the world. . . . They offer themselves for active service of their own free will, in accordance with the voluntary system, and for this reason the individual trooper of the British Army should be estimated as equal to ten of the troops of the other Powers recruited under compulsory systems."

The *Misr*, another Coptic journal, remarks:—"We have observed that these troops were as glad to see the Egyptians as the Egyptians were to see them. Their greetings attracted the sympathy of all the natives who saw them, and they received many expressions of welcome in return. They all look very healthy and strong."

"PEARLS OF EGYPT" CIGARETTES.
A. CHELMIS & CO. Est. 1870.
HIGH-CLASS CIGARETTES, Manufactured in Cairo.
London Agents—

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, September 12.

Local Effects of the War.

The Children of Israel of old found it a hard task to make bricks without straw; and it seems to be an equally difficult matter to write a letter in a place where there are only two topics of interest—the progress of a vital war about which we know absolutely nothing reliable, and the utter stagnation of trade, with its consequent distress and misery, only too evident to us. Moreover, there is the likelihood that when one does write the letter will be long out of date when it reaches its destination, if it ever gets there at all. For instance, I have to-day seen The Near East of August 28, in which is a Salonika letter of July 25, since which everything has changed, and a universal catastrophe has been fiendishly brought about.

Owing to a rapidly decreasing stock of paper, with very little hope of further supplies soon coming in, our newspapers are now reduced to one small sheet, with a much smaller second edition or supplement (the same price being charged for each separately), in which is no room for anything except contradictory war telegrams, speculations and rumours as to what Turkey and the other Balkan States are going to do, a series of police orders vainly meant to regulate the price of provisions and fuel, with articles, letters, etc., bewailing the situation in general. We used to have Salonika society gossip, to hear of such places as Albania, Epirus, Mexico, and other foreign parts; but the rest of the globe is now wiped out, and for us exist only the battle-fields, actual and potential, of Europe.

A Deutsche-Levante steamer reposes in the bay, and as no more belonging to that company are likely to be seen in these waters for some time to come, the agent, presumably to occupy his leisure hours, daily posts up at the foot of his office stairs telegrams announcing glorious German and some Austrian victories, messages from the divine William, including a long one to President Wilson endeavouring to justify German cold-blooded murders of women and children, the wanton burning of towns and villages, and other brutal savagery, all of which are read and believed by gaping passers-by. The German consular authorities, too, get from their Government regular official reports of the progress of the war as they wish it to be, which are communicated to the members of their colony, and even read out to an admiring congregation at their church on Sundays. But we poor Britons, having no church of our own, cannot be so favoured, and only twice since the war began has there been sent to our consulate, for our information, any official account of the situation. All we have had communicated to us otherwise are certain Orders in Council whereby we are warned of the pains and penalties we shall incur by lending money to the enemy, and things of that sort, such Orders being in our case ludicrously unnecessary, as, the banks having closed their doors for payments, we cannot get money for our own needs, let alone for an enemy.

The Refugees' Problem.

At last our local authorities have awoke to the fact that, at any rate for the present, we have had enough refugees dumped upon us. A few days ago the "City of Malaga" arrived with about 1,600, but they were not allowed to land, and the captain was ordered to take them to the Piræus. Others have come since then, but they too have been refused and sent off to the same destination. It was certainly high time. Even under normal conditions it would be a big task for these impoverished territories to support through winter the thousands that have already come, but how it can be done with the existing penury one fails to see. The police authorities are at their wits' end even now to devise schemes for keeping down the ever-rising price of provisions. With the very best intentions, they arbitrarily fix sale prices for all articles of personal and domestic consumption, even the quantities shopkeepers must keep in stock and that they may sell to their customers, etc., of which due notice is given in the newspapers. But all this fails to effect the end in view, and these notices quickly become dead letters, and have to be continually modified. The danger now is that merchants will altogether cease to import, and that supplies will certainly fall off if the natural course of commerce is unduly hampered, in which case the situation would inevitably become far worse. In such abnormal times it is hardly likely merchants will go on importing unless they see an adequate profit in the end. The police may force them to sell their present holdings at arbitrary prices, but they cannot compel them to order more and run the risk of further loss.

Moreover, it is whispered that there are cases of plague both here and at the Piræus; and if this be true shipping will certainly fight shy of Salonika, and imports of all kinds will practically cease, a state of famine being the result. There seems a foundation of truth for these rumours, seeing the port authorities have now stopped the lying alongside the quays of all ships coming here, the reason given being the danger of an invasion of rats. Everybody knows the connection between plague and rats. As many steamers, however, are anchoring stern on to the quay, to which they are moored aft by hawsers, rats still have an easy means of reaching the shore.

A Postscript.

Just as I was about to close this letter I have been favoured by our Consul with the contents of an official telegram, dated London, the 11th inst., giving most satisfactory information of the progress of our allied armies. Needless to say it is a very different version from what comes to us "made in Germany," and it has the ring of sterling, not German, silver.

OFFICIAL "NERVES" IN SYRIA.

A correspondent in Syria writes:—"The Turks seem to be getting very nervous of late, and as for suspicion, they start at anything that has any connection, however remote, with the British Government. A young Syrian gentleman, Ibrahim B. Hassoun, who is in the service of the Anglo-Sudanese Government, was lately spending his furlough in this country, and attended the wedding festivities of some relation of his in the Hauran. Afterwards, when travelling to Haifa, he was astonished to find himself accosted by soldiers and an officer, who, after asking what brought him to that neighbourhood, hailed him off before a Court Martial for examination. He explained who he was, how he came to be in the country, and so forth, and was finally set free. But it is clear that the military authorities still regard him as a spy in the service of the British Government, and have only released him because of lack of evidence.

"In connection with this state of suspicion it may be noted that no telegram in English, though written in the plainest of language, is accepted. The Turks appear to think that English has peculiar powers of its own!"

NEAR EAST BOOKSHELF.

HOW TO LIVE IN PERSIA.*

For the archæologist, for the sportsman, and for the traveller who likes to wander leisurely along little-used tracks amidst varied and very often grand scenery, Persia possesses attractions that enable it to stand comparison with any country in the world. And though it cannot boast a large number of European residents, those who have lived long in the land almost always look back on their residence with real pleasure. But it must be acknowledged that it is not a country in which the average European or American can live, or in which he can undertake even a short journey without taking certain precautions that are not called for in more advanced countries. Should he endeavour to do so he is like to come to grief quickly, for the climate is original, so are the autochthons; and it does not pay to take liberties with either of them. The traveller or would-be resident, however, who is prepared to adapt himself to his surroundings need fear little either from the climate or from the natives; and how to carry out the process of adaptation is told very fully and clearly by Dr. Neligan. Travellers and residents in other countries of the Near East will also find a great many invaluable "tips" in the book. There are, for instance, instructions how to form and lay cement flooring of various kinds; how to rig up a simple form of fixed bath; how to prepare and apply a top dressing for a lawn tennis court; what kinds of water vessels to use on a journey; and much more information of a similar eminently practical kind that should be useful to residents in many parts of Asiatic Turkey and the Sudan, as well as to those in Persia. What the author writes about carpets and the buying of carpets, about Persian holidays, Persian time, and the Persian and Arabic calendars is almost as interesting to the stay-at-home as to the traveller who knows his Orient well.

The subject of "Routes from London to different parts of Persia" provides material for a very useful chapter; while notes on "Some of the Principal Main Routes in Persia" are given in the next chapter. The latter, being "in each case the result either of personal experience or of that of other Europeans who have recently done the journey," are likely to be more reliable than such things very often are; but the reader is expressly warned to make enquiries before deciding to follow any particular route. This is such a simple precaution that the warning seems almost superfluous; but the countries of the Near East appear to possess an extraordinary fascination for travellers of the most happy-go-lucky character, so, doubtless, the author is well advised in including it. The chapter on "The Care of the Health" constitutes a veritable *vade-mecum* on this important subject, and that on "Outfit" should prove valuable to the novice. In connection with the subject of "Stores" Dr. Neligan has some particularly sound advice to offer:—

> It is a great advantage as well as a great economy to be able to live entirely on the country in which one finds oneself. It is easy to do this in Persia, but the ability to do so is largely a question of individuals and of locality. While some people find life impossible without added luxuries in the shape of "tins" and bottled beer, others are quite content with what is to be found on the spot! Probably having investigated the local resources more thoroughly, they are able to obtain better results.

And again:—

> . . . A plea in favour of making the best of the local resources and supplies must be entered. There are a number of excellent Persian dishes, and also vegetables and herbs, which it is a pity that Europeans do not use more. On the other hand, a protest must be made against the use of a lot of preserved edibles. The bad housekeeper is generally known by the quantity of "tins" which he or she uses. . . . Apart from the question of expense, preserved food is seldom the equal of fresh food.

If Europeans in Persia and other countries of the Near East would lay these hints to heart, and act upon them, their health would almost certainly benefit.

The author's remarks upon the Persians and on the climate of Persia are well worth quoting. After pointing out that many Europeans are prone to judge all Persians by what they see of the official classes and of servants, and that this is not reasonable, he proceeds:—

> To the credit, then, of the Persian may it be submitted that he is intelligent, hospitable, and courteous; that he has a keen sense of humour, and is devoted to children, flowers, and sport; that he knows his country's poetry and history to a remarkable extent. The country people are industrious, hardy, frugal, and, for the most part, peaceably inclined. From our point of view the Persian's love of work is not manifest, and his business methods are leisurely and devious to the point of vexation (what else can be expected in a country where time is of no account, and one hundred miles a day is express travelling?). The Persian has the faults of Eastern nations and of his creed. Corruption is rife; truth is a matter of convenience, but there are striking exceptions; take, for instance, the honesty of the *charwardar* (muleteer) and *hammal* (porter) classes. It is only fair, however, to remember that in questions of morals, as in other matters, the point of view accounts for much. Many of the Persian's bad points are the result of a system and of much misgovernment. Revolution, civil war, maladministration, epidemic disease—these have too often caused the cup of Persia's troubles to overflow. But it must be owned that, as far as foreigners are concerned, though considered lawful prey, as everywhere else in the world, in no other Eastern country have they been treated so uniformly well as in Persia. And this holds, in spite of recent unfortunate incidents.

As to the climate, from what may be called the European point of view, the author sums up as follows:—

> The insurance companies, owing to ignorance of the conditions in Persia, class it as a tropical country, and as a country where, on account of internal disturbances, there is danger to life. As a matter of fact, in the opinion of all those who are best qualified to judge, neither view is correct. . . . Persia is *not* a tropical country; for the greater part of the year the climate is temperate. . . .

He adds:—

> Europeans do not run any risk of life worth considering. Persia differs very much from, say, China in this respect. The ordinary traveller may be robbed on the road, but he is not killed.
>
> It might be further pointed out that in a country where there are no railways as yet, and not two dozen motor cars, no overhead cranes, no "tubes," no houses that will burn, and no militant suffragettes, the ordinary risks to life are somewhat less than in certain other parts of the world.

Lest the remark as to the few motor cars in the country should lead the hasty reader to suspect Dr. Neligan of being an opponent of the all-conquering car, we may add that the notes upon "Motor Cars in Persia" that will be found on pages 182-185 are the most complete of their kind that we have read. In connection with the state of the country it is pleasant to find the author paying a well-merited compliment to the Swedish officers who have been training the Gendarmerie. He writes of "a marked improvement" in the state of the principal roads as regards disturbances, and considers that "the prospects of general security being restored are bright." We sincerely hope that the present disturbed state of Europe will not result in any dimming of those prospects.

* "Hints for Residents and Travellers in Persia." By A. R. Neligan, M.D., etc. (Bale, Sons, and Danielsson, London. 5s. net).

NEAR EAST BOOK NOTES.

"Foreigners in Turkey: Their Juridical Rights" is the title of a book published a fortnight ago from the Princeton University Press. The author is Professor P. Marshall Brown. The book could hardly have made its appearance at a more suitable moment.

Messrs. A. and C. Black announce for immediate publication "Lands and Peoples of the Bible," by the Rev. James Blaikie, F.R.A.S. The volume is illustrated with numerous plates, and the author makes liberal use of the results of modern exploration in Palestine, Babylonia and Assyria, Egypt, and Syria in his studies.

Among the Victoria League publications is a leaflet entitled "The Servians and Austria," by Mr. G. M. Trevelyan. The price is ½d. for one copy, large quantities being sold at lower rates.

W. N. WILLIS'S GREAT BOOK.

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 42-60, Waterloo Rd., London.

TANGIER TO TEHERAN.

I see that THE NEAR EAST published an article last week on Consular Post Offices in Turkey. Doubtless this was a serious and sober screed, but from my own experience in a certain city of Syria I can truly say that one at least of the Consular post offices was not then a serious institution. Being a stamp collector, with a weakness for the overprinted issues provided by the foreign post offices in Turkey, I entered, and at the *guichet* (the arrangement is similar in *all* the offices) demanded one specimen of each value on sale. The postmaster, pleased to find a purchaser for some of his higher values, became affable. He produced obsolete rarities from a private drawer, offered to postmark my stamps lightly, and expressed opinions freely about things philatelic in particular, and matters Ottoman in general. As I went out I made to post a letter in the box provided for the purpose. "Don't do that," cried the postmaster; "if you want your letter to *get* anywhere, you had much better post it at the Austrian office!"

***

I see that the King of Roumania, or his successor, is supposed to be upon the point of qualifying once more for that proudest of German titles, *Mehrerer des Reichs*. As his Majesty already bears four territorial quarterings on his shield of arms for the Principalities of Wallachia, Moldavia, the Banat of Craiova, and the territory of the Dobruja (*Azure two dolphins affrontées gold*), he will probably add another for Transylvania (or Ardeal, as his people call the Principality) should the fortune of war subject it to his sceptre. As borne by its present Imperial and Royal Apostolic owner, the shield of Transylvania might well make a neighbour envious. It may be blazoned: *Per fess azure and gold, over all a bar gules from which issues a demi-eagle displayed sable between in chief a sun-in-splendour and a crescent silver. In base seven towers sable.* The seven towers undoubtedly refer to the seven towns from which the *Erdély* of the Magyars, our Transylvania, takes its German name Siebenbürgen. The upper part of the Transylvanian shield is very reminiscent of the full coat of Wallachia: *Azure an eagle displayed holding a sceptre, a sword, and a Cross, in dexter chief a sun, all gold.* His Roumanian Majesty will thus be able to embroider on his coat-of-arms an eagle and a half, two suns, and two crescents, as he already bears one on his Moldavian quartering *Gules a bull' head caboshed, between its horns a star and in sinister chief a crescent, all gold.* His motto might well be "Heaven's Light our Guide," if that were not already taken, as, in addition to the heavenly bodies enumerated above, Craiova provides yet another star: *Gules on an open crown, a lion rampant crowned and holding a star, all gold.*

***

Dame Naturo has a reputation for studying the current history of mankind, and doubtless reads her daily paper to see what is happening. As the result of her diligence she nearly always takes steps to assist mankind when by its own folly it has unduly depleted its numbers—scientific observers have learned names and columns of statistics to prove this, and doubtless they will eagerly seize upon the Hatches, Matches, and Despatches column of the *Echo de Bulgarie*, in which is recorded Nature's latest recuperative effort. Fearing that the Bulgarian race might have suffered unduly as a result of its recent arguments with its neighbours, Dame Nature has arranged that in one district alone three Bulgarian mothers should present their respective husbands with triplets—all boys in all three cases! What makes it the more remarkable is that the proud fathers all belong to one political party. Really the statistics of the scientific observers will tend to become complicated if party politics come to be mixed up with the statutory returns of the Bulgarian registrar-general.

***

It is remarkable to what an extent St. George, the hero of Christian and Moslem alike, is concerned in the war in his capacity as patron saint. Not only is his Cross, scarlet on a white field, borne on every British flag on land, but it appears twice on the White Ensign. The Order of the Garter is peculiarly his own, while he shares the patronage of another British Order with the Archangel Michael. This body somewhat illogically has its chapel in the Cathedral of St. Paul. In Russia St. George is the patron of an Order admission to which is confined to those, of whatever rank, who have performed some pre-eminent feat of arms in the field, and the saint also appears on horseback on the Imperial Russian coat of arms. In Germany Bavaria alone seems to hold the martial saint in reverence, but in Italy, where every preparation is being made for war, the great port of Genoa is under St. George's patronage, and in the old days was proud to call her republic by his name. The piety, or perspicacity, of mediæval monks ascribed the honour of being St. George's birthplace to Lydda, on the Jaffa-Jerusalem Railway. I notice the din of war has penetrated even to that spot, and that the mobilization in Palestine is once more disturbing the pilgrim route up from the sea to the Holy Places.

***

In his letter published in our issue of September 27, 1912, our Cairo Correspondent referred to a speech made by Admiral Breusing at a meeting of the Pan-German League. I came across the passage to-day, and it reads rather strangely. For it records that the Admiral "declared, that in case of war with Great Britain, Germany's first object would be to make, with the assistance of Austria and Italy, a land attack on Egypt, in order to stop the British food supply." Presumably Admiral Breusing knew what he was talking about, so we must conclude that Germany's calculations were not quite so perfect as she had always led the world to suppose. At any rate, we have not heard of any above-board attack on Egypt, either with or without the assistance of Austria. Neither has Italy shown any marked inclination to pull the chestnuts out of the fire for the Kaiser. And up to the present the British food supply has not been cut off. Admiral Breusing and his friends must guess again.

***

Neutrality appears in some places to be a word capable of modification. A country is able, seemingly, to be "strictly" or "very neutral," or it may be just "neutral," or it can be like a correspondent who writes, "of course, we are neutral, but we sincerely hope you will win." As far as I can make out from reading the papers the Turks have declared that their neutrality is something really monumental and epoch-making among neutralities—supposing that the word has a plural—and have repeated this statement on several occasions. Yet men can be found to carp at the Ottoman interpretation of the duties of a neutral, which is held to lack at times that dispassionate outlook upon a warring world which The Hague expects of everyone who does his duty. On the other hand, a neutrality such as that professed by Italy or Roumania can be regarded by one side in the present conflict as being "a sort of" neutrality—and very diluted at that. Indeed, it is hard to find that adamantine imperturbability and noncurance which upholders of the abstract read into the epithet neutral, unless, perhaps, it be in Bolivia or Abyssinia.

***

Mr. A. Hilliard Atteridge had a most interesting article in the September number of *The British Review* on General Brialmont. The Belgian military engineer who designed the fortifications of Liège, Namur, and Antwerp has, as most of my readers are aware, also left a monument to his skill in Eastern Europe. In 1883 he was trusted by the Roumanian Government to prepare a scheme of defence for the country. It was on the basis of the costly experiments made in constructing the forts round Bucharest that he designed the fortifications of Liège and Namur. Perhaps it is not so widely known that he prepared a plan for the Ottoman Government for the fortification of Constantinople. But the plan has never been carried out, having been postponed to the *bukra* which never comes.

CORSAIR.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

TURKEY AND GERMANY.

To the Editor of THE NEAR EAST.

Sir,—

"Our life and prosperity will be decided by the results of the battles in Western and Central Europe. If Germany lives, we live: if Germany loses, we will lose our national existence."

This is a quotation from the *Public Opinion*, a widely read Beyrout Arabic paper.

It is needless to say that this is the general opinion here. Even the most ignorant are living in the hope of seeing Germany win, and through her the Turkish Empire strengthened and consolidated. German news is printed and sold in the city, while the restrictions upon Reuter are increasing daily. The other day the newspaper editors were warned against publishing the English, French, and Russian Ambassadors' telegrams, while the telegrams from the German and Austrian Ambassadors are typewritten and sold in the streets. Nor is the Turkish Government satisfied with this. Two weeks ago, in one of the Turkish Army camps in the city of Jerusalem, there was held a reception in honour of the German colony in that city. A friend of mine told me the other day that while at Jerusalem he walked through the Moslem Cemetery just outside the east wall of the city to see the "Golden Gate." He

Digitized by Google

was stopped by a Moslem, who told him he couldn't go any further because he was a Christian My friend told him that he was an American and that the Americans are going to help the Germans! He was immediately set at liberty, and he paraded the whole cemetery.

It is inexplicable that with all the demonstrations of sympathy that the Turkish Government shows towards the German, Turkey is going to stay "neutral."

Take the "Goeben" affair. The "Goeben" and her mate could have easily steamed into the Adriatic and then stayed there to help the Austrian fleet. Instead of that they took the risk and went through the Dardanelles. It is hardly conceivable that Germany at this time should be able to spare one of its finest battleships, if in sending it to Constantinople the Germans were not counting on Turkey doing something for them in return. Thanks to fortune and the good sense of Talaat Bey, however, Germany has not been able to pull Turkey into the battlefield yet. We hope in the interests of this country, it will never be able to.

The suppression of the Capitulations of European Governments at this critical time is very deplorable. Under other circumstances it might have been perfectly right for Turkey to pass a law like this, but at present it seems only ominous. Meanwhile, military preparations in Palestine are going on with the utmost rapidity. Large buildings are being leased for use as hospitals, and the troops are drilled morning and afternoon.

Yours, etc.,
AN OBSERVER.

Jerusalem, September 14, 1914.

THE CAPITULATIONS.

To the Editor of THE NEAR EAST.

Sir,—May I be allowed to say, on the pro-Turkish side, a few words with regard to the above, which have been abolished by Imperial Iradé as from the 1st October, 1914, and with regard to which I do not doubt but that you will have many letters from those who are only too keen to blame *everything* that Turkey does, on principle?

Your Constantinople Correspondent, though scrupulously fair in his methods of argument, is rather too keen to look at the various questions that arise with a partiality for the Christian grievance, whatever it may be, and with too little allowance for the Turkish aspect of the same question. I therefore anticipate that he may not give force to the one point that I would like to emphasize—viz., the terribly hindering and unjust effect in the past of the whole system of the Capitulations on the Ottoman Government, and on the Ottoman population in general.

In connection with the various letters that I have written you from time to time, and that you have been kind enough to publish, certain of my late opponents have tried by gentle verbal suasion to convince me how wrong I have been to stick up for the Turks, and how harmful are the various Britannico-Turkish Associations to which I and other friends of Turkey belong. The attempts were, of course, all doomed from the outset, for the very bed-rock of the other side of the question is either one of two things, sometimes both: (a) a *racial* and ingrained dislike of the Turks (when it is not a question of an Englishman); and (b) a more or less avowed antagonism to the Islamic religion and, consequently, a natural desire to support the cause of Christian nations with which Turkey may have differences. With regard to the former, the tendency is, of course, natural. When for ages past there has been friction between races it is too much to expect that any particular member of one of the races in question can be *quite* impartial in an argument on the question of his country's relations with that of the other race; there may, of course, be exceptions, but I think a fair example would be to say that if an Englishman were now to be discussing the question of Anglo-German relations there might be at least a *slight* bias in his argument in favour of his own country. It is only natural, and no one could blame him. But I think that when it is someone of a nation that has *not* a standing cause of friction with the Ottoman Empire, that that person should not be, or, rather, should try not to allow himself to be prejudiced against the Turkish side simply because of the question of religion.

In our epoch, and in England in particular, differences of religion do not make causes of dissension amongst the population at large, and I think that those who have to consider or comment on the relations of the races in the Near East should try more than they do at the moment not to be influenced by the fact that one side is Christian and the other Mohammedan. In this part of the world at any rate, the Christian races have much to learn from the practical observance of their religion by the Mohammedans in the matter of charity and filial respect (to quote two instances). And I think it is safe to say that no one ever starves to death in Constantinople. Can the same be said of any Christian capital? Let us, then, abandon our one-sided view of the problems here and admit that Turkey has been crushed for centuries under the obviously unfair burden of the Capitulations under which, not only were foreigners relieved from the payment of taxes applied to all Ottoman subjects, but the State was unable to make its own laws in the matters of Customs duties, etc., without first obtaining the consent of all the Great Powers—a process which at the best of times meant the granting of reciprocal and generally ruinous concessions in return, and took interminable periods to accomplish. Imagine government under such conditions! Add to this the continual interference of the Great Powers in every department of the State, and the inability of the latter to impose punishment on the breakers of its laws; and on the top of all this remember that these Capitulations were originally granted by the Ottoman Rulers of their own free will under conditions of time and history quite different to modern civilisation, and you may have some faint idea of the abominably unfair and unjust burden under which the Ottoman people suffered.

I do not say that our Government could have done anything alone; for unless all acted together we would have given our consent when other Governments would have bargained for theirs—thereby causing possible trade disadvantages to Great Britain. But what I do say is that Turkey, in taking advantage of the present European situation to relieve herself of the millstone round her neck, has acted quite justifiably, and her Government is to be congratulated on its well-timed and bold move. I trust that the various European Powers involved will accept the *fait accompli* with good grace, and that, in particular, Great Britain will accept it in such a spirit of good will that it may cause Turkey to forget its disappointment over the "Sultan Osman" incident, and its bitter memory of the breach of faith of Europe, in the famous declaration at the outset of the Balkan War that, whatever the result thereof, the territorial situation of the opponents would remain unaltered.

Yours, etc.,
ARTHUR P. TULLY.

Constantinople, 11th September, 1914.

EGYPT AND THE PRESS.

To the Editor of THE NEAR EAST.

Sir,—In view of the friendly feeling towards England displayed by Egyptians, and of the loyalty of Indian Moslems, I have no doubt that Englishmen will be even more ready than they usually are to listen to any request for consideration that may be put forward by Egyptians and by Moslems. I therefore take this opportunity of writing to ask whether it would not be possible to put an end to certain annoyances to which we have been subjected in the past, and which might quite well have done irreparable mischief. I refer to the ill-informed and frequently grossly inaccurate references to Islam, Moslem teachings and traditions, and Moslem ways and customs that appear only too frequently in both Egyptian and English papers. Thus, at the time when mistrust was intense in Egypt a certain London paper wrote "Unless the leopard of Mecca changes his spots," and various others misquoted certain verses from the Quoran to prove that Moslems were fanatics, thanks to the teachings of their faith. But what made matters worse was that a certain local paper in Egypt, immediately after the murder of the late Boutros Pasha Ghali, began inserting certain insinuations that added more fuel to the fire. Thus, upon proposing to change the names of certain streets it said that if the name of Sharia Clot Bey were changed into Jennet-el-Muameneen it would not have failed to create tremendous enthusiasm among "its hard-labouring inhabitants." To indicate the gravity of the impression of such a paragraph I need only point out to the English reader that the "hard-labouring inhabitants" of that locality are merely people who run gambling hells and all sorts of infamous places, and that "Jennet-el-Muameneen" means the "Paradise of Moslems." Again, that paper undertook to criticise the style and literature of the Quoran, and, pointing out the fallacy of Arabic logic, it gave a literal translation, or, so to speak, a false translation, of one of Al-Mutanibbi's best lines, in which he said: "He would have listened to your pleadings were he conscious, but he whom you reproach has no conscience." Such insinuations caused at the time so much resentment and fury among all classes of Egyptians that Sheikh Abdul-Aziz Shawish, who was a teacher in Cambridge University and who has a good knowledge of English literature, wrote in the heat of the debate that "The English language is devoid of literature." It is not too much to say that the publication of such statements and views was the prime factor in widening the gulf between English and Egyptians at the time when the Egyptian authorities did hold the reins of the Administration, and the Egyptians had therefore nothing to complain of about the Anglo-Egyptians. English writers and journalists would certainly do better to bear in mind constantly that captious critics are always abroad and ready to put all sorts of constructions on such quotations.

It is such most irresponsible writings, of which the English authorities would hardly have been conscious, that would enable Germans to pose as protectors of Islam, arming themselves with such phrases as indicating England's designs on, and intentions towards, Islam. And while the Germans and others have been energetically busy, both in Constantinople and Cairo, in furthering their propaganda of being the champions of Islam, England, feeling sure of her "clean hands" and her honour—which, in the circumstances, proved to be a serious mistake—did not trouble in any way to bring home to the Moslems any of her researches into and knowledge of Islam. Thus, while Baron Oppenheim was spreading his propaganda broadcast, from Cairo to the Euphrates; while the *Ottoman Lloyd* was publishing inflammatory articles in Constantinople, and the German director was devastating the Khedivial Library, and introducing into it as many German books as possible (whether translated into Arabic or not), the English Government not only did not trouble to keep its popularity among Moslems unimpeachable, but it is almost certain that those lamentable publications passed quite unnoticed.

What England badly needs is to step forward and explain herself to the people. Her best policy would be to organise a Press campaign and a literary campaign that would not only dismiss German (and other) mischievous machinations, but would popularise English ideas, ideals, and traditions, thus making England understood.—Yours faithfully,

ALI F. MOHAMED.

THE PRESS ON THE NEAR EAST.

The Mpret's Failure.

The following extract is from *La Gazette de Lausanne* of September 12:—

Dès son débarquement, le mbret rencontra des difficultés qu'il n'avait pas su prévoir. Nous avons rapporté au jour le jour les mesures qui, prises dans les meilleures intentions, le rendirent impopulaire auprès d'une partie de ses sujets. Il vint un jour où ceux-ci s'armèrent les uns contre les autres, et ce jour-là, qui en faisait un souverain de guerre civile, rendait inévitable la chute du prince de Wied. Réfugié à Lugano, le mbret peut annoncer à ses sujets sa rentrée prochaine dans sa bonne ville de Durazzo: nul n'est dupe de ce langage et lui-même se fait moins d'illusion que personne.

Germany's "Friendship for Turkey."

An editorial note in *The Orient* of September 2 calls attention to a point of some importance, and one which the Turks, who are such warm admirers of the Teuton, would do well to reflect upon:—

Italian neutrality up to the present moment has been based on her declaration first that the war into which Austria and Germany plunged was one of aggression and not of defence, and secondly that those two empires did not consult her as their ally before declaring war; and that, therefore, her alliance with them did not bind her to act at all. We have no indication that Germany or Austria will call in question the correctness of these statements of their former ally. The facts alleged by Italy may be regarded as correct. We wish to call attention to one fact logically resulting from these allegations. The Triple Alliance has up till now been very unified; no such rift in the lute has occurred before. Then the same principles now asserted by Italy may be presumed to have guided the Alliance for at least the past four years. Hence we may assume with justification that when Italy made her attack on Turkey in September, 1911, she had previously consulted the other members of the Alliance and obtained their consent. Otherwise, Germany would have had good reason to come to the aid of her friends the Turks against an attack that was far more unprovoked than that by Austria on Servia. This goes to show that Germany was cognisant of the plan of Italy to seize Tripoli, and did not lift a finger to help Turkey. We wonder how the Turks think of this fact as bearing on the attitude of Germany toward them to-day.

The Capitulations in Egypt.

Writing on "The Danger in Egypt" in *Truth*, "Scrutator" remarks:—

Under the capitulations it is doubtful whether the Austrians and Germans can be commanded to leave Egypt, or whether trading with those persons is trading with the enemy. In Egypt every man's house is his castle in the literal sense, for the house of an Italian or Austrian subject living in Cairo or Alexandria is Italian or Austrian territory. Amongst the whites there is no such thing as an Egyptian citizen. During a European war this is a very dangerous state of affairs. What is wanted is to make an end of the fiction of Turkish suzerainty and the hypocrisy of Egyptian autonomy, and to boldly declare Egypt to be a British Protectorate. This would immediately restore confidence; France would not object, while Germany and Austria would be excluded once for all.

The Turk through American Spectacles.

If it is nothing else the following comment from *The New York World* (September 15) is amusing. It is under the characteristic heading of "Bully for the Turk!":—

Promptly upon its denunciation of the capitulations, the Sublime Porte gives proof of Turkey's fitness to enter the sisterhood of free nations by raising its protective tariff 100 per cent.—almost, indeed, up to the average rate to which ours was reduced by the Underwood Bill. What a noble campaign of education must have preceded this enlightened action! "Bismillah!" shrieked the spell-binders of Stamboul. "The foreigner pays the tax. Rally to the defence of home industries against the pauper labour of Germany and America! Spurn the sophistries of the Cobden Club; and if British gold has corrupted your would-be leaders to the debasing heresy of free trade acquaint them with the cord and the Bosphorus! I have spoken. Salaam aleikoum!" In rural regions the argument varied. Much laughter must have greeted the story of Hodja Hussein, who sheared his fat-tailed sheep backward because with only a 14 per cent. tariff on wool he couldn't bear to look the intelligent animals in the face. By whatever argument achieved, this is a glorious victory. How it heartens the true friends of the poor labouring man!

Roumanes in Austria.

We quote below from an article in *The Manchester Guardian* (September 29), under the heading "Roumania's Chance":—

It is not to be denied that the Roumanes of Transylvania are placed in anything but happy material and political conditions. Forming a class of poor peasants under Magyar landlords, being, moreover, subjected to the merciless process known as Magyarisation, they of late have also been gradually deprived of their religious liberty and robbed of their churches and church schools, and transferred in some instances to the jurisdiction of Catholic bishops. It must be obvious to every Roumanian that no such golden opportunity for seizing Transylvania and completing the nation's unity on one side at least will ever recur. Roumania, in fact, is in the same position as Italy, and it is not without significance that rumours should speak of negotiations between the two countries. Roumania is able to invade Transylvania with at least 300,000 well-trained men, and if Bulgaria should think the moment opportune for seeking revenge upon her for the Treaty of Bucharest, Roumania will be able to put against her another quarter of a million.

Turkey and the Balkan States.

The following extract is from an article in *The Weekly Dispatch* (September 27) by Mr. H. Charles Woods:—

From a diplomatic point of view, the positions of Italy, Roumania, Turkey, and Bulgaria are by far the most important feature of the international situation. At the present moment, for various reasons, each of these countries is maintaining a neutrality, the possible duration of which it is impossible to calculate. As far as Italy and Roumania are concerned, as it is now unlikely that either of these countries will take the field on the side of Austria and of Germany, it is only a question whether they will permanently maintain their present attitude or whether they will take the field on the side of the allied entente Powers. Agitations are reported to have taken place in both these countries in favour of war, but it is natural that no wise Government in either of them should agree to risk the dangers of military operations until it has assured itself that the diplomatic field is clear. The positions in Turkey and in Bulgaria appear to be uncertain. In the former country the situation is always complicated by the attitude of the Chauvinistic section of the Committee of Union and Progress, which may at any moment predominate and force the hand of the present Grand Vizier (Prime Minister), who is reported to be in favour of peace. The attitude of Bulgaria almost entirely depends upon whether means can be found to compensate her for the loss of, or to give back to her, territory which should have remained Bulgarian after the Balkan wars.

SERBIAN RELIEF FUND.

Lady (Ralph) Paget, the Hon. Lady Whitehead, Lady Boyle, Lord Curzon of Kedleston, Lord Fitzmaurice, Sir Valentine Chirol, Sir Arthur J. Evans, Mr. T. P. O'Connor, Mr. J. St. Loe Strachey, Mr. G. M. Trevelyan, Mr. Bertram Christian, and Mr. R. W. Seton-Watson are the signatories of an appeal which has been issued on behalf of the Serbian Relief Fund. The circular states:—

In practice, if not in theory, Serbia is as much our ally as Russia, and as such is entitled not merely to our esteem and sympathy, but also to assistance of a more practical kind. In striking contrast to her achievements are the meagre resources of the little country. For the third time in two years she is involved in war, and this time her very existence as a nation is at stake. The last two wars cost her not less than 50,000 lives out of a population of barely three millions, and yet despite her exhaustion she has hurled back Austria's boasted punitive expedition, and in her turn inflicted severe punishment on Austrian armies. But this success has been won at fearful cost, and the shortage of doctors and nurses is very great—greater than in any other part of warring Europe.

A small detachment of ten British nurses, under the leadership of Mme. Grouitch, is now in Serbia; but these gallant volunteers urgently need further help. How urgently is best proved by the pathetic appeal of the Serbian Government enjoining strict economy in lint, cottonwool, and hospital appliances.

Nor is this all. Serbia's undefended capital has been systematically bombarded by Austrian and Hungarian troops; the fertile district of Shabatz has been brutally ravaged by the invaders in the opening weeks of the war, and the suffering among non-combatants in the north of Serbia is therefore quite as acute as in Belgium and Northern France. Under these circumstances we have no hesitation in appealing to the generosity of the British public in aid of a country which is assuredly fighting our battles as well as those of her own race.

Any help will be most gratefully received and acknowledged. Parcels of clothes, etc., especially medical and surgical appliances, should be addressed to Lady (Ralph) Paget, at 195, Queen's Gate, S.W.; cheques should be sent to Sir Edward Boyle, Bart., Hon. Treasurer, Serbian Relief Fund, at 63, Queen's Gate, S.W., or to the account of the Serbian Relief Fund at the London County and Westminster Bank, Limited, 1, St. James's Square, S.W.; inquiries should be addressed to Bertram Christian, Esq., chairman of executive, at 22, Berners Street, Oxford Street, W.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian Old style.	—	Moslem.	Jewish.
1914. Oct.	1914. Sept.		1332. Julkada.	5675. Tisseri
2	19	Friday	12	12
3	20	Saturday	13	13
4	21	Sunday	14	14
5	22	Monday	15	15
6	23	Tuesday	16	16
7	24	Wednesday	17	17
8	25	Thursday	18	18

Sunday is the birthday of her Majesty the Queen Dowager of The Two Sicilies, sister of the late Empress of Austria.

Sunday is the birthday of H.I.H. the Grand Duke Paul of Russia, husband of the late Princess Alexandra, sister of his Majesty the King of the Hellenes.

Tuesday is the birthday of H.I.R.H. the Archduke Clement Salvator of Austria-Tuscany, grandson of his Imperial and Royal Apostolic Majesty the Emperor of Austria.

Tuesday is the birthday of H.I.H. Mehmed Nizam-ed-Din Effendi, son of the Heir and twenty-seventh in order of succession to the Ottoman Throne.

Wednesday is the birthday of her Grand Ducal Highness Princess Antoinette of Luxemburg and Nassau, niece of the late Archduke Karl Ludwig of Austria, brother of the Emperor.

Thursday is the birthday of his Majesty the King of Montenegro.

Thursday is the birthday of H.R.H. Prince Harald of Denmark, nephew to her Majesty the Queen Mother.

Thursday is the birthday of H.I.H. the Grand Duke Serge of Russia, brother-in-law to the Grand Duchess George, *née* Princess Mary of Greece.

H.R.H. Oscar of Prussia, a nephew of her Majesty the Queen of the Hellenes, has been taken seriously ill from heart weakness. His condition is considered grave.

H.H. Prince Friedrich Wilhelm of Hesse, a nephew of her Majesty the Queen of the Hellenes, is reported to have been seriously wounded.

It is reported from Rome that the Albanian Senate has elected H.I.H. Burhan-ed-Din Effendi, son of the ex-Sultan, to be Mpret of Albania.

Lord Roberts attained his eighty-second birthday on Wednesday.

Lord Roberts, who visited Serbia some years ago, has written to Mme. Christitch:—"I am altogether in sympathy with Serbia in the gallant and successful struggle she has made against great odds in meeting the unprovoked attack of Austria, and I certainly think this country should show her appreciation of the assistance Serbia's army has given the Allies, the great sacrifices she has made, and the material losses she has suffered in their cause, by sending her whatever help she may need at the present time, whether in money or in comforts for her sick and wounded, as some recognition of the great part she is playing in this war.

According to the French papers H.R.H. Prince Adalbert of Prussia, a nephew of Her Majesty the Queen of the Hellenes, who was reported from Copenhagen to have died in hospital in Brussels, was originally wounded by his own men.

Field-Marshal Sir John French, Commander-in-Chief of the British Army in France, attained his sixty-second birthday on Monday.

The Constantinople correspondent of *The Times* reports under date of September 20:—Admiral Limpus and his staff left on Wednesday, taking with them the good wishes of a host of friends. The fact that the Turkish authorities bade him no official farewell, only one Turkish officer in mufti being present at his departure, has aroused much comment.

According to a Reuter's message from Constantinople a statement which appeared in the Press that Sir Richard Crawford, Adviser to the Ottoman Ministry of Finance, contemplates resigning his post in the Turkish service is quite unfounded.

The Bulgarian General Todoroff, commanding the Rilo Division, has been decorated by the Tsar with the Order of St. Stanislaus (First Class).

The new American Minister to Persia, Mr. Caldwell, and his wife, are reported by *The Orient* to have left Constantinople on September 2 by Persian steamer for Batoum on their way to Teheran.

Lieutenant-General Sir E. T. H. Hutton, K.C.B., K.C.M.G., who has been appointed to command the 21st Division of the Third New Army, served in the Egyptian Campaign of 1882 including the battle of Tel-el-Kebir, and commanded the Mounted Infantry in the Sudan in 1884-5. He also served with distinction in the South African War.

On the occasion of the marriage of Mr. Genadieff, H.M. Tsar Ferdinand of Bulgaria has presented to the leader of the Stambulovists a gold *tabatière* with the royal monogram. Madame Genadieff has received a valuable brooch.

The marriage took place on September 5, at St. George's Cathedral, Jerusalem, Palestine, of Mr. Otis A. Glazebrook, American Consul in Jerusalem, to Emaline Adelia Rumford.

Mr. Charles H. Riggs, son of the Rev. Charles W. Riggs, formerly of Aintab and now of Oberlin, U.S., has been appointed as a missionary of the American Board and a pioneer in agricultural work in Albania.

Major Greenhill Gardyne, whose marriage to Miss Rachel Lethbridge took place by special licence on Saturday, 26th ult., at the Church of St. Michael and All Saints, Lyndhurst, joined his battalion of the Gordon Highlanders in Cairo last winter.

The announcement of the marriage of Major G. R. Macnab, Gordon Highlanders, to Miss Mary Winifred Kay, daughter of the late Christopher Kay and Mrs. Kay, of Ravenscroft, Middlewich, will be read with great interest in Cairo, where both the contracting parties were well known and very popular. The bride was a frequent visitor to the capital, where she resided with her near relatives, Captain Broadbent, of the Camel Corps School, and Mrs. Broadbent. Major Macnab has also many friends in Cairo, and deserves special credit for the energies he has bestowed upon the efficiency and working of the Soldiers' Club. Very few persons beyond their immediate relatives were present at the wedding at All Saints, Ennismore Gardens, on the 24th ult. Mrs. Kay, the bride's mother, gave her away, and her immediate attendants were her cousin, the Hon. Dorothy Emmott, and Miss Constance France Hayhurst. In the unavoidable absence of a brother officer, Major Macnab was attended by Mr. John Kay as best man.

We regret to announce the death of Lieutenant-General James Henry Bor, C.B., C.M.G., which took place on Wednesday last week at Gaulston House, Coole, Westmeath. The late officer, who had been Aide-de-Camp to the late King Edward (1904 to 1910) and to King George (1910-11), saw a good deal of service in the Near East. In 1878 he accepted service in Cyprus, under the Foreign Office. From 1884 to 1892 he was Chief Commandant of the Cyprus Military Police. Appointed Colonel of the Cretan Gendarmerie in 1897, he served in Crete throughout the insurrection of that year, being decorated for his services, and receiving from the King of Italy the silver medal for gallantry while suppressing the mutiny of the Albanian Gendarmerie.

General Straghan, whose death was mentioned in last week's issue, was the father of Mrs. Blunt, whose husband, Lewa Blunt Pasha, has for many years served with the Egyptian Army.

According to a Reuter's message a telegram received at Amsterdam from Valona states that the Greek Governor-General of Epirus, has been killed in a motor accident.

The Rev. P. B. Kennedy and Mrs. Kennedy, of the Albanian Mission, are now, we understand, in the United States.

Mr. A. S. Merton, of the Egyptian Department of Agriculture, has been appointed

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.

Secretary to the Supplies Commission appointed by the Egyptian Government on August 24.

Captain Harry Sherwood Ranken, M.B., Ch.B., M.R.C.P., who has died of wounds at Braisne, had been employed with the Egyptian Army, and was a member of the Sudan Sleeping Sickness Commission. In collaboration with Dr. H. E. Plummer and Captain Fry he prepared a series of "Reports on the Experimental Treatment of Trypanosomiasis."

Captain Lumley-Smith, who was well known in Egypt when with his regiment, the 21st Lancers, and who married the second daughter of Coles Pasha, has recently been appointed adjutant of the Herts Yeomanry. His battalion has just been ordered out to Egypt; and if it is stationed in Cairo Mrs. Lumley-Smith will in all probability join him there.

The youngest son of Coles Pasha has lately joined the West Somerset Yeomanry, who expect to proceed to the front shortly.

On September 1, at Roumeli Hissar, a daughter was born to Mr. and Mrs. George Baker, of Constantinople.

Mr. Arthur Warden Baker, who volunteered for service, has been appointed 2nd lieutenant in the Scots Fusiliers. The son of Mr. Arthur Baker, Lieutenant Baker is well known in Constantinople and the Near East generally.

Sureya Bey Vlora, the Albanian Minister in Vienna, left the Austrian capital for Lugano on September 8, according to *Le Jeune Turc*.

Mr. N. B. T. Mackintosh, formerly of the Egyptian Ministry of Education, has taken over the Boys' High School, Sutton, Surrey, of which he is personally acting as principal.

APPOINTMENTS, PROMOTIONS, ETC.

The *Journal des Balkans* announces that the Russian General Poponoff, Military Attaché at Cettinje, has been placed in command of the Montenegrin Army.

The following appointments have been made in the Egyptian Army:—

Bimbashi C. L. Barlow has been granted the temporary rank of Kaimakam whilst employed in the Sinai Peninsula.

Captain George G. Cobden, 9th (Queen's Royal) Lancers, has been taken on the strength of the Egyptian Army with the rank of Bimbashi and has been posted to the Cavalry and Mounted Infantry.

Lieutenant William J. Maxwell, the Queen's Own Cameron Highlanders, has been taken on the strength of the Egyptian Army with the rank of Bimbashi and has been posted to the 10th Sudanese.

The following transfers have been approved:—

Kaimakam H. F. Elgee Bey, Officer Commanding 3rd Battalion to Officer Commanding 12th Sudanese.

Kaimakam P. C. Joyce Bey, Officer Commanding 12th Sudanese, to Officer Commanding 3rd Battalion.

Bimbashi S. T. Grigg, 15th Sudanese, to Camel Corps.

Mr. John Arthur Ray, of Texas, at one time American Consul in Muskat, has been appointed American Consul in Odessa.

According to *Le Messager d'Athènes*, Mr. Koussidis, a professor of the School of Arts and Crafts in Athens, has been appointed Director-General of Posts, Telegraphs, and Telephones in Greece.

Mr. Stellakis, Greek Consul-General, left Port Said on September 6 en route for Greece. He has been succeeded by Mr. Xanthopoulos, who was previously Consul at Port Said and has now returned there again.

Mr. Charles E. Allen, of Kentucky, and Mr. E. F. Lange, of New York, have been appointed American Student Interpreters in Turkey.

Mr. William R. Langdon, formerly clerk in the American Consulates-General in Constantinople and Athens, has been appointed American Student Interpreter in Japan.

Mr. Adolph Van Hemert Engert, Student Interpreter, has been appointed Deputy American Consul-General and Interpreter in Constantinople.

NEW BISHOP IN JERUSALEM.

Canon Rennie MacInnes, M.A., has been appointed by the Archbishop of Canterbury to succeed Bishop Blyth, whose resignation of the Bishopric in Jerusalem and the East takes effect from October 18. The Bishopric was founded in 1841 (Act 5 Victoria, cap. 6, commonly called "The Jerusalem Bishopric Act," an amendment of Act 5, George III., 1737), jointly with the Kingdom of Prussia, Great Britain and Prussia having alternate right of appointment. This dual arrangement came to an end in 1881, when Prussia did not exercise her right of appointment, and the Bishopric remained vacant for over five years. It was revived in 1887 by Archbishop Benson, and reconstituted as an English Bishopric, the Archbishops of Canterbury and York and the Bishop of London being the three trustees.

Canon MacInnes is the younger son of the late Mr. Miles MacInnes, of Rickerby, Carlisle. He was educated at Harrow, and graduated at Trinity College, Cambridge, from whence he went to Ridley Hall. He was ordained deacon in 1896 and priest in 1897 (diocese of London). His experience of English clerical work is the three years he spent at St. Matthew's, Bayswater (1896-1899), when he became an honorary member of the C.M.S., and joined the Cairo Mission. Canon MacInnes early devoted himself to the study of Egyptology, and is considered a very fair authority upon certain points of this big subject. It is this historic sense which has led him to make a sympathetic study of the Coptic Church in Egypt, with which his relations have been very friendly and courteous. He is also a keen student of Arabic, and has some knowledge of Islam as represented in Egypt. He did not, however, identify himself with the aggressive smashing policy of certain members of his society a few years back, whose zeal somewhat outran discretion, and did not help matters forward permanently. Canon MacInnes has done some sound but not "showy" work. He is much liked socially in Cairo. In 1909 the Bishop appointed him an Honorary Canon of St. George's Collegiate Church (English Cathedral) at Jerusalem, marking his appreciation of Mr. MacInnes's missionary work in the diocese, which he has always followed with close interest in all its branches.

The fifth Bishop in Jerusalem will take up his work under very different circumstances from those which complicated and vexed the revival of the Bishopric in 1887. Whereas there was then neither church house nor any work that belonged to the Bishop as Bishop, there is now the solid foundation known as St. George's, comprising the beautiful cathedral, bishop's house, clergy house, library, schools, and medical work at Jerusalem, as well as at Haifa, Beyrout, and Syria. The earnest hope is being expressed widely by Churchmen, both in England and in the diocese itself, that the new Bishop will pursue the non-party policy of the fourth Episcopate, now closing, both with the Churches of the East and in missionary questions, which has brought the Church of England in the Near East to her present position of dignity and advantage.

DOMESTIC ANNOUNCEMENTS.

MARRIAGE.

WYLIE—HARRIS.—On September 17, 1914, at the British Consulate and afterwards at All Saints' Church, Cairo, by the Rev. W. Stunden, M.A., A. S. Wylie, of the Ministry of Public Works, Cairo, to Winifred Mary, eldest daughter of A. J. Harris and Mrs. Harris, of Llanishen, Glamorgan.

DEATH.

PARKINSON.—On September 23, suddenly, while travelling to Cyprus, Herbert Frederick Cavendish, the dearly beloved husband of Ellen Parkinson, of Highfield, Ryde, Isle of Wight, and Ramleh, Alexandria, Egypt, and son of Mrs. Parkinson, of Lansdowne Road, W.

FRIDAY, OCTOBER 2, 1914.

SECOND THOUGHTS IN ROUMANIA.

Events are proving too strong for the Roumanians. At the outbreak of the European War a Council of State proclaimed the neutrality of Roumania, and the step seemed adequate for the situation at that moment. News of the violation of Belgian territory had not reached Sinaia; Great Britain had not yet declared war. In spite of the prominent part played by Serbia in the preliminaries, the struggle had resolved itself into a quarrel of the Great Powers, and Roumania's first duty seemed to lie in the Balkans. There, in view of the uncertainty attaching to the attitude of Turkey and, possibly, Bulgaria, the task of maintaing the *status quo* appeared to be obviously imposed upon her. She had a proprietary interest in the Treaty of Bucharest, and felt that her national dignity would not allow her to see its provisions lightly set aside. Eight weeks of war, however, have opened up not only for Roumania, but for the whole world, a wider horizon than presented itself on August 3, the date of the Roumanian State Council. The causes of the Armageddon are better understood; the resolve of the outraged conscience of civilization to be rid once and for all of the incubus of German militarism and to place, if possible, on a firm and lasting basis the peace of Europe is appreciated. In the light of the true significance of the great war the maintenance of the *status quo* in the Balkans appears for the first time a wholly inadequate policy. In some respects, moreover, it is a mistaken policy; for the *status quo* cannot fail to be modified whether by the victory or the defeat of Serbia, and by maintaining the Treaty of Bucharest Roumania would not be perpetuating the principle which that agreement formulated. While, therefore, the faith of the Roumanian Government has been shaken in the infallibility of its original policy, the Roumanian public, young and old, has been dreaming dreams and seeing visions. The rout of the Austro-Hungarian armies not only by Russia's overwhelming numbers, but by the comparatively scanty forces which Serbia has been able to put into the field, has opened up the prospect of the collapse of the Dual Monarchy. In the event of a partition of the Hapsburg estate, the first reversion to one portion would be claimed by Roumania. Across the Carpathians and in Bukovina are situated some three million Roumanian kinsfolk, whose ultimate "redemption" has been the cherished ambition of the Roumanian people ever since the national instinct found expression in the union of the two principalities of Moldavia and Wallachia. The time for the realization of this ambition seems to be drawing near, and it is feared that if Roumania does not act now the opportunity will pass. Thus in the course of a few weeks public opinion has veered round from approving a policy of neutrality to the demand for an immediate declaration of war, and its pressure is being felt in the highest quarters.

The Government, however, still delays to take the fateful step. Its difficulties are admitted. The most formidable, we may feel sure, is the national reluctance to place King Carol in a false position. For forty-eight years he has guided the destinies of the country with conspicuous success, and the Roumanians are the first to acknowledge their indebtedness to him. It savours of a tragedy that on the eve of his jubilee, for which preparations are already on foot, a crucial difference of opinion should arise between Sovereign and people. But King Carol is too loyal to his adopted country to allow his personal predilections to thwart the realization of the national ambition. If he cannot bring himself to sign a declaration of war against Germany and Austria-Hungary, his reluctance will be understood and respected, and means will have to be found to enable his Majesty to delegate the act to other hands. We have little doubt, however, that the wish of Roumania will be that King Carol should lead the nation in person across the threshold of its desires. Even when this difficulty has been overcome, the Roumanian Government will find it necessary to secure its diplomatic "lines of communication" before it launches an army over the Carpathians or into Bukovina. The understanding with Bulgaria, so far as is known, is now complete. Any action taken by Roumania is likely to be regarded as being in the interests of the Balkans as a whole, and Bulgaria's service to the common cause will merit the same recognition, whether peace is secured in the Balkans by means of her neutrality or by the unsheathing of her sword. The possible effect on Turkey, however, of a Roumanian declaration of war cannot be overlooked. So far the Porte has refrained from throwing in its lot with the waning fortunes of Germany and Austria-Hungary; but it is playing recklessly with fire. It has borrowed two German men-of-war, and probably as many as two thousand German soldiers and sailors; it has mobilized its army and massed troops on the Egyptian frontier; it has affected to flaunt the whole world by announcing the abolition of the Capitulations. Whether the action of Roumania in throwing in her lot with the enemies of Germany and Austria-Hungary will cause Turkey to fling further prudence to the winds or will make her realize the increasing hopelessness of the German cause is entirely a matter for speculation. The former possibility has to be reckoned with, and entails upon the Roumanian Government the necessity of seeing to the arrangements made to deal with the Turkish danger.

When the Great Powers stood committed to war some voices were raised in Roumania in favour of immediate participation on the side of the Triple Entente. As things are to-day, it would have been better if such advice had been followed at the time. For the reasons we have set forth this course was not possible; but it will not be overlooked that each day's delay now tends to rob Roumanian participation of much of its virtue. The nation would not have been human if at one time the thought had not occurred to it that it might stand to gain all that it wanted without the expense and risk of a campaign. If such a belief is still to be met with in Roumania, it knows well how to hide its head. The heroism of the Belgians and the prowess of the Serbians have left no room for selfishness or craven fears on the part of any nation which seeks salvation for itself or sympathizes with the cause of civilization. The eagerness of the Roumanian people to take up arms for the realization of its destiny is manifest, and it chafes under the restraint that has hitherto been imposed upon it. Already it has had to stand by and see some of the work in which it ought to have co-operated performed alone by the Russians. If it holds back much longer there will be the danger that the Allies may feel that, for the sake of Belgium and Serbia, the principle of the reward being proportionate to the effort will have to be enforced. Even now the Roumanian Government will do well not to set its expectations too high. As it has failed to bear the heat and burden of the day, it has forfeited the right to dictate its own terms. It will realize, however, that the principle for which the Triple Entente is fighting covers all the ground on which Roumanian hopes are built. Nevertheless the cause of permanent peace in Europe requires that the legitimate aspirations of every country should be attained. In this matter Roumania must share the lot of the Balkan States. If these arrive at a mutual agreement among themselves, which leaves no party dissatisfied, there will be much to be said for the principle of "Roumanians for Roumania." But the occasion for insistence on this point has gone by with the delay in the Roumanian declaration of war. The Government can now only hope to make good its claims after it has vigorously carried out what work the successful advance of the Russian arms has still left it to do.

ROUMANIAN AMBITIONS.

When Mr. Asquith, speaking at the Guildhall in November, 1912, enunciated as a political dogma "The Balkans for the Balkan races" few of his hearers expected that within two years the Balkan races would be in a position to claim the territory inhabited by their co-nationals outside the Balkan peninsula. Yet now the opportunity lies ready to the hand of Roumania to unite under her national sceptre those of her people who have hitherto had to bear allegiance to St. Stephen's Crown the national emblem of the alien Magyars in Hungary, or to the Imperial Crown of Austria in the Bukovina. We publish below an ethnographical map of those portions of the Dual Monarchy where the great mass of these foreign Roumanians live, so shaded as to indicate the areas inhabited by actual Roumanian majorities.

The Roumanians in the Dual Monarchy, according to the two last census returns, numbered:—

	1900.		1910.
In Hungary	2,799,479	...	2,949,032
In the Bukovina ...	228,507	...	273,254
Elsewhere.....	2,358	...	2,469
	3,030,442		3,224,755

Among the irredentists of Bucharest are some who favour what may be called "Dacianism"—inasmuch as they consider that the Roumanian monarchy should be territorially co-terminous with the former Roman province of Dacia. The western boundary of this was certainly the Tisza or Theiss, while that on the east was either the Pruth or the Dniester. The Dacians, in drawing a Roumanian frontier along the Tisza, would include not only the whole of the Roumanians in Hungary, but also a very considerable number of Magyars, Szeklers, Germans, and Slavs, and would, in their anxiety to liberate their kinsmen, thus subject multitudes of unwilling aliens, foreign alike in language, race, and creed.

Others less ambitious aspire only to the acquisition of those Hungarian counties which form what used to be the autonomous Principality of Transylvania, as we style what is known to the Roumanians as Ardeal, to the Magyars' Erdély and to the Germans' Siebenbürgen. The boundary of this historic State is shown on the map as it was until 1867, and does not include the counties which were temporarily gained for Transylvania by Stephen Bocskay in 1606.

The population of Transylvania was in 1900:—

Roumanians	1,397,282
Magyars and Szeklers.....	814,994
Germans	233,019
Others	11,543
	2,456,838

From this it will be seen that Transylvania proper contained in 1900, the latest year for which the writer is able to find the necessary figures, less than half the Roumanian-speaking population of Hungary. The non-Roumanian races have been resident in Erdély for a very long time—indeed, the Germans generally known as Saxons are the descendants, if not of the children who were decoyed away from Hameln by the Pied Piper, as legend will have it, at least of colonists introduced at the beginning of the twelfth century. These three peoples, the Magyars and their kinsmen, the Szeklers, and the "Saxons," were the "privileged nations" who alone enjoyed political rights in the Principality up to 1848. The Diet of Nagy Szeben recognised the Roumanians as a "fourth nation" in 1863, but Erdély was swallowed up in Hungary in 1868, and the process of compulsory Magyarization began to the infinite disgust of the Saxons and the Roumanians.

ROUMANIANS IN THE DUAL MONARCHY.

Digitized by Google

There is much in the history of Transylvania just as there is much in the population of the Principality which is antagonistic to the theory of amalgamation with Roumania. It was the Magyars of the Principality who were the only free representatives of their race when the rest of Hungary was partitioned between the Austrians and the Turks, and even now a population of 1,000,000 non-Roumanian mountaineers can become a formidable minority in the very heart of the new Roumanian State.

Should the service of the Roumanians be such as to secure for their monarchy an extension of territory over the whole of Ardeal, it is obvious that elaborate provision must be made to safeguard the rights and liberties of the Magyar, Szekler, and German inhabitants of the six counties in the south-eastern corner of the Principality, Háromszék, Csik, Udvarhely, Maros-Torda, Kis Küküllo, and Nagy Küküllo. The world is not anxious for that treatment of minorities which is only too common in the Balkans to be extended north of the Carpathians. If there is to be peace in Transylvania in the future under the sceptre of the Hohenzollerns of the south there must be no application of the *lex talionis* in Ardeal. Far better would it be if the whole non-Roumanian population were legally expropriated, adequately compensated under proper supervision, and removed from the country. The Szeklers are supposed to be the "frontier-guards" of the Magyar State. If Erdély is to be lost to Hungary the Magyar garrison and the frontier guard had better be recalled with the realm of St. Stephen, and their places could be filled by Roumanians from Hungary proper. During the past few years there have been racial difficulties in Posen, in Alsace-Lorraine, in Bosnia, in Transylvania itself. It will be more than foolish to overthrow one ethnic injustice in order to erect another in its place.

MR. BUXTON'S VISIT TO BULGARIA.

The following correspondence has passed between Mr. C. Kessary, the London correspondent of the *Estia*, of Athens, and Sir E. Grey's private secretary:—

30, Gloucester Terrace, W., Sept. 23.

Sir,—I beg to bring to your notice that in a large section of the Greek Press the following statements have been published:

(1) That Mr. Buxton, M.P., President of the Balkan Committee, has been sent to the Balkans on an official mission from the British Foreign Office.

(2) That he is accompanied by the private secretary of Sir Edward Grey.

(3) That his mission is to obtain the good will of Bulgaria towards the Triple Entente by promising her part of Macedonia, including Cavalla, and this, of course, at the expense of Greece and Serbia.

I am more than convinced that the above information cannot be true, and is largely due to German machinations, and shall feel extremely obliged if I may be authorized to contradict officially the above information through the *Estia*, one of the most important Athens newspapers.—I am, Sir, your obedient servant,

CHR. KESSARY, London Correspondent of the *Estia*.

Foreign Office, London, S.W., Sept. 24.

Dear Sir,—In reply to your letter of yesterday, calling attention to certain statements which have been made by the Greek Press, Sir Edward Grey desires me to say:—

(1) That Mr. Buxton, M.P., President of the Balkan Committee, was not sent to the Balkans on any official mission from the British Foreign Office.

(2) That Mr. Buxton was not accompanied by Sir Edward Grey's private secretary, but by his brother, Mr. Roden Buxton.

(3) That Mr. Buxton's visit to Bulgaria was a private visit, and that there is no foundation whatever for stating that he made offers to the Bulgarian Government at the expense of Greece and Serbia.

You are authorized to contradict, on the official authority of the Foreign Office, the statements referred to in your letter under reply.—Yours very truly,

W. TYRRELL.

THE WAR.

PRESS AND PUBLIC OPINION.

Mr. Roosevelt and the War.

The following extract from a message of the Washington correspondent of *The Times*, under date of September 24, gives Mr. Roosevelt's views on the war and the conditions of peace:—

Americans, he said, have a twofold duty in this crisis. They must profit from its lessons, and must be ready to aid the achievement of a just peace. But he continued:—"Of course, peace is worthless unless it serves the cause of righteousness. A peace which consecrates militarism will be of small service. A peace obtained by crushing the liberty and life of unoffending peoples is as cruel as the most cruel war. . . . A peace which left Belgium's wrongs unavenged, and which did not provide against the recurrence of such wrongs as those from which she has suffered, would not be a real peace." Mr. Roosevelt then analysed the causes of the conflict. There is room, he thinks, for sincere differences of opinion about the initial positions of Austria, Serbia, Russia, Germany, and France. As for England, "when once Belgium was invaded, every circumstance of national honour and interest forced England to act precisely as she did act. She could not hold up her head among the nations had she acted otherwise." About Belgium also, only one view was possible. She was deliberately brutalised. "I admire and respect the German people. I am proud of the German blood in my veins, but it is impossible not to face the danger of a transatlantic application of all that Bernhardism implies. The United States must be prepared. Arbitration treaties, The Hague Court, and all the rest of the pacificist stock-in-trade are useless unless backed by force. No abundance of the milder virtue will save the nation that has lost its virile qualities. On the other hand, no admiration of strength must make us deviate from the laws of righteousness. What has occurred to Belgium is precisely what would occur, under similar conditions, to us unless we were able to show that the action would be dangerous."

Plain Talk for Turkey.

The following is an extract from a leading article of *The Times* (September 30), under the heading of "Alternatives for Turkey":—

We are confident that in the long run the Allies will be victors in the European war, and that their victory will be complete. If, as we believe, this expectation is fulfilled, they will not spare Turkey the just punishment which wanton intervention in a struggle that is not hers will bring upon her. Her ill-knit Empire is open to attack by sea and by land in many directions. It includes possessions which each of the Allies may reasonably desire to annex or to assign to the minor States which prove amenable to their advice, and populations whose disaffection towards the rule of the Committee and whose aspirations for self-government are notorious. Respect for subsisting treaties and a wish to prevent the extension of the European war have led the Allies to promise Turkey a great reward for standing aside and keeping at peace with the Balkan States. But if she attacks either they will not forgo the uttermost consequences which victory may bring them. They will break up the Turkish Empire, or allow others to break it up, should they deem its destruction to their advantage, as almost certainly they will do. We have neither the right nor the wish to dictate to Turkey. We owe it to her, as an old friend, and we owe it to ourselves, to put before her in blunt and unmistakable terms what the policy of the Allies will be if she treats them as enemies.

The Claims of Serbia.

The following is an extract from an article in *The Birmingham Daily Post* (September 26), under the heading of "Serbia's Great Work in the War":—

The stand which Serbia has made and is making in the South against the gigantic power of Austria is not less heroic, and has, happily, been more successful than the stand Belgium made, and is making, against the might of Germany. When the history of this war is written what may most appeal to the imagination of men will be the courage—I had almost written the superb and unprecedented courage—of the small nations. Of Belgium nothing need now be said, for the great qualities she has shown and the bloody sacrifices she has endured are in all men's minds. But let us not forget Serbia. Does the story of the world exhibit a nobler and more inspiriting spectacle than these few millions of Slavs—five millions at the utmost—defying the giant power of Austria? It is, indeed, a case of David and Goliath; but David, equally armed, not merely with sling and stone, for the Serbs, an historic and ever-warlike people, have not only trained all their manhood to war, but have provided themselves with the best arms modern science can provide. And with that army they have achieved an astounding success undreamt of in the West when the war began.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The Cyprus Gazette of September 8 announces the issue of five-pound and one-pound notes, to be redeemed at their face value by the Government at the expiration of six months of the termination of the present war or before that date, should the Government so desire. The £5 note is printed in red ink, and shows a simple design with the value in English, Greek, and Arabic. The £1 note is of a similar design, but is printed in black ink.

***

On August 21 we reproduced an extract from an article which appeared in a London paper and which described the run on the Constantinople banks towards the beginning of August. In the course of this article, it was stated that the National Bank of Turkey was among those whose doors were besieged by "angry and panic-stricken crowds of Turks, Levantines, and Europeans." This is inaccurate, as there was no run on the bank at all. The withdrawals of funds by the depositors was barely above the average, and at no time was there any indication that anything resembling a run on the bank would take place. We sincerely regret it if the reproduction of the article in question in THE NEAR EAST should have created a false impression concerning a bank in which British capital is largely interested.

***

I am glad to see by the publication of the September issue of *The Monthly Journal* of the British Chamber of Commerce of Egypt that even if the other local Chambers have temporarily ceased publishing their monthly journals, it has, nevertheless, been decided to continue to publish the British one, "as it is considered that British trade needs every assistance now, even more than at normal times." This is the right spirit to show, and it is emphasised by the anouncement that, in view of the many opportunities for British manufacturers of articles to gain a foothold in Egypt, as a result of the war, the Chamber is "ready to assist *not only its members*, but British manufacturers with any information they may require regarding the local trade, and advise them as to the best means of introducing their goods." The Anglo-Egyptian Press is also putting its shoulders to the wheel with articles, so that, if the "war on German trade" does not succeed in Egypt, it will be no fault of the Chamber or of its Press supporters.

***

The question of representatives and travellers is one that is so frequently cropping up that the following extract from the annual report of Mr. Geary, British Vice-Consul at Alexandria, will be read with interest:—"There seems to be a growing tendency to appoint salaried representatives of British firms in Egypt, as soon as the growth of business renders this advisable, instead of relying entirely on local agents. There can be little doubt that an employee whose career is bound up with the success of his firm, while his profits in most cases increase automatically with the increase of business that passes through his hands, is more likely to advance the interests of his firm than an agent who has many irons in the fire. Where the business does not justify the appointment of a salaried representative, it might be possible for more than one non-competitive firm to appoint a joint representative. This plan has been tried with some success in the Far East."

***

Verily, the Germans are Machiavellian! It was only last week that I referred to Roumania and the economic sway exercised by Germany over the whole of the Near East, but I must admit that I was not prepared for the following tit-bit culled from a recent issue of the *Journal des Balkans*. According to this paper, the Diskonto-Gesellschaft of Berlin, which has huge interests in Roumania, has "sacrificed" 200,000 lei for military charity in Roumania; 100,000 lei for the Roumanian Red Cross, and 100,000 lei for the families of soldiers killed in battle. Another financier of shrewdest dye, a certain Ludwig Roselius, of Bremen, has sent 25,000 to the Queen to be distributed among institutions destined to help the destitute families of soldiers. According to the paper which publishes these German *douceurs*, "one would think that the Germans were inviting the Roumanians to a war-dance."

***

The Diskonto-Gesellschaft is, by the way, one of Germany's most powerful financial agents in the Near East, and is heavily involved in most of the big Balkan loans which have the approval of the Imperial Government. One of the most recent of these was the ill-fated Bulgarian loan of last summer, to which I have already referred. This loan was to have been taken up by a group of banks, including several Austrian banks, and the greater part of the first slice of the loan was to be devoted to the paying back of small loans made by Bulgaria during the war. One of these creditors was, of course, the Diskonto-Gesellschaft, and another the Russo-Asiatic Bank. I now learn that, by an arrangement with the Diskonto, the latter agreed to pay the former 10,000,000 roubles on August 7. Naturally, this has not been done, and now, it appears, the Russo-Asiatic is clamouring in Sofia for immediate payment. Bulgaria—and rightly, I think—is pleading a case of *force majeure*, and there the matter rests for the time being, but I understand that the pourparlers now going on are likely to lead to a compromise. Apropos of this, the question arises: Did the Diskonto-Gesellschaft and its group pay Bulgaria anything off the first section of the new loan, and, if so, how much? I think it was very little, but perhaps the group are beginning to think it all too much. For they will shortly be in need of all the spare cash they can lay their hands on.

***

The news concerning the Egyptian Government's decision to restrict the cultivation of cotton in 1915 has created quite a sensation in cotton spinning circles, and the extracts reproduced elsewhere from *The Manchester Guardian* give one aspect of the question. But, as the writer himself points out, "it would be rash to assume that the authorities in Egypt are not fully alive to all considerations," to which is added the pious hope that "one awaits further information as to the Government proposals with confidence that such extreme measures will not be found necessary." *The Times* Cairo correspondent, on the other hand, cabling on September 23, states that "the measure is much approved" and is "expected to facilitate negotiations for the financing of the present cotton crop."

***

At first sight it would appear that the last clause is somewhat optimistic, but on analysis it must be admitted that it is based on sound judgment. In the first place, reference must be made to the London Commission which was recently appointed by the Egyptian Government, primarily with a view to determine what amount of Egyptian cotton England was likely to require this year. The Commission has now finished its work and has been wound up, and I am in a position to announce that it came to the conclusion that Lancashire would only require about 4,000,000 cantars of cotton this season. As the crop this year promises to be a heavy one (7,800,000 to 8,000,000 cantars), it is obvious that there will be a surplus, and unless a shrinkage of the supply is assured for next year, the financing of this year's crop will be rendered practically impossible. As it is, the Government's measure insures this shrinkage, with the result that it will be easier to finance the crop this autumn. Of course, this is all on the assumption that the war month.

In the current issue of *La Vita Italiana all'Estero* there is an interesting article on "Italian Interests in the Balkans," in the course of which the writer points to a circumstance already mentioned in these columns months ago. The point in question refers to Italy's thoroughly pro-Austrian attitude when, during the Balkan War, Austria objected to Servia's "little window" on the Adriatic. It stands to reason that the acquisition by Serbia of a port on the Adriatic signified a new market for Italian goods and an excellent route for a commercial penetration of the Balkans. Instead of realising this the Consulta foolishly objected to the creation of this port.

War on German Trade.

SOAP TRADE IN THE NEAR EAST.

In continuation of our series of extracts from the bulletins issued by the Board of Trade, we give this week particulars from the same source of the openings for trade in soap which present themselves in the Near East:—

Germany's exports of soap amounted in 1912 to £451,200, Austria's to £108,200. In 1913 Austria's exports of fine soaps were as follows to the undermentioned countries:—

	£
Bulgaria	3,000
Roumania	1,100
Turkey	11,100
Egypt	5,100

Germany's exports of fine soap to Turkey are estimated at about £5,000 per annum.

[From the foregoing figures which are by no means complete, the Austro-German soap trade in the Near East must be considerably over £30,000 per annum. The principal lines imported by the Balkan States from Austria and Germany are cheap scented soaps, both bright in colour and strong-scented. Finer qualities come principally from France. From the British soap trader's point of view, the Near East market has not been properly worked up to the present; were it to be done, results would most certainly justify initial expenditures.]

"As regards household and laundry soap, the exports from the United Kingdom are already so large that it would seem that we have little to gain in this line."

[The above applies in a general manner to the market as a whole; regarding more particularly the Near Eastern market, there are good opportunities in the Balkan States for cheap household soaps (Serbia, for instance) if the market is properly worked. Once established, a brand of household soap would practically monopolise sales.]

The following particulars are available as to the special requirements of some Near Eastern markets:—

Turkey.

The Austrian Consul at Smyrna, in a recent report, observed that ordinary qualities of soap are produced in the country. There is, however, a considerable demand for toilet soaps, which is supplied by Italy, Germany, and, to a smaller extent, Austria-Hungary. Emphasis is laid on the need for introducing soap in attractive packings.

It appears from a French Consular Report on the district of Haifa and Acre that, in order to compete successfully with the local product, imported soap must be cheap and should not be too soluble, as the washerwomen leave their soap in the water. It is stated that the Germans sell a toilet soap at 1 fr. 80 a dozen cakes (of 100 grammes each), and a glycerine soap at 2 frs. a dozen cakes.

The Special Commissioner recently sent by the Board of Trade to Syria reported that the largest quantities of the very cheap class toilet soaps are imported from Austria (small cakes in brilliant colours, sold in the bazaars at about 20 to 30 paras per cake), and from Germany. The German firms supply such soap as plain scented soap (cakes weighing 100 grammes, six cakes per box), 1.80 frs. per dozen; glycerine soap (transparent), 2 frs. per dozen; and family soap, 1.80 frs. per dozen.

A report by the German Consul at Beirut for 1911 states that France supplies the better quality soaps, other kinds coming from Germany and Austria. The demand for imported soap has decreased by reason of the fact that there are produced in the interior large quantities of household soap, which is preferred by the native population because it is not so readily soluble as the European varieties.

A recent report by the German Consul at Trebizond states that amongst better quality soaps imported into his district a well-known British brand formerly occupied first place; in 1913, however, the imports of this brand fell off considerably. Ordinary washing soap was imported from other parts of Turkey and from Greece to the value of 150,000 frs.

Montenegro.

The Austrian Consul at Antivari reports that soaps are imported almost exclusively from Austria-Hungary. The imports from Austria in 1911 amounted to 86,400 kgs., and from Hungary 22,400 kgs., and consisted chiefly of the better qualities. Italy supplies cheaper varieties.

Bulgaria.

According to a report by the German Consul at Varna the imports of common soap continue to show considerable expansion, in spite of the increased output of Bulgarian manufacturers. The principal countries from which supplies are drawn are Turkey, France, the United Kingdom, Austria, and Germany. Toilet soaps from Karlsruhe continue to compete successfully with the Bulgarian and French products.

Albania.

The Austrian Consul at Valona states that the demand there is almost entirely for ordinary household qualities. The use of higher quality soaps is only very slight.

Serbia.

The Austrian Consul at Uskub points out that the people there chiefly use a home-produced soap. The well-to-do classes, however, are beginning to evince a liking for fancy soaps, and a considerable increase in the sales of these better quality soaps is noticeable.

Egypt.

The following figures show the value of imports of soap of all kinds during 1913 from the undermentioned countries:—

	£E.
United Kingdom	14,231
Turkey	198,486
France	11,998
Austria-Hungary	5,953
Germany	1,546
Total from all countries	231,894

The German Consul at Cairo states in his report for 1912 that although common soap is imported largely from Turkey-in-Asia, and is also manufactured in Egypt, soap of better quality is obtained to a large extent from Austria-Hungary and the United Kingdom. The former country particularly has increased its trade to a considerable extent within the last few years; Germany's trade, on the other hand, has suffered a set-back, having fallen from £E2,074 in 1910 to £E688 in 1911. This decrease is stated to be due largely to the fact that German manufacturers have not efficiently canvassed the market by means of commercial travellers. Moreover, French goods are tastefully and carefully packed, whereas German manufacturers often do not pay sufficient attention to the packing of their wares.

Our Alexandria Correspondent sends us the following particulars concerning soap-making in Egypt:—

The consumption of common soap in Egypt is considerable. Formerly this article was imported from Syria, Crete, Greece, and Marseilles, but since the introduction of cottonseed oil into soapmaking the local industry has developed to a great extent, and the importation of household soap has dwindled.

The two kinds of soap generally manufactured in Egypt are the "Nablousi," an imitation of a soap made at Nablous, and the "Traboulsi," an imitation of a variety made at Tripolis in Syria. In the interior the demand is confined entirely to these two varieties, but in Alexandria there is also a market for the white soap of Crete, the yellow soap of Greece, and the Marseilles soap.

As a result of the great advance in the price of cottonseed oil, there is now being manufactured an inferior quality of soap, manufactured by the cold process with imported fats, talc, and caustic soda. Oil containing sulphur is also added, in order to give a slight smell of olive oil, which recalls the Syrian soap.

The largest producer of soap in Egypt is the Salt and Soda Company, which owns two large factories in connection with its refineries at Kafr Zayat and Alexandria.

The wholesale price of soap in this country is P.T.4 for soaps manufactured by the hot process with oil of sulphur, P.T.3 for those manufactured by the cold process from cottonseed oil, and P.T.2 from those manufactured from grease and talc.

There is only one factory for high-class toilet soaps in Alexandria. This article is chiefly imported from England, Germany, and France.

Lubricating Oils and Greases.

Germany's exports of lubricating oils and greases amounted in 1912 to £487,350, as against £860,380. Owing to the fact that lubricating oils, etc., are not separately recorded in our export returns, details on the lines of those given above for Germany and Austria-Hungary cannot be given for the United Kingdom. Moreover, the Austrian figures appear to cover a somewhat larger field than the German, so that the total given for Austria is undoubtedly too large, but to what extent it is impossible to say.

The following were (in 1912) Germany's exports to some Near Eastern countries:—

	£
Greece	2,850
Roumania	3,350
Turkey	6,200
Egypt	2,700
Morocco	750
	£15,850

as against the following figures for Austria:—

	£
Greece	5,600
Servia	6,600
Montenegro	320
Bulgaria	1,100
Roumania	500
Turkey	1,935
Egypt	1,460
Morocco	100
	£17,615

or an approximate total of £35,000, part of which will have to be supplied in future by British exporters.

Greece.

The following particulars are available as to the trade in lubricating oils, etc., in Greece:—

An Austrian Consular report for 1911 draws attention to the increased demand for lubricating oils and greases, owing to the rapid development of the Greek mercantile marine in recent years. The consumption is mainly accounted for by purchases for the use of single vessels (the large steamship companies buying direct in bulk) and for foreign warships visiting Greek ports. Many firms are established in the Piræus and Syra especially for the supply of ships' requisites. The importations of lubricating oils reached a total value of £10,000 in 1911. Germany and Austria are mentioned amongst the leading countries of supply. Lubricants are imported in casks of 140 oka (about 400 lbs. avoirdupois).

[We draw our readers' attention to an article on "The Importance of Lubrication," which appeared in The Near East on September 11.]

BOARD OF TRADE BULLETINS.

The following bulletins were published during the past week:—Goldsmiths' and silversmiths' ware, and electro-plate; fertilisers; medicines, comprising drugs and medicinal preparations; sewing, etc., cotton; rail locomotives; perfumery and cosmetics; fire-proof bricks, retorts, crucibles, etc.; and building and furniture fittings, including locksmiths' wares.

Applications for copies of any of the above or of those published in our previous lists should be addressed to the Director, Commercial Intelligence Branch, Board of Trade, 73, Basinghall Street, London, E.C.

IRONMONGERY IN EGYPT.

The Moniteur Officiel du Commerce, of Paris, states that the imports of ironmongery to Egypt rose in value from £E213,000 in 1909 to £E260,000 in 1913. This increase results from activity in the erection of new buildings involving an increased demand for ironmongery for use in their construction. The following are some of the more important of the articles in demand:—

Locks.—Ordinary locks are imported from France in large quantities. German makers have introduced types of locks which they have created. America sends her well-known special locks, which have a great success. Locks for drawers, boxes and cupboards are supplied almost exclusively by Germany.

Iron Nails and Iron Wire.—Prices for these are very subject to fluctuations. Ordinary nails come specially from Belgium and the best qualities of nails and also iron wire from France.

Wire Netting.—France is the chief supplier of this article, but Germany and Italy are making progress with netting at low prices.

Copper Taps, Etc.—France supplies cellar taps without competition, but German makers send well made water taps at low prices, which are adopted by the water company.

Iron Kitchen Utensils.—Very light articles which do not last long are not liked by buyers. Germany and Belgium supply a fairly heavy kind which are more durable and find a better demand.

Enamelled Iron Kitchen Utensils.—Germany and Austria, especially the latter country, have achieved great success in the manufacture of goods of superior quality, whilst at the same time they do not neglect the cheaper qualities, which they supply at very low prices.

Scales and Weights.—These are all of French origin. Other countries have not so far competed in quality and price. Germany, however, is beginning to supply an article which is appreciated for its good construction and cheapness.

Screws are supplied in equal quantities by France, Belgium and Germany. The qualities are similar. Iron Pins are supplied mostly by France. Bolts.—Four years ago, France, England and Germany manufactured each its own kind of bolts. At the present time England continues to supply its specialities, but Germany now produces the French article with perhaps a little less finish but at a lower price.

Most articles in copper and brass for construction purposes come from Germany, and are stated to be better made and cheaper than those which up to two years ago were exclusively supplied by England. Germany procures all the types manufactured abroad and imitates them and at the same time complies with all the wishes of buyers. It is pointed out that in the competition amongst manufacturers of these goods, minor matters such as packing and ticketing should not be neglected. Attractiveness in the appearance of a package is often of importance. Germany sends travellers speaking three or four languages, who are most tenacious and never discouraged, and express gratitude for the smallest order obtained from retailers.

COMPETITION WITH GERMANY AND AUSTRIA-HUNGARY.

In connection with the campaign undertaken by the Board of Trade, on the advice of their Advisory Committee on Commercial Intelligence, to assist British manufacturers and merchants to secure trade formerly in the hands of German or Austro-Hungarian firms, the Board have received a very large number of enquiries for names of sellers or buyers of articles.

Special arrangements have been made in the Commercial Intelligence Branch of the Board of Trade for dealing with the enquiries, and lists are being prepared and circulated of articles which enquirers desire (a) to purchase, and (b) to sell. The first list was published on August 29; the second list is now ready and may be obtained on application to the branch. Firms interested in any of the goods mentioned, either as buyers or sellers, should communicate with the Director of the Commercial Branch, Board of Trade, 73, Basinghall Street, London, E.C.

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondents.)

Constantinople. September 20.

There is a good deal of sickness here, and much distress. The crop has been good, but the railways cannot take it, and the peasantry left on the ground after the mobilization have had difficulties in getting the harvest in in some places, while in every quarter they have no market. Anyone who could arrange for cheap transport of grain from up-country now would be like to make a fortune in no time, for the farmers are ready to sell for a song. Business remains in general in the lowest possible water.

Athens. September 15.

The Government, with the object of preventing any inordinate increase of prices, is importing about thirty million francs' worth of cereals and sugar from America. These it will sell to the various merchants and millers, while at the same time it will fix the retail selling price beyond which no one may sell. The stringent measures taken by the Government have prevented any serious rise in the price of foodstuffs. Bread, for instance, has only gone up five centimes per oke.

ROUMANIAN CROPS.

The following statistics concerning this year's wheat crop are published by the Ministry of Agriculture:—

The area sown with wheat this year was 2,100,000 hectares, and the crop is estimated at 16,600,000 hectolitres, or 7.9 hectolitres per hectare. This is, roughly, about one-half of the annual average during the past five years, namely, 30,500,000 hectolitres. The quality is likewise inferior, weighing from 72 to 73 kilos per hectolitre.

FOOD REMITTANCES FOR TURKEY.

The Manchester Chamber of Commerce has been informed of a communication received by the Turkish Vice-Consulate in Manchester, from the Ottoman Embassy in London, to the effect that the authorities in Turkey have received from time to time, through the parcel post, importations of ham, etc. As all flesh foods imported have to be accompanied by a certificate from the health authorities, duly legalised at the Consulate, it should be known that, unless these regulations are observed, the parcels will be retained by the Customs authorities.

BRAILA GRAIN TRADE.

The acting British Vice-Consul at Braila reports that the Committee of the Braila Bourse has notified that, owing to the European war, it has been impossible for local merchants to carry out their sales of grain abroad, as from July 25.

EGYPT'S COAL IMPORTS.

The following are, according to Messrs. R. J. Moss and Co., of Alexandria, Egypt's imports of coal from January 1 to September 17, 1914:—

	Tons.
Welsh	431,918
Newcastle	178,003
Scotch	118,836
Yorkshire	94,801
Other qualities	186,383
Total	1,009,941

as against 1,029,390 tons for the same period last year.

Stocks ashore and aboard steamers in port discharging, 40,000 tons.

ALBERT SINGER
KHARTOUM SUDAN

EXPORT OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

PRODUCE REPORT.

London, October 1.

Sugar.

The market for foreign granulated has been quiet, but steady, with only small sales passing. American granulated for prompt has sold at 26s. 6d., and for shipment first half October at 25s. 9d. c.i.f. English refined continues to show a good demand, and prices are unchanged: Tate's cubes No. 1, 33s. 6d., and pieces at 23s. to 27s.

Coffee.

The public sales were resumed on Tuesday, with a total catalogue of 4,759 packages. The demand was very poor, only a few lots of desirable quality being disposed of, and the great bulk of the offerings was withdrawn. Prices ruled irregular, and sellers' limits were seldom reached. Costa Rica, fine bold coloury, was sold at 82s. 6d., and fair bold greyish at 73s. 6d.; medium ditto at 66s., and peaberry 80s.; East India medium coloury realised 67s., and peaberry 71s.; washed Dumont at 52s. to 59s.

Seeds.

Linseed has been steady and in sellers' favour for distant positions, London, spot, Bombay, 47s. is asked; Calcutta, spot and afloat, 46s.; and Oct.-Nov., 46s. 3d. Hull, spot, Bombay, 47s. is asked. Cotton seed is rather dull; London, spot, Egyptian, quoted £7 15s.; loading sold at £7 15s.; and Oct. £7 18s. 9d. is asked. Hull, spot, Egyptian (old), £7 10s.; spot, Bombay, £6 1s. 3d., and on passage, £6 2s. 6d. asked. Rapeseed largely nominal. To London nothing was offered; to Hull, Ferozepore, Sept.-Oct., 51s. asked, and bold Ferozepore ditto, 53s.

Oils.

Linseed remains quiet at current prices. Spot pipes (landed terms), 26s. 3d., and spot, barrels, and month, 26s. 9d.; Hull, spot and Sept., 24s. Rape oil is firm. Refined, spot, in barrels, 35s. 6d.; Japan (in cases), July-Aug., 30s. 3d., and Sept.-Oct., 29s. 3d. Cotton oil is dull. Crude, Egyptian, spot, pipes, 29s. 5d.; refined, pale, pipes, 28s.; and sweet, barrels, 35s.

Oilcakes, etc.

Linseed.—There has been little activity in the market during this week, and trade has been confined to buyers filling their immediate requirements; at the same time, values are fairly well sustained, there being a general idea that prices will harden during the coming months in consequence of the present unremunerative state of seed crushing. Best London linseed cake met a dull sale at £8 12s. 6d. to £8 17s. 6d. Cotton cake.—Owing to the last steamer cargo of Egyptian cotton cake arriving in a more or less heated condition, causing a shortage on spot, quotations are fully 1s. 3d. to 2s. 6d. per ton dearer, best brands making £5 8s. to £5 10s., in warehouse, while a steamer parcel afloat commands £5 5s., ex-ship, with English cakes, making rather more money at £5 10s. to £5 12s. 6d., and Bombay, £4 15s. Decorticate cotton cakes are not offered on spot, but parcels of meal are obtainable at £8 5s., while for Oct.-Dec. monthly shipments the low figure of £7 5s., ex-ship, would be accepted.

Locust Beans.

There is scarcity for present delivery, the nearest quotations being £6 15s. for whole and £7 5s. for kibbled.

Corn.

Wheat.—The cargo market has been more or less quiet, with little change in values, both buyers and sellers being indifferent; 46s. would buy choice white Kurrachee afloat or Oct.-Nov. Buyers generally have adopted a waiting policy, which certainly cannot last.

Maize.—For Danube - Galatz - Foxonian, afloat, 30s. 9d. is asked, and Danubian-Bulgarian, loading, is offered at 30s. 6d. per 480 lbs. Parcels are very slow.

Barley.—There has been only moderate business during the week at late rates. For Black Sea, arrived, ex-store, 25s. 3d. is wanted, and 25s. 6d. for Sept.-Oct., while No. 1 Californian, brewing, afloat, is quoted at 32s., and Sept.-Oct. at 32s. 6d.

Oats are very quiet and unchanged.

Digitized by Google

Egyptian Cotton.

RESTRICTED CULTIVATION.

The report that the Egyptian Government is proposing a compulsory reduction of the acreage under cotton in 1915 is, says a correspondent in *The Manchester Guardian*, a very serious matter. In the course of his article he argues that "if the idea of the Egyptian cotton growers is to restrict the crop to such a quantity as will enable them to command something like decent prices they are probably not far wrong in their estimate. But it is hardly conceivable that they can be so foolish as to attempt anything of the kind. They must be aware that the recent high level of the price of Egyptian cotton was due very largely to the impossibility of obtaining a crop sufficient to meet the increasing demand for fine cotton.

Artificial Prices.

"Any attempt to maintain the price of Egyptian cotton at a high level, out of proportion to its cost of production and the price of American cotton, by an artificial restriction of the supply could only result in very serious damage to the fine cotton trade, which would in the long run react upon the growers of the raw material. The experience of the trade in 1909-10 ought to have convinced the growers that Egyptian cotton no longer possesses the monopoly which it once enjoyed, and that any excessive premium of Egyptian over American will inevitably lead to the substitution of the better grades of American cotton for the ordinary Egyptian.

Cereal Crops.

"The idea of increasing the production of cereals looks well on paper, but it must be remembered that durra is virtually the only summer cereal crop in Egypt which can replace cotton. Wheat, barley, and oats are winter crops in Egypt, and the reduction of the cotton crop in summer would not affect the production of these crops to any material extent. It must be remembered, too, that the quality of Egyptian wheat has hitherto rendered it unsuitable for export to European markets. It seems therefore that the only result of reducing the cotton acreage will be to give the native grower plenty of durra to eat and no money to pay his debts, with the result that he will be forced to sell his durra, probably at unsatisfactory prices, to pay his rent and taxes The landlords will have greater difficulty than before in collecting their rents and the Government their land tax, while the fellah will be worse off than ever."

LANCASHIRE EXPORTS.

The August Board of Trade returns, says *The Daily Dispatch*, were the most lugubrious for probably a generation. It is likely, also, that the September returns will be very unsatisfactory, but there is a growing body of opinion that we have seen the worst. From now onward we may look for better things. These gaps in supply make for healthiness in our chief markets abroad, which, it must not be forgotten, are prosperous, and want goods the bulk of which only the machinery of Lancashire can supply.

Deliveries continue to be taken with more regularity, the financial situation is on the mend, and without very much delay new business will have to be considered. Probably very few members not directly interested on the shipping side know what difficulties merchants have had to overcome. These are being gradually dealt with. Forward contracts of any note are not yet practicable, but we know of various mills that are being put on full time.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, October 1.

No improvement whatever has transpired in the market during the past week. The tone continues very uncertain, and there is a general lack of confidence on the part of buyers in the prospects. One reason for the depression is the unsettled state of the raw cotton markets. A further reduction in spot prices has occurred in Liverpool, but values are still on an artificial basis. It is feared no immediate opening of the future market can be arranged. Manufacturers of cloth have had a most discouraging week. Very poor advices are being received from Egypt. Remittances are slow in coming in, and shippers are not at all disposed to send further supplies of goods out. The Near Eastern outlets are badly situated and business has been quite at a standstill. Some traders are rather alarmed at the proposed ending of the moratorium, and representations are being made to the Chancellor of the Exchequer with regard to the matter. Practically no offers have been met with for India, and the further loss of boats, as a result of the exploits of the German cruiser "Emden" has caused uneasiness. There is no fresh news from China, and stocks in Shanghai are heavy. Producers of printing cloths are doing very badly, the depression in Burnley and district being very acute. Less machinery is now running in Blackburn compared with a few weeks ago. Fresh work is badly wanted by manufacturers in Nelson and Colne. Nothing is occurring at the moment to prevent a more wholesale stoppage of looms in the near future. Buyers and sellers of yarn have simply been marking time. Deliveries are falling off, and owing to there being no disposition to accumulate stocks, the output is being further restricted. Perhaps on the whole Egyptian qualities are rather better situated than American descriptions. There is no chance of export business at the moment.

THE COTTON INDUSTRY.

The following are extracts from a review of the Lancashire cotton industry recently published in *The Statist*:—

The conditions prevailing during the past month may be described as being without parallel in the lifetime of any living person. The dislocation of trade as a result of the European war has been very severe, and the production in yarn and cloth is only about one-third of the output of normal times. Practically no fresh business has been done during the month, fresh orders being confined to Government contracts to meet the requirements of the war. Attempts have been made at exports, and during the last fortnight some shipments have taken place, chiefly to India. The high insurance rates, however, are a bar to any important development in our foreign trade. On the outbreak of the war shippers of cloth instructed manufacturers to stop all deliveries. This step was of serious consequence to all producing concerns, and goods began to back up at the weaving sheds and in merchants' hands. Since then some supplies have been taken, but a steady restriction of the output of cloth has taken place.

BY APPOINTMENT.

JOPP'S BLEND

Old Highland Whisky.

AGENTS for EGYPT and the SUDAN:

COMMERCIAL & AGENCY CO. OF EGYPT, LTD., Alexandria & Cairo.

NEWS FROM ALL SOURCES.

The operation of the Greek moratorium has been extended to October 13.

A number of engineers have left for Eski-Joumaya, says *Le Journal des Balkans*, in order to study on the spot the canalisation of the River Vranja, the silting and spreading of which caused the recent floods from which the whole country has suffered.

Constantinople papers state that the Ottoman Government has just begun the installation of the telephone line to connect Sofia and Constantinople. It is expected that the work will be completed towards the end of the year.

The directorate of the National Bank of Greece has decided to open a branch at Kavalla.

The Ottoman Government has created a consular agency at Toulouse. The post is honorary.

The *Echo de Bulgarie* states that an agreement has been come to between the railway authorities of Roumania, Austria-Hungary, Turkey, and Bulgaria, by which it is decided to arrange a new conventional train service between Vienna and Constantinople. The route will be Vienna—Budapest—Bucharest—Rustchuk—Tirnovo—Stara Zagora—Constantinople.

The exportation of cereals from Roumania to Austria and Germany, which is now officially prohibited, has been virtually stopped for some time past, the railway authorities declining to accept consignments for transmission beyond the frontier, on the ground of congestion of traffic.

According to news from Sofia, a tunnel and a bridge on the Uskub-Salonika line has been destroyed by comitadjis, and the rails torn up at various points. The news lacks confirmation.

Austria has cancelled all her commercial treaties. The oldest of these was the Anglo-Austrian treaty, and one of the youngest, that concluded with Serbia in 1911.

The Roumanian Bank Rate was fixed on September 6 at 6 per cent.

A sum of from 30-40,000,000 lei will have to be spent by the National Bank of Roumania in granting small loans to farmers on their crops. This is an exceptional measure produced by the present money stringency.

The Roumanian State Railway receipts for July amounted to 10,649,000 lei, or an increase of 6,500,000 lei over last year's receipts when, owing to the war, practically all transport had been stopped. From April 1 to July 31, 1914, receipts totalled 41,900,000 lei, an increase of about 10,000,000 over last year and 4,500,000 over 1912.

The National Bank of Bulgaria, with a view to facilitate credit during the moratorium, is granting exceptional terms to its clients, Those, for instance, who prior to the moratorium had paid back more than 50 per cent. of their loans to the bank, are enabled to borrow again up to the 50 per cent. limit.

The directors of several important Russian banks have handed over to M. Spolaikovitch, the Serbian Minister in Petrograd, 20,000 roubles for the Serbian Red Cross Society.

British manufacturers and merchants wishing to obtain a market in Sweden are invited to write to the Secretary, Swedish Chamber of Commerce, 5, Lloyd's Avenue, London, E.C., in order to obtain names of importers and advice on commercial conditions in Sweden, etc. The Chamber receives daily a large number of inquiries from Swedish importers who have hitherto purchased from Germany and Austria. British importers wishing to obtain supplies from Sweden will also be assisted by the Chamber.

Shipping Intelligence.

THE LEVANT TRADE.

Attitude of British Shippers.

On September 4, "H. E. P.," writing to THE NEAR EAST, advocated that if we really intended to wage a successful war on German trade, it would be necessary for the Liverpool shipping companies to continue their services to Constantinople and the Near East. "Commentator," at the time, pointed out the impracticability of such a policy, and we now receive the following letter from the Constantinople agency of the Ellerman Line, which bears out this opinion:—

The Editor of THE NEAR EAST.

Dear Sir,—It is evident that your correspondent H. E. P. is not thoroughly *au courant* of the position existing at Constantinople. Does he know, for instance, that the Turkish authorities are making wholesale and, in many cases, arbitrary requisitions of goods deposited in merchants' premises, in bank depots, and in Customs warehouses? A large proportion of the goods imported through the Liverpool liners are required by the authorities, and are consequently liable to requisition. Can it be expected under these circumstances that merchants should import goods (even if there was a market for them) which are seized by the authorities, and against which an incomplete receipt is given (stating no price) for settlement "after the war?" Does H. E. P. know that business is at an absolute standstill, and that even if requisitions were not resorted to, there would be no or very few imports for lack of funds to pay for them? The importation of coal to Turkey, which of late years formed no inconsiderable portion of the cargo carried by the Liverpool liners, is prohibited by the British Government.

The exportation of grain is prohibited by the Russian and Ottoman Governments. There may be a small lot of general cargo offering for shipment, but here again enormous difficulties are met with in financing such shipments owing to the refusal of banks to discount bills or enter into transactions of any kind.

I ask, under these circumstances, whether it is possible for the liners to run their steamers to the Levant, when it is evident, for the moment at least, that there is little cargo, if any at all, to carry on both the outward and homeward passage.

Mr. H. E. P. must remember that the Messageries Line is subsidised by the French Government, whereas the Liverpool lines are entirely independent of outside assistance. I would also point out to H. E. P. that the Moss Line does not form part of the "Ellerman combine."—Yours truly,

JAMES LA FONTAINE.

Constantinople, September 18.

CLOSING OF THE DARDANELLES.

Reuter's Constantinople correspondent reported on Monday that the port authorities of the Dardanelles notified the closing of the Dardanelles for navigation.

It is generally believed that the closure is only temporary—a matter of a few days; it is likewise suspected, however, that Germany has induced the Turks to close the Straits.

According to a Reuter's telegram from Paris of yesterday's date, advices from Constantinople say that the local Press states that the closing of the Dardanelles is due to the presence of the Anglo-French fleets cruising at the entrance to the Dardanelles and searching mercantile vessels, which is prejudicial to the advantages arising from the opening of the Straits.

MINES IN THE ADRIATIC.

Venice, October 1.

Owing to the mines in the Adriatic, the steamboat service from Trieste to Venice has been suspended. It is reported that the Government has decided to stop all mail steamer service in the Adriatic.—Reuter.

According to the Weekly Suez Canal Shipping List of Messrs. Worms and Co. (forwarded by Messrs. James Burness and Sons, London) there passed through the Suez Canal during the week ended September 10 sixty-seven vessels, of which fifty-one were British.

HAIFA NOTES.

The following are extracts from a letter from our Haifa correspondent, which has taken two months to reach us, having been despatched on August 2:—

The vessels of the Greek "Achaia Steamship Co." are now calling at this port twice a week with satisfactory results for the owners.

A movement is, I learn, on foot aiming at the formation of a native steamship company, but it is doubtful whether it will ever be successful. Local merchants are undergoing considerable loss and inconvenience as a result of the high freight rates charged, but the directors of the various steamship companies appear to be in agreement regarding a general tariff.

The Italian "Società Italiana Marítima de Navigatione" has also been permanently established here. In common with other steamship companies, the vessels of this company call twice weekly, and are doing a good business.

SALONIKA A FREE PORT.

(FROM OUR OWN CORRESPONDENT.)

ATHENS, September 15.

The establishment of a free port at Salonika has been decided upon in order to facilitate Serbian commercial interests, and a Bill to this effect will be submitted to the Chamber of Deputies as soon as it assembles.

Large harbour extension works and improvements will also be effected, and merchandise destined for Serbia will be subjected to no duties or taxes whatever.

NEW PASSENGER SERVICE.

Reuter reports from New York that the International Mercantile Marine Company announces the establishment of a direct passenger service from this port to Greece, beginning on October 15. The steamers "Kroonland" and "Finland" will maintain the service, calling at the Azores, Gibraltar, and Naples.

NEWS IN BRIEF.

The Roumanian Steamship Service has started a new bi-weekly line from Constantza to Mangalia, Cavarna and Balchitck, and a second line between Constantza-Cavarna-Balchitck and Constantinople.

The Messageries Maritimes Company has put some of its larger boats on the Constantinople line on account of the extra traffic due to the suppression of other lines.

AMERICAN CHAMBER OF COMMERCE FOR THE LEVANT.

The Chamber enters upon its fourth year with several new men on the managing board. Among these may be mentioned Mr. Oscar Gunkel and Mr. Lucien Irving Thomas, otherwise directing the affairs of the Standard Oil Company in the Levant, Mr. Arthur Leavitt, Assistant Turkish Secretary at the American Embassy in Constantinople, Mr. Theron J. Damon, an American journalist residing in the East, Mr. Theo. N. Curmusi of the Austro-Americana Steamship Line, and Mr. J. Wylie Brown, who takes over the executive work of the Chamber, which during the last two years has been performed by Dr. Hubert Banning.

AMERICA AND THE LEVANT.

There are many natives of the Sivas Vilayet in the United States, and the money which they send to their families and friends plays an important part in the economy of the population. About Ltq. 12,000 in American cheques passes through the Imperial Ottoman Bank at Sivas each year, while the post office, private banks, merchants, etc., handle a sum to make up an average of from fifteen to twenty thousand Turkish pounds per annum. These remittances from America, together with similar income from Russia, Roumania, etc., are the means which save many regions from financial bankruptcy.—*Levant Trade Review.*

Engineering Notes.

War on German Trade.

It is, we think, hardly correct to call the proposed concentration of efforts of British manufacturers for the recovery of the old position held by them until a few years ago in the world's commerce "a campaign to capture German trade." The expression, perhaps, suits the present martial times, but its applicability is doubtful. The Press in the meantime is inundated with suggestions on the subject. Some of these are, undoubtedly, quite practical, but the majority are of an amateurish character, suggesting all kinds of attacks (except, it must be admitted, bomb-throwing from airships). However, so far as we know, none of the suggestions, practical or unpractical, have been acted upon. The Board of Trade, on the other hand, is acting effectively by rousing the energy of manufacturers and by showing in plain figures the great advance of the enemy within recent years. It is, moreover, demonstrated that Germany sent to Great Britain last year £80,000,000 worth of goods, a great portion of which represents the value of engines, machinery, motor-cars, mining and agricultural implements, electrical appliances, railway and tramway material, tools, hardware, cutlery, etc., all of which could be made in Great Britain. We will not deal here with how this home trade of eighty millions is to be "captured," we are more interested in the engineering trade which the Germans and Austrians have taken from the English in the Near East, and which represents many millions.

Why Germany Gained Ground.

In the Near East, including Southern Russia, British manufacturers and merchants developed trade in their own way and dictated the terms on which that trade should be carried on. When others came upon the scene, they had neither the position nor the information possessed by the British, but they meant business, and so they took risks. Where they could they obtained money in advance, where they could not they got it on delivery, or they gave credit. The Germans could give the latter with the assistance of their banks, which had agents and representatives throughout the Near East. In this way, and with up-to-date, systematic and concentrated efforts, they succeeded in capturing British trade, which, in the meantime, had made no efforts whatever to modify old methods. Every attention was paid by Germans to the particular requirements of buyers of machinery, implements or tools, and any change of designs to suit local wants or conditions was promptly undertaken.

How to Regain Trade.

It is not so difficult to regain our lost trade as it is represented in the plans of commercial-war strategists. In a great many instances only a slight relaxation of British cast-iron rules is needed to recover the lost position. Many existing banking establishments in the Near East, and especially private bankers, are always ready to undertake the carrying out of credit terms when the buyer is trustworthy. Slight alterations in the construction of a machine or implement must not be refused. No new plant or machinery is required for such alterations. Capable travellers must be sent, and only capable and responsible agents or representatives must be appointed. We will deal in forthcoming issues of THE NEAR EAST, with the various classes of engines, machinery, etc., mentioned in the bulletins of the Board of Trade, as to the particular districts of the Near East in which such engines or machinery are required, and the type which the Germans have introduced.

A New Motor-Car "Log."

Owners of motor-cars often have good reason to suspect, from inexplicable wear and tear of their vehicles, or the consumption of fuel, that unauthorised use of their property is made by those in charge. There are, of course, many devices recording the mileage and speed of a car, but that is not all that an owner wants to know. Thus a new instrument of quite recent invention is undoubtedly a great advance in that direction. This new instrument is, so to say, a mechanical "log-book," recording perfectly and accurately the movements of the car. By its use it is possible to obtain tangible evidence of the time during which the vehicle is running and standing, the velocity with which it is travelling at any given time, and the total distance travelled. The log is reproduced on a strip of paper which is suitably graduated to show both time and miles. The paper is carried on a revolving drum, which is actuated by clockwork mechanism, while an improved speedometer mechanism controls the movements of a pencil point which travels across the circumference. The drive is taken from the centre of the front wheels in the usual manner, and the speed of the flexible shaft is suitably reduced by a gear box at the back of the instrument. Special precautions have been taken, not only to prevent the instrument's operation being interfered with so that incorrect records should be shown, but also that any attempt to tamper with the drive or other parts shall immediately be shown on the record strip. The strip of paper gives a complete running record for thirty-six hours, when it is necessary for another roll of paper to be put in the machine, and this operation is an extremely simple one. The value of securing an exact log of the movements of a car needs no demonstration.

Automatic Sprinklers.

The automatic sprinklers introduced in Alexandria appear to be operating most successfully, states the *Monthly Journal* of the British Chamber of Commerce. Since their introduction, the pumping station has dealt with fifteen fires in cotton risks, eight of them having occurred in buildings protected by sprinklers, and in every case the sprinklers have acted with the greatest efficiency. What would the claims have amounted to had these buildings not been protected with sprinklers?" ask the journal, and then adds:—"The insurance companies will be the first to admit that Minet-el-Bassal is a very different proposition from their point of view from what it was a few years ago. We believe we are right in saying that they would probably prefer to see more buildings able to claim the 30 per cent. discount on premiums allowed on buildings properly protected by sprinklers than to carry the unprotected risks at the higher premium. If merchants would insist, as it would appear to be in their interest to do, that the shoonahs they rent should be sprinkler protected, Minet-el-Bassal would soon finally lose the reputation of being from the insurance point of view one of the most hazardous areas in the world."

TENDERS INVITED.

EGYPT.

[*Further information concerning tenders marked (B) can be obtained by United Kingdom manufacturers and merchants at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.*]

Steam Coal.—Tenders are invited by the Egyptian State Railways and Telegraphs Administration for the supply of (1) 360,000 metric tons of Welsh steam coal, and (2) 40,000 metric tons of Lambton's steam coal. October 20. [B.]

Bicycles.—Tenders will be received by the Under-Secretary of State, Ministry of the Interior, Cairo, for the supply of bicycles and accessories to the police, and for the upkeep and repair of the bicycles of Cairo and Alexandria cities, for a period of three years, commencing on November 1, 1914. October 15.

MOROCCAN OPPORTUNITIES.

A British Morrocan correspondent of the British Empire Industrial League, living at Mogador, has written making suggestions for the capture of more trade. He says, *inter alia*:—As a loyal subject of his Majesty I welcome this opportunity of putting my hand to the wheel, with a view to not only regaining lost ground, but also to entirely superseding the German and further developing the sale of British products. I could at once make arrangements," he continued, "to transfer to them (English firms) the whole of the trade hitherto done throughout Morocco by the German firms referred to." The correspondent then gives a list of articles imported into Morocco by Germans and Austrians. These include enamelled ware, porcelain cups and saucers, coloured tea glasses, cotton reels, plain and mercerised cotton yarns, cutlery, cheap paper envelopes, watches and clocks, gold thread, cotton cord and kaftan, needles, superfine cloth, iron fittings, locks, bolts, pocket mirrors, glass and glassware, decorated tin boxes, fez, horse shoe nails, soaps, sewing machines, glass beads, velvets, motor-cars, methylated spirit, petroleum lamps, sanitary articles, earthenware, packing paper, dyes, imitation amber, combs and brushes, brass plates and electrical fittings. The war has, of course, entirely stopped all commercial relations between Morocco and Germany. The moment is, therefore, most opportune for British firms wishing to extend their trade in this part of Africa.

Financial Situation in Egypt.

A Welcome Improvement.

(From our own Correspondents.)

Cairo, September 14.

The financial situation appears to be much easier, and as proof thereof we have the fact that whereas some ten days ago the banks would only accept drafts on London from ordinary individuals "for collection," to-day they freely buy this paper for cash or credit on account. The opening to-day of the Minet-el-Bassal Bourse for dealings in spot cotton and cereals is most welcome, and it is generally considered that it will greatly assist the "place" and improve the situation.

The Moratorium.

The chief banks in Alexandria and Cairo have been studying the question of the extension of the general moratorium declared on August 9 and expiring to-morrow, as also various proposals made by the Government for the further relief of the situation. A committee has been conferring with the Ministry of Finance, and a decree has been signed, and will be issued to-night, extending the general moratorium until October 1.

Under the new moratorium banks and credit establishments are bound to pay a sum not exceeding £E30 on each deposit the balance of which does not exceed £E200. On deposits, which on August 8 exceeded £E200, a maximum of 15 per cent. must be paid, after subtraction of any payment made since August 9, in no case can more than £E9,000 be withdrawn from any one deposit. Charitable institutions are to be allowed to withdraw up to 30 per cent. of their deposits, subject to deduction of anything paid on or after August 9.

All this is an improvement on the original arrangement, for under the first decree, i.e., the one promulgated on August 9, depositors could only insist on payment of 5 per cent. with a maximum of £E3,000 per claimant. To-day's decree goes even one step further, for it enacts that traders and contractors shall have the right to withdraw from their deposits, in addition to the 15 per cent. laid down, sufficient to enable them to pay the salaries and wages due by them, and that all cheques and bills drawn in payment of taxes or fees due to the State or any of the municipal bodies must be paid in full.

All commercial debts or negotiable instruments which matured prior to August 4, and in connection with which legal proceedings were either presented or suspended in virtue of the decree of August 9, will become payable on and after to-morrow in regard to 15 per cent. of their value, whilst the drawees of bills and such like negotiable instruments, which are held by a bank or credit establishment, is now allowed to set off against any such bills or negotiable instruments without any limitation any balance that may stand to his credit at the same bank or credit establishment. The other provisions of the moratorium decrees of August 4 and 9 still hold good, such as they are.

Taxes Paid with Jewellery.

The Council of Ministers took an unusual decision this week, but one that the peculiar state of affairs existing at present, and likely to exist for some time, entirely excuses. Pending the adoption of some scheme for financing the cotton crop and, in many cases, even after any settlement is arrived at, great difficulty will be experienced by the fellaheen in paying their taxes. The heaviest instalments of the latter fall due during the ensuing three months, and on the collection thereof the Government relies for the wiping out of the deficit that results in the summer, and for the creation of a substantial working cash balance.

It has been reported that many persons, in order to pay the taxes, have been selling articles of gold jewellery, which, owing to the present state of affairs, have fetched ridiculously low prices. (As an instance of this, I would say, that anyone with a few sovereigns to spare could easily make a profit of about 12-15 per cent. thereon by going into the Muski and purchasing gold articles, which, owing to the scarcity of gold coinage and stagnation of business, the merchants are willing to sell at anything up to 15 per cent. below the actual value of the gold contained in them.)

By the decision referred to above, the Council of Ministers has arranged for the fellaheen to be allowed to tender gold jewellery in payment of their taxes. Government assayers are to be appointed in the Mudirias and Governorats, and the articles tendered will be correctly valued, and if the value exceeds the amount of tax due, the difference will be paid in cash to the owner. By these means, the fellaheen will not suffer the heavy losses that they would incur did they dispose of their jewellery to dealers.

Liquidating Gold Hoards.

The gold thus bought by the Government will be melted down into ingots of £500 each, and will, it is understood, be deposited with the National Bank of Egypt, who may receive power to issue more notes against it. It is not certain to what extent the fellaheen will avail themselves of this new arrangement. The authorities frankly admit it is an experiment and an attempt to keep the direct taxes up to their usual level without inflicting any hardship on the masses. It is known for a certainty that vast sums are swallowed up every year in the Muski—and, consequently, are withdrawn from circulation—where they are melted down and made up into the many divers articles of jewellery with which the fellaheen love to adorn their womenfolk, and which the latter covet to such great extent. After a prosperous cotton season at least £200,000 thus disappears, and competent authorities compute that in some years quite double that amount is handled in this manner. It is hoped that the inducement held out by the Government will cause the fellaheen to liquidate what amounts to nothing more nor less than gold hoards, and that, together with the sums that are still believed to be buried, and that the tightness of money will cause to be unearthed, a substantial amount of the gold hitherto unremuneratively invested by the Egyptians will return into hands which can utilise it for the general benefit of the country.

EGYPTIAN MORATORIUM.

Reuter, cabling from Cairo on Wednesday, stated that a Khedivial decree had been issued for the prolongation of the moratorium until October 15 on the same terms as previously.

EGYPT AND INDIAN FINANCE.

The succession of native Indian bank smashes has, says the Cairo correspondent of *The Pioneer*, not been without its effect in Cairo. Egypt enjoyed close relations with India owing to the large number of Indian traders who are settled here. These traders regularly make remittances home, and the tightness of money resulting from these failures has naturally sent the rate of exchange on India up considerably. The local banks have been asking as much as 1½ to 1¾ per cent. on the face value of rupee drafts payable in India. As a result there has been a run on the local post offices, where British postal orders for one sovereign, payable at fifteen rupees in India, are issued for a commission charge of 1 per cent. only.

GAMBLING IN ROUMANIA.

The Indépendance Roumaine, in a spirited article, calls the attention of the Government to the fact that since June 20 up to September 1 the Roumanian gambling houses have made profits amounting to about 40,000 lei per night. It compares these startling profits with the penury and stringency obtaining everywhere in this year of war, and rightly suggests that the proprietors of these casinos and gambling houses should be asked to ply their trade elsewhere. Another suggestion frequently made in Bucharest is that the Government should levy so high a tax on these establishments as to oblige them to close down or disgorge the greater part of their profits.

CROWN LANDS IN PALESTINE

(From a Correspondent.)

Jerusalem, August 3.

Crown Lands.

A new company has been registered in Constantinople under the presidency of Prince Ali Pasha, the Vice-President of the House of Deputies, with a capital of one million Turkish pounds. The object of the company is to purchase the Crown lands of both the Palestine and Syria districts in order to prevent the Jews from securing these lands. Every Turkish subject may hold shares, and traders and cultivators especially of the country are invited to do so. Many notables of the two districts are taking part in carrying out the scheme, and the Government have promised to give the needed help. According to the local Press, the plan will serve to stay the influx of immigrants as well as to counteract the unceasing endeavours of the Zionists, who have obtained a great portion of the lands in Palestine.

Abolition of the Meteliks.

As history repeats itself, so the history of the meteliks (copper Turkish coins) repeats itself. With reference to what has already been said in the columns of The Near East regarding these coins, I give the following information. On Thursday, July 30, the Jewish money-changers of the city, who are the fulcrum of commerce in Jerusalem, refused to deal in the old copper meteliks, and soon their example was followed generally in the trading community and even by some of the Governmental Departments. Jaffa has also followed suit. It was rumoured some time ago that the Government was going to abolish the old copper meteliks—namely, the one, two, five, ten, and twenty pieces—in March, 1915, the fiscal year of the Government. The action of the Jewish money-changers has caused a great deal of uneasiness and stagnation of business, and although the Government has issued orders to prevent this strike, they have refused to deal in the old copper coins.

CONSTANTINOPLE IMPROVEMENTS.

Mr. Consul Waugh in his annual report on the trade of Constantinople states that during the early part of 1913 there was a severe depression owing to the effects of the war, but towards the end of the year there was a recovery which became brisker in the early part of 1914. Several improvements have been made in the main streets, and some of the narrowest have been widened. An excellent service of electric tramcars runs from Pera across the bridge to the far end of Stamboul; the town is supplied with electric light, and there is a good telephone service. The Société Impérial Ottomane Co-intéressé de Docks, Arsenaux et Constructions Navales (Armstrong-Vickers) has obtained a concession for reorganising the dockyard of the Golden Horn, and to build at Ismidt a floating dock of the capacity of 32,000 tons, and building repairing yards for naval purposes. No new railways were opened during the year, but the Baghdad railway is making steady progress, and various concessions for railways in Smyrna have been granted or are under consideration. Of the electrical material imported £20,000 worth was from the United Kingdom and £140,000 from other countries; of the steam and oil engines and parts £159,000 worth was from the United Kingdom (increase 50 per cent.) and £342,000 from other countries. An electric lighting concession for the town of Mersina has been granted to an Ottoman subject.

BRITISH GOODS REQUISITIONED BY TURKEY.

H.M. Chargé d'Affaires at Constantinople reports that he has received information from the Turkish Government to the effect that United Kingdom firms, whose merchandise may have been requisitioned by the Turkish Military Authorities without delivery of a receipt, should communicate with the Civil Authorities at Constantinople or elsewhere with a view to having the required formalities carried out.

THE POSITION IN THE CITY.

(By Our City Editor.)

Stagnation!

The newspapers persist in declaring that the whole position is much better. I am quite unable to agree. We have got used to the condition of chaos—that is all. The Stock Exchange shows no inclination to re-open its doors, and the amount of business done by brokers and dealers on a cash basis is infinitesimal. The fixing of prices at which gilt-edged securities are to be sold has had only one result—namely, to stop business. This move of the Committee was instigated by the dealers, and it is seen to-day that all the dealers are sellers. They are never buyers. Consequently you can only deal one way.

Armament Shares in Demand.

There is, however, one exception to the stagnation business: that is amongst armament securities. Everybody realises that the armament firms must make very large profits out of the war. As a consequence there has been a demand for the shares. For example, Kynochs have risen £5, and the Birmingham Small Arms, which were quoted at 45s. before the war, are now difficult to buy at 55s. Vickers Maxim are now 34s. 6d. and Armstrongs 39s. 6d., whilst Cammell Laird are quoted 4½. All these securities seem good to buy at their present prices. The Birmingham Small Arms report appeared this week. The profits for the year are £190,429, or £3,400 better than in the previous year, and the dividend of 15 per cent. is again paid. £50,000 goes to the reserve fund and £68,284 is carried forward. The balance-sheet is strong. Creditors only amount to £75,000, and the total assets of the concern are £1,891,677, of which £870,000 consists of cash and investments. The investments show an increase of £300.000, which money has been put into the Daimler Company. The business has been well managed for a great number of years, and has a splendid record.

Germans in London.

There is a good deal of talk about the position of the German houses in London, and it is quite clear that many of them are heart and soul with the enemy. The sooner the Government realises this the better. There are also many Anglo-German firms on the Stock Exchange, and some of these openly express sympathy with the national foe. It is rumoured on good authority that the principal shareholders in the Swiss Bank are two of the directors of the Dresdner Bank. The two banks have been closely associated, and are supposed to control the German copper industry. It has been declared that they own the bulk of the shares in the Metallische Gesellschaft and Henry R. Merton and Company. This is a matter that should be gone into, and if the firms mentioned have no German connections they will gladly welcome any inquiry.

End of the Moratorium.

The ending of the moratorium will be an excellent thing for trade in general, and probably some arrangement will be made by the Government to help those firms who have a large business abroad and find a difficulty in obtaining money. Many of the Bradford houses who do a large business in Germany have been asked to take scrip in the recent German Imperial Loan in payment of their debt. This is an impudent proposal, and is not likely to be accepted. Apparently all German traders owing money abroad have been instructed to make this offer.

Companies' Earnings.

The Brazil Railway report has been the event of the week. The position of the company appears to be hopeless. Two of its most important railways, the Madeira Marmore and the Sarocabana, have defaulted on their bonds, all the subsidiary industrial undertakings have got into trouble, and the only two roads now controlled by this railway that are doing well are the Paulista and the Mogyana. It seems most unlikely that the company will be able to meet the interest on its so-called bonds. Holders should remember that these bonds are only secured upon paper agreements and not upon actual physical assets, and they should sell for whatever the bonds will fetch. The Johannesburg Consolidated has had a fairly good year, but, as the whole of the money is locked up in loans to the Stock Exchange, no dividend can be paid, although 5 per cent. has been declared.

No News from Egypt.

There is no news of any importance from Egypt, but the financial section in Alexandria and Cairo look upon a war with Turkey as inevitable.

COMPANY MEETING.

OTTOMAN (SMYRNA-AIDIN) RAILWAY.

Lord Rathmore, presiding on Tuesday over the general meeting of the Ottoman Railway from Smyrna to Aidin, stated that the declaration of war in the beginning of August was speedily followed by a prohibition by the Ottoman Government of the export of grain from Turkey, bringing with it a suspension of credit and a consequent stagnation of enterprise and commerce throughout the country. In addition, the state of war had led to an almost entire cessation of maritime traffic in and from the Port of Smyrna. Having regard to all these circumstances and in view of the unsettled state of affairs in the Ottoman Empire, the directors had most reluctantly decided to carry forward to the next account the large balance shown.

The new Convention which had been signed with the Turkish Government would not become operative pending the completion of transactions with other parties in which the Government was engaged at the outbreak of the war. The directors believed that the Convention would place the company in a decidedly stronger position in the future. It secured an extension of the time-limit of their concessions for an additional period of forty-nine years—that was, until the end of the present century; and it also included the grant to the company of the right to construct extensions of their existing lines over a total length of 230 miles in addition to the 379 miles which were at present covered by their railway.

COMPANY RESULTS, &c.

Anglo-Egyptian Oilfields.—Gemsah production for last week amounted to 1,673 tons (previous week, 1,870 tons); Hurgada production for last week, 143 tons (previous week, 140 tons).

Piræus, Athens, and Peloponnesus Railway.—The coupons and drawn bonds of the 4½ per cent loan, due October 15, will be paid on and after that date at the offices of Messrs. R. Raphael and Sons, Austin Friars House, E.C.

Ottoman Railway From Smyrna to Aidin.—Receipts for the week ended September 26 amounted to £9,527, against £13,848 for the corresponding period of last year.

COMPANY NOTES.

Traian Roumanian Oil.

The report of the Traian Roumanian Oil Company, Ltd., presented at the meeting on Tuesday, covers the period from March 19, 1913, to April 30 last, and states that the profit for the period amounted to £28,561. After making provision for English and Roumanian taxes, amounting to £1,925, writing off £17,040 for depreciation and £755 half the preliminary expenses, there remains a balance of £8,839, which sum it is proposed to carry forward. The production of crude oil from the company's properties situated in the districts of Baicoi, Bustenari, and Campina amounted to 23,686 tons. The company not having entered into long period contracts has benefited from the steady rise in price of crude oil which has taken place during the past eighteen months. A comprehensive drilling programme was initiated when the property was acquired, and six wells were located in positions where good results are practically certain. Unfortunately the Balkan War of 1913 considerably interfered with the development work, about 80 per cent, of the workmen having been called to the colours during the Roumanian mobilisation. As a consequence it was not possible to complete any of these new wells. Progress during the winter months was also retarded by the unfavourable weather conditions which prevailed. The recent outbreak of war has rendered the transport of crude oil in Roumania practically impossible and, as all the company's available storage is full, it has been necessary to close down for the present most of the producing wells. Meantime, with the limited supply of labour available, it is hoped that it will be possible to continue drilling operations at some of the most important wells, and that when transport facilities are again available several of these will have reached the productive stage. Official recognition of the company has been granted by the Roumanian Government, and the properties have been transferred into the company's name.

CURRENCY FOR NEW GREEK TERRITORIES.

H.M. Minister at Athens reports the publication of a Royal Decree dated July 21-August 3, providing for the extension to the Greek New Territories of the coinage system in force in Old Greece, so that all the coins struck in virtue of the laws regulating that system, and those which are at present circulating, will be legal tender in the New Territories. The circulation of copper or nickel coins of the Ottoman Empire is prohibited, but the 25, 50, and 100 piastre Turkish gold coins, as well as the ½, 1, 2, 5, 10, and 20 piastre silver coins, will be temporarily legal tender in the New Territories, except that the gold coins will not be legal tender in Crete.

GREEK INSURANCE.

We published last week a reference made by our Athens correspondent to war risks. *The Board of Trade Journal* now publishes the following:—

H.M. Minister at Athens reports that the *Official Gazette* of August 18 publishes a decree empowering the Ministers of Finance and of National Economy to authorise the National Bank, as mandatory of the State, to cover, on account of the State, war risks on cargoes of currants exported by sea. The conditions of insurance are to be settled by agreement between the two Ministers and the National Bank. The decree is subject to subsequent approval by the Chamber of Deputies.

TURKISH POST OFFICES.

Reuter reported from Constantinople on Tuesday that the French and Russian post offices will close on October 1, but the staffs will be transferred to their respective Embassy buildings, where they will continue to receive European mails up to October 28, and extra-European mails to November 26. They will discontinue from October 1 to despatch mails from Constantinople, and this duty will devolve entirely on the Ottoman postal administration. The Austrian, German, and Italian offices will close October 1. No mention is made of the British post office.

NOTES OF THE WEEK.

During the past week the war in the west has been extended along a line leading northwards from the Aisne through Bapaume and Arras to the neighbourhood of Armentières and beyond. Hitherto the operations along the river front in France and before Antwerp have been quite distinct, but the constant efforts of the Germans to outflank the left wing of the Allies and to intercept communications between Antwerp and Ostend have tended to bring the two battle areas nearer together. In Antwerp itself the situation is believed to be less critical than was the case twelve hours ago. The Germans are making a very determined effort to possess themselves of this great fortress, and have penetrated through the outer line of defences on the east and south. Unforeseen factors have, however, entered into the defence, and the task of the assailants has been materially made harder owing to the fact that the German artillery no longer enjoys an undisputed mastery by reason of its weight of metal. It cannot be said that Antwerp is besieged, seeing that the railway to Ostend is still open, as every effort on the part of the enemy to cross the Scheldt for the purpose of cutting that line of communication has been foiled. But it is beset, and until the Germans have been driven back out of range of Antwerp or its defences we cannot be entirely content as to its safety.

In view, however, of the imminence of actual bombardment the Belgian Government has taken the very wise precaution of withdrawing its administrative staff and its archives out of the danger zone to Ostend. Such a step enables the military authorities to consider Antwerp as the great fortress which it is, and not as the capital of a kingdom. The reasons for the departure of the Belgian Government from Antwerp are precisely those which influenced the French Government to retire from Paris to Bordeaux. Further east along the front in France our gallant Allies have effectively smothered repeated attempts on the part of the Crown Prince's army to break through in the Argonne and on the Upper Meuse. In the centre of the line of battle—that is to say, the section between Suippes and Soissons—no important movement has been chronicled, but in the western section very vigorous fighting is believed to be even now in progress. Here the fortune of war has swayed almost a few metres at a time, and the soil is becoming sour from the presence of such multitudes of men during so long a time. General von Kluck is now in a less favourable position than he was a fortnight ago, and there is a general impression among well-informed observers that Fortune is smiling upon the arms of the Allies.

In Poland the German offensive in the north failed miserably to force the passage of the Niemen, and the great movement which was to have altered the whole fortune of the war has not only been checked and rebuffed, but has actually had to be diverted into another area. So far as can be known at present, substantial numbers were withdrawn from the army of East Prussia to accompany General von Hindenburg in his attempt to save the remnant of the Kaiserlichs from destruction near Cracow. It is not improbable that this decision was hastened by the handsome Russian victories on the Niemen and near Suwalki. As a result of these movements and changes of plan, the Russians have once more appeared as conquerors in East Prussia, while what must now be considered the main German Army of the East has descended into Southern Poland, and now faces the victorious Russian Army of Galicia across the waters of the Upper Vistula. With that fine disregard of frontiers which distinguishes modern warfare, the German Army is drawn up on Russian soil facing the Russians on Austrian soil, while the unhappy Kaiserlichs have to support their terrible ally partly on their own and partly on German territory. Meanwhile the Russians are sweeping through the passes of the Carpathians into the plains of Hungary. They have already occupied the Ruthenian counties round Máramoros Sziget, where they find themselves as much among their own people as they were in Galicia, and some of the Slovak counties in Northern Hungary, where also they are among a kindred folk. So rapid have been the Russian invasions of Hungary, and so menacing is this advance considered to be, that the Kaiserlichs are making every effort to fortify Vienna, which saw an invader's camp fires as recently as 1866, and was twice occupied by Napoleon's troops in 1805 and 1809. It is reported as likely that the Imperial Court and Government may withdraw to Prague, which would be directly behind the great Teutonic hosts in Silesia and Southern Poland, and maybe the aged Emperor will bitterly

Digitized by Google

regret that he has left unfulfilled his promise to his Czech subjects to be crowned King of Bohemia. Were the Czechs to be as ardent supporters of the Throne as are the Magyars—won by just such a concession in the past—the arms of the Kaiserlichs would be greatly strengthened at the present moment.

In the southern theatre of war a close examination of the rival statements of the two Press Bureaux still leaves the observer in considerable doubt. It is plain that the Serb Allies have not as yet taken Serajevo, and it is equally certain that no considerable invasion of Serbia has been effected by the Kaiserlichs. Yet it seems that the Serbians have been unable to make good the positions which they had won on the Romania Planina, and the line of battle seems to have been rolled back towards the Drina. Without artillery nothing can be achieved against the defences of the Bosnian capital, and heavy guns can only be brought up under cover of the advance of large bodies of troops. The raiding parties of Montenegrins who have pressed right up to and beyond the Serajevo forts can have but little influence upon the fortunes of a war against a foe equipped with every device of military science, and as yet the Serbian Army is not in a position to force its way through the mountains and hold ground long enough for great guns to be brought to bear upon the permanent works in which the Austrians put their trust.

In both Italy and Roumania a considerable volume of public opinion exists in favour of immediate action, but those in control of the Government have decided that the time is not yet. It may be that preparations are not yet complete. We know that in the case of Italy much was found to be necessary in the way of replenishing stores and rearranging the disposition of artillery since the end of July. It may be that the opportunity is not yet ripe. Certainly in Roumania the influence of King Carol has restrained both statesmen and people from anything in the nature of precipitate action. Both Rome and Bucharest are determined to consult their own interests, and it is not for any foreigner to attempt to dictate to them what steps they should take in pursuit of those interests. We can only remind them that the parable of the labourers in the vineyard will not be the text upon which the Peace sermon will be preached when the time comes.

It is very greatly to be hoped that the reported ill-treatment of Macedonians by Serbian officials, which are vouched for not only from interested but also from independent sources, are unfounded. Engaged upon a life-and-death struggle, from which we hope Serbia will emerge the victorious liberator of her kinsmen beyond Save and Drina, the monarchy of King Peter cannot afford to figure as an oppressor elsewhere. Envious neighbours are only too ready to listen to stories of ill-treatment if any case occur, and, in view of the mutual suspicions of those Balkan States which still remain at peace, it is highly undesirable that any opportunity should be given to the diplomacy of the Teutonic Powers for making further trouble. We consider it to be unlikely that Bulgaria will emerge from her neutrality, in spite of the Austrophil leanings of Tsar Ferdinand or the Russophobe creed of his Ministers. But there is a vast difference between the maintenance of a strict neutrality in the midst of suspicious and suspected neighbours and the reconstruction of a Balkan *bloc*, to which desirable end great statesmen unceasingly labour.

Of Turkey it is difficult to write. The behaviour alike of metropolitan ministers and provincial officials is so remarkable, and the situation of all Europeans, save subjects of the Teutonic Powers, so precarious, that it is difficult to believe that the Porte is master of its own fate. It is idle to recapitulate the untoward events which are of daily occurrence; it is vain to ask what peaceful purpose the military movements in Asia Minor can serve. The Porte has been assured that no one of the Powers of the Triple Entente or their supporters harbours any evil intentions against it, and common sense would naturally persuade the Turks not to cherish schemes of conquest at the expense of all their neighbours at once. But it appears that it is not the Turks with whom our statesmen have to deal, but with Powers who affect to use the Porte as their puppet. It is an undignified position for the Commander of the Faithful to occupy, and one far from creditable to the statesmanship of his Grand Vizier. We most earnestly hope that the successor of Mohammed Fatih, the first Padishah, will be able to shake himself and his country free from the grip of the Byzantine nightmare of intrigue and force which now menaces the Guarded Realms.

The efforts of Berlin to pull the strings of Islam have often been noticed in these columns, and upon occasion we have expressed our suspicions that the long-drawn war in Morocco was not wholly foreign to Germany. Still the confession of a German officer recently captured in France that actual skilled assistance was given to the Moors to enable them the better to occupy the attention of the French will be somewhat of a surprise to some. We know that the Teutonic Consular representatives had to be expelled from Tangier by the French, just as they had to be removed from Cairo by the British military authorities. We know also that German agents were troublesome to the Italians in Libya until summarily suppressed. We are aware that the Germans are straining every nerve to set the Turks against us, and that they have failed to enlist the Sheikh-es-Senussi as an armed supporter of their policy. Yet, in spite of all their efforts, it is comforting to view the Dar-ul-Islam. A genuine public opinion exists in Moslem Egypt in favour of Great Britain and her Allies. Moslem Algeria and Moslem India are pouring forth their blood and treasure for the sake of France or in the service of the King-Emperor. Moslems of African race have distinguished themselves in the same service further afield, and such assurances have been given that we now have every right to believe that if further assistance be asked of Islam within the British Empire it will eagerly be accorded.

Such being the case, it is open to question whether Ottoman Islam is as opposed to the cause of the Allies as at first seems to be the case. Patriotic Turks in Cyprus, inclined to be indignant with Great Britain for having requisitioned the warships in building for Turkey in British yards and moved by anti-British articles in the Constantinople Press, have listened to the reasoned explanation of the British High Commissioner, as conveyed in a letter to Irfan Bey, the senior Moslem member of the Legislative Council in the Island, and have recognized alike the necessity and the legality of the action. Is it too much to hope that equally patriotic Turks on the mainland will come to the same conclusion if the same arguments can be presented to their consideration? The powers that be in Constantinople evidently are of that opinion, as every precaution is apparently being taken to prevent the Turks of the mainland from knowing anything except what the Teutonic "advisers" of the Porte think fit for public circulation.

The election of Burhan-ed-Din Effendi as Mpret by the Albanian Senate has been followed by that of Essad Pasha Toptan, the exiled Minister of War of the ex-Mpret, as Grand Vizier, or President of the Provisional Government. It is asserted that his Excellency produced such overwhelming arguments in favour of his candidature that the Senate was unable to refrain from making him Dictator of the Principality in name. It remains to be seen whether he will be able to make himself master in fact and restore peace to the country. In the south we learn that a Moslem force has defeated the Epirotes in the Valona district, and it is possible that this may lead to renewed activity on the part of the Orthodox insurgents, who have frequently declared that they will never again submit to Mussulman domination. Such activity in its turn is not unlikely to produce uneasiness in Italy as to the safety of Valona. Rome is determined not to allow this portion of the Adriatic to pass under Greek control, whether it be Hellenic or Epirote, and as Italy is for the moment the only representative of the Concert with time to devote to such matters, it is not unlikely that further hostilities in Southern Albania may lead to an occupation of Valona by Italian troops, acting, at first at any rate, in the name of Europe.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, September 22.

War Conditions.

When hostilities broke out in Europe, the British and Egyptian authorities at once closed up all official channels of information and forbade the local Press and foreign correspondents from publishing or despatching any articles or messages that had any bearing on the local military situation, or contained matter that might be of some assistance to the enemies of the Entente. No one could or indeed did object to this interdiction, which has had such a signally successful precedent at home. One or two journals did venture to publish information, which was regarded as a transgression of the official order, and they were promptly dropped upon in a manner that will ensure that no repetition of the offence shall take place. Beyond those instances, there has been no attempt at disobedience, and everyone seems to have realized the necessity for keeping everything as secret as possible.

But this secrecy that has been imposed, this veil that has been drawn over actions that everyone knew were imminent or were taking place, has had as one natural result the circulation of the most extraordinary and at times contradictory, rumours, with regard to the situation in Egypt. The Turkish Army has appeared at least half-a-dozen times on the eastern frontier, now at Akaba, now at El Arish, now at Ghezza, and it has even crossed the border! The wells on the caravan road from Kantara, which are considered of such strategic importance, have been blown up or destroyed regularly every week! And last, but not least, the troops from India have, ever since August 15, according to "authoritative statements" in the clubs and cafes, been dodging about between Bombay and Marseilles, incidentally disembarking at Suez and detraining at Cairo in a most extraordinarily agile manner, which left one, in the end, absolutely bewildered as to what had happened.

The Indian Troops.

As a matter of fact, all these circumstantial statements as to the movements on the eastern frontier and those of the Anglo-Indian forces have been quite incorrect. The curtain that has concealed the military dispositions has now been drawn aside sufficiently to let us and the Egyptian population know that troops from India have arrived, and that their disembarkation on Egyptian soil started on the 9th inst., but exactly in what numbers they have landed and what proportion, if any, has gone on, no one—not even the officers themselves—is able to tell. The manipulation of the curtain is in very deft hands, and in the circumstances one must be content with whatever items of information, whatever facts permitting accurate deductions, are vouchsafed to us.

The fact that the Anglo-Indian troops had arrived was confirmed by a parade that took place through the city on Wednesday last. The troops marched in from Heliopolis, where an enormous camp had been laid out, past Shepheard's and the Continental, where Lieut.-General Sir John Maxwell, the G.O.C. of the Army of Occupation, took the salute, down the Sharia El Manakh, past the French Agency, which they saluted with "La Marsellaise," the National Bank of Egypt, across into the Abdin Square, and back viâ the Opera Square and the native quarter of Clot Bey, into the Sharia Abbas once more. In spite of their unpleasant sea-trip the troops looked very smart, the black-bearded Sikhs, some of them of gigantic build, and the Jap-like Gurkhas, arousing much interest, especially amongst the natives, and the whole parade was most imposing; though it would certainly have been more impressive if the police arrangements for keeping the route had not been so inadequate. For once in a way one regrets to say that the Cairo City Police did not display its usual efficiency.

The Late Mustapha Pasha Fahmy.

Universal regret was expressed and was evident when it became known that Mustapha Pasha Fahmy had passed away on Monday morning last. The aged statesman—he was 71—had arrived on the 8th inst. from Marseilles, where he had had a paralytic stroke, followed by a second one on the steamer, and his demise was quite expected. His funeral took place in Cairo on Tuesday, and the crowd of notables, European and native, who followed the coffin through the streets was in itself an eloquent testimony to the affection and respect that the late Premier had inspired amongst all classes of the population. His funeral was, indeed, the most impressive one that has taken place in Cairo for many years, if one excepts that accorded to the Coptic Prime Minister, Boutros Pasha Ghali, which was attended by special circumstances.

In the late Mustapha Pasha Fahmy England loses a sincere and loyal friend, and Egypt a distinguished and able servant. Throughout the period during which he held office, either as Prime Minister or as an ordinary Minister, he ever displayed a foresight and a grasp of Egypt's peculiar political position and her needs that were unique in an Oriental. He was, as Lord Cromer said, every inch a gentleman, and during the thirteen years he acted as Prime Minister under the great Pro-Consul, he never once failed him. As may be remembered, Mustapha Pasha Fahmy was again offered the Premiership last spring. Whatever theories may be indulged in as to the reason, he firmly rejected the offer, there is little doubt that his state of health must have been a determining factor, and although everyone regretted the non-return to power of this veteran and able statesman, it was evident, and events have proved it, that his decision was entirely in the interests of the country.

Egyptian Interests in the Deutsche Orient Bank.

The closing of the doors of the Deutsche Orient Bank just at the most critical period at the outset of hostilities must have come as a terrible shock to its many Egyptian depositors, and the latest action of that institution in trying to get out of the obligation imposed upon it by the extension of the moratorium—it pretended that the payment made under the first moratorium had to be deducted from the larger one authorized under the extension—cannot have done much to raise their confidence. The number of native depositors in the D.O.B. is enormous. Scarce an important Daira or rich native but has entrusted its or his money to the Teuton. The Egyptian Red Crescent, the Egyptian Congress, and the Egyptian University all have their funds in its coffers. One and all have been lured by the high rates of interest allowed, and by the belief that it was all done for love of the Moslem.

Rumour has it that at the last moment an important sum was sent by the bank to Germany; and although its local management contradicts the statement, it is pretty generally felt in financial circles that the deposits were not all lent out in Egypt or in Syria. It is to be hoped that, since his pocket is touched, the Egyptian will at length realize the true value of the Teuton's avowed friendship for him, and that he will draw a comparison between the position of the D.O.B. and the local British and French banks which have remained open all the time, and have by no means insisted on

adhering to the bare minimum imposed by the moratorium decree.

The D.O.B. has served the political ends of its Government nobly, and it will be interesting to see whether it will be able to pay its depositors in full when peace is declared. In the meantime, it would appear to be the duty of the authorities to pay much closer attention to its administration. Since Egypt is in a state of war with Germany and German Agent and Consuls have left the country, there should be no reason why, as in England in the case of the German banks, an English manager should not be appointed. Considering the large amount of Egyptian deposits, such a step would be fully justified in the interests of the country. It would ensure that depositors would obtain fair and impartial treatment, and that all the assets would be held in trust for them. Under present conditions no such guarantee exists.

EGYPT AND GREAT BRITAIN.

The following statement issued from the British Agency, Cairo, is yet another item in the evidence that is accumulating day by day to show how greatly Germany miscalculated when she reckoned that the Egyptians would rally to *her* support:—

"His Britannic Majesty's Agency has received a number of inquiries from Egyptian notables who desire to express their sympathy for Great Britain by subscribing to the British Red Cross or other Relief Funds for sufferers from the present war. These offers of assistance, which are especially valuable as an indication of the excellent feeling towards Great Britain prevailing throughout all classes of Egyptians at the present moment, will be deeply appreciated by His Majesty's Government. The National Bank of Egypt will be glad to receive and acknowledge subscriptions to the British Red Cross or Prince of Wales's Funds.

"At the same time, the Agency desires to point out that Egypt has been herself affected by the war and that the existing financial stringency is causing, and is likely to cause during the coming winter, a considerable amount of unemployment and distress throughout the country. In the circumstances, the Agency would recommend that Egyptians should not, in their laudable desire to show sympathy to Great Britain, lose sight of this aspect of the case, and considers that the best method of showing this sympathy, and the one which will be most appreciated by his Majesty's Government, is that all Egyptians should concentrate their efforts to assist their poorer fellow-countrymen by organising relief to meet local distress."

EGYPT AND THE INDIAN TROOPS.

Reuter learns in connection with the suggestion that at least a portion of wounded troops from the Indian Expeditionary Force should be brought to this country rather than be kept at hospital bases in France and possibly at Alexandria, that the primary consideration in this matter is climatic. No doubt can exist in India as to the reception which would be accorded to any of his Majesty's Indian troops were they brought here, and while the warmth of that reception would be intensified in present circumstances hardship would be suffered by the troops themselves. The personal welfare of this section of the forces must outweigh all other considerations, and India, who already knows the affection and admiration with which her rally to the King-Emperor is regarded in this country and throughout the Empire will not be slow to interpret rightly the proposed distribution of her wounded.

The Egyptian Red Crescent Society, of which Prince Mohammed Ali is president, has made a contribution of £E1,000 to the funds of the British Red Cross Society. The Prince telegraphed this sum to Lord Kitchener, who replied thanking the president and the native members of the Egyptian Red Crescent Society for their generous gift.

PORT SAID NOTES.

(From Our Own Correspondent.)
Port Said, September 22.

The Suez Canal.

The staff of the Suez Canal Company has been seriously depleted by the departure of the French Reservists for the front. The office, works, telegraphs, etc., are now being conducted by a staff composed almost entirely of men of advanced years, whose only regret is that they are unable to join their compatriots in the active defence of their country.

The working of the canal is carried on with the same regularity and efficiency as before, and the international waterway is open to the world's shipping.

Germans and Austrians.

Much amusement has been caused here by the efforts of the unfortunate Austrian and German Reservists to join the colours. They have been refused passages by captains of numerous steamers of all nationalities, and they were finally ordered by their consuls to embark on Italian steamers at Alexandria. After several vain attempts a number succeeded in getting away from that port by a Greek steamer, but, if rumour may be believed, they were met outside the harbour by a British cruiser, and are now being cared for by the British Army at Malta. Their repeated refusal by steamers of several neutral Powers affords a striking commentary on the popularity of the Teutonic Alliance.

The German and Austrian Consuls have been requested to leave the country. The Austrian Consul left a few days ago, and the German Consul is given until the 24th of this month. Their duties are taken over temporarily by the American Consul, who, by the irony of fate, is an Englishman.

The Indian Expeditionary Force.

The first convoy of transports bringing the Indian troops has at last arrived, and a number of steamers has already passed through the Canal and proceeded to an unknown destination.

The majority of steamers engaged in this work are owned by the British India Steam Navigation Co. It is said that as many as eighty of this company's vessels have been taken up by the Indian Marine for carrying troops.

The destination of the troopships is generally supposed to be Alexandria, where the troops will be landed and exercised after their long journey, and on the arrival of another convoy they will, it is said, re-embark for Marseilles under convoy of the Franco-British Fleet.

THE ENEMY OF ISLAM.

Addressing a meeting promoted last week by the Indian Volunteers Committee, at the Polytechnic, H.H. the Agha Khan gave a stirring address on the loyal spirit of India at this crisis. He could not, he said, adequately express the feelings of pride and joy with which he was addressing young fellow-countrymen whose spontaneous desire actively to serve the King-Emperor in this supreme hour in the destinies of Europe and the world had found scope in the formation of the Indian Field Ambulance Corps. They represented a spirit which was universal among their countrymen sojourning here. In this supreme hour differences of race and creed counted for nothing among the King-Emperor's Indian subjects. They were absolutely united in the common purpose of taking their full share in the trials and sorrows of the Empire, and in contributing to the sacrifices entailed by her unconquerable determination and that of her Allies to win through.

He had always been convinced that Germany was the most dangerous enemy of Turkey and other Moslem countries, for she was the Power most anxious to enter by "peaceful penetration" Asia Minor and Southern Persia. But she had been passing for years past as a sort of protector of Islam—though Heaven forbid that they should have such an immoral protector. Happily, so far as the Moslem subjects of the King were concerned, these efforts were absolutely futile. They would never break down the strong wall of their loyalty, which was based on the consciousness that their dearest interests, religious as well as civil, were guaranteed to them by British rule more securely than they could be by any other dominion.

In a message dated October 1, Reuter's Cairo correspondent says:—General Sir John Maxwell, commanding the British Army of Occupation, has published an order that all German, Austrian, and Hungarian subjects in Egypt will have to register before October 10 and obey the conditions under which they are allowed to remain in the country. Persons disobeying this order will be arrested.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, September 23.

The Situation in the Balkans.

The efforts made by Germany to stir up the Balkan States have so far failed, notwithstanding the Turkish mobilization. This is largely due to the attitude of Greece, who, strong in her possession of considerable military and naval forces, has declared her intention of standing by her ally, Serbia, and has thus counteracted certain aggressive tendencies that might have led to serious trouble in this part of Europe. Moreover, the failures and reverses of the German Army and the victories of the Russian Army have also had their effect. According to latest reports from Constantinople, however, it looks as if Turkey, which seems just now to be in the position of a German possession, is really about to take action of some kind. Against whom? Everything seems to indicate Russia as the object of attack, but the fact that it might also be directed against this country is not lost sight of here.

Greco-Roumanian Relations.

On the other hand, everything seems to show that in Roumania the constantly increasing pressure of public opinion in favour of the Triple Entente will at last compel King Carol's Government to abandon its neutrality and embark upon the military occupation of Transylvania and the Eastern Bukovina. Roumania, finding herself, as regards Austria, situated similarly to Italy, will in all probability wait for the latter to abandon her neutrality first, so as to take common action with her against Austria.

It is quite clear that the new situation brought about by the unfavourable turn which the fighting has taken for Austria offers to Roumania opportunities that make her wish to be free to employ her army in another direction than in the south. This accounts for her activity in endeavouring to bring about an understanding between Greece and Turkey on the subject of The Islands.

All this had created an impression here, as I indicated in my former letter, that Roumania had entirely lost interest in the Treaty of Bucharest. However, since the return to Athens of the Greek delegates to the Turco-Greek conference in Bucharest, who doubtless had occasion to discuss these questions with the Roumanian Government, it is stated in official circles that relations between the two countries still rest on the solid basis of the coincidence of their interests. Besides, Roumania is not at all forgetful of the risk of a Bulgarian invasion, which might seriously menace her territory while her army was occupied in Transylvania, in which case the assistance of Greece could be of the greatest value to her. But on the other hand, Greece would find herself in a very difficult situation if she, or Serbia, should meanwhile be attacked by Bulgaria, since Roumania could only send a very small part of her forces to defend the territory annexed under the Treaty of Bucharest. In these circumstances the Opposition journals are advising the Government to have a clear understanding before entering into any such engagement, as to what compensation would be given to Greece, and to get it directly guaranteed by the Triple Entente Powers, to whom she would be acting as an ally, and from whom she might therefore expect the treatment of an ally.

As to the compensation (Kavalla) that Roumania would be prepared to give Bulgaria at the expense of Greece, in order to ensure her neutrality, it is stated in official circles here that Roumania never dreamed of anything of the sort. Such a proposal, it is pointed out, would be opposed to her own interests; for, in violating the Treaty of Bucharest, she would naturally render herself liable to have to restore the part of Silistria which she annexed by virtue of that very Treaty.

The Bucharest Negotiations.

The breaking-off of the Turco-Greek pourparlers upon the pretext of awaiting "a more favourable moment," as the official communiqué put it, has brought about no change in the relations between the two countries, having simply put them back to where they were before the Bucharest conference. Thus, besides the question of The Islands, there are left in suspense others, no less important, for the solution of which Greece was prepared to make some concessions in the matter of The Islands. These questions concern the persecutions of and excesses committed against the Greeks in Asia Minor: that is to say, the indemnity to be paid to the victims, the exchange of properties to be arranged between the emigrants, etc., which are questions of vital importance to Hellenism in Turkey. Greece having demanded an immediate settlement of these questions, Turkey agreed that they should be arranged at the Brussels conference —which, of course, did not take place.

Such a state of affairs could not, however, continue without seriously prejudicing the interests of Greece, who naturally wishes to take advantage of the first chance to put an end to it. Should nothing occur in the Balkans to make Greece abandon her neutrality, and thus give her an opportunity to settle her accounts with Turkey, she, having rejected the settlement offered her through German mediation, would look to the Triple Entente Powers to obtain for her at the conclusion of the War a satisfactory and definite settlement of The Islands and the other questions. That would be one of the rewards that Greece would expect from the Entente for her friendly attitude either in remaining neutral, or in taking part in the War in favour of the Entente, as the case might be.

The Capitulations: Greece Uneasy.

The attempt made by Turkey to suppress the Capitulations has caused more anxiety to Greece than to any other country concerned. For, it is argued, if in spite of the Capitulations, Greek subjects are liable to such persecution and annoyance as at present, it is not difficult to imagine what their lot would be if the Capitulations were abolished. Greece, being the only Balkan State enjoying capitulatory privileges on the same footing as the Great Powers, has protested with them to the Porte against the abolition.

The German Minister's Nerves.

The caustic articles in which the Greek Press has criticised the acts of vandalism committed by the Germans at Louvain and in France, and the lively good wishes for the Allies expressed daily by the great majority of the Greek journals, have given the German Minister an attack of nerves. The official representative of the heroes of these exploits of savagery, imagining that these articles were inspired by Mr. Venizelos, went to the King to complain against one of the journalists, and by implication against Mr. Venizelos. But his activities have had quite a contrary result to what he hoped. The organs of the Press, which had, after all, only given truthful expression to the feeling of the Greek people, and had carefully refrained from any personalities, promptly replied to the Minister's action by publishing a series of still more enthusiastic articles, glorying in the gallantry and the victories of the French, and the principles of liberty and justice of the noble English nation, which has always protected the small and the weak against the greed of the great. The French and English flags were also printed in their correct colours at the head of these articles. These manifestations of feeling have apparently made his German Excellency even more furious.

Mr. Streit's Resignation.

Mr. Streit, who has just resigned his portfolio as Minister for Foreign Affairs, was a victim of his extreme Germanophilism. Indeed, it is affirmed that the communications made to the Opposition journals to which I alluded in my former letter—and according to which the Triple Entente Powers were represented as having promised Bulgaria territorial compensations at the expense of Greece, and as having encouraged Turkey in her pretensions to the Islands, in order to turn Greek public opinion against her—emanated from Mr. Streit, and that this was the direct cause of his estrangement from the Cabinet. Mr. Venizelos, has taken over the direction of foreign affairs while still retaining the direction of the Ministry of War.

SERBIAN LETTER.

(From Our Special Correspondent.)
Nish, September 14.

Serbia Invades Bosnia.

Except at Belgrade, along the River Sava, and in the North-West, along the Drina, the effects of the gigantic war now proceeding are for the moment but little felt. The greatest difficulty is caused by the closing of all the banks in Serbia, which naturally entails a good deal of hardship; and another inconvenience is the difficulty of communication with foreign countries, either by land or by water, and the dislocation of the postal service.

Serbia is making every effort to maintain the military reputation which she gained in the late wars against Turkey and Bulgaria. She is calling up all her sons, even those who have been hitherto considered incapacitated, to take up arms for the defence of the country. Small as the State is in comparison with her mightier neighbour, the Serbian forces, encouraged by the success and advance of the Russian troops, are no longer remaining on the defensive, but have gone forward to attack the enemy in its own territory. What the Austrian troops have failed to achieve the brave Serbs have accomplished.

The Biter Bit.

For several weeks the threatened invasion of Serbia by the Austro-Hungarian troops has been defiantly set at naught; the Dual Monarchy which had boasted of being able to overrun the whole of Serbia in a few days and to take possession of Belgrade in as many hours has found itself greatly deceived in its expectations. The Austrian troops have failed to occupy Serbia as they had intended, but the Serbian troops to-day have invaded the enemy's territory.

Austria-Hungary's Failure.

The failure of the Austro-Hungarian invasion seems almost ridiculous. When, after numerous failures, the Austro-Hungarian troops did at length set foot on Serbian soil, crossing the rivers Drina and Sava in the North-West, their armies, consisting of 200,000 men, although opposed by an inferior force, were unable to advance. Although they occupied the commanding position of the heights of Tcher, 600 metres high, they were ignominiously beaten, the heights were taken by assault at the point of the bayonet, and the invading forces fled in disorder. The battle lasted five consecutive days. But after the heights of Tcher were taken and the enemy's left wing broken, it did not take the Serbians long to make their victory a decisive one. The Austrian troops fled in panic, making for the pontoon-bridges to get across into their own territory. The fields were piled with their dead, the rivers were a mass of floating corpses, large numbers of prisoners were taken and a quantity of booty, consisting of guns, rifles, ammunition, field-hospitals, etc., was secured.

In a few days, however, the enemy again attempted to invade Serbia. This time their forces consisted of four divisions and one brigade, numbering 90,000 men. They succeeded in crossing again at Ratcha, at a point where the Drina flows into the Save, and across the Drina further to the west, but met with the same fate as before. After the first day's battle they were scattered, and on the second day the majority of those still fighting were driven into a bend of the Drina from which they could not escape. Here the Serbian infantry, supported by artillery, almost annihilated these remnants of Austro-Hungarian troops. The enemy's losses in dead and wounded are estimated at 10,000 men.

Beaten as they are the Austro-Hungarian troops are still making efforts to force their way into Serbian territory by crossing the Drina, but each time they are repulsed with great loss. One point, however, near Krupanje, they have again succeeded in reaching in great numbers, and at this moment there is desperate fighting going on between the two contending armies. At present it seems likely to end in another glorious victory for the Serbian arms.

Capture of Vishegrad.

In the meantime, Serbian troops are also employed further south, in an aggressive movement, and yesterday they captured Vishegrad after brilliantly carrying the fortified positions commanding it.

Nor is Serbia's forward action limited to this direction. Some days ago the Serbian troops crossed the River Save at several points and heroically cleared the whole length of the opposite banks of the river of the enemy. A little south of Mitrowitz, the 13th Regiment of Infantry and part of the 15th Regiment, having to contend with overwhelming forces of the enemy, met with very heavy losses; but this had no influence on the operations of the Serbian Army, which successfully accomplished its task; and to-day the Serbian troops occupy Semlin, the frontier town opposite Belgrade, and are also operating further north in the district of Srem (Sirmium). The fortified position outside of Semlin is in Serbia's possession, and consequently the bombardment of Belgrade from the land batteries has ceased; and it is hardly likely that the Austrian river warships will venture to approach Belgrade or Semlin under present circumstances.

The railway bridge between Belgrade and Semlin has been temporarily repaired, and the railway station at Belgrade and railway lines leading to it have been put in order. If all goes well, the inhabitants of Belgrade will soon return to the capital, and again take up their residence there.

ROUMANIA AND THE BUKOVINA

In view of the statement recently made by a Roumanian diplomatist about the nationality of the inhabitants of the Austrian province of the Bukovina, the following table, taken from the 1910 census, is of interest:—

Population of the Bukovina.

				Percentage of Total.
Slavs:—			342,397	43·07
Ruthenes.....	305,100	38·38		
Poles.....	36,210	4·55		
Other Slavs ..	1,086	0·14		
Roumanians			273,254	34·38
Germans			168,851	21·24
Others.....			10,427	1·31
			794,929	

From this it will be seen that the Roumanians form rather more than one-third of the population, and are outnumbered considerably by the Slavs, of whom the greater number are Ruthenians or Little Russians. The map which was published in The Near East of last week shows the districts of the Bukovina where the Roumanians are in a majority, and there is no valid historical reason for considering the Bukovina as an indivisible political and territorial unit. Indeed, it only came into existence as a distinct administrative area late in the eighteenth century, when it was acquired by Austria from Turkey.

The Japanese Red Cross has sent a large consignment of medical stores to Serbia.

SERBIAN AMBITIONS.

Historically as well as racially there is much to be said in favour of the Serb ambitions for the acquisition of some of the Austro-Hungarian territories between the Drave and the Adriatic. Dalmatia, which stretches a long finger of territory far to the south and intervenes for so many miles between Bosnia, the Hertzegovina, Montenegro, and the sea, is, in spite of the long Venetian domination, a kingdom of the Southern Slavs, only 2.84 per cent. of the inhabitants being Italian.

Bosnia and the Hertzegovina have a Slavonic percentage of 97.56. Its inhabitants are, however, mainly divided between three creeds, while those of Dalmatia and Croatia-Slavonia adhere chiefly to two. As in the Balkans, religion enters largely into the politics of racialism. A Latin Bosnian is apt to consider himself a Croat, just as his Orthodox brother is a Serb or his Bosniak cousin a "Turk." In the Slovene provinces of Austria, where a Slavonic people shares the territory with Germans and Italians, the population is almost entirely devoted to the Latin Church.

THE SOUTHERN SLAVS OF THE DUAL MONARCHY.

	Serbs and Croats.	Slovenes and Other Slavs.	Non-Slavonic Races.	Percentage of Slavs in Total Population.
Styria	151	410,913	983,635	29·47
Carinthia	28	82,663	304,381	21·37
Carniola	205	491,836	28,286	94·56
Görz and Gradisca	186	155,089	94,618	62·14
Trieste	2,403	57,671	130,839	31·17
Istria	168,184	57,239	110,945	58·32
Croatia and Slavonia	2,588,954	—	43,000	98·75
Dalmatia	610,669	3,066	21,120	96·67
Bosnia and the Hertzegovina	1,822,564	29,041	46,439	97·56

RELIGIONS OF THE SOUTHERN SLAVS IN AUSTRIA-HUNGARY.

	Latins and Uniats.	Orthodox.	Moslems.	Percentage. L.	O.	M.
Croatia and Slavonia	1,861,500	661,600	—	71	26	—
Bosnia and the Hertzegovina	442,100	825,400	612,100	23·29	43.49	32.25
Dalmatia	539,000	105,300	—	83·49	16·32	—

Among the 1,426,568 Slavs in Styria, Carinthia, Carniola, Görz and Gradisca, Trieste and Istria there were in 1910 only 4,411 Orthodox, the rest being overwhelmingly Latin.

Dalmatia.

During the first half of the seventh century that Slavonic invasion took place which still colours the country ethnically. The people of Romance stock retired before these invaders, and, by crowding into Ragusa, Zara, and Spalato, preserved an Italian tradition, which, subsequently strengthened by the Venetian connection, survives in those centres to this day. Later, when the Slavonic Serbs adopted Christianity, they preferred the Orthodox creed or one of the numerous heresies which arose within it, while the Latins of the coast adhered to Rome. For several centuries the rival populations, whose differences were emphasised by their religious beliefs, failed to coalesce. In the ninth century a Serb pirate community, which still retained an affection for Paganism, came into prominence at the mouth of the Narenta. These people early became involved in war with the Venetians, and, after a by no means one-sided struggle, were forced to submit to the Republic of St. Mark in 998, when the Doge assumed the title of Duke of Dalmatia in honour of the conquest. The Italian cities of the seaboard, while retaining a considerable measure of autonomy, turned to Venice for assistance

Digitized by Google

against their Serb neighbours, who in their turn accepted the protection of Hungary, which was eager to contest the sovereignty of the coast with the Italian Republic. For 300 years the Venetians and the Magyars disputed the lordship of Dalmatia, which at that time had no fixed frontiers, with varying success. Towards the end of that time, however, the Serb States of the interior, which had hitherto directed their vigorous though distracted nationalism against the Byzantines or the Bulgars, began to push towards the Adriatic, and by 1389 the King of Bosnia was master of the coast from Cattaro to Fiume, with the exception of the Venetian fortress of Zara and the independent Republic of Ragusa. The Bosnian Empire of Tvrtko and his successors was, unfortunately, almost as ephemeral as the Serbian Empire of Dushan, and within half a century the Venetians were able to conquer the whole of what we now understand as Dalmatia, with the exception of Ragusa, where the commingling of Italian and Serbian races and traditions produced a brilliant literary and mercantile civilisation, which only the rude hand of Napoleon was able to subvert in 1808.

The Coming of the Turks.

After the Ottomans had conquered the territories and inherited the ambitions of both Serb and Magyar it was only to be expected that they should come into collision with the Republic of St. Mark. At the beginning of the sixteenth century Dalmatia was overrun by the Turks, and by the peace of 1540 the Venetian dominion was once more reduced to a few isolated ports and islands, the whole of the interior forming the Ottoman Sanjak of Klissa. Many Serbs, under the pressure of this political change, emigrated from the Turkish territory and took refuge under the wings of the Evangelist's Lion, where in course of time they adopted the religion of their protectors. It is due to this movement of the sixteenth century that there is now a percentage of 83.49 of Latins to 16.32 of Orthodox in a kingdom which has an almost entirely Serb-speaking population. It was not until 1699, by the Peace of Karlovitz, that the Venetians recovered the whole of Dalmatia, a dominion which was not disturbed until Napoleon destroyed the Republic of St. Mark in 1797 and gave Dalmatia to the Austrians. In 1805 he took it away from them, and attached it to his own kingdom of Italy, only to transfer it a few years later to the French Empire. At his fall it was restored to the Austrians.

Croatia—Slavonia.

The kingdom of Croatia and Slavonia, which at present is a "member of the crown of St. Stephen," and as such is united to the Hungarian kingdom, had but a brief separate existence. During the reigns of the kings of Croatia, in the tenth and eleventh centuries, the Croats—whose chief differences from the Orthodox Serbs (who are their blood kin) are that they adhere to the Latin Church and make use of the Latin alphabet—established a reputation for maritime prowess at the expense even of the Venetians. A disputed succession to the crown in 1098 gave an opportunity to Ladislaus I., King of Hungary, to seize the country. This prince maintained an autonomous organization in his subject kingdom, and delegated his authority to a Ban, who was generally a Croatian nobleman. Although there were numerous insurrections, the authority of the Hungarian kings was never seriously shaken, and the kingdom of the Catholic Serbs followed the fortunes of the Magyar monarchy. Thus, in 1527, the Croats accepted Ferdinand I. of Austria as their king upon his election to the throne of Hungary.

In course of time, like the greater part of the realms of St. Stephen, Croatia was overrun by the Turks, and in 1606 the Emperor-King retained only the western portions under his dominion. The whole territory was recovered in 1718, with the exception of a small area—Turkish Croatia—which was amalgamated with the Ottoman vilayet of Bosnia, and only returned to the Hapsburgs at the annexation of 1908. At this time it must be remembered that a very considerable area of Croatia, Slavonia, and Hungary itself was occupied by what was known as the Military Frontier. This extended along the whole of the Turkish march, from the Carpathians to the sea, and was under an entirely separate administration with a legal system of its own. In course of time the Military Frontier became no longer necessary, and late in the nineteenth century the greater part of the districts which composed it were amalgamated with Croatia and Slavonia. During the period of the Turkish Occupation the Hungarian kingdom had been partitioned and weakened to such an extent that for many years "Imperial Hungary" was merely regarded by Vienna as a troublesome and unimportant frontier province. In such circumstances it is not surprising that the old relationship of Croatia to the Crown of St. Stephen should have been forgotten when that august diadem was so little regarded by its wearer. As a result of this Croatia came to be considered as a Crown land of the Austrian monarchy, and as such was subjected to the administrative experiments of Vienna, and not of Budapest.

The Kingdom of Illyria.

In 1767 Croatia, Slavonia, and Austrian Dalmatia were united under the name of the Kingdom of Illyria, and a precedent was thereby set which, had it been followed, would have led to the formation of a third prop for the Hapsburg throne, which is now uneasily poised upon only two. This experiment in Illyrism, half-heartedly attempted by Vienna, was widely extended by Napoleon, who stripped the Hapsburgs of the greater part of Croatia and added it to the "Illyrian provinces" of the French Empire, which comprised Carinthia, Carniola, Dalmatia, and the Littoral. When the Napoleonic régime collapsed the Emperor Francis erected a little kingdom of Illyria of his own, but, somewhat curiously, excluded those provinces which had been called Illyria in 1767, and only arranged Carinthia, Carniola, and the Littoral within the new dominion. This arrangement lasted until 1849, and Croatia and Slavonia were restored to their old dependence upon the crown of St. Stephen. The aggressions of Magyar nationalism, which sought to impose its own language upon the Croats, led to a recrudescence of Illyrism, and the celebrated Ban Jellachich was anxious to reunite Croatia with the Slovene provinces of the Austrian kingdom of Illyria. At that time, however, the Slovenes had no racial consciousness of their own, and the Hungarians were able to prevent the Austrian Emperor from taking so wise a step. The part played by Jellachich in the subsequent relations of Hungary and the Hapsburgs is too well known to need recapitulation. His dynastic loyalty secured the liberation of his country from Magyar dominance, but German influences in Vienna were afraid of the rising strength of southern Slavdom, and steps were taken to prevent the formation of a Croato-Slovene State, which might well have acted as a counterpoise to the Magyars.

Croatia was an Austrian crown land until 1867, when the Hapsburgs made peace with their Hungarian subjects and sacrificed all dreams of Illyrism in the process. Croatia was once more subjected to the Magyars, who have done all in their power to excite the dislike and mistrust of their Croatian subjects.

Trialism.

Of late years "Illyrism," or "Trialism," as it is sometimes called, has aimed at the amalgamation of Croatia-Slavonia with Bosnia, the Hertzegovina—the ancient Duchy of St. Sava—and Dalmatia to form a Serbo-Croat kingdom of equal political status with Austria or Hungary under the sceptre of the Emperor Francis Joseph, who still styles himself King of Illyria. This would not include the Slovene provinces of Austria—Carinthia, Carniola (Krain of the Germans, Krajina, "the frontier," of the Slavs), and the Littoral, which have but little connection with the historic independence of their Croatian and Serbian kinsmen to the south-east, and are almost entirely Latin by faith and Western by tradition.

Sir Valentine Chirol, formerly the Foreign Editor of *The Times*, has contributed to the series of Oxford pamphlets, published at twopence each by the Oxford University Press, one on the subject of "Serbia and the Serbs." In this he sketches the history of the Piedmont of the Balkans, and traces the sequence of events which led up to the explosion of July last. There is but one misprint, 1891 is given instead of 1901 as the year of ex-King Milan's death.

TANGIER TO TEHERAN.

If to err—or, more vulgarly—to take a toss, be human, then, indeed, the Censor is sometimes not divine. A few days ago that august being addressed a gravely-worded letter to a London daily rebuking it for having contravened his regulations by publishing a certain dispatch. He received a polite reply from which he learned, possibly to his surprise, that he had duly passed the message in question, which, moreover, had been drastically cut down before it had been submitted to him, for fear that he should inadvertently pass certain passages, the publication of which the editor considered dangerous to the public interest. One of these days they will realize that a censor who has to be censored for fear that he should "give the show away," and does not know what he has seen, or recognize his own censoring, is hardly worth the fuss made about him.

***

In the absence of important news from the Front during the third week of the Battle of the Aisne the Censor laboured unceasingly to extend the sphere of his usefulness. I have collected one or two Censor tales already, but so far he has done nothing to equal his last exploit. A certain great journal submitted for censorship a despatch received by post from its correspondent in Nish. The despatch, which was just four weeks old—such being the delays of war—contained some breezy descriptive writing in which reference was made to the pipes smoked by a certain officer in that town. These pipes attracted the Censor's notice—he smelt danger, not tobacco, and in the interests of the military situation, and in order to prevent panic excised the superlative epithet qualifying the pipes smoked by an officer a month ago in Nish! If the poor censors have to work as hard as that to protect us from reported odours in the Balkans no wonder they have no strength left to prohibit the circulation of the entirely fictitious news of a "victory" for the Allies in France, which they permitted to be so largely reported last week.

***

In view of the difficulty in obtaining news about Persia which exists at present I take it very kindly on the part of the German wireless information bureau to tell us what has been happening in Tabriz. As the Germans say there has been wide-spread movement, as a result of which the Russians have been defeated after fierce fighting, we may, with some confidence, assume that the caravan routes are well policed, and that the harvest has been good in Northern Persia.

***

I am sorry to see that the Macedonians are once more on the warpath. Old and deeply ingrained habits cannot be readily shed, and for years past tradition has prescribed a season of insurrection between harvest home and the first snows. Those acquainted with Macedonia and the manners of its masters are not surprised that the bad old times have not yet disappeared. The new proprietors were warned what would happen at the time of the Treaty of Bucharest, but now they are trying to implicate the Bulgarian Government in the band-fighting which is reported from several centres in Macedonia—Moslem as well as Exarchist. That also is traditional, and shows how hard it is to kill a custom.

***

It is reported that the serious risk to which Turkey is now exposed by the folly and boundless vanity of one or two of her most prominent men has roused the ex-Sultan from his apathy; and that he has addressed to the controllers of her destiny an impassioned warning of the danger in which they are placing her. What truth there is in this report I am unable to state, but as it certainly does not emanate from Germany there is at least a chance that it may not be false. Moreover, Abdul Hamid, however closely he may be confined, and however dulled his brains may have become as a result of that confinement, is still too clever a man to be blind to the critical position in which poor Turkey now finds herself. Such blindness as *that* could only be produced by super swelled-headedness, which was not Abdul's complaint. If he has issued the warning attributed to him it shows that he cannot be quite such a selfish man as his detractors would have us believe. For if he were he would have let the country go to the dogs and chuckled over its progress.

***

I have long recognized that the Egyptian Government Survey Department is extremely enterprising, but even so I was not a little surprised to read in the *Journal Officiel* the other day a notice that the Department has issued a special war map of Central Europe, which, with sixty-six assorted flags, can be bought for the modest sum of 60 milliemes. Map and flags can be had in English or Arabic. In view of the interest that the fellah is showing in the war, I imagine that the Arabic edition should prove popular.

I cannot absolutely guarantee the truth of the following story, but I believe it to be true, and it is at least characteristic as regards Lord Kitchener. A certain crack territorial corps, having volunteered for foreign service and been accepted, was shipped off to some "destination unknown." In due time, after a voyage rendered monotonous by the failure of the Kaiser's warships to put in an appearance, the force reached a French port; and the men's hopes rose high. At once the report was passed round that they were to get a cut in at the Kaiser's "cannon fodder" forthwith. But, alas! disillusionment followed hard on the heels of rumour. They were, in fact, to go on garrison duty to a station which we will—with an eye on the Censor—refer to as Utopia. A chorus of groans rent the air. Then some bright individual suggested a kind of telegraphic Round Robin to Lord Kitchener. No sooner said than done. A telegram begging that they might be allowed to go to the front forthwith was drawn up and dispatched, and the reply was anxiously awaited. It came. "Utopia, or disband," it said; and it was signed, "Kitchener." So "Utopia" it was.

***

Surely our ethnographer has got loose again, as I see that Serbian ambitions are discussed elsewhere in what is doubtless a learned article and illustrated by a map. So I must gird myself, don a herald's tabard, and blazon forth the gorgeous shields of dominion which perhaps King Peter will be able to add to his existing achievement. First, there comes the kingdom of Dalmatia, with *Azure, three leopards' heads affrontées, crowned gold*; then Croatia, with a splendidly simple shield *Chequy* silver and gules; and Slavonia, *Azure, a river in fess vert bordered argent, thereon a weasal passant proper beneath a gold star.* Bosnia itself, which is already partly within the Serbian sovereign's grasp, has for arms, *G les an arm holding a scymetar all proper.* I see also that Rascia—which roughly corresponds with what diplomacy, but not the Turks, called the Sanjak of Novi Bazar—has a shield of *Azure three horseshoes inverted silver.* It should surely be a lucky coat to quarter on the new Serbian shield. Ragusa, the last of the Mediterranean Republics to survive, and now Duchy of the Hapsburgs, bears *silver three bends azure*, and Cattaro, which may have to be represented on King Nicholas's *écu complet*, has *silver a lion rampant gules.* The heralds have it that the kingdom of Illyria, whatever actual territorial existence it may now have, in armoury is dignified as showing *Azure, an antique galley gold.*

***

Are Serbians, I wonder, able to "see things" or to inspire others to "see things" that are hid from most of us? It will be remembered that in the review of Mr. Petrovitch's fascinating "Hero Tales and Legends of the Serbians" that appeared lately in THE NEAR EAST mention is made of the "seeing" (by "thousands of soldiers," be it noted) of Kralyevitch Marko at the battle of Prilep two years ago. And this week my attention has been called to a letter from Mr. Chedo Miyatovich which appeared in *Light*, and gives particulars of "visions," almost as strange, of Serbians seen by an English lady. Briefly, the story is that a Serbian officer and a Serbian lady whose love affairs were not running smoothly had been debating the great "to be or not to be" question, and the officer—a lieutenant at the time—asked Mr. Miyatovich's help. The latter in turn consulted an English lady at Bradford, who, after seeing four visions of the officer and the lady, foretold a happy marriage for them, and brilliant success in his profession for the lieutenant. A good many things seemed to point to the impossibility of the "vision" being fulfilled, so to say. Amongst others the medium foretold that the officer would inspect the embarkation of his men on a large steamer; and this was in 1910, before Serbia even talked at all of her "little window." However, it all came out as foretold. The young lieutenant *did* superintend the embarkation of his regiment at Durazzo, during the late Balkan wars; he married the lady of his choice; and he is now a major. Mr. Miyatovich gives all names, dates, etc., in his letter, and tells us that the Crown Prince of Serbia was so interested in the story that he sent for the hero, who produced documentary evidence as to its authenticity. I for one certainly would not like to express doubt of the perfect accuracy of the story merely because I cannot explain it all. Too many strange things have happened in my own life.

CORSAIR.

Reuter's Petrograd correspondent reports, under date of the 4th inst.:—Turkish and German agents are reported here to be scattering proclamations in Persia preaching a holy war against Russia, France, and Great Britain. The Christian population on the frontier continue to be alarmed by the attitude of the Kurds.

Under date of October 4, Reuter's Odessa correspondent reports that many Bulgarian volunteers have arrived in that city, anxious to be enrolled in the army of General Radko Dimibrieff.

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

ÆSOP ON THE SITUATION.

To the Editor of The Near East.

Sir,—I read the present position between Great Britain and Turkey in the light of the following fable:—

A Lion was one day engaged in the eating of an exceedingly tough and scraggy Eagle which had foolishly aroused the King of Beasts from peaceful Slumber in the Sunshine. In this unpleasant Task the Lion was aided by a friendly Bear and a cheerful Cock, whose Farmyard the Eagle had devastated. While the three Friends were thus engaged an inquisitive Gobbler, misled by the Fuss which the Eagle made in dying, saw fit to peck the Lion's Tail and tweak the Bear's left Ear. Occupied with the crunching of aquiline Morsels neither Animal for the Moment paid any attention to the absurd Bird, which shot his Feathers, swelled his Comb and strutted as though he were no End of a fine Fellow. When, however, the Eagle had been swallowed, before settling down to digest so sorry a Meal, the Lion and the Bear made bold to ask the Gobbler what might be his little Game. Abashed, the Bird replied: "Sirs, I meant no Harm," to which they answered, "Foolish Fowl, your Wits are plainly weak, we will put you in a Cage lest worse befall, and we will take Care of your Farmyard."—I am, sir,

Æsop Junior.

London, October 6, 1914.

TURKEY AND GERMANY.

To the Editor of The Near East.

Sir,—It seems to be distinctly unfortunate for the Ottoman Empire that Enver Pasha ever went to Germany; for while there he appears to have imbibed the doctrines that are now making the Prussians so universally detested throughout the civilised world. And now not only does he model his moustache more or less upon that of the egregious Kaiser, but he seems determined to play the part of an Ottoman Kaiser-cum-Napoleon, and, thanks to his inordinate ambition, Turkey's very existence is actually imperilled. At least, that is the impression left on the minds of many sincere well-wishers of the *real* Turks.

But are we not to some extent responsible for this state of affairs? It is obvious that even Enver could not have wrought the harm he has if only the activities of the notorious Wolff Bureau had been counteracted by the dissemination of accurate information through an all-British agency. A study of recent issues of The Near East will surely prove the accuracy of this statement to any of your readers. And though it may now be too late to undo the mischief done, it is to be hoped that if, after all, Turkey should succeed in avoiding the pitfall that has been dug for her by her false "friends," we shall see to it that she is spared from such risks in the future—by establishing, or supporting, a decently run Press bureau of our own at Constantinople.

In the meantime, we can only hope—for Turkey's sake—that the cooler heads amongst the Sultan's Ministers may be able to keep Enver in check, in spite of his three thousand or so German assistants—or masters.—Yours, etc.,

Pro-Turk.

London, October 7, 1914.

THE PRESS ON THE NEAR EAST.

Turkey and Her Counsellors.

At the end of last week Turkey's attitude was a subject of considerable interest, if not of anxiety, to Press and public in this country. The feeling of "the man in the street" on the subject may, perhaps, be summed up as one of hopefulness that his old friends would not suffer themselves to be used as catspaws by the Germans or the Germanophiles. The Turks' difficulties were recognised; their neutrality was earnestly desired, for their own sake chiefly; but their active interference was not feared. *The Manchester Guardian* put the matter well in a leading article:—

We must own that the Turkish Government's position is extraordinarily hard. If she keeps to the straight path of neutrality Germany can certainly inconvenience her a good deal. If she yielded to the German squeeze she would inevitably make dangerous enemies among the Allies, for her interference would be quite unprovoked and would be deeply resented. It would also be ineffectual, for it would instantly and almost automatically call into action counteracting forces in South-east Europe. An anti-English movement at Constantinople now would come too late to do us appreciable harm in India, where all the great Mahommedan influences have already rallied to our support. It might cause us a little trouble in Egypt, but nothing likely to make any serious difference in the later stages of our war with Germany.

That is the very view which The Near East has been endeavouring to impress upon its Turkish friends ever since the war broke out. The writer in *The Manchester Guardian* winds up neatly:—

Turkey is so drenched with cooked accounts of the progress of the war by the official Press Bureau at Berlin that expectation of a German victory is common at Constantinople. That is perhaps the chief danger. It would be a curious tragedy if, after all the vicissitudes of its long, wonderful history, the Ottoman Empire in Europe were to die of false news.

Turkish Uneasiness.

It is difficult for the average Englishman to see clearly the Turkish point of view. Mr. Marmaduke Pickthall, however, seems not only able to see it, but to identify himself with it, and in *The New Age* (October 1) he enters an eloquent plea for Turkey in "Turkish Independence." Turkey, he says, is resolved that interference in her internal affairs of a peculiar kind, which other nations do not suffer, should henceforth cease, and with it the haughty treatment from certain Powers to which she has been exposed in the past:—

Rather than endure such treatment any longer, she will fight, and go down fighting, to avoid inglorious death. A reassuring word from England given solemnly could easily prevent this great catastrophe. One trusts that the word has been, or may yet be given; the more so that unpleasant rumours are abroad. Persistent rumours—perhaps made in Germany—of a decision of the Entente Powers to rob Turkey of Constantinople on the conclusion of the war, even though she should maintain neutrality, are current in the Near East. Another whisper runs that that decision was already irrevocable at the very moment when the three Ambassadors approached the Porte with their offer to "defend the integrity and independence of Turkey against all comers."

Both rumours are, of course, absolutely false; and both are obviously of the Berlin brand. But it is worth directing attention to them as showing the kind of lie that is foisted off on the Turks by their Teutonic "friends"; the kind of "false news" to which *The Manchester Guardian* refers. Mr. Pickthall adds:—

The Turkish Government with one exception has no desire to go to war upon the side of Germany. But the Turkish army has been mobilised; it is as fine an army as they ever put into the field; the troops are spoiling for a fight of some kind. The neutrality of every nation has a bias; and that of Turkey, necessarily, owing to her recent history, has a noticeable bias to the German side. But the Government, in spite of most tremendous pressure from Berlin, has hitherto preserved neutrality. It was no easy task; and would have been impossible but for the belief which seems implanted in most Turkish minds that England is a truer friend than Germany. Will the Porte be able to maintain neutrality if England fails to give the word of reassurance I have mentioned? Would the Porte be wise to maintain neutrality in such a case?

He concludes with a reminder of the good work the Young Turks have done "under difficulties which English people can hardly be expected even to conceive."

More German Machinations.

A Tiflis correspondent sends to *The Westminster Gazette* (October 6) a communication regarding the machinations of German agents in the Caucasus and amongst Armenians in Turkey. He writes:—

. . . . It is opportune to let Western Europe know something of the machinations of German agents who have been sedulously endeavouring to create disturbances in Russia by fomenting disaffection amongst the Uniate and Gregorian Armenians. Some Turkish subjects of notoriously evil reputation, receiving subsidies from a source openly antagonistic to Russia, have left no stone unturned to persuade the Armenians in the Caucasus to rise against the Czar. The police, however, through the loyalty of the Supreme Patriarch at Etchmiadzin, have been placed in possession of facts which enabled them to counteract the Teuton emissaries from Constantinople with remarkable skill and adroitness.

Germany had promised to "protect" the Armenian Christians if they would assist Germany now! Turkey was enabling arms and ammunition to be stored for use on the frontier! England would soon be tired of the campaign in France and leave Paris to Germany without even trying to help her ally! This was the kind of "stuff" whispered about since the declaration of war. There has also been a very active propaganda against England in Turkish Armenia by Germans for the past ten years, and the inscrutable silence of the British Government until the end of last July has largely aided German propaganda. Natives could not understand British methods of treating calumny with contempt, and so playing, as it seemed, the German game.

Another Potsdam Disappointment.

The failure of the German emissaries to stir up Egypt to aid the enemies of the Entente is the text of an article entitled, "The Loyalty of the Fellah," in *The Glasgow Herald* (October 3). The writer says:—

No doubt the belief was entertained in Berlin, if not in Constantinople, that the Egypt of the British Occupation was like the smoking flax—only waiting a fanning breath to break into flame. Whatever influences were brought to bear on the handful of malcontents who pose as Egyptian Nationalists the result

Digitized by Google

has been one more disappointment for Potsdam. There is no unrest in the country, and if any should occur in the near future it will not be because the fellah—who, after all, is the person who counts when it comes to talk of insurrection—has any grievance against Britain or any affection for Germany, but simply because the price of cotton, on which he depends for his generally precarious existence, is unremunerative. If it is merely a question, however, of tiding the people over a period of difficulty caused by serious restriction of demand for their only commodity, the Egyptian Government is qualified to deal with it—is, we believe, prepared to deal with it. Economic trouble of itself cannot therefore be a serious danger if the people as a whole are loyal to their governors, and their loyalty gives us no ground for disquietude.

The German Conscience.

In a leading article on "Turkey's Policy," *The Morning Post* calls attention to a point of some interest:—

Turks are hardly readers of history, and are not likely to know that Ranke, the greatest of German historians, held that Louis XIV. of France committed an unpardonable sin against Europe when he made alliance with Turkey against the German Emperor. The German conscience, then, rejects the idea of co-operation with Turkey. It is for Turkey to draw the inference as to the motives of a German policy which seeks that co-operation. But, after all, what the Turkish Government has to consider is the interest of the population of Turkey, especially of Asia Minor. Can that interest be promoted by a new war just now, when Turkey is in no danger and when by remaining at peace she has still a chance of restoring her administration and her finances?

Perhaps the Turks think that "the German conscience" is dead. If so, they are not alone in this opinion.

Strenuous Nish.

Under the title "Nish in War Time" *The Times* published a graphic article from its correspondent in the temporary capital of Serbia, written on September 3. Existing conditions in that city are, he says, "frankly abnormal":—

Half the population of Belgrade sought refuge here, with the result that the few small, dirty hotels are crowded and every house with a vacant room has been invaded by some of the host of unwilling immigrants. Foreign ministers are billeted in divers places, Serbian Ministeries are located in any available buildings, where departmental chiefs work in small rooms with a table in one corner and a bed in the other. The chancery of the British Legation occupies half a narrow, dirty room in a small, grubby hotel, the remaining half serves as a bed-chamber for an energetic attaché, who is distinguished by a determined liking for cold baths and rank plug tobacco, which he burns in stumpy briar pipes. The Ministry of War, with a flagrant disregard of Christian prophecy, occupies the Bishop's Palace. In among the trees by the river-side there is a small café, over the entrance to which hangs a card bearing an ink-written legend which in English means "National Assembly." Here it was that the Serbian Parliament met and took measures grossly affecting the destiny of the nation. Yet, in spite of all the drawbacks, of which I have instanced but a few, the administrative machine is working with remarkable smoothness.

Serbia Quietly Confident.

As to the spirit in which Serbia has faced and is facing the trial he writes enthusiastically:—

I find myself possessed of an ever-increasing admiration for the Serbians. The spirit of the nation is wonderful. During this, their third consecutive war, they are to be seen at their best. From the very beginning of their present struggle, even before they were assured of Russian help, there was no panic and little excitement. Now the people, having nothing to do, sit calmly at café tables, and wait, mostly in vain, for news. The peasants go to war as to the manner born. Reservists come in from the fields, drop scythe, shoulder rifle, say "au revoir," and march off to battle as though to a new field of golden, waiting corn.

And his description of the gallant Serbians' feelings towards this country is calculated to increase still further our liking for them:—

The news of England's help, precious above all in Serbian eyes, called forth nought but quiet and heartfelt expressions of gratitude. Yet England's decision counted for so much. It put new life into the peasant soldiers. England was with them; therefore they must win. Even when the news came of the great victory at Jadar, when the hated Austrians were beaten into a mass of hopeless fugitives, there was no "mafficking," no cheering, but your Serbian friend seized your hand and wrung it with a fervour which eloquently expressed the pride and thankfulness pent up in his heart.

Articles to Note.

"Turkey, England, and the Present Crisis," by Marmaduke Pickthall, in *The Asiatic Review* (October).

"The Diplomatic Situation," by J. Ellis Barker, in *The Outlook* (October 3).

"Fruit Culture at Baghdad," in *The Gardeners' Chronicle* (October 3).

THE WAR.

PRESS AND PUBLIC OPINION.

Serbia and the Allies.

On Saturday *The Globe* published an article with the above title, from which we take the following extracts:—

In proportion to her resources, Serbia has made sacrifices and achieved results infinitely greater than those of any other Power engaged in this war; and it must never be forgotten that if to-day the situation stands fairly for the arms of the Allies, it is due in no small measure to the brilliant victories won by the Serbian Armies over vastly superior forces of the Austrians. . . That in the final settlement the reward of Serbia will be honourable goes without saying; but that is still a long way off. Some more immediate recompense is necessary. As a comparatively undeveloped country Serbia we know is lacking in those comforts and provisions that are necessary to mitigate the sufferings of the wounded; and her civilian population will feel the pinch of want in the coming winter. Something should be done at once to put the Serbian Government in a position to meet all these necessities, and to ensure that privation and resourcelessness shall not be allowed to achieve what the armies of Austria failed in. Whatever supplies are needed should be hurried into the country before the rigours of winter set in. It is the least that can be done for a people so gallant.

The Turk and the Tempter.

Under the above heading *The Daily Graphic* published on Monday a note regretting that "the insidious intrigues and brutal pressure of the Wilhelmstrasse are making mischievous headway at the sublime Porte." The writer continues:—

We, in this country, understand perfectly well the mingled intimidation and cajolery by which it is sought to tempt the Ottoman people to their ruin, and they may rest assured that we are watching their difficulties with a very genuine sympathy. We trust that even now they will find the strength and common sense to resist overtures which are not only a peril to their most vital national interests, but which have nothing in common with their best traditions and aspirations. . . . The wiser heads among them must surely see that the resentments of yesterday count for little in the sum of national honour and security. . . . Turkey cannot afford to become the catspaw of the Powers of Darkness, not only because of the ignominy of it, but because it is a doomed course. In 1849 Turkey resisted the Reactionaries of Vienna and Potsdam, and in doing so established a claim on our sympathy which, in spite of unworthy Sultans, she has never forfeited. She will do well to remember this precedent to-day.

The Reorientation of Roumania.

The current *Outlook* contains an article on "The Attitude of Roumania" which is well worth reading. Owing to lack of space, we can quote only the passage in which the writer sets out two of the reasons, "apart altogether from the King's personal sympathies, which account for the country's present inaction":—

The first is that Roumania's hands are not entirely free. So long as Turkey's attitude remains equivocal—and just now it seems to be more ambiguous than ever—Roumania is naturally and legitimately reluctant to throw all her energies into the northern theatre of operations. The present plight of Germany can hardly encourage her to trifle with the conception of war on two fronts. The second reason is that the notion of co-operation with Russia demands a complete reorientation of the ideas of most Roumanian diplomats of the older school. Consider the mental attitude of a good Roumanian now well advanced in the fifties; and we may probably assume that most Roumanians in high positions are about that age. Our typical Roumanian fought with Russia in the War of Liberation, and then looked on in futile exasperation while Russia appropriated for herself the best part of the spoils. For the next thirty years he continued to regard Russia as a faithless friend and Austria as a sure protector. . . . Then in 1908 came a change. Austria began to adopt a more selfish and personal policy in Balkan affairs, a rapprochement with Russia followed; and only in May of this year the Tsar and his family spent two days on Roumanian soil. But from an entente to an alliance is a great step. Should we English have been equally ready to support France in arms in 1904 as in 1914? There is no ground for surprise that Roumania hesitates to break with her diplomatic traditions; rather we may feel some sympathy with statesmen who find that events have moved more rapidly than their ideas.

W. N. WILLIS'S GREAT BOOK,

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 48-50, Waterloo Rd., London.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. Oct.	1914. Sept.		1332. Julkada.	5675. Tisseri
9	26	Friday	19	19
10	27	Saturday	20	20
11	28	Sunday	21	21
12	29	Monday	22	22
13	30	Tuesday	23	23
	Oct.			
14	1	Wednesday	24	24
15	2	Thursday	25	25

To-day is the birthday of H.I.R.H. the Archduke Theodore Salvator of Austria-Tuscany, grandson of the Emperor.

To-day is the birthday of H.R.H. Princess Pia of Parma, aunt of H.R.H. the Crown Prince of Bulgaria.

To-morrow is the birthday of H.R.H. Prince Francis of Bavaria, great-nephew of the late ex-King Otho of Greece, who has recently been wounded in action.

To-morrow is the birthday of H.R.H. the Count of Flanders, younger son of His Majesty the King of the Belgians, and at present a guest in this country.

To-morrow is the birthday of H.H. Duke Adolf Friedrich of Mechlenburg-Schwerin, whose functions as Imperial German Governor of Togoland were recently terminated by the Allies.

To-morrow is the birthday of Her Majesty the Queen of Wurtemberg, mother-in-law to the elder brother of the ex-Mpret of Albania.

Saturday is the birthday of H.R.H. Prince Nasr-ed-Din Mirza of Persia, uncle of His Majesty Sultan Ahmed Shah.

Sunday is the birthday of H.R.H. Princess Maximilian of Baden, who was born a Princess of Cumberland, and niece to Her Majesty the Queen-Mother.

Sunday is the birthday of H.R.H. Prince Peter of Montenegro.

Monday is the birthday of H.H. the Duke of Schleswig-Holstein-Sonderburg-Glucksburg, father-in-law of H.R.H. the Duke of Albany, Duke of Saxe-Coburg and Gotha.

Monday is the birthday of H.R.H. Princess Mirko of Montenegro, née Constantinovitch, a relative of the late King of Serbia.

Monday is the birthday of H.I.H. Fakhr-ed-Din Effendi, elder son of H.I.H. Burhan-ed-Din Effendi, who has just been elected Mpret of Albania.

Monday is the birthday of H.R.H. Princess Elisabeth of Roumania, eldest daughter of the Crown Prince.

Tuesday is the birthday of H.I.R.H. the Archduchess Margarita Maria of Austria, daughter of the late Grand Duke of Tuscany.

Tuesday is the birthday of H.I.H. the Grand Duke Cyril of Russia, husband of a daughter of the late Duke of Edinburgh, who had at one time been Grand Duchess of Hesse.

Wednesday is the birthday of H.I.R.H. the Archduke Leopold Salvator of Austria, brother of the late Grand Duke of Tuscany and brother-in-law of H.R.H. the Duke of Madrid.

Wednesday is the birthday of H.R.H. Princess Maria Theresa of Parma, aunt of H.R.H. the Crown Prince of Bulgaria.

Reuter's Sofia correspondent reports that on Tuesday King Ferdinand received in audience M. Panaretoff, the first Bulgarian Minister to be accredited to the United States, who is leaving via Constantinople to take up his post at Washington.

H.R.H. Prince Eitel Friedrich of Prussia, nephew of her Majesty the Queen of the Hellenes, has been injured while serving with the German Army.

It is announced that H.I.R.H. the Archduke Joseph Ferdinand, eldest son of the late Grand Duke of Tuscany, has been given the command of the Austrian Army near Cracow vice General von Auffenburg.

Lord Kitchener telegraphed to Mr. Milne Cheethan requesting him to visit personally the late Mustapha Pasha Fahmy's residence and present his most sincere condolences to the sons-in-law and the family of the deceased, saying that in the death of Fahmy Pasha Lord Kitchener has lost a great friend and Egypt has lost one of her greatest statesmen.

Lord Roberts has consented to be a vice-president of the Serbian Relief Fund. The committee of the fund has decided to send a Red Cross unit to Serbia, under the direction of Lady Ralph Paget.

Gifts in kind—warm underclothing for the soldiers, and dresses and suits for their families—are, we understand, being received in considerable quantities at 195, Queen's Gate, but there is no risk of the supply exceeding the demand. Mrs. Seton-Watson, Mrs. Carrington-Wylde, and Mrs. Bertram Christian have kindly undertaken to unpack, sort, and forward the goods. The committee is meeting once a week at 22, Berners Street.

General Sherif Pasha, former Turkish Minister in Sweden, and proprietor of *Mecheroutiette*, arrived at Alexandria on September 21.

M. Michel Madjaroff, the Bulgarian Minister, who, as already announced in these columns, has recently been appointed to Petrograd, will leave London in about ten days to take up his new duties.

October 28, St. Simon and St. Jude's Day, has been fixed for the consecration of Canon MacInnes, the new Bishop in Jerusalem, in Westminster Abbey. The sermon will be preached by the Bishop of London.

On September 19 the staff of the Bulgarian War Office entertained the Ex Minister for War, General Boyadjieff, at dinner at the Military Club, Sofia.

Professor Flinders Petrie visited Manchester on Monday. In the evening, at the University, he delivered an address on "Metals in Ancient Egypt" to the Egyptian and Oriental Society, and later in the evening he gave a lecture on "The Treasure of Lahun."

King Constantine has advised the despatch of ten surgeons to Serbia in addition to the two Greek medical teams already at the front. King Constantine's action has caused the greatest satisfaction in Serbia, where the medical authorities are experiencing the greatest difficulty in coping with the wounded.

On Sunday, the 4th inst., at 71, Avenue Road, Regent's Park, the wife of Hugh Evelyn Wortham, editor of *The Egyptian Mail*, gave birth to a son.

Sir William Garstin left London on Saturday for Paris.

Mr. Noel Buxton, M.P., and Mr. C. Buxton left Sofia for Bucharest on Saturday.

His many friends both in Egypt and in this country will be pleased to learn that Mr. R. C. S. Morrison-Scott has been gazetted to a temporary commission in the Royal Marine Artillery.

Madame Take Jonescu, who arrived in town recently, is leaving London shortly for Bucharest.

We congratulate Mr. and Mrs. W. H. Crawfurd Price upon the birth of a son, which took place last Saturday at 24, Glenlock Road, Hampstead. Mr. Crawfurd Price is a well-known journalist of Athens.

We learn from *The Egyptian Gazette* that Dr. Zwemer recently met with an accident in Cairo while cycling in the Boulac Road. He collided with a carriage and received several painful contusions on the head, arm, and legs. He was removed quickly to the home of Mr. Upson, of the Nile Mission Press, where Dr. Madden attended him. No bones were broken, but he will be required to keep his bed for several days.

The Egyptian Gazette reports that Osman Pasha Mortada, Director of the Khedivial Maieh, soon after his return to Cairo from Constantinople, informed a representative of *Misr* that the Khedive was in excellent health, with the exception of a slight trouble in his teeth, and that he was still in Constantinople, as its climate suits him at the present time.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels.
High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(Proprietor of the Army and Navy Stores).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Lieutenant Hugh Mockler-Ferryman, of the 52nd (Oxfordshire and Buckinghamshire) Light Infantry, who was killed in action at the Battle of the Aisne on September 16, was the elder son of Lieut.-Colonel A. F. Mockler-Ferryman, author of the "Military Geography of the Balkan Peninsula" and of many other well-known works.

The Turkish Ambassador called at the Foreign Office on Wednesday and saw Sir Edward Grey.

Balkan papers received by the last mail report the death on the battlefield of Mr. Vladislav Ribnikar, a well-known Serbian journalist and editor of the *Politika*. Mr. Ribnikar was the brother-in-law of Mr. Tcholak Antich, the Serbian Minister at Sofia.

The Egyptian Gazette states that several Anglo-Egyptian officials have volunteered for the British Army. They are: Messrs. E. L. Chambers, A. J. Haughton, G. P. Mead, W. G. North, R. Scammell, W. Day, E. C. Bambridge, J. A. Tennant, G. St. C. Fielden, A. Holden, G. A. Roberts, and C. F. C. White. Most of them, adds the *Gazette*, left for England by the Orient liner on September 15.

Among the passengers who left for Port Said by the P. and O. s.s. "Mongolia," which sailed from London last Saturday were:—Judge and Mrs. Maxwell Fleming, Mrs. Madden, Judge and Mrs. Marshall, Miss D. W. Marshall, Judge and Mrs. Tuck, and Mrs. J. Warnock.

APPOINTMENTS, PROMOTIONS, ETC.

Essad Pasha Toptan has been appointed Grand Vizier of Albania.

The Greek Chamber has elected as President Mr. Zavitzands, the Government candidate.

Mgr. Joseph, bishop-in-charge of the diocese of Stara Zagora in Bulgaria, has been elected Bishop of Tyrnovo.

Baron Fasciotti, Italian Minister in Bucharest, has returned to his post.

Mr. Papadopoulos, President of the Hellenic Consular Court at Smyrna, has been promoted to the corresponding post in Constantinople.

The Cyprus *Gazette* announces that Mr. Stanley Fisher, Puisne Judge of the Supreme Court, and Mr. H. C. Lukach, Assistant Secretary and Clerk of the Executive Council, have been appointed to the Currency Commission.

Mr. C. Diamandy, Roumanian Minister at Petrograd, has returned to his post from Bucharest.

M. Constantin Collas has been appointed Secretary to the Greek Legation in London.

Mr. B. B. Howell, of the Finance Department, Sudan Government, Cairo, has been transferred to Khartoum to replace Mr. Ornald J. Forster, who has been transferred to Cairo. Mr. Howell arrived at Khartoum on September 4.

Mustapha Bey, of the Ottoman Ministry of Public Works, has been appointed Director of Railways in succession to Muklitar Bey.

SIR MURDOCH MACDONALD.

The following appreciation of Sir Murdoch Macdonald recently appeared in *The Egyptian Mail*:—"The Ministry of Public Works in the last thirty years has enjoyed the services of many brilliant engineers; the roll of names which begins with that of Sir Colin Scott-Moncrief, and includes Sir William Garstin, Colonel Ross, Sir William Willcocks, and Sir Arthur Webb, is one of which Great Britain and Egypt should deservedly be proud. To these Mr. M. Macdonald—Sir Murdoch Macdonald as we shall now know him—has been no unworthy successor. He came to Egypt not so many years ago, but he quickly made his mark. In the heightening of the Aswan Dam and in the work at Esna his services were signal, and when the work at Aswan no longer presented such difficulties as demanded his supervision and presence he was offered and accepted the post of Under-Secretary to the Ministry of Public Works. It was the last appointment the late Sir Eldon Gorst made; it was assuredly the best. Lord Kitchener, with his power of divining a man's capabilities, did not take long to discern the remarkable calibre of the Under-Secretary. When Mr. Dupuis resigned Mr. Macdonald took his place, though not his title. Since then he has given proof of high administrative faculties, coupled with an insight into the technical problems of irrigation in Egypt, that put him as high as any of his famous predecessors. Unlike most of them, he had not enjoyed a long experience of exclusively irrigation engineering. But he brought to his new task an acute intellect and an extraordinary power for work, and it has been his good fortune to put through schemes for the development of Egypt wider than any of those which the Occupation has hitherto accomplished. His success has been unimpeachable. The cultivable northern regions of the Delta will in two or three years be increased by a million acres; for the first time in history drainage in Egypt will be as efficient as irrigation. Nor will it be said that Sir Murdoch Macdonald only attacked one side of the dual problem that eternally besets the irrigation engineer. We are embarking on large schemes of irrigation in the Soudan that will have their effect on every part of Egypt; Mr. Macdonald has envisaged a wider field than lay open to any of his predecessors, and it may even be that he will stretch the far-reaching hand of the Ministry of Public Works beyond Khartoum, beyond the Bahr el Gazal, to the lakes of Uganda, where the Nile has its rise. That will be the last chapter of the history that begins with the Cairo barrage and has been consummated in our generation by the Aswan Dam. This is a great, a splendid work, and Egypt can consider herself lucky that she has the engineer able to carry it out. Of the man himself one finds it hard to speak, for one feels that he himself would rather be unspoken of. His unfailing sympathy, his unflagging zeal—these his colleagues know. And the wide world knows, too, that the cares of high office and the incessant claims of the most exacting position the Egyptian Government has to offer have never for one moment diminished his courtesy, his urbanity, and his interest in anything that appertains to the fuller life of the community."

OBITUARY.

SIR WILLIAM CARINGTON.

The death is announced of Colonel the Hon. Sir William Carington, Keeper of the King's Privy Purse since 1910. Sir William was born in 1845, was educated at Eton, and entered the Grenadier Guards, of which he became a lieutenant-colonel. He participated in the Egyptian Campaign of 1882, and fought in the action of Mahuta, in the Battle of Tel-el-Kebir, receiving the medal with clasp and the bronze star. In 1868 he became Liberal member of Parliament for Wycombe and represented the constituency for fifteen years. He was associated with the Court for thirty-four years, and was appointed Groom in Waiting to Queen Victoria, retaining that appointment from 1880 to 1882, when he became Equerry, a position he occupied until 1901. In that year he was made Controller and Treasurer to the Prince of Wales and Extra Equerry to the King. He had been Keeper of his Majesty's Privy Purse since 1910, and was appointed Privy Councillor in the same year. Sir William Carington was created K.C.B. in 1913, having previously been made C.B. in 1897, K.C.V.O. in 1901, and G.C.V.O. in 1911. He married in 1871 Juliet, the only daughter of Francis Warden.

DOMESTIC ANNOUNCEMENTS

DEATHS.

CROSBIE.—On October 4, 1914, at 125, Archway Road, Highgate, London, N., Sarah McMorland, widow of Rev. P. Crosbie, of Salonika, in her eighty-ninth year.

SINADINO.—On October 3, at The Lodge, Southfields Road, Eastbourne, Nicolas Sinadino, of Alexandria, Egypt, aged fifty-three. Funeral Norwood Cemetery, Wednesday, 11.15 a.m.

FRIDAY, OCTOBER 9, 1914.

PLAYING WITH FIRE.

Until two days ago it seemed all to the good that Turkey, in spite of many provocative acts, had refrained from an actual declaration of war. If it be true that she has now received four big siege guns from Germany, the world will be less ready to attribute to prudent statesmanship the delay in taking the fateful step which can only lead to a further diminution of the Ottoman Empire. Nevertheless, we should like to feel that each day which passes is strengthening the hands of the moderates of the Committee of Union and Progress, who are known to be in favour of neutrality. It is indeed difficult to understand how the military party contrives to retain its influence. What it seeks to commit the country to is in effect a struggle single-handed against the greater part of Europe. If Turkey embarks upon hostilities at this juncture she will nominally be striking a blow on behalf of Germany and Austria-Hungary. But just as neither of these Powers is in a position to offer her practical support on sea or land, so will Turkey's campaign fail to exercise any appreciable effect on the struggle in Central Europe. Neither Russia nor Serbia would detach a single soldier from the firing line or its immediate supports, nor would the Anglo-French fleets have to impair their strength in the Adriatic in order to cope with the Turkish complication. The military party in Constantinople can hardly be advocating hostilities merely for the *beaux yeux* of Germany. It must hold out for Turkey some permanent advantages, which, having won by her armed might, she will be in a position to retain by the same means. The greatest optimist cannot expect to achieve more on the Caucasus and Egyptian frontiers than the infliction of passing inconvenience to the Russian and British Governments. On her European frontier, however, there is room for more definite aspirations. Thrace and Salonika are alluring objectives, and there is the settled conviction that the Turkish Army is capable of better things than it accomplished in the Balkan War. We may leave it to the Porte's military experts to decide what chances it has of winning back and holding Thrace against the armies of Roumania, Bulgaria, and Greece; but it may be taken for granted that, if Salonika were seized against the wishes of the Triple Entente, the last word would rest with the guns of the Anglo-French fleet. Turkey has profited more than once by the divisions of Europe, but to-day she is no longer able to play one set of Powers off against another. She has to decide between Germany and Austria-Hungary on the one hand, whose assistance is limited to war bulletins and a military mission, and, on the other hand, the Powers of the Triple Entente, who possess the command of the sea and are in a position to deal with a hostile Turkey at their leisure.

We have no wish to do an injustice to the military party in Constantinople. Before the outbreak of the war abundant support was to be found for its line of reasoning. It had the assurances of Germany that France could be overrun in three weeks, that the Russian Army was of no fighting value, and that the British Army was contemptible. For Turkey, therefore, to make common cause with the victorious hosts of Germany and Austria-Hungary and to help herself to whatever territory she coveted seemed the obvious and most advantageous course. But the day has gone by when such a policy can be seriously advanced. Germany's war of easy conquest has become, according to her own showing, a struggle for existence; Austria-Hungary may still be capable of a stubborn fight, but it will be with her back to the wall. It would be more than quixotic on Turkey's part to attempt now the programme which seemed so attractive as expounded by German theorists before the war. When Germany has carried out the part which she had mapped out for herself it will be time enough for Turkey to round off the pleasing picture in South-East Europe. In the meantime the Porte may profit by the opportunity which has been afforded it of taking stock of the European situation. If it finds that things are not turning out quite as Germany led it to expect, let it consider to what extent Austria-Hungary has been a free agent in mapping out her own destiny. If, as is far more probable, the Dual Monarchy has been merely a catspaw of Germany, it will be well for the Porte to reflect whether Turkey had not better resume her freedom of action before it is too late. The mistakes of the German General Staff regarding conditions in Russia and France may be repeated in connection with the situation in the Near East, and Turkey might soon be fighting as hopeless a struggle as Austria-Hungary has had forced upon her in Galicia. The latter Power, however, can console herself with the reflection that the fate of dismemberment seemed to be reserved for her whatever course she took. Turkey, on the other hand, is threatened by no such catastrophe. A sound policy in the future superimposed upon neutrality now means for her the consolidation and material progress of the Ottoman Empire. An appeal to the sword, if successful, might restore to her a small stretch of territory which she has never held with any advantage to herself; if unsuccessful, it would mean the loss of the capital of the Empire and the expulsion of the Turks from Europe. Such a contingency, let it be remembered, is by no means remote. Turkey was threatened with that fate two years ago when the Bulgarians reached Chatalja; now there is the certainty that Russia will exact the penalty in full for any active hostility on Turkey's part.

We refuse to believe that the Turkish Government has been so blind to its own interests as not to count the possible cost of a declaration of war. The more the inevitable result of an unsuccessful campaign is brought home to it, the more likely is it to subject the programme of the military party to scrutiny in the light of events in Central Europe. Much sympathy will be felt with the reluctance of Enver Pasha and his military clique to see the Turkish Army settle down to a long era of peace under the stigma of the Balkan War. But an army is not everything in a State; at best it should be the servant and not the master of that State. The dangers that ensue when the latter condition obtains are being exemplified by Germany. However one may admire the marvellous precision of the German war machine, there can be no doubt that the subordination of diplomacy to militarism is likely to prove the undoing of the German Empire. May Turkey take the lesson to heart in time! The Porte has not yet wholly surrendered itself to its military elements. It has its statesmen as well as its protégés of Potsdam, and there is a general belief that if Talaat Bey would only rally the former to his standard and come out into the open all would be well with Turkey. It is not denied that the military clique has had some arguments on its side. The action of the British Government in effecting the compulsory purchase of the two Turkish men-of-war building in this country has lent itself to misrepresentation, and was deeply resented in Turkey; moreover, Turkish fears have been played upon in regard to Russia's alleged designs upon Constantinople. But Turkey stood to lose nothing—if her pledges were genuine—from the temporary loss of the two men-of-war, and she can easily satisfy herself regarding the friendly intentions of the Triple Entente. The three Powers ask for her neutrality far more in Turkey's own interests than from a desire to avoid military complications for themselves. The effect of Turkish hostility on the military situation would be relatively small, but the consequent disintegration of the Turkish Empire would have far-reaching results, and the Powers, in addition to wishing Turkey well, are not anxious to add to the problems which they will shortly be called upon to solve.

BULGARIA'S NEUTRALITY.

(From a Correspondent.)

Bulgaria's attitude in the present war is one of strict neutrality, and it will be her policy, dictated by her leading statesmen and her own interests, to maintain that attitude so long as it is in any way compatible with national prestige, honour, and integrity.

By remaining neutral in these troubled times Bulgaria is rendering the best services within her power to the cause of the Allies, and for reasons that are only too obvious. In the first place, her neutrality has enabled Serbia to throw her whole army against Austria and leave her eastern frontier to a large extent unguarded; in the second place, so long as Bulgaria remains neutral Turkey will be unable successfully to wage war on Greece, as her armies will not be allowed to violate Bulgarian territory; thirdly, and parallel with the latter, there is every likelihood that Turkey will remain neutral as long as Bulgaria does; and, fourthly, any campaign undertaken by Roumania in Transylvania will be facilitated by the maintenance of Bulgaria's present attitude.

Questions, it is true, have arisen tending to throw doubt on the sincerity of Bulgaria's neutrality. There was the question, for instance, of the passage of German sailors through Bulgaria from Rustchuk to Constantinople in a special train. In answer to representations made by the Entente Powers at Sofia, the Bulgarian Government declared —(1) That the men were dressed as civilians and had passports declaring them to be working-men; (2) that they came from Roumania, where they had likewise travelled in a special train; and (3) that the special train which took them across Bulgarian territory had been chartered by a private company. Finally, the Government disclaimed any knowledge of the real character of the Germans in question. Latterly, further accusations have been levied against Bulgarian neutrality, such as the transit of war material through the kingdom on its way from Germany to Constantinople. The Government has emphatically denied the truth of these assertions. After all, it must be remembered when discussing the attitude of Bulgaria that one of the principles of her foreign policy is to keep on the best of terms with Great Britain and Russia, and that, unless compelled to do so against her will, she will, whilst maintaining a strict neutrality, do nothing, either directly or indirectly, against their interests or wishes.

In the same way, Bulgaria wishes to live in peace and friendship with her neighbours. Her sincerity in this respect is proven by her attitude towards Serbia in allowing the latter to withdraw her army from Macedonia, and if she does not object to King Peter's army, in conjunction with that of Montenegro, liberating the Southern Slavs from Austrian hegemony, she will likewise raise no objection if Roumania attempts to free her Latin brothers in Transylvania. As for Turkey, the relations between both countries are friendly. It has not been forgotten by the Bulgars that the first to make friends with them after the Second War were the Turks.

Neutrality, then, is Bulgaria's watchword. After the war, when the map of Europe is being carved out afresh, her position, thanks to a period of peace and to her steadfast policy, will be a stronger one than it is to-day, and her claims to territories occupied by her nationals will be fully discussed by the victors, and, it is hoped, will be recognised in a friendly spirit by those of her neighbours who have, or will have, benefited by her neutrality.

Reuter reported on Wednesday from Rome as follows:—

"A representative of the *Idea Nazionale* to-day interviewed M. Rizoff, the Bulgarian Minister here. M. Rizoff denied that any agreement existed between Bulgaria and Turkey to attack Roumania if the latter declared war on Austria, or that Bulgaria would allow Ottoman troops to pass through Bulgarian territory in case of a Greco-Turkish war. M. Rizoff said that Bulgaria would maintain the most absolute neutrality, and, considering the uncertain political situation in the Balkans, Bulgaria would not conclude an understanding now which might later endanger her vital interests.

THE BULGARIAN ARMY.

(From a Correspondent.)

Sofia, September.

With a population of 4,329,108, Bulgaria is in a position to place in the field in time of war an army of about 600,000 men.

Before the war Bulgaria had approximately 7,000 officers, of whom about 2,500 were on active service.

War Casualties.

The following table gives the number of killed and wounded officers and soldiers in the last two wars:—

	War against Turkey.		War against the Allies.
Officers killed	339	....	280
Officers wounded	902	....	773
Soldiers killed	24,401	....	20,326
Soldiers wounded	36,876	....	42,911
Total	62,518		64,290

The number of officers killed was 9 per cent. of the total number of officers in the army, and the number of wounded was 24 per cent., or together, 33 per cent. The number of killed soldiers was 7.5 per cent. of the whole army, and the number of wounded was 13 per cent., or a total of 20.5 per cent. No other army can show such a heavy percentage of losses sustained in a war. In spite of this, and of Bulgaria's great material and territorial sacrifices during the recent wars, the present *moral* of the Bulgars is even more favourable than before the wars.

The best proof of the above statement is contained in the following facts:—

Royal Military School.

(a) Military service in Bulgaria is viewed with greater sympathy now than before the wars. The number of candidates for admission to the Royal Military School has risen. The number of pupils is 1,058, as follows:—

Seniors	184
Juniors	444
1st Preparatory	388
2nd Preparatory	42
Total	1,058

Of these 162, or almost one-sixth of the total, are Macedonians.

It is noteworthy that the educational standard of the candidates is much higher than hitherto. It is also a fact that many of them have given up their university career in order to apply for admission to the Military School.

According to the opinion of competent circles the diligence of the cadets and their confidence in the future are greater than they used to be.

School for Reserve Officers.

Apart from the Military School, there is a Special School for Reserve Officers, which has to be attended by all graduates from the higher and secondary schools who are liable to military service.

Graduates from the higher schools have to spend one year and nine months in the special school and three months in the army; graduates from the secondary schools two years and nine months in the former and fifteen months in the latter.

After having passed an examination, the graduates from the special school are promoted to "candidate-officers," and later on to "reserve officers." They can also be promoted to higher grades after a certain number of years and participation in manœuvres. The annual number of entries into the special school for reserve officers is about 300; this year they number 500.

Bulgarian officers belong to all social classes. Sitting beside the general's son in the Royal Military School is the peasant's son or the son of the ordinary workman. The Bulgarian Army is in every sense a democratic one.

Popular Enthusiasm.

(b) The popularisation throughout the country of the different gymnastic and rifle clubs and the increased number of members. A programme for the military preparation of school children is being elaborated.

(c) The erection of monuments in honour of the warriors who fell in the recent wars. It is noteworthy that the majority of these monuments are erected, even in the smallest villages, by private means.

Digitized by Google

Patriotic Literature.

(d) The creation of a new patriotic literature. Since the war a number of patriotic journals have been established, such as *Narod i Armia*, "People and Army"; *Obnovlenie*, "The Renovation"; *Swobodno Mnenie*, "Free Opinion," etc., etc. Daily papers have started a special section for military topics.

(e) All political parties have, through their leaders in the Sobranje, spoken in favour of a "strong army."

(f) The creation of societies and the organisation of funds for different purposes, such as, for instance, in aid for the wounded, for the strengthening of the Bulgarian Navy by the purchase of new warships ("Otetz Paissi," "St. Cyril and St. Methodius," etc.).

(g) The extraordinary celebrations on the occasion of the National holiday, "St. Cyril an dSt. Methodius," denote also a strengthening of the Bulgarian national feeling.

(h) In a word, it can be said that both the material strength of Bulgaria and popular sentiment are in excellent condition. Moreover, the Bulgarian Army, which distinguished itself by its preparedness for war and its iron discipline, has now the advantage of its long experience of war, and is the best guarantee for the peaceful development of the country and the maintenance of its interests.

BULGARIA'S POPULATION.

The following statistics are taken from the *Bulletin Mensuel de la Direction Générale de la Statistique du Royaume de Bulgarie* (August, 1914) :—

Population.

The following give the population of Bulgaria towards the beginning of 1911 and 1912, according to nationalities and sex :—

	1912.	1911.
Bulgars	3,589,439	3,523,311
Turks	502,564	501,560
Other Nationalities	308,557	309,642
Males	2,237,881	2,206,685
Females	2,162,676	2,130,828
Total	4,400,560	4,368,923

Towards the middle of 1912 the population of Bulgaria was, according to more recent statistics, 4,432,427.

Births and Deaths.

The following are the figures for 1910 :—

Births—	
Males	93,866
Females	87,245
	181,111
Deaths—	
Males	50,411
Females	49,500
	99,911

Municipal Population.

The population in 1914 of the various towns is as follows :—

Bourgas	14,897	Rousse	36,225
Chirpan	11,675	Samokov	10,440
Choumen	22,225	Svichtov	13,101
Dupnitza	11,601	Sliven	25,142
Haskovo	15,067	Sofia	102,812
Kasanlik	10,568	Stanimaka	12,969
Kustendil	13,748	Stara Zagora	22,003
Lom	11,081	Tirnovo	12,649
Pazardjik	18,098	Varna	41,419
Plovdiv	47,981	Vidin	16,450
Pleven	23,049	Vratza	15,230
Rasgrad	13,975	Yambol	19,956

The National Bank of Bulgaria in 1913.

Economic and Financial Considerations.

(SPECIAL TO "THE NEAR EAST.")

SOFIA, August.

Regarded from the point of view of profits, the year 1913 was an excellent one for the National Bank of Bulgaria. The gross profits for the year were 20,774,981.92 lewas against an expenditure of 9,443,699.31 lewas, leaving a net profit of 11,331,282.61 lewas. The net profits for 1912 were 6,661,853.52 lewas, showing an increase in one year of 4,669,429.09 lewas. We can therefore rightly assert that 1913 was an excellent year for the National Bank of Bulgaria. But the assertion is only applicable as regards the final result—that is, the net profits—and does not measure the Bank's activity in procuring said results. In order to obtain a fair survey of the former, we shall have to examine it in connection with the economic situation of the whole country, and thereby seek the real causes of the increased profits.

Diminished Activity.

The fact that the Bank's net profits were 11,331,282 lewas in a year when the country was waging a war that ended so disastrously for it, will surprise all who are unacquainted with the conditions obtaining in Bulgaria. It stands to reason that business was dead in Bulgaria during the war, and that none of the banks, including the National Bank, could pursue their activity as in normal economic times. It was only after the demobilisation had been carried out, and more particularly during the last four months of the year, that the situation improved, thanks to increased imports and exports. But this short period of activity cannot account for the surprising results obtained by the National Bank. The explanation of this phenomenon is to be found, in the first place, in the fact that during the war the Bank dealt almost exclusively with the State, opening large credits in its favour and thus enabling it to meet current expenditures; and, secondly, in Article 49 of the Bulgarian Bank Law, which determines that when a bank has advanced to the State sums amounting to more than 10,000,000 lewas, the plus amounts are to bear interest.

Advances to the State.

For almost one year, from September 19, 1912, to September 12, 1913, the date of the extinction of the moratorium, the National Bank devoted its operations, as stated, almost exclusively to the service of the State, thus facilitating the acquisition of enormous army supplies. The result was the issue in ever-increasing numbers of bank notes, the climax having been reached on August 31, 1913, when the notes issued amounted to 209,700,000 lewas. Thereby the limit of 10,000,000 lewas referred to above had been surpassed by a considerable amount, and at the conclusion of the unhappy war and at the end of the year the State's indebtedness to the National Bank stood at about 150,000,000 lewas. The maximum was attained on Sepember 7, 1913, when the debt stood at 157,000,000 lewas. According to Article 50 of the Bulgarian Bank Law, the rate of interest has to be fixed between the State and the bank, but in no case must it be more than 2 per cent. less than the usual rate. For 1913 it was fixed at 5½ per cent. These large interest-bearing advances to the State were the principal item producing the bank's net profits of 11,331,282 lewas in 1913.

The following table shows the National Bank's activity in 1913 as compared with 1912 :—

ORDINARY BANKING OPERATIONS.

Date.	Number of Operations.	Amount in Lewas.
1912	1,214,128	6,250,561,915
1913	957,354	5,385,717,716
	(−) 256,774	(−)864,844.199

OPERATIONS WITH THE STATE.

Date.	Number of Operations.	Amount in Lewas.
1912	241,363	458,017,122
1913	178,671	1,011,431,411
	(−) 62,692	(+)553,414,289

Bank note circulation and gold and silver in hand in 1913 are given in the following tables :—

	Gold. Amount in Lewas.	Date.	Gold Notes. Amount in Lewas.	Date.
Maximum....	56,428,000	Aug. 7	181,769,000	Sept. 22
Minimum....	50,271,000	Jan. 7	138,915,000	Jan. 22
Average.....	54,922,000	—	163,616,000	—
	Silver.		Silver Notes.	
Maximum ..	23,935,000	Dec. 7	28,009,000	July 31
Minimum....	16,902,000	Jan. 7	22,531,000	Nov. 30
Average.....	20,418,000	—	24,151,000	—
	Gold and Silver.		Gold and Silver Notes.	
Maximum....	79,326,000	Dec. 7	209,696,000	Aug. 31
Minimum....	67,173,000	Jan. 7	162,033,000	Jan. 31
Average.....	75,340,000	—	187,767,000	—

BALANCE-SHEET, December 31, 1913.

	Lewas.
In hand on December 31, 1912	163,513,209
Paid in on 371,353 operations in 1913	1,616,097,361
	1,779,610,570
Paid out on 317,548 operations in 1913	1,611,130,622
In hand on December 31, 1913	168,479,948

of which—

	Lewas.
In gold and silver	78,773,757
In notes	89,706,191

Gold Reserves Abroad.

It will thus be seen that the cash and notes in hand on December 31, 1913, did not differ much from the figures for December 31, 1912. The same does not apply, however, to the bank's gold reserves in the hands of its correspondents abroad. On August 31, 1912, the date of the mobilisation, these stood at 36,700,000 francs, and were subsequently strengthened against securities on May 6, 1913, by a further 12,000,000 francs. By October 14 they had entirely disappeared, but were again brought up to 13,500,000 francs by the end of the year. It was the State's obligations abroad that exhausted the bank's gold reserves in the hands of its foreign correspondents.

The Moratorium.

As long as the moratorium lasted—that is, from September 17, 1912, to September 12, 1913—the bank's balance-sheet remained stationary, with the exception of its opera-

NATIONAL BANK OF BULGARIA.

State Bank of Emission. *Established 1879.*

Head Office - - SOPHIA.

Branches at Sophia, Roustschouk, Varna, Philippopolis, Tirnovo, Burgas, Widin, Plevna, Sistov, Sliven, T.-Pazardjic, Shumla, Stara-Zagora, Gabrovo, Dede-Agatch, Xanthie, Gumuldjina, and 70 agencies.

Capital - 20,000,000 leva gold = £800,000. Reserve Funds - 10,500,000 leva gold = £420,000

EVERY KIND OF BANKING BUSINESS TRANSACTED.

Governor, CHR. TCHAKALOFF.

Digitized by Google

tions with the State. Noteworthy only is a greater activity in the granting of advances on the deposit of securities, due to the restriction of personal credit. These rose from 7,300,000 lewas in 1912 to 8,600,000 lewas in 1913.

Portefeuille.

After the repeal of the moratorium the situation altered rapidly. At different periods the bank's portefeuille was as follows :—

	Securities.	Value in lewas.
On September 14, 1912 (3 days before mobilisation..... ...	43,891 ..	52,618,133
On September 30, 1912	45,571 ..	51,393,465
On December 31, 1912	44,272 ..	50,597,754
Acquired in 1913	37,384 ..	49,86.,506
	81,656 ..	100,459,260
Encashed in 1913	52,164 ..	59,371,631
On December 31, 1913.....	29,492 ..	41,087,629

The portefeuille showed the following variations :—

	Portefeuille.	Deposited securities.	Total.
Maximum (Jan. 7, 1913).....	50,536,9:0	33,204,405	83,741,324
Minimum (Dec. 31, 1913).....	41,087,632	17,621,879	58,709,511

Special Current Accounts.

These are in the nature of advances made by the bank and secured by the guarantors. On January 7, 1913, these were valued at 42,803,833 lewas, and by December 31, 1913, they had fallen to 39,060,362 lewas.

Generally speaking, a considerable decrease in the portefeuille took place towards the end of the year—namely, to the extent of 25,031,813 lewas. The largest decrease is in the item "Private Banks," whose deposited securities dropped from 33,200,000 lewas on January 1, 1913, to 17,600,000 lewas on December 31, 1913. The special current accounts also show a falling-off of 3,743,471 lewas.

Deposits.

These data show that in the latter part of 1913 a decided and general improvement had taken place in the money market. This improvement extended to the ordinary deposits, which increased by about 20,000,000 lewas; current accounts also increased, namely, from 30,200,000 lewas towards the end of 1912 to 56,400,000 lewas on December 31, 1913. This increase in liquid money proves the existence at the time of a considerable amount of capital, which could have been usefully employed in industrial and commercial enterprises, but which, owing to the abnormal times produced by political events, found no opportunity for investment. In view of the monetary situation, the National Bank of Bulgaria undertook to attract this capital by offering to pay an interest of 3 per cent. thereon. It was thus able to prevent these moneys from being devoted to speculation on the foreign *agio* (rate of exchange), which would have had the result of sending it up and thus accentuating the crisis. The fall in the "Private Bank Accounts," alluded to above, shows the same improvement in the situation, because it proves that these banks had so far recovered that they were able to reduce their obligations towards the National Bank and the number of their deposited securities.

Foreign Exchange.

The *agio* crisis in Bulgaria began towards the beginning of the war, in September, 1912, but remained latent as long as the moratorium was in power. As soon as the latter had been repealed, however, it broke out with pent-up vigour. The cause is to be found in the country's very unfavourable balance-sheet. The more complex the political situation in the Balkans, the greater grew the country's monetary obligations abroad. Thus, for instance, the service of the consolidated debt—interest plus amortisation—rose from 45,000,000 lewas in 1911 to 53,000,000 in 1912, and amounted to 57,000,000 lewas in 1913. To this must be added 4,000,000 lewas, representing the dividends to be paid on foreign capital invested in the country, and 5,000,000 lewas to cover insurance premiums which rose considerably as a result of the war; moreover, the trade returns were, in view of increased consumption of foreign goods at home and the prohibition of exports abroad, unfavourable to the country, and showed a deficit in 1912 of 57,700,000 lewas, which rose in 1913 to 80-90,000,000 lewas. Another factor in the situation was the financial boycott subsequent to the demobilisation of the Army, the result of which was that it was impossible for the State to raise a loan abroad.

Exchange Syndicate.

In order to meet the country's heavy obligations abroad, foreign currency was requisite, but was not forthcoming in sufficient quantity owing to reduced exports. During the last four months of the year imports rose enormously without a corresponding increase in exports. The demand, therefore, for foreign money was enormous, and change quotations rose accordingly. Private banks sought to profit by this state of affairs and engaged in rather harmful speculation, with the result that the foreign *agio* rose rapidly, reaching a climax on December 16, 1913, when it stood at 22.25 per cent. It was time now for the National Bank to intervene. In order to put an end to this form of speculation, the National Bank took the initiative and formed a syndicate composed of all banking institutes whose object it was to avoid competition on the purchasing market, and thereby to reduce, if not entirely to remove, competitive speculation on the *agio*. This fell from 22.25 per cent. on December 16 to 15 per cent. on December 19, and by February of this year it had dropped to 8 per cent.

Increasing Exports.

Other factors influenced the situation similarly. It is a fact that every crisis creates its own peculiar conditions, which enable it eventually to be overcome. Thus, whereas the high rate of exchange tended to stem imports, it simultaneously gave an impulse to exports, all the more gratifying because the country had stored two good harvests, which were only waiting to be sent abroad. By means, therefore, of the artificial restriction of speculation through the Exchange syndicate, and by forcing exports, the *agio* had fallen by the first half of March, 1914, to 7 per cent.

Capital and Profits.

In spite of all the unfavourable circumstances enumerated above, the end result of the year was, as previously pointed out, a most favourable one for the National Bank of Bulgaria. The net profits rose, as stated, from 6,661,853 lewas in 1912 to 11,331,282 lewas in 1913. This result was principally due to the increased circulation of bank notes and the interest of 5½ per cent. paid by the State to advances exceeding the ten million lewa limit. Up to 10,000,000 lewas no interest is paid by the State.

The bank's net profits for 1913 are detailed as follows :—

	Lewas.	Per Cent
Reserves added to the Bank's Capital	2,832,820.65	.. 25
Mortgage Reserve Fund	174,364.80	.. 1.5
"Doubtful Operations" Fund	4,670,855.87	.. 41·17
Commissions (tantièmes)	325,985.59	.. 2·8
State Operations	5,327,265.70	.. 29·53
	11,331,282.61	

On December 31, 1913, the National Bank of Bulgaria possessed the following capital and funds :—

	Dec. 31, 1912. Lewas.	Dec. 31, 1913 Lewas.
Bank's Capital	13,054,244.61	15,878,065·61
Reserves	7,323,671.—	7,323,671.—
Mortgage Reserve Fund ..	496,:76.64	670,931.44
"Judicially Recognised Land" Fund	515,060.63	722,704.62
"Doubtful Operations" Fund.....	2,151,762.86	4,809,402.33
	23,532,315·74	29,404,775.—

THE HARVEST OUTLOOK.

(From the Official Monthly Bulletin for September.)

From the most recent information to hand concerning Bulgaria's crops, including maize, it appears that the outlook is satisfactory. Autumnal cereals, nevertheless, show a slight falling-off both as regards quality and quantity. Barley is the best of these latter crops. The oat harvest is excellent in many districts, more particularly in that of Sofia.

Autumn Cereals.

The following are estimates of this autumn's cereal crops :—

Wheat.....	12,500,000 quintals
Rye	2,500, 00 ,,
Barley	3,500,000 ,,
Oats	2,000,000 ,,

The maize crop is somewhat backward, but it is not expected to be under 850,000,000 kilos. The millet crop is satisfactory, and has been harvested. A greater amount was sown this year than usual

Tobacco.

Tobacco is in an excellent state, and the crop promises to be a good one. Two or three first pickings have already taken place everywhere, and the weather has favoured the drying of the leaves. According to information to hand, the output this year can be estimated at about 15,000,000 kilos of good quality. These figures do not apply to the New Territories, where only half the ground to be planted with tobacco is under cultivation. Here the output is estimated at about 7,000,000 kilos.

Sugar and Vines.

Sugar-beet promises well; nevertheless, it does not seem to flourish well in the department of Stara-Zagora.

In spite of the favourable weather, the vines have not been able to progress, and are suffering from mildew and other diseases. In the regions of Lovetch, Tirnovo, Razgrad, and Chuma the crop is badly compromised, but in the regions of the Vidin, Lom, Rustchuk, along the Black Sea littoral, and in the New Territories, the outlook is better, though the ripening of the grapes is at least a week late.

Fruit.

Other fruit are showing better results, foremost in importance being plums, followed in order by apples, peaches, nuts, pears, and quince. The state of the olive, fig, and granate trees is promising.

NEWS IN BRIEF.

Survey work on the new line from Samovite to Nicopali is shortly to be completed.

The municipality of Sofia is providing work for the unemployed. An Employment Bureau is to be opened at the municipality in this connection.

The exportation of eggs from Bulgaria is no longer prohibited (September 13).

The *Outro* of Sofia denies that war material for Turkey has passed through Bulgaria.

The Agricultural Bank has been authorised by the Council of Ministers to issue a loan of 5,000,000 lewas, under Government guarantee, for distribution among the victims of the floods at Eskijumaia and among the inhabitants of the Harmanly district invaded by the Turks.

The Bulgarian Government has appointed a Consul in Salonika and it is reported that another will be appointed in Serres.

The Bulgarian Exchange Law.

In Connection with the Establishment of a Stock Exchange in Sofia.

(SPECIAL TO "THE NEAR EAST.")

Sofia, September.

The first Stock Exchange in Bulgaria is to be established this year in Sofia. The necessary preparations have already been made by the Sofia Chamber of Commerce and Trade, and it is to be hoped that the institution will be in a position to carry on operations towards the beginning of September.[1] According to the Exchange Law passed on March 1, 1912, the initiative for the creation of an exchange has to be taken by the local Chamber of Commerce and Trade, in this case that of Sofia. The object of this clause is to ensure that an exchange can only be established there where the necessary guarantee is forthcoming.

Exchange Regulations.

The Sofia Stock Exchange will be controlled by regulations, which have not been definitely fixed, being still in elaboration, and which will have to be approved by the Administrator of the Exchange and the Minister of Finance. It is therefore impossible to analyse them here, but we shall refer to the Exchange Law, which is applicable to the regulations, and will have to be incorporated in them.

The Bulgarian Exchange Law of 1912 defines an exchange as an open market where dealers and brokers meet to transact business, and determines two kinds of exchanges —namely, a "stock" exchange and a "commodity" exchange (mart). Article 1 determines the nature of business to be transacted—in the former, coins, gold and silver, banknotes, public and private securities, and also commercial securities are to be negotiated; in the latter commodities, freights and transport insurance, including marine insurance. Article 2 states that at an exchange all the above operations can be concluded, but in case only those of the first category are negotiated it is a stock exchange, and if only those of the second category it is a commodity exchange.

State Control.

According to Article 3 all exchanges stand under the control of the State, and no new exchange can be established except by a Governmental decree, to be signed, in the case of a stock exchange, by the Minister of Finance, and in the case of a commodity exchange by the Minister of Commerce and Trade. In these circumstances, the control of the exchanges is exercised directly by either one of the two above-named Governmental departments, but the method of control varies accordingly. Article 11 states that, in the case of a stock exchange, an Exchange Commissary, who is a Government official, has to be appointed by royal decree. The control of the commodity exchange, on the other hand, is entrusted to the local Chamber of Commerce and Trade, which appoints an official delegate therefor. The Commissary, in the case of the stock exchange, and the delegate, in the case of the commodity exchange, are responsible for the carrying out of the Exchange Law and Exchange Regulations. They have free access to all meetings held by the Administrative Board of the exchange within their jurisdiction, control all resolutions, and have to point out any illegalities that may occur with a view to their removal. They are, moreover, obliged to report to the Minister of Finance (or Trade and Commerce, as the case may be) any irregularities or illegalities that may occur in the life of the exchange, and advise as to the measures that will have to be adopted in order to ameliorate the situation.

Exchange Corporation.

If it is intended to erect an exchange in any given locality in Bulgaria, the local business men who wish to operate thereon have, in the first instance, to form themselves into an Exchange Corporation. Members of such a corporation can only be business men whose trade tax (Gewerbesteuer) amounts to at last 200 lewas, in the case of a stock exchange, per annum, and 100 lewas in the case of a commodity exchange. Companies are to be represented on the corporation by special delegates. The tax clause is the only one affecting members of a corporation—that is to say, that foreigners, for instance, are also eligible for membership. According to Article 16, only members of the exchange corporation can operate on the exchange.

Administrative Board.

Each exchange is to be administered by a Board composed of nine members—namely, two delegates of the local Chamber of Commerce of whom one is its secretary, one delegate of the brokers operating on the exchange, and six delegates of the Corporation, elected at the latter's annual meeting. The delegate of the brokers is entrusted with the duties of a syndic. The Board elects its own officers, four in number—namely, a chairman, two deputy chairmen, and a secretary. These officers form the executive, and it is their duty to see that the Board's resolutions are duly carried out.

The Board's principal duties are as follows:—

(a) It determines the date of the annual meeting (of the Corporation?) and summons it;

(b) It decides what securities or commodities can be admitted to the exchange;

(c) It arranges for the quotation of prices;

(d) It draws up the annual report of the Corporation and submits it, after it has been voted at the annual meeting, to the corresponding Governmental Minister, etc., etc.

Brokers.

Brokers who operate on an exchange are regarded as public individuals who negotiate business for a third person. They must be of Bulgarian nationality and at least twenty-seven years old, must have at least a secondary school certificate, and have had five years' business experience, etc. No secondary school certificate is required in the case of a broker on a commodity exchange. Brokers are admitted on the recommendation of the Exchange Board by a Ministerial ukase, and are expelled in the same way. The Board decides the number of brokers to be admitted. Each broker has to give a security of 10,000 lewas for operating on a stock exchange and 5,000 lewas on a commodity exchange.

Arbitration.

A Court of Arbitration has to be instituted on every exchange and it has to decide all questions arising between members in the course of their dealings; its jurisdiction is obligatory in cases where the deal has already been concluded. The court is composed of three members, a chairman and two members appointed by the litigants. It can also be composed of one member, but only in case both litigants agree to his selection. A list of members who have the exclusive right to act as arbitrators during the forthcoming year has to be passed at each annual meeting of the Corporation.

Stock Quotations.

The Board decides as to the admittance of securities to quotation on the exchange. In the case of State securities, the Minister of Finance has likewise to give his authority. All business done on the exchange is either on sight (Real) or *à terme*. The latter, whether in stocks or commodities, is legally recognised if concluded on the exchange.

The above are the principal clauses of the Bulgarian Exchange Law. We shall refer at some length to the regulations adopted for the establishment of the Sofia Stock Exchange as soon as they have been definitely approved.

(1) Owing to the war and the proclamation of the moratorium, the opening of the Stock Exchange has been postponed.

THE BULGARIAN LOAN.

Frequent questions have arisen regarding the outcome of the Bulgarian loan of 500,000,000 lewas concluded in July last with a group of Austro-German banks at whose head stood the Diskonto-Gesellschaft of Berlin. In a recent communication reprinted by the Sofia paper *Mir*, M. Tontcheff, the Minister of Finances, stated (and we have every reason to believe the report to be accurate) that:—"It is not true that we only received an advance of 5,000,000 lewas on the loan recently concluded. The fixed advance of 120,000,000 lewas was punctually paid. Of this sum 30,000,000 lewas were forwarded to the Austrian banks, and 27,000,000 lewas were left with the contracting group at the disposal of the Russian Asiatic Bank.

"Similarly it is not true that the last-named sum of 27,000,000 lewas was confiscated by the German Government. This sum could not have been confiscated, because the Diskonto-Gesellschaft is a private bank. According to correspondence which we have had with the bank in question, the whole sum remains credited to the Russian Asiatic Bank."

It will thus be seen that, after having paid bank accounts abroad to the extent of 57,000,000 lewas, the Government had a sum of 63,000,000 lewas in hand for other purposes.

No further operation in connection with the loan has since been negotiated.

COMMERCE.

Bulgaria's trade statistics, interrupted owing to the Balkan War, have now been brought up to date to the month of April, 1913, and to the month of March, 1914.

In April, 1913, the value of her imports was 12,430,056 lewas, as against 19,376,339 lewas for the same month in 1912, and the corresponding figures for the country's exports are 9,846,337 lewas and 20,902,945 lewas.

In March, 1914, the value of the imports was 25,786,747 lewas, as against 8,527,780 lewas for the same month in 1913, and 19,668,705 lewas in 1912. The corresponding figures for the country's exports are 19,964,328 lewas, 8,345,904 lewas, and 24,747,808 lewas.

Further details concerning the country's trade in March, 1914, are as follows:—

Imports.

From England to the value of 4,302,092 lewas (as against 510,359 lewas in 1913), the principal items being:—Cotton goods (2,816,146 lewas), metal and metal articles (362,373 lewas), machinery (418,461 lewas), and chemical products (260,998 lewas).

From Austria-Hungary to the value of 6,460,205 lewas (as against 2,886,829 lewas in 1913), the principal items being:—Cotton goods (2,501,399 lewas), metals and metal goods (844,593 lewas), machinery (511,863 lewas), leather and leather goods (437,058 lewas), and colonial produce (474,973 lewas).

Germany's exports to Bulgaria amounted to 5,529,458 lewas (against 2,683,663 lewas in 1913), the principal items being:—Cotton goods (1,288,800 lewas), metal and metal goods (887,546 lewas), machinery (722,384 lewas), and non-denominated articles (1,146,214 lewas).

The imports from other countries were:—From Italy, 1,773,577 lewas (of which 1,303,225 lewas represent cotton goods), as against 402,945 lewas in 1913; Belgium, 689,717 lewas, against 495,476 lewas; Turkey, 1,468,440 lewas, against 26,194 lewas; and France, 2,604,316 lewas, against 310,016 lewas.

Exports.

To England to the value of 1,164,478 lewas, as against 497,908 lewas in 1913, the principal items being:—Maize (518,224 lewas) and rye (196,488 lewas).

To Austria-Hungary to the value of 969,890 lewas, as against 902,586 lewas in 1913, the principal items being:—Eggs (322,610 lewas) and tobacco (231,208 lewas).

To Belgium to the value of 8,565,715 lewas, as against 1,941,915 lewas in 1913, the principal items being:—Wheat (5,184,656 lewas) and maize (2,363,030 lewas).

NOTES AND NEWS.

Devonshire Square,
London, E.C.

We publish to-day our second monthly supplement on Bulgaria, and readers will find the analysis of the National Bank of Bulgaria interesting from many points of view, as giving a rather concise survey of the economic situation of the country during a year of war. The trade returns for March of this year, as compared with March of last year, as well as those for April of last year as compared with April, 1912—that is to say, before the war—are most instructive, and the country's recuperation a noteworthy feature. It is gratifying to see that our trade with Bulgaria has improved. Austria and Italy, it will be observed, are our two most formidable rivals in the cotton goods trade, and more particularly is the growth of Italy's exports in this respect to be noted. She is gradually becoming our most serious cotton goods rival on the Near Eastern market, as was pointed out by our Special Correspondent in the Balkans some time ago. In Serbia, for instance, before the war, she had ousted Austria, and in satins was doing an almost exclusive trade.

***

The Admiralty notice concerning the port of Dedeagatch should, in view of the uncertainty of the Dardanelles route and in view of the normal growth of our trade with Bulgaria, be welcomed by shippers. I think it would at the present time pay a line to organise a regular service between Dedeagatch and the west of Europe, with a call at the first port on the mail route. This would greatly facilitate communications between Bulgaria and England, France, etc., at present in a most absolute state of chaos. Cargo, both outward and homeward, would be easy to get, and the line could make a permanent feature of this route, to the advantage of all concerned, including its own dividends. Needless to say, the Bulgarian authorities will do all in their power to facilitate the service, which will be a forerunner of the inevitable development of southern Bulgaria.

***

On September 28 Reuter's Agency reported from Venice that advices from Vienna stated that, "as a result of the refusal of the Canadian Pacific Railway to pay dividends to Austrian shareholders, the Government has confiscated the company's securities and moneys deposited in Vienna, in addition to their observation cars running on the Austrian railways." I have been unable to have the above report confirmed, or otherwise, at the London offices of the C.P.R. On September 30, however, Sir Thomas Shaughnessy was reported by Reuter's from Montreal as having said: "They (the Austrians) do not know whether we will pay dividends or not. They may confiscate what they like, but we will do our duty." It would seem, therefore, that it is premature to pass any further remarks, as nothing positive seems to be known regarding Austria's latest move against the C.P.R. The Austrian offices have all been closed down, and it is quite on the cards that the Government will have taken further measures against the company, but the plea of "no dividends" is too thoroughly Germanic in its naïveté to be admitted. In any case they could not expect any dividends to be paid them; and, when all is said and done, I think the Canadian Pacific can afford to laugh at a defeated Austria.

***

How German influence is being felt as far East as the Persian Gulf, is to be gathered from two letters which have reached me from a Busreh correspondent who is engaged in the shipping business. They are dated August 19 and August 27. The following extracts clearly illustrate German influence on Turkish imagination, and must be borne in mind when the final day of reckoning arrives. I quote from both letters: "The Turks' chief energies for the moment seem to be concentrated on mobilizing, and they are calling up all sorts of people to serve, and are bleeding the Christians to the extent of 43 liras per head if they want exemption. . . . They have, however, made special arrangements for any Turkish subjects employed by the Germans, and are not calling these up for service nor demanding cash. There have also been various rumours about the Turks commandeering all coal and oil here, and last Thursday, I think it was, we received official notice that they required it, but so far they have not prevented us coaling our ships, though I know they stopped some of Messrs. ——— stuff, and I believe put all their stock under seal. . . . . Last night there came reports of the declaration of war by England upon Turkey, and though this is not yet confirmed, the vessels were warned to leave Turkish waters, and they all went off down to Mahomerah, and are now going to Bushire."

***

The second letter contains the following:—"Last week the Gulf mail boat only came up to Bushire, and it has done the same this week, only we are getting a tug to go from Mahomerah to Bushire to take the mails down. The situation here is still very indefinite, and we really had no official news till last Saturday, when the Consul had a telegram stating that there was no need for a panic, but that the British ships had been ordered to withdraw from Turkish waters as a precautionary measure, on account of the pronounced pro-German bias shown by the Turks. This seems pretty plain-speaking, and I think it has sobered things down a bit here. But practically all business is suspended, and we have got all our ships that we can in the Karun."

***

Thanks to the kindness of a large Liverpool firm, I am able to reproduce the following extracts from a most interesting letter received from the firm's Constantinople correspondent. I quote:—"While exporters are doing no business because of the inability to finance purchases, and because of the senseless prohibitions of the Government, importers are likewise not buying or placing orders for the same reasons as regard finance and for two other reasons. First, the lack of shipping facilities; and second, because of the senseless requisitions of the War Office. The hackneyed business expression that "there is nothing doing," has never been more truly applied to any situation than to the present one in this country. The complete stagnation is not, however, due entirely and directly to the European War. The Turkish Government by their policy have accentuated what was bad enough, without any assistance.

***

"During the first week of August, provisions and all foodstuffs rose tremendously in price. Many foolish things were done such as buying hundreds of loaves of bread. Prices fell again almost as quickly as they rose, and although such articles as sugar, tea, candles, butter, etc., articles that are imported from abroad are higher in price than normally; all vegetables, fruit, poultry and eggs are cheaper than they usually are because the export of foodstuffs is prohibited.

***

"I have mentioned above the requisitioning orders issued by the Government. No heed seems to have been taken as to whether articles are really wanted or not, and as a result such things as ladies footwear and ladies hose have been seized. Further, all the potatoes in the market were seized; as a result no potatoes were sent in from the interior, where thousands of tons are grown every year. An English steamer with a thousand tons of maize on board was forbidden to leave for Liverpool until the maize was discharged, and this although quite 20 per cent. of last year's crop of maize is available and the new crop, which has just been harvested, is very much above the average. A direct result has been that dealers in foodstuffs, coal, and anything which might perhaps be seized, stopped the shipment or did not allow the goods to be landed, but returned them to the place they came from. The action of the War Office in requisitioning all the flour and wheat, threatened us with a shortage of flour; this was followed by a proclamation that merchants could safely bring flour into the country, it would not be seized. Merchants, however, put no faith in the proclamation, as another could be published later annuling the first one. It was not until the prefect of the city called the flour merchants together and assured them that they could rely upon the proclamation referred to, that flour was again imported from Roumania."

War on German Trade.

BOOTS AND SHOES IN THE NEAR EAST.

In continuation of our series of extracts from the bulletins issued by the Board of Trade, we give this week particulars from the same source of the openings for trade in boots and shoes (except of rubber) which present themselves in the Near East :—

The total value of boots, shoes, and slippers (except of rubber) exported from Germany in 1912 amounted to £1,281,000, from Austria in 1913 to £1,037,000, and from the United Kingdom in the same year to £4,307,000.

Of the Near Eastern countries, Roumania purchased from Germany in 1912 to the value of £23,600; and Egypt in the same year for £11,000, Austria's buyers were Serbia (£152,000), Bulgaria (£14,000), Roumania (£63,000), Turkey (£18,000), and Egypt (£40,000). The trade done by the enemy in this line in the Near East alone is enormous, being well over £300,000 in value. A great part of this trade should be acquired by us. We must not wait for the countries concerned to come to us asking us to sell; we must go and induce them to buy. As stated in the Bulletin : "The markets of South-Eastern Europe and the Levant may be regarded as a promising field for exploitation." For instance, our exports to Serbia are nil, whereas Austria's exports are over £150,000 per annum.

The following table shows our exports to the Near Eastern countries previously mentioned :—

Serbia	—
Bulgaria	£100
Roumania	£2,700
Turkey	£57,900
Egypt	£97,600

[All of which can easily be augmented. It must not be forgotten, however, that some of the Near Eastern countries (Bulgaria and Roumania, for instance) are seriously beginning to manufacture their own footgear. In Bulgaria a boot factory has been erected under American supervision that is turning out boots and shoes that are far superior to the Austrian and German article.]

The following are particulars concerning the trade in various Near Eastern markets :—

Egypt.

A French Consular Report states that high-class expensive goods are either made in Egypt itself by Italian or Greek workmen, or imported from the United Kingdom, Austria, and the United States. The United Kingdom specialises in men's handsewn boots selling at from 8s. to 9s. a pair f.o.b., including the agents' commission of 5 per cent. The styles in demand are the same as those in vogue in Europe. Ladies' high-class hand-sewn boots and shoes are obtained mainly from Vienna; they are of French or American style with Louis XV. heels, and they sell at 7s., 10s., and 12s. 6d. a pair according to quality. Good quality men's boots of American manufacture find a ready sale in spite of their high price.

A German Consular Report observes that Egyptians being naturally prone to luxury are consequently interested in smart footwear. Even the poorer classes pay considerable attention to their shoes and take a pride in having the best they can afford. There is no doubt that by careful canvassing of the market an increased trade could be done.

Smyrna.

Competition of local firms is an important factor in the trade, the shoes produced in Smyrna being of good quality and comparatively low price. Amongst other countries sharing in the trade are the United Kingdom, which provides goods selling at from 7s. to 13s. a pair. Germany sends fur-lined shoes.

Damascus.

Shoes of box calf, patent and glacé leather, mostly of American style, are imported from the United Kingdom and France. There is an increasing demand for these goods, as their shape and appearance please local buyers, while the local boot and shoe makers are at present unable to compete as regards price.

Syria.

The Special Commissioner sent out by the Board of Trade, in a recent report, writes :—"Notwithstanding the very cheap footwear made in the country, there is a sale at Beyrout, somewhat limited at present, for ready-made boots and shoes, especially in children's and women's sizes. Boys' and girls' ready-made shoes are imported from France and Austria, and find a ready sale owing to their cheapness and smart shape. A small trial which has been made by a local firm in British boots and shoes, in men's, women's, and children's sizes, has been fairly encouraging, but the shape of the British-made shoe does not meet with general favour, and it is believed that were British manufacturers disposed to make a boot to suit local tastes there would be a fair prospect of business. Shape is everything, consistent of course with moderate price, and the narrow toe, pointed kind of shoe and boot is the one most liked by the Syrian.

"Children's boots from Nos. 3 to 6 should sell at about 3s. per pair, and from Nos. 6 to 8 at not more than 4s. Men's sizes must find a sale at from 10s. 6d. to 18s. per pair, but should not be dearer. American ready-made shoes of the 'Walk-over' and 'Hanny' makes have been recently introduced. The American firms have shown considerable enterprise, and have supplied their agents with a very full range of free samples, and their agents have been given a free hand in order to push sales. Shoes and boots of brown box calf are largely worn, and there is a very good opening for a cheap white canvas shoe for summer wear."

Persia.

According to a French Consular report on the trade of Persia, French footwear is considerably dearer than that coming from Germany, Austria, or the United Kingdom.

It may be mentioned that European footwear is only worn by a minority of the population—namely, the well-to-do persons, who buy only good quality footwear of elegant appearance. They take pride in their boots and shoes, and it is a mistake to suppose that any kind of boots and shoes is good enough for the Persian market.

The following extract from the report by the Special Commissioner of the Board of Trade, published in 1904 may still be of interest :—"An increasing demand for boots and shoes (men's and women's) of European shape is noted. Walking boots appear to come chiefly from Austria, long riding boots (chakmeh) from Russia, and fancy shoes and slippers from France."

Trebizond.

The imports at Trebizond (says the "Journal" of the Chamber of Commerce) of sole leather destined for use in the manufacture of rough boots for the agricultural population increased from £6,800 in value in 1912 to £18,160 in 1913. Of the latter total Greece supplied £6,160, Egypt £4,000, Turkey in Europe £2,240, France £3,560, and Russia, Belgium, Germany, Austria-Hungary, and the United States the remainder. Leather for uppers shows a diminution in the imports, which amounted in value to £3,880 in 1913. Kid is most in demand, then patent leather, box calf and black calf.

PORT SAID AND THE WAR.

(FROM OUR OWN CORRESPONDENT.)
PORT SAID, September 23.

The Business Aspect.

The outbreak of war was received in Port Said with considerable excitement, and brought in its train the inevitable chaos and confusion in business affairs.

When the bottom drops out of the credit system, countries which are dependent to a large extent on European centres for their financial support feel the pinch as acutely as any, owing mainly to the sudden stoppage of all exchange business. On August 1 it became impossible here to negotiate the usual shipping bills on London, Paris, or Berlin; consequently, steamers whose Canal dues are paid locally could not pass through the Canal until the dues had been settled elsewhere.

Fortunately this state of affairs did not last long, and very few steamers were delayed on account of non-payment of Canal dues. In most cases arrangements were made for the payment of steamers' dues in London or Paris.

Local banks, after a short "holiday," opened their doors to their creditors, and we are now doing business through the medium of National Bank of Egypt notes and English, French, and Egyptian silver. The bank-notes were at first accepted with reluctance, but it is surprising how popular they have since become with the disappearance of gold, even amongst the natives. It is to be hoped the financial authorities will profit by the lesson of the crisis in order to impress still further upon the Egyptian mind the value and stability of a paper currency.

SITUATION IN SMYRNA.

The Acting British Consul-General at Smyrna (Mr. C. E. Heathcote-Smith) reports, under date September 7, that trade there is in a condition of complete stagnation, although this is the time when the export trade in sultanas, figs, and barley should be at its height. A general prohibition has been put by the Ottoman Government on the export of all cereals, thereby effectually stopping the export of barley, while the business of raisin and fig merchants is at a standstill owing to the absence of all banking facilities. Since the declaration of the Turkish Moratorium in August, no bank has paid out more than £10 against any deposit account, while all advances on merchandise or securities have ceased completely. Under such circumstances there has been a sudden dead stop in business, and ruin faces a large number of firms in Smyrna, who have been dismissing their employees wholesale.

It has been proposed that, in the event of Turkey not being involved in the war, the Smyrna banks should advance to sultana and fig merchants 25 per cent. to 30 per cent. cash against the value of the fruit brought to Smyrna for handling and shipment. The cash thus obtained would be used partly to satisfy the up-country grower who sold the fruit, and partly to pay the daily wages of the many thousands of hands engaged in the packing and export of the fruit. Although such financial measures are of particular importance for the sultana and fig trade, dealers in all the other Smyrna crops (cotton, cotton-seed, opium, valonea, oil, tobacco, etc.) will need more or less similar facilities if they are to carry on their normal business.

Requisitioning of goods by the military authorities in the Smyrna district has discouraged any attempt being made at present to renew orders for goods from abroad. Gold is very scarce amongst private merchants, and the local banks are hoarding the little they have.

BOARD OF TRADE BULLETINS.

The following bulletins were published during the past week :—Pins and needles; manufactures of iron or steel wire; cables, cordage, twine, nets, etc.; tin wares (including tinfoil); heavy chemicals; cast-iron goods (stoves, bolts, etc.); ornamental feathers; boilers and boilermakers' wares, and cement.

Applications for copies of any of the above or of those published in our previous lists should be addressed to the Director, Commercial Intelligence Branch, Board of Trade, 73, Basinghall Street, London, E.C.

The Cotton Crisis.

Sir Charles Macara on the Situation.

Two weeks ago we referred in these columns to Sir Charles Macara's proposal for the creation of a cotton reserve, the intention being to prevent the Lancashire market from being overwhelmed with current supplies, while, at the same time, it is hoped to effect a considerable control over the prices. Simultaneously we had to report from Egypt the curtailing by the Government of the acreage to be sown with cotton next year—the only remedy, apparently, for the abnormal state of the market as produced by the war. Since then we have received numerous letters from readers in all parts of the country who are directly interested in the cotton industry, and one and all protest loudly against the Egyptian Government's drastic action. In view of this, and in view of the fact that we are inclined to regard Sir Charles Macara's scheme as not only practicable, but indicative of the ultimate remedy to be adopted to improve the situation, we have interviewed its author both concerning the general situation and the Khedivial decree above mentioned.

The Egyptian Situation.

Regarding the latter, Sir Charles, who, it will be remembered, was prominent in advocating the British Government to guarantee the three million loan for cotton-growing in the Sudan and who has always shown great interest in the development of Egypt's cotton crop, was most positive in his condemnation. The penalising of the planter, he said, was no remedy for the situation. The International Federation of Master Cotton Spinners and Manufacturers' Association and the British Cotton Growing Association had always been advocating the increase in the area under cotton, and here was the Egyptian Government, on the advice of people hardly competent to deal practically with the question, upsetting the work of years and penalising the planter to the detriment not only of his own interests, but to those of the State, whose revenues were bound to suffer. The immediate object of this, it was stated, was to enable the present crop to be financed—a roundabout way of putting it, as the Government were now obliged to issue £5,000,000 in paper guaranteed by the British Government in order to move the crop. Instead of this, the Egyptian Government should have created a cotton reserve out of this year's crop, and thus allowed the law of supply and demand to take its natural course.

This brings us to Sir Charles Macara's reserve scheme which is creating a sensation in all circles, both here and in America, that are interested in cotton. The scheme is simplicity itself. It is nothing more or less than that the British and American Governments should jointly treat cotton as the former has treated sugar, meat, etc.—that is to say, that the price of the raw material must be guaranteed. Why this should be so is best illustrated by the following facts:—

Some Facts.

1. One-third of Great Britain's manufactured exports are cotton goods; therefore, the number of operatives, distributors, and dependents runs into bigger figures than those of any other industry.

2. Great Britain is not only responsible for the cotton-growing areas of Egypt and India, but owns 40 per cent. of the cotton machinery of the world; the United States produce five-eighths of the world's raw material and own 20 per cent. of the machinery; it is therefore these two countries which, in their own interests, will have to regulate the flow of the cotton into the market.

3. The countries at war to-day, exclusive of ourselves, take one-third of the world's cotton crop; this, admittedly, creates a surplus of the raw material on the market, and, as the present year is an exceptionally good one, the surplus is all the greater.

4. The difference in price between a 12,000,000 bale world crop and a 16,000,000 bale crop is approximately £20,000,000: in other words, the difference of ½d. per lb. in the price of the raw material makes a difference of £20,000,000 on the year's crop.

5. In the present state of the market spinners will not buy, not knowing to what depths the price of cotton may go; the result is an entire want of confidence and complete business stagnation. There is thus the gravest danger of an economic disaster in Lancashire. Moreover, if the price drops too low (as it may do), that is, below the cost of production, the planter will be ruined, because not only is he growing cotton at a loss, but because he has already borrowed on the standing crop to meet expenditure. The result will be a cessation of cotton cultivation, spelling disaster to Lancashire. Consequently, the price must not be allowed to drop below the cost of production.

Warning to Egypt.

The above are some of the interesting facts mentioned by Sir Charles Macara in conversation with our representative. Besides, he had a word of warning for Egypt that is not without its grave significance. Egypt must not think, he said, that she is indispensable; if she curtails her crop the deficiency can be made up with better American cotton, thanks to the modern system of combing in the production of fine yarns. She can get from no other crop the revenue she gets from her cotton; so that, if she does not grow it as heretofore, she stands a risk of being seriously prejudiced in the future. In a word, the Government's decision to curtail the acreage under cotton is likely to react disastrously on the country itself.

The Root of Evil.

Opposed to the curtailment of the crop is the reserve scheme. It is an alternative well worthy of consideration. If a grave crisis is to be avoided, said Sir Charles Macara, the Government must find means to control the price of cotton, to keep it at its level with but small variations year after year and thus to normalise the supply of the raw material as we regulate the flow of a river. Should they not do so, they will have to take the responsibility of the greatest depression the cotton trade has ever known. The best way to guard against this calamity and to avoid the expense of providing for millions of operatives thrown out of employment, is to come to an agreement with the Government of the United States, whereby the present extraordinary surplus can be coped with, and a reserve created on the lines advocated for years by Sir Charles Macara. As stored up cotton will last longer than the war, whatever its duration, and as people will have to clothe themselves whatever happens, the supply cannot become so great as to justify the penalising of the cultivator or the curtailing of the crop. If no such measure is taken safeguarding the interests of all the millions concerned in the cultivation of cotton and its industry, from the planter of the raw material to the consumer of the manufactured article, the responsibility, and it is a serious one, will have to rest with the Government. It is a responsibility which he, Sir Charles, would not be willing to shoulder.

The reserve scheme is neither costly nor difficult to work. It had best be organised by means of a guarantee by the State worked through the ordinary trade channels, in the same way as the Government guarantees the Bank of England, thus enabling the latter to guarantee the joint stock banks, and these in their turn their customers. It is even doubtful whether the scheme would cost the Government a penny, unless, of course, they attempted to store up the cotton on their own account, which would, however, be unnecessary. On the other hand, measures like that adopted hastily by the Egyptian Government are laughable, in view of the movement going on throughout the world to increase the area under cotton; and as for the Government of the United States guaranteeing 2¾d. per lb. to cultivators whose cost of production was nearer 4½d. per lb., it does not meet the case. The root of the evil lies deeper, and it is for the Governments of the two countries most directly concerned to eradicate it in the interests of the millions on both sides of the Atlantic who are dependent on cotton for their livelihood.

EGYPTIAN COTTON RESTRICTION.

LIVERPOOL, September 28.

To the Editor of THE NEAR EAST.

DEAR SIR,—The Egyptian Government's promulgation of a Khedivial Decree curtailing next season's cotton acreage by 40 per cent. has aroused serious criticism here and at Manchester. The impression prevails that there was no occasion for such a hurry, and that the Financial Adviser to the Egyptian Government might have been well advised to "wait and see" and consult other interests before acting on the suggestion of one section only, particularly when that section represents mostly the large speculative interest of the Alexandria market, to the exclusion of the far more important and more legitimate interests of the mill industry of Lancashire, not to mention the real interests of Egypt herself and those of the many firms engaged in handling and shipping Egypt's crop, buying, selling, warehousing, and insuring it, and who are not concerned in the speculative attractions of the problem.

However, a Khedivial Decree is not a law of eternity, and I feel convinced that when Lord Kitchener—who has his hands full at present with matters far more important and pressing to the Empire—has the time to go into the matter, and feels satisfied, in the light of subsequent developments, of the convenience of leaving the cotton acreage in Egypt in the *statu quo ante*, it will not take long to revoke the present Ukase, which has sent the bulls of the speculative fraternity into a delirium of anticipatory joy, whilst filling legitimate traders and spinners with fears for the future should these speculators, on the strength of a perhaps insufficient supply next year and the year after, buy up not only all the cotton grown this season, but as much paper contracts as they can get as well—particularly as the latter will not require any outlay of capital once the market has grounded—and then put prices up against everybody else, and subject the whole trade and industry to the worries and losses and disorganisation of business which always result from the selfish operations of a few "cornering" individuals.

It is a generally admitted axiom that to reduce the productive power of a country is tantamount to economic suicide. How much more must it tell upon a country where it is sought to curtail its staple crop, its practically only cash asset, universally appreciated and sought after? Egypt had made a good crop, somewhat damaged by insects, but nothing like the extent into which that damage had been magnified by interested parties—and may be so again—and there was every chance of the entire crop finding a market if prices had been allowed to follow the law of supply and demand. But no; fired up by the bull campaign in America, which has ended by ruining half the market, the Alexandria clique thought that by buying up the crop—in paper, of course—they could force spinners to pay a price which intrinsically it was not worth. They did not think it worth the price themselves, or otherwise they would have bought the actual cotton instead of paper contracts, or taken up the dockets when the cotton was tendered to them instead of running away from it. As a result of their ill-advised tactics, the Alexandria Bourse is in a bankrupt condition, and our spinners and manufacturers, after making tests with other growths which were offered on a much cheaper basis, and finding them quite as good for their purpose, began boycotting Egyptians, first Uppers, for which they found a cheaper substitute in Brazilians and staple Americans, and gradually even the various growths of Delta cotton, which were hopelessly beaten by Peruvian Mitafifi, long stapled Indian, East and West African, and even American Sea Island cotton.

Thus it has come about that Lancashire spinners have consumed some 160,000 bales more than last year of so-called "outside" growths, and that we are left with nearly 200,000 bales of Egyptians unsold, quite two-thirds of which would have gone into consumption and the money for it into the grower's pocket, had the law of supply and

Digitized by Google

demand not been interfered with by speculators. Had the price been allowed to go down to, say, 16 dols. in Alexandria the whole crop might have been sold and exported, and with the better methods of cultivation now practised in Egypt, thanks to the efforts of a more enlightened Government, even 14 dols. or 15 dols. would be a good price and leave a handsome profit to the grower.

If proper rotation be observed in the cultivation of cotton in Egypt, there would be no exhaustion of the soil, which is now used as an argument by the advocates of "grow no no cotton." They forget that Egypt's soil is renewed every year through the irrigation of the Nile flood, and once the growers have learnt the lesson of seed selection and renewal—because it is the deterioration of the seed, due to climatic influences, which is the real cause of the crop deterioration—and evolve new strains of suitable staple to take the place of decrepit ones, Egypt will always find a market for all it is able to grow at a price that will leave the Fellah a fair return on his capital and labour.

If the acreage be compulsorily reduced by 40 per cent. or more, I do not hesitate to say that whilst the Government would benefit speculation, and speculation *only*, it would inevitably ruin the chances of Egypt maintaining her place of importance amongst the countries which now supply Lancashire with the long-stapled cotton she requires, and everybody in the trade knows that Lancashire uses more of that than any other country.

The first effect of a curtailment in Egypt would be an increased acreage elsewhere, and if the spinner finds that other countries will be able to supply him with his quality at a price inferior to that pretended by Egypt, where people will naturally think their cotton ought to be worth so much more because they planted so much less—an argument that appeals to the Oriental mind—well, he must not be blamed for buying the other man's cotton and leaving Egyptian alone. And once spindles have been adapted to other growths, it is very difficult to revert to the old kind, with the result that even should Egypt, a sadder but wiser nation, repent of her folly and plant a full crop again, she may find her clients, or most of them, gone, and no consideration of price may bring her trade back again for a long time.

And who can guarantee that the sowing of a full acreage must needs produce a full crop, and a slump in prices? No other cotton crop is so precarious and liable to destruction by its enemies—insects and fogs—as that of Egypt. Supposing now the acreage was reduced by 40 per cent., and the crop grown from a 60 per cent. acreage cut down by another 50 per cent. through damage before it matures, would the poor grower be compensated by the advance in price which speculators would force on contracts, if consumers found that owing to cheaper supplies elsewhere they could do without Egyptian cotton altogether? It would then be too late to remedy the evil, for all who are engaged in the trade know that most of the damage to the crop occurs late in the season and is very often not found out until after it is picked and baled.

There are endless other propositions which might be adduced in condemnation of the latest Khedivial Decree, but I think the few I have mentioned, and which are the most important, ought to be sufficient to cause the Government to reconsider its decision. It is much better for Egypt to grow a crop of ten million cantars, sell it at, say, $14, and kill the competition of "outsiders," maintaining an unrivalled position, than to cut it down to perhaps five millions, market some of it at perhaps $20 or more, remain with the rest unsold and unsaleable, and lose her place and importance as a cotton-producing State.

And how will the future Government of Egypt get in its taxes and pay its way, with no cotton growing or selling? Is it possible that the Financial Adviser was not aware, when issuing his Decree, that whilst he imposes a reduction in next year's acreage of 40 per cent. and threatens severe punishment to offending growers, the British Government are paying a subsidy to the British Cotton Growing Association in order to enable it the better to extend cotton cultivation, and the propaganda in favour of it, everywhere else?

Yours faithfully,

X. X.

FINANCING THE CROP.

The Cairo correspondent of *The Times*, in a message dated October 2, says:—The Financial Adviser in a note on the financial situation issued to-day points out that Egypt, being mainly a cotton producing country, has necessarily suffered from the war, which has caused a reduction in the demand for cotton. It became evident that cultivators would be unable to dispose of their crop, and the Government took action immediately to assist them.

The preliminary suggestion of the Government to purchase the undisposable portion of the crop was found to be impracticable and financially unsound, and it was decided that the best policy was first to ascertain the proportion of the crop to be liquidated and then to render financial assistance in a measure as ordinary conditions permitted, simultaneously seeking aid from the British Government. The commission sent to England reported that spinners would probably purchase 5,000,000 cantars, which would be taken at intervals during the season, and in order to ensure the market against the balance of the crop the Government decreed on September 22 the limitation of the cotton area in 1915.

The Financial Adviser states:—"I think with this measure there is every hope that the balance of the crop will be disposed of in the second half of 1915." Since the country is bound to suffer the severest hardship in the interval, the British Government consented to guarantee up to a maximum of £5,000,000 any sum the Egyptian Government might have to borrow to meet the situation.

The Adviser dwells on the value of the British assistance, which, he says, demonstrates that the calmness of Egyptians and the widespread expression of their sympathy and friendship for England have encountered the recognition they deserve. He warns cultivators that prices are bound to be below the average, and Egypt, like other countries, must expect a loss.

He points out also that it is imperative to keep up the revenue by the prompt and regular payment of taxes, otherwise it will be impossible to meet the State's obligations abroad, whereon the country's credit depends.

In a message forwarded the next day (October 3), *The Times* correspondent says:—"With reference to the Financial Adviser's note, the Egyptian Government, with the guarantee of the British Government, will issue Treasury bonds in London to the amount of £5,000,000, part of which will be used in backing an issue of emergency currency in the form of bank-notes. The National Bank of Egypt has agreed with the Egyptian Government to issue these notes, which will be used in financing the crop through ordinary banking and commercial channels. A scheme on this basis will be in full working soon.

"Meanwhile, ordinary arrangements are being carried out in financing the crop. Arrangements have been made for the usual payment of Debt coupons falling due this month."

CROP VALUES.

The value in lewas of Bulgaria's principal crops in 1910, 1911, and 1912, were as follows (exclusive of straw in the case of cereals):—

	1910.	1911.	1912.
Wheat	200,340,454	213,154,278	225,859,928
Rye	29,795,776	28,235,340	32,918,377
Barley	35,045,259	32,238,110	41,587,743
Oats	16,788,836	16,366,420	17,554,650
Millet	1,197,735	1,433,688	1,091,114
Maize	83,759,313	87,956,413	97,637,120
Rice	2,301,241	1,489,740	1,975,924
Fruit	8,451,658	3,466,855	3,208,830
Attar of Roses	3,540,400	5,641,199	4,172,440

MANCHESTER MARKET.

MANCHESTER, October 7.

The conditions prevailing in the market during the past week have continued very disappointing. No activity has occurred in any quarter. From week to week less machinery is running in both yarn and cloth sections, and as a natural result unemployment throughout Lancashire is increasing. Some advices relating to the Egyptian cotton crop are not quite so favourable. There is some expectation of the American crop this season being of record dimensions. The business offering in piece goods for Egypt shows no improvement whatever. Mail advices are very poor. Dealers on the other side complain of the disorganised state of the market. Shippers here are not at all disposed to anticipate future requirements. The outlets of the Levant are badly reported upon, and no relief appears to be in sight. Only odd lots have been sold for India, and shipments to Calcutta are being somewhat checked owing to the fear of danger to boats as a result of the exploits of the German cruiser "Emden." Stocks in Bombay are increasing. Nothing fresh of interest has transpired with regard to China, but one or two small lines have been put through for Singapore. A little more inquiry is mentioned for Java. In the Lancashire weaving towns less machinery is running than a week or two ago. Numerous manufacturers are using up their supply of yarn, and will then stop for an indefinite period. In American yarns for home use very low rates have been taken by certain spinners. Some users of the raw material have the advantage of being able to buy cotton on a much lower range of prices than in Liverpool.

DYERS ADVANCE PRICES.

The Bradford Dyers' Association have issued to their customers a circular stating that in consequence of the serious position of the supply of dyewares and chemicals they regret they are compelled to make certain alterations in their terms, conditions, and prices. For all goods and orders received on and after October 12 to November 30, 1914, inclusive, their prices for dyeing cottons—all blacks and colours—will be advanced by 5 per cent. on prices existing on September 30, 1914; for all goods and orders received after December 1, 1914, and until further notice the prices of blacks will be increased by 10 per cent. and colours 20 per cent. on prices existing on September 30, 1914. They also ask for indulgence in the matter of delivery owing to the difficulty of maintaining regular employment at their works. They assure their customers that this advance of prices has been rendered necessary by the enormous increase in prices of their supplies.

EGYPTIAN COTTON SHIPMENTS.

Some particulars have just come to hand of the shipments of Egyptian cotton from Alexandria in the season ended August. The following table from the *Manchester Guardian* gives the amounts exported by several of the leading firms:—

	Total Shipments. Bales.	Shipments to England. Bales.
Lindemann and Co.	103,304	29,649
Choremi, Benachi and Co.	101,638	63,315
Peel and Co., Ltd.	97,094	71,765
Carver Brothers and Co., Ltd.	94,184	57,147
Pilavachi and Co., Ltd.	53,383	49,172
Frauger, G. and Co.	51,384	16,505
Planta, J. and Co.	49,516	26,275
Reinhart and Co., Ltd.	46,896	27,186
Mohr and Fenderl	46,480	12,261
Andres, F. and Co.	44,339	11,144
Bindernagel, H.	26,751	22,467
Hahnloser, P. and Co.	20,587	9,312
Riecken, G.	14,840	5,207

Near East Markets.

SPECIAL REPORTS.

(From Our Own Correspondent.)

Athens. September 28.

In view of possible difficulties in obtaining supplies of wheat and other cereals next year should hostilities be protracted, the Ministry of Agriculture has issued circulars advising the farmers to pay particular attention to the careful cultivation of as great an area as possible, and giving detailed instructions as to the best methods of securing good crops, etc. Travelling inspectors, too, will give verbal explanations and advice.

CYPRUS BARLEY AND WOOL

(From a Correspondent.)

Attention is being called to the suicidal practice of certain Cypriot merchants of mixing grit and other impurities in barley sold for exportation. So persistent has been this practice that Greek merchants in Egypt have complained bitterly of the results already experienced in that country; and to these are now added warnings from England. This abuse is, of course, condemned by the respectable merchants of Cyprus; and the Greek Press is again taking up the matter—one leading paper pointing out that "we run the risk of seeing our barley excluded from England"—it might add, from other countries. The Government is invited to deal with this evil by legislation.

Cyprus "hill barley," it should be mentioned, is of excellent quality. It is of a kind chiefly grown in the high lands of the Papho and Limassol districts. It is of high value for malting purposes. A large British firm, indeed, stated that it would be prepared to take any quantity of it that could be shipped. The cultivation of this barley might be largely and profitably extended, and it would always find a good market. Sufficient warning ought to have been given by the evil results that have followed the adulteration of so much Cyprus wine. The exceptive "plastering," i.e., addition of gypsum, which has caused the exclusion of such large quantities of wine from France, has not yet been stamped out.

Another matter that deservedly occupies attention is that of the quality of Cyprus wool. The native heads of sheep are capable of much improvement, the quantity of the wool being relatively very poor. The importation of British rams, "Lincolns" and others, on a much larger scale is urged. The interests of Cyprus as a whole call, too, for a large increase of sheep, and a corresponding decrease of goats—the destructive pest of agriculture and forest growth. The Cyprus Committee for the Improvement of Stock has already done much good for the native herds of ponies, and has dealt to some extent with cattle, pigs, poultry, etc. There is plenty of room for the expansion of its energies.

There is every reason to believe that with German competition suppressed Morocco will become a far more important customer for British manufactures than heretofore from the moment that home shipment and mercantile firms summon up courage to resume business.

ALBERT SINGER
KHARTOUM SUDAN

EXPORT OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

PRODUCE REPORT.

London, October 8.

Sugar.

There is not much alteration in the position of refined sugar, and no change in the price of English standards. The Royal Commission on the Sugar Supply stated this week that persons desirous of purchasing white sugars imported by the Commission should address themselves not to the Commission but to the brokers or wholesale dealers through whom they have been in the habit of procuring their supplies. Foreign refined, due from America, was sold at 28s., c.i.f., London.

Coffee.

The market has been quiet. There has been some business in fine Costa Rica and East India at 80s. and upwards. Smalls, of the former, also were sold at 63s., and bold at 70s. to 71s.; washed Dumont, bold, sold, 57s. 6d. to 60s. 6d.

Currants.

There is a marked activity now in the market, and trade, by all appearances, has commenced in earnest. The s.s. "Michael Andritsakis" arrived last week with about 1,400 tons. It is evident that a considerable quantity of the present crop is affected by rain; but generally the fruit seems very good and attractive at the present range of prices. Pyrgos, 24s.; Amalias, 25s.; Patras, 26s. to 26s. 6d.; Gulf, 26s. to 28s.; Vostizza, 28s. to 35s.; and Smalls, 26s. to 32s. From Liverpool, it is reported, the volume of business has been satisfactory, and the lower range of prices is causing general activity. Confectionery fruit is in very good demand, and the selection limited, especially of the better grades.

Sultanas.

Sultanas sell steadily, but buying seems to be from hand to mouth. Spot supplies of new fruit are small, and the future is very uncertain, and no authentic information can be given as to the arrival of the next shipment. Smyrna, common to medium, sells at 34s. to 40s.; good to fine, 42s. to 45s.; and choice up to 57s. 6d. From Liverpool it is reported that the demand has been somewhat disappointing. Old fruit is neglected, and shipments of new Smyrna fruit are so small that merchants ask prohibitive prices. No relief is expected until the arrival of the s.s. "Syria," due early next week, with the first general shipment. Some parcels of new Greeks, ex s.s. "Meroe," were sold readily at full prices.

Seeds.

Linseed remains dull, and tendency of prices weak. London-Calcutta, spot, is quoted 45s. 6d.; afloat, 45s. 6d.; September-October, 45s. 6d.; October-November and November-December, 45s. 9d. Bombay, October-November, 47s. Rapeseed is steady. Ferozepore, September-October, to Hull, is offered 51s., and bold Ferozepore, ditto, 53s. Cottonseed, London-Egyptian, afloat, is quoted £8, and new crop, October, £8. Bombay, spot, Hull, £6 per ton. The market for canary seed exhibits some irregularity owing to lower offers for Spanish. There has also been more arriving lately. Hungarian and Danubian haricot beans, in narrow compass, offer at 85s. to 90s. Mustard seed is firm and in better demand.

Oils.

Linseed is very quiet. Spot pipes are offered 25s. 3d.; barrels, ditto, 25s. 9d. Rape oil is steady at late rates. Cotton oil is dull and weak. Crude, spot, in pipes, 26s.; refined pale, pipes, 25s. 6d.; and barrels, sweet, 33s.

Oilcakes.

Linseed cakes.—In spite of an inactive and dull trade values generally are steady. Best London-made sell £8 12s. 6d. to £9. Cotton cakes.—A sharp advance has taken place both in spot and forward positions, and at market yesterday holders of parcels of Egyptian in warehouse ask £5 10s. to £5 12s. 6d., while £5 7s. 6d., ex ship, has been freely paid for September-October shipments.

Shipping Intelligence.

PORT SAID TRADE ROUTE.

(From Our Own Correspondent.)

Port Said, September 23.

Port Said Harbour presented a striking appearance when the German cruisers "Goeben" and "Breslau" were being "rounded up" in the Mediterranean. For six days British and French homeward-bound steamers were detained, and a large number of neutrals preferred the safety of the harbour to the unknown possibilities outside.

Ships were double-banked at the buoys, and the German ships, whose stay was apparently indefinite, were placed stern-on to the quay in the collier basin, so close together that in some cases hardly a foot separated them.

When the news came that all was clear, forty odd steamers were safely piloted out to sea in a few hours, a performance reflecting great credit on the officials of the Suez Canal Company.

THE LEVANT TRADE.

To the Editor of The Near East.

Sir,—I have read H. P. S.'s letter in The Near East respecting the suspension of the services of the Liverpool Lines to the Levant.

One cannot expect these lines to keep up a regular service with their expensive steamers, when there is little or no cargo offering, but there is doubtless sufficient traffic, both cargo and passenger, to warrant a limited service, and I think the Liverpool companies should therefore show their enterprise and patriotism by sailing, say, one steamer a month, even if at a loss. Moreover, in the absence of our German competitors there is the probability of new connections and new trades being opened.

But where, I think, the Liverpool Lines have acted most arbitrarily is in stopping their steamers en route to Constantinople at other ports, and there discharging their Constantinople cargoes. This is a great hardship to consignees, and there is no justification for this action.

During the Italian war, and again recently, the English liners have ended their voyages at Malta, Piræus, or Smyrna, and have landed at these ports their goods for Constantinople and the Black Sea, whereas the foreign liners continue to come through the Dardanelles.—Yours, etc.,

Justitia.

Constantinople, September 22, 1914.

THE DARDANELLES.

Reuter's Constantinople correspondent reported on Saturday :—

"A circular Note of the Porte to the local diplomatic missions lays down from the military point of view a limit of six nautical miles parallel to the coast as to the extent of Ottoman territorial waters in the Black Sea, the Archipelago, the Mediterranean, the Red Sea, the Sea of Oman, and the Persian Gulf, while the entire Sea of Marmora is declared territorial waters. As regards the exterior of the entrance of the Dardenelles, the Note prescribes a six-mile space comprised between a line drawn from Kum Kaleh to Seid ul Bahr (at the entrance to the Dardanelles), which is declared an absolutely prohibited zone.

"The same principle applies to the entry to the Bosphorus, viz., a line drawn from the Anatolian lighthouse to the Rumelian lighthouse. Further, the entrance to the Shatt el Arab, within a radius of six miles, and the entire river Euphrates, are declared prohibited zones. Access by day and night to all the forbidden zones is formally prohibited to warships, while merchant vessels are prohibited by night. It is believed that the above prescriptions as regards the Dardanelles are intended to facilitate the solution of the existing difficulty."

The same agency reports from Petrograd, under date October 7, that the President of the Russian Manufacturers and Merchants has had an interview with M. Sazonoff on the subject of the closing of the Dardanelles. The Minister stated that the Powers of the Triple Entente were taking steps with the object of securing the reopening of the Straits. M. Sazonoff emphasised the necessity of freeing Russian trade from German influence.

BRITISH STEAMER FOUNDERS.

Reuter reports from Batoum on October 3 that near Trebizond the Russian steamer "Princess Eugénie," of Oldenburg, perceived the steamer "Belgian King," flying the British flag, in distress. The "Belgian King" sank shortly afterwards. The "Princess Eugénie" saved the crew and 107 passengers.

CARGO FOR BULGARIAN PORTS.

The *Daily Malta Chronicle* published on September 23 the following notice, received from the Admiralty :—

"Bulgarian Government states that they would welcome any ships at Dede Agatch, with cargo for other Bulgarian ports.

"Port is free of mines, and goods consigned to Bulgaria and Constantinople can be forwarded by train.

"Ships which wish to go there should be encouraged to do so."

The Corinth Canal, says our Athens correspondent, which for some time past was partially blocked by a landslip, so that none but small coasting steamers could make use of it. will be opened up again to general traffic in the course of a few days.

Engineering Notes.

In our "Engineering Notes" last week we outlined the reasons why the Germans have gained ground in the Near East markets, to the detriment of British manufacturers. In the case of the engineering trade, as we have often pointed out, the defective system which British engineering manufacturers have been following there has been the chief factor in affording an opportunity to their German competitors to oust them from those markets. On being asked, for instance, the price of any implement or machinery, they never quote inclusive prices to enable the purchaser to know the exact cost of what he wants delivered to the nearest seaport. The quotations are, as a rule, for delivery f.o.b. Liverpool or London, and often at the manufacturer's works! The quotations include many items for extras or spare parts, and end with charges of from 5 to 7½ and often 10 per cent. on the value for packing. Such a system of quotations not only puzzles, but alarms the purchaser. The Germans, on the other hand, quote strictly inclusive prices. The present writer had an opportunity of seeing a German pro-forma invoice for machinery compared by a buyer with a similar English invoice. In vain he tried to show to that buyer that he would find a saving of 20 per cent. by choosing the English goods, as the German price included ample provision to cover any unforeseen expenses. His answer was: "I don't mind that. I want to know what it will cost me delivered here." And the German had the order.

Carelessness Regarding Delivery.

The carelessness with regard to delivering machinery at a given time is another great defect which has deflected much custom from British manufacturers, and has enabled Germany to step in and secure trade by prompt deliveries. Near Eastern buyers only decide to buy after great consideration, and when the purchase money has been provided. As a rule the order is given at the last moment which will allow a prompt delivery, and the buyer relies on the promise of the manufacturer. A delay in delivery not only tries patience but often results in serious losses. This unfortunately has often been overlooked by British manufacturers in undertaking orders for the Near East.

Travellers and Representatives.

On the very important question of proper representation, British manufacturers are surprisingly indifferent, especially in the Near East, while it is well known that the great commercial success of Germany is due, to a great extent, to the wise selection and dispatch of capable representatives who have a practical knowledge of what they are trying to sell. In the Near East a German traveller can explain to buyers all that they want to know about a machine. He understands what they require, and accordingly advises his firm what to do. Any special alterations needed to meet local wants he carefully studies and submits to his firm, which willingly carries it out. Unfortunately, representatives of British firms are seldom to be found in the Near East, and those who may happen to visit that region are, as a rule, quite incapable of competing with the versatile and qualified German experts. Is it, therefore, to be wondered that, according to official statistics, in one part alone of the Near East the machinery imports in 1911 totalled £2,342,574, of which £1,212,477, or more than half, came from Germany, £474,690 from Austria-Hungary, £324,250 from the United States, and only £211,914 from the United Kingdom?

Cyprus Roads

A correspondent writes:—The development of road communications, involving as it does the bridging of numerous torrents and gullies in so mountainous an island, is still, and will long be, one of the principal needs. A very good piece of work is now being carried out in the west of the island by the construction of a carriage road to connect the large village of Lefka with Mount Troödos. It runs through a long, steep, and very picturesque valley, following the course of a mountain torrent. High up in the valley, at the village of Kalopanagiótes, are situate mineral springs, which possess a high reputation for healing properties and are largely resorted to in cases of rheumatic and also internal ailments. This place should now increase in importance. The Great Fairs of the Kykkou and other monasteries bring vast numbers of pilgrims along this route. The road will be of great value for trade and agriculture.

A Russo-Persian Railway.

In the Russian *Government Gazette* just received it is stated that late in June a party of Russian engineers reached Enzeli for the purpose of examining the proposed railway route from Enzeli to Resht, and thence on to Kasvin. The survey is being conducted under the guidance of the engineer Yarosh. The proposed line is to serve as an extension of that already selected from the station of Alyat, which is near Baku, on to Astara and thence along the shore of the sea to Resht. The Enzeli-Resht-Kasvin route, the length being 224 versts, will follow the existing paved road crossing the high Elburz mountain range near the postal station of Kain. The projected railway from Alyat Station to Kasvin, about 600 versts long, is to connect Central Persia with Russia. There is a good paved road from Kasvin to Teheran—distance, 136 versts. The most important section is that connecting Enzeli and Kasvin, as this gives an outlet to the sea to the richest provinces of Persia—Chamse, Kasvin, and Hamadan, which will facilitate the transport of Russian goods into Persia.

New Solid Fuel Gas Engine.

The naphthalene locomotive built by the Schneider works at Le Creusot, France, is an engineering novelty of much interest. This new type of internal combustion engine depends chiefly on solid fuel—one of its two carburetters using ordinary gasoline or petrol for starting, and the other—water-jacketed, and brought into action when suitably warmed up—employing naphthalene, which is vaporized from the liquid state after having been previously melted in a reservoir. For the locomotive, the water-cooled four-cylinder mechanism yields 70 horse-power at 950 revolutions per minute. The special claims of this engine are its cheap running and its independence of coal and of water, except the small quantity required for cooling.

Head Office: RUE SOLIMAN PASHA, CAIRO, EGYPT.
Also at ALEXANDRIA and LONDON.

S.S. "KAISAR-I-HIND."

A New P. and O. Mail Steamer.

The P. and O. Company's new steamer "Kaisar-i-Hind" ("Emperor of India"), so named in commemoration of the visit of their Majesties the King and Queen to India in connection with the Imperial Durbar of 1911-12 (at which time the vessel was projected) has arrived in Tilbury Dock. She has been constructed at the yard of Messrs. Caird and Co., of Greenock, is of 11,430 tons gross register, with a length of 520 ft., breadth 61 ft., depth amidships 38.3 ft., and is driven by two sets of quadruple expansion reciprocating engines developing 16,000 h.p. While she embodies the general design of recent steamers of the "M" class, her internal planning presents a further development of this favourite type among P. and O. steamers, and, being intended more especially for the company's mail and passenger services between London, Marseilles, and Bombay, all her arrangements are made to meet that particular trade.

In the first saloon cabins upper berths are almost entirely absent; most of the cabins contain only two berths, and there are, besides, numerous single-berth cabins. A large majority of the cabins are furnished with cot bedsteads, wardrobes, writing tables, etc., and for each bed throughout the ship there is provided a portable reading lamp; the free provision, also, of an electric ventilating fan in each cabin will be appreciated. The passenger cabins include *en suite* accommodation in the shape of cabins *de luxe* and bedrooms with bathroom attached. Water is laid on to all cabin lavatory basins throughout the ship. Altogether there is accommodation on five decks for 315 first and 233 second saloon passengers.

The sixth and uppermost deck—the boat deck—will, while intended for general use, be of especial value to passengers as an observation deck. Beneath the boat deck sheltered promenade wing decks, flanking the music saloon and a double range of cabins, extend throughout the midship length of the vessel. On this level also is situated the first-class smoking saloon, a handsomely designed apartment with a glass domed roof, including among its comfortable appointments lounge seats, card-tables, electric punkahs, etc., while at the after end access is had to an open-air verandah. Abaft the after well this deck is continued as an awning covered promenade poop-deck of considerable area for the enjoyment of second-saloon passengers.

The first dining saloon is situated forward of the midship section on the upper deck, with a seating capacity for some 300 passengers, and, like the second dining saloon, extends throughout the width of the ship. This saloon, in common with the ship's other public apartments, has been constructed internally from the designs of Mr. T. E. Collcutt, with mural decorations and empanelled frescoes by Professor Moira; it is approached from the decks above and below by a handsome companion staircase, and is lighted from the sides by twenty-two large circular portholes, and from above by an oval well, which rises through the music saloon and is continued to the promenade deck, where it terminates in a large stained-glass dome in the ends and sides of which Professor Moira's pictures are placed. The music saloon is extensive and lofty; the rich but quiet tones of its furniture and carpets and its recessed writing tables give it an air of repose; while at the after end, next the companion communicating with other decks, are the cabinets containing the ship's library.

The "Kaisar-i-Hind" has an electric laundry capable of dealing, *en voyage*, with passengers' needs in the matter of fresh linen, and is fitted with a powerful installation of wireless telegraphy on the Marconi system in charge of skilled operators. At the disposal of the purser's department is a modern refrigerator plant with considerable storage capacity ensuring an ample supply and variety of fresh table provisions during the voyage. The first and second saloon galleys are, moreover, fitted with up-to-date electrical devices as adjuncts to the services of the culinary staff. The new vessel will be despatched on her maiden voyage on the 24th inst., when she is to leave Tilbury Dock, with Bombay as her destination.

IONIAN BANK'S NEW PREMISES.

(From Our Own Correspondent.)

Athens, September 28, 1914

The Ionian Bank was installed in its new premises last Monday. The new building is nearer than the old one to the business centres and Stock Exchange, and is fully up-to-date in every respect.

With the exception of the National and the "Popular" Banks, this is the only one which has not taken advantage of the moratorium.

GERMANY AND GREECE.

(From Our Own Correspondent.)

Athens, September 28.

In consequence of the large increase of orders secured by British, Italian, and American firms since the outbreak of hostilities, to the great detriment of German trade, the German Legation informs the public that 60 per cent. of any orders given to German firms can be executed as usual and shipped viâ Trieste and Venice.

NEWS FROM ALL SOURCES.

A corn exchange has been opened at Lule-Bourgas.

"White Horse" whisky has been awarded a gold medal at the Anglo-American Exposition recently held in London.

Over 200 of the staff of Messrs. W. and T. Avery, of Birmingham, have joined the Colours.

The new sorting hall and *poste restante* constructed behind the Cairo General Post Office has been opened.

A commercial agency has been established in London with the object of promoting the sale of British manufactures in the rapidly increasing markets of Morocco.

The German passenger steamer "General," which took refuge at the Golden Horn a month ago, has changed her flag, and now flies the Ottoman Star and Crescent.—*Orient.*

At a Court of Directors held on Thursday Mr. Vivian Hugh Smith, of Messrs. Morgan, Grenfell and Co., was appointed Governor of the Corporation, in place of the late Sir Nevile Lubbock.

One hundred and seventeen ships arrived at Alexandria during August and disembarked 8,831 passengers. Fifty-three of these ships were British, twenty-four Greek, and nineteen Italian. Other nationalities show very small figures.

Owing to the extraordinary difficulty of procuring a sufficiency of army boots, the Greek Government has issued a notice (says our Athens correspondent) that in case of mobilization all reservists presenting themselves with a pair of new boots will be indemnified at the rate of 15 frs. per pair.

In discussing trade there is no avoiding figures, and statistics are indispensable to show to what sum German and Austrian exports have recently amounted. The round total of the various products of manufacture was £480,000,000 for 1912; or £337,000,000 in fully manufactured goods, 84 per cent. of it belonging to Germany. Such a trade is in itself an empire. . . . In face of these particulars who will belittle the prospects of obtaining a greater accession of business than any that we have known? The very splinters of such an edifice are gigantic, says in *Mercantile Guardian.*

BANK OF ATHENS

(INCORPORATED IN GREECE.)

THE POSITION IN THE CITY.

(By Our City Editor.)

Re-opening the Stock Exchange.

The general feeling is that the Stock Exchange will re-open early in November. The Committee have issued a long series of new rules which are preliminary to such re-opening. In future no member can hammer himself, neither can he be hammered. When he finds himself unable to meet his liabilities he must go to the Committee, who will take the matter in hand. Of course, no one knows how this will work out in practice. The clients appear to be very reasonably protected, but here again we are in the dark as to the practical effect of the rules. One thing is satisfactory, that is that no firm can today hammer itself. It would have been scandalous if half-a-dozen big firms had been allowed to shift the whole of their liabilities upon the backs of smaller firms. It would have meant the collapse of the Stock Exchange. For those big firms would have had no choice but to hammer themselves as soon as the House reopened. That has now been avoided.

"Make Believe."

As for the fixed price in the Yankee market that, like the similar rule in the gilt-edged market, was only made to safeguard the moneylenders and others with loans outstanding at the banks. No bank can now close up a loan as it will be unable to sell the collateral. It is not allowed to sell under the fixed price rule. No cover can run off and no rate be forced. Naturally, the effect is temporary, for sooner or later the Stock Exchange must pay off the banks. The idea of "make believe" is quite childish, and I am sorry to say is spreading into other departments such as the Press Bureau and the daily papers.

Fixed Prices.

I do not object so much to fixed prices in gilt-edged stocks, because here the dealings are few and far between, and the present quotation more or less tallies with the price of money. But fixed prices in such gambling counters as Eries, Utah, Steels, Anaconda, is childish. It means the complete stoppage of all business as long as the rule exists.

Short-dated Bills.

The Government continue to borrow on short-dated Bills. But the last issue of Exchequer Bills was much more coldly received, and clearly the Chancellor will have to issue a War Loan. He should have done this when the war began and people hot upon the support of the country. He has in a way chloroformed the investor by the Press censorship, the closing of the House, and the absence of all genuine news. A War Loan must be made. The cost of the Army is enormous, and the Navy is also very expensive, and we cannot go on finding money in short-dated Bills. Such Bills must be met one day, and this may mean a strain upon our resources just when we least expect it.

Armament Shares.

There continues a fair business in all armament shares. Kynochs and their subsidiary in Arklow are full of orders. The Birmingham Small Arms is working day and night; Cammell Laird, Vickers and Armstrong, are hard at work now; in all those companies large profits are now being made. A cheap share is the New Explosives, which has now got out of trouble and is busy in contracts. It should rise during the next few months.

Egypt's Cotton.

The arrangements in regard to the cotton crop are pretty much as we forecasted in The Near East many weeks ago. The crop will be paid for in paper, and the National Bank will be helped by a loan, which, however, will not be offered to the public. The fellaheen will take paper-money when they find that they can get nothing else. We must not forget that the native in India has long been used to paper-money. But in the present case it is "Hobson's choice." It is clearly impossible to ship gold to Egypt, and no other country is at all likely to send any gold or take charge of the crop. Therefore, the fellaheen must make the best of what they can get.

Company Notes.

The Mexican Light and Power and Mexican Trams' reports came to hand after many months' delay. As all dividends have been stopped the figures, though showing steady returns, are not of much use to the investor.

Harrisons and Crosfield's report shows increased profits, but these profits are obtained by disregarding the depreciation of over £50,000 in the securities. Anyone can make profits in this way. The company is in need of funds, and will issue fresh capital.

Dick, Kerr and Co. also ask for more money, and wish the preference shareholders to forego their claims in favour of a debenture issue.

Seaport Selangor once again pays 6 per cent., having made a profit about equal to their dividend. But as the company has ample funds in hand the board may be pardoned.

EGYPTIAN STATE ACCOUNTS.

(From Our Own Correspondent.)

Cairo, September 22.

The returns of the State accounts for the first four months of the financial year—i.e., April to July—just issued, are very favourable. The revenue amounted to £E5,358,741 and the expenditure to £E6,380,075, as against £E5,019,052 and £E6,475,955 respectively for the same period of 1913.

It is to be noted that although the revenue shows an increase of £E339,689, it now includes items such as sale of land (£E69,456), and other receipts (£E97,993), that were under the old *régime* passed direct to the Reserve Fund. On the other hand, the expenditure includes outlay on new works, that have always been debited to the Reserve Fund. That outlay during the four corresponding months of 1913 (financial year) came to £E715,149. So altogether the accounts show a very marked improvement.

The chief increases in revenue were:—Customs (£E68,752), Tobacco Dues (£E79,351), Ports and Lights Dues (£E13,924), Railways (£E35,776), Post Office (£E19,742), Sale of Land (£E42,265), and other receipts (£E110,864). Native Tribunals, Telegraphs, and Rents show slight decreases, whilst Land Tax has fallen off by £E62,404.

It must be borne in mind that the four months under review cover the period just preceding the outbreak of hostilities in Europe. The next return will be of greater interest, since it will give some indication of how the crisis is affecting the country, though the true test will not come until October and November.

NATIONAL BANK OF ROUMANIA.

COMPANY RESULTS, &c.

Agricultural Bank of Egypt.—The National Bank of Egypt notifies that Coupon No. 20 of the Agricultural Bank of Egypt Three and a-Half per Cent. bonds will be paid at their offices in Cairo, Alexandria, and London.

Anglo-Roumanian Petroleum.—Production of crude oil for the month of September, 722 tons. Office note.—It is expected that baling and pumping wells will be restarted shortly.

Bulgarian Five Per Cent. Gold Loan of 1902.—The numbers are announced of 845 bonds which have been drawn for repayment at par on September 14 at the Imperial Ottoman Bank, or Messrs. Stern Brothers.

Egyptian Delta Light Railways.—Receipts for the ten days ended September 10 amounted to £E3,923, as against £E5,477 for the corresponding period of 1913.

Egyptian Markets (week ended September 24).—Cattle markets, £298; decrease, £171. General markets, £348; increase, £56. Total, £646; decrease, £115. Total from commencement of year, £35,492; decrease, £1,669.

Greek Four per Cent. Rentes, 1889, and Greek Five per Cent. Funding Loan.—Messrs. C. J. Hambro and Son, having now received remittances from Athens for the service of the above announce that they are prepared to pay coupons due on October 1. Tickets for coupons already lodged should now be presented at their office.

Khedivial Mail Steamship.—The directors state that the dividend due September 30 on the preference shares has been postponed.

Ottoman 4 per Cent. Loan on the Egyptian Tribute.—The half-yearly coupons for interest due 10th inst. will be paid on and after that date at the banking house of Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street.

Ottoman Railway.—Receipts for the week ended October 3 amounted to £8,785 as against £13,377 for the corresponding period of last year.

Roumanian Loan Coupon.—With regard to the service of the Roumanian Government 4½ per cent. gold loan of 1913, Messrs. J. Henry Schröder and Company announce that, according to cabled advice received by the Roumanian Minister in London, the necessary funds for the payment of the coupon and drawn bonds due on October 1 were duly remitted by the Roumanian Government on the 19th ult., but have been delayed in transmission owing to the prevailing condition of the postal service.

Sudan Goldfield.—September return, 1,203 ozs.

Suez Canal.—Traffic receipts for the 5th inst. amounted to 830,000 frs., and for the 6th inst. to 350,000 frs., against 330,000 frs. and 470,000 frs. respectively last year.

Traian Roumanian.—Cable from Campina, dated October 2:—"Resumed bailing Baicoi. Expect resume other places soon."

NOTES OF THE WEEK.

The death of King Carol of Roumania has closed a long and most important chapter in the history of that kingdom. Since the day that he arrived, a disguised wanderer in an unknown and almost unheard-of wilderness, he never ceased to labour for the uplifting and improvement of his adopted country. He found a couple of half-ruined Principalities, the playthings of foreign diplomacy, trampled under generations of invasion and warfare, flayed for uncounted years by Phanariots. He built up a powerful, united, and important State, the wealth and military strength of which have caused it to be courted by combinations of Powers, and have earned for it the position of the "Gendarme of Europe." Happy in the moment of his death, the aged monarch was still the master of his kingdom, his policy was still pursued, his orders were obeyed, his kingdom was still at peace. A great figure has passed from the European stage, and has left but the great memory which will ever be associated with the name of King Carol the Founder.

The new King Ferdinand at the moment of his accession finds Roumania at the parting of the ways. Among his subjects there are those who look towards the lost province of Bessarabia, and aspire to the conquest of the area inhabited by their kinsmen under Russian rule, aspirations which are consonant with what is plainly the dynastic policy of a Hohenzollern king. There are, however, also many others who look rather towards Transylvania, where larger numbers of Roumanes live under less favourable conditions than those enjoyed by their cousins in Russia. In the pursuit of the former policy a King of Roumania would expose his kingdom to the hostility of its Slav neighbours, who are so numerous and envelop it so largely. To uphold the second alternative by force of arms would, in the opinion of many, only be to isolate Roumania still more in an encircling sea of Slavs—friendly Slavs, no doubt, and grateful for assistance rendered, but still Slavs conscious of their racial strength, and perhaps eager to absorb the last ethnic barrier which lay between the geographical continuity of the Slavs of the north with their brothers of the south. There is a third path—that of neutrality. But for a State circumstanced as is Roumania to-day neutrality leads but to a diplomatic *cul-de-sac*. Roumania will preserve her territorial integrity and can pursue her peaceful development so far as the disturbance of finance and commerce in neighbouring States will permit. But if the Teutonic Powers win they will treat with scant courtesy a potential ally whose sword was never drawn on their behalf, and Roumania will become a second Saxony. Should the other neighbour prove victorious Roumania would have to face a future of isolation in a Slavonic sea without the benefit of territorial aggrandisement and without that measure of respect and friendship which her neighbours undoubtedly accord to a race which proves itself upon the battlefield.

Such, then, are the courses which lie before King Ferdinand. In Mr. Bratiano the new King has an experienced adviser, and if his own ties of blood draw him in one direction the innumerable European relationships of his Queen, who was born a British Princess, undoubtedly must influence her in the opposite direction. Such being the case, the temptation to remain neutral will be strong, and if King Ferdinand has to lead his troops into action, whether it be into Transylvania or into Bessarabia, we may rest assured that his decision will be based less on personal predilections than on the considered advice of Ministers. With King Carol the Founder a policy might have been affected by the Sovereign's family connections. In the case of King Ferdinand and in the future a policy can only be Roumanian.

The events of the past week in the north-western theatre of war are calculated singularly to impress casual observers. Not only has Antwerp, for years esteemed an impregnable fortress, been taken by the Germans, but a British expedition sent expressly to assist in its defence has failed to prevent its fall, or even appreciably to prolong its resistance. The Germans have won a resounding victory. The casual observers will fail to realise that the victory is, to a certain extent, hollow in that the neutrality of the Scheldt is for the present an effective bar to the use of Antwerp by the Germans for purposes of offence. It may be argued that in the present year of grace neutrality, at best a paper bulwark, is of no great efficacy against a German army. That is certainly true, but, on the other hand, we understand that the Dutch are fully prepared to take the field in defence of their neutrality, which is directly connected with that of the Scheldt. It is possible that Germany may decide that it is not worth while to wage a war with the Netherlands in order to be able to make use of Antwerp as a port of arms against Great Britain.

Digitized by Google

As the immediate result of the loss of Antwerp the Kingdom of Belgium as a distinct and independent political unit has ceased to exist. Its sovereign is an exile, its Government has had to find shelter in a foreign land. Courtesy and sympathy, as well as heart-felt admiration for our gallant but unfortunate allies, make it difficult for us to realise the pitiable plight in which Belgium now finds itself. At best, a few square miles of its territory still escape the occupation of the Teutonic invader. Such a triumph readily lends itself for purposes of glorification of German prowess, and in the hands of the energetic emissaries of Berlin who infest Constantinople and other neutral capitals, the fall of Antwerp, and the conquest of Belgium will be most useful weapons against the Powers of the Triple Entente.

In France there appears to have been very little change to chronicle. For the greater part of the distance between the Belgian frontier and that of Alsace, along the whole of which there are almost continuous trenches, it seems that a kind of military stalemate has been reached. There are, however, indications that vigorous action is to be expected at the extreme left of this immense line which may lead to a pronounced change in the geography of the campaign in France.

The German invasion of Poland, in which it is supposed that no less than twenty-eight army corps are engaged, appears to have reached the line of the Vistula between Iwangorod and Sandomir. Warsaw itself is still some twenty miles or more removed from the firing line, and the prospects of a German advance along the right bank of the great river from Thorn through Plock towards the Polish capital are not encouraging to the Teutons, who have failed to expel the Russians from East Prussia and their positions at Mlawa and to the south of it. The recent adventures of the German Army during its hopeless attempts to cross the Niemen and its hapless retreat by way of Augustowo cannot have inspired it with any great confidence in its new task of forcing the passage of a much wider river in the teeth of the opposition of vastly greater forces.

In Galicia the Russians hold the Uzhok Pass, a great gateway into Hungary on the north, and continue to besiege Przemysl, several of the forts of which they claim to have reduced. An attempt on the part of the Kaiserlichs to relieve the place appears to have been repulsed at a point some twenty-five miles to the west. News of the Russian advance into Transylvania is wholly lacking, but, indirectly, it may be assumed to be making favourable progress, as the politicians of Budapest are reported to be now convinced that Transylvania should be autonomous. This death-bed repentance finds a parallel in the Constitution hastily granted by the unfortunate King Francis II. of the Two Sicilies under pressure of the invasion of Garibaldi and The Thousand who deposed him a few days later.

On the Drina the silence which reigns, so far as the outside world is concerned, appears to be that of exhaustion. Montenegrin raiding parties are reported to be in the neighbourhood of Serajevo, but their presence hardly seems to perturb the Kaiserlichs, who are arranging for the opening of the State trial of the men accused of complicity in the assassination plot which led to the death of the Archduke Franz Ferdinand and the Duchess of Hohenberg. French guns are now believed to be in position on the Lovtchen Mountain which dominates Cattaro, and a naval demonstration before Ragusa induced the Austrian authorities hurriedly to withdraw. Apart from these incidents there is little to record about the progress of the war in Bosnia and the Adriatic; the Kaiserlichs, however, have announced their intention of prosecuting it more vigorously in the near future, and doubtless the Serbian Army will be quite ready to resume operations by that time.

The position of Bulgaria at present is curious. Supporters of the policy of reconstructing the Balkan Alliance are anxious to secure her adhesion, and fully realize that such a step on her part must be paid for. But those of her neighbours who would profit from her co-operation are unwilling to contemplate the price to be paid, which must necessarily be territorial. Yet if the re-settlement of Europe be conducted on ethnic lines, as seems desirable, a certain territorial readjustment in favour of Bulgaria is inevitable. Apparently it is a dread of this impending rectification of frontier at their expense which leads the public organs of certain countries to attack Bulgaria for her present behaviour—in the hope, perhaps, that if she can be proved, by repeated accusation, of having been a danger to the Triple Entente during the war, she may be disqualified from benefiting in any way at the general peace. The method pursued is clumsy. The Government of Sofia has been pressed by the Powers of the Triple Entente to remain neutral. It is attacked in certain quarters for having acted upon that advice and maintained a strict neutrality when requested to forward munitions of war sent from one belligerent State to another. It is attacked in the same quarters for having permitted the passage of munitions of war destined for a neutral State, and is even blamed for having allowed the subjects of one friendly State to cross its territory on their way to that of another friendly State. There have been besides a number of accusations levelled against Bulgaria which are wholly unfounded in fact—some of them being even ridiculous. Yet they are gravely issued from official sources and as gravely printed in certain journals.

From various items of information to hand it appears that the Germans have almost succeeded in starting the Ottoman Empire on its final career down the slippery slope leading to destruction. As directed from Berlin the Porte seems merely to be manœuvring for position—it is anxious to be able to pose as the victim of aggression, and has made several efforts to tempt the patience of the enemies of Germany. Their patience is, however, as robust as that exhibited by St. Anthony of old, and does not give way under constant provocation. Turkey has been thrust into a curious diplomatic limbo of its own. No Power is at war with the Porte, but, if one may judge from certain acts on the part of supposedly responsible officials, the Porte cannot be said to be at peace with all the world. The situation is remarkable, and does not seem likely to last very long. If no one can be found to play the part of an aggressor in declaring war on Turkey, it is probable that the Sultan will be called upon to unsheath the scimitar of Osman against the foes—not of his house or of his Empire—but of his insidious German friends.

Not content with playing the Porte, the Germans, who, as have been repeatedly pointed out in THE NEAR EAST, have endeavoured to arouse Islam from Tangier to Teheran against Great Britain, France, and Italy, are now believed to be intriguing with Christian Abyssinia against its three neighbours. Such a policy can hardly fail to irritate the Italians, whose memories of Adowa have scarcely faded. The Venice correspondent of *The Times* is inclined to think that enthusiasm in Italy for a war against the Tedesco is abating, but it may revive if Berlin seeks to precipitate the legions of the new Negus upon Eritrea.

From Urumiyah comes a report, refreshingly reminiscent of those far-distant days before the war, that Kurds have attacked the Cossack escort of the Russian Vice-Consul. There would be nothing strange in such an adventure were it not that the Kurds in question came from over the Turkish border, and are believed locally to have been instigated by Ottoman officers.

Turkish nonchalance in matters sanitary is traditional, and sad experience has made it difficult to look for any improvement. It is, however, most unfortunate that the Porte should have chosen the Derkos Lake drainage area for an exhibition of its notorious incompetence in this direction. The Constantinople correspondent of *The Times* reports that an epidemic of typhoid is now raging in the capital owing to the fact that the Ottoman military authorities have seen fit to quarter diseased

Digitized by Google

troops in the area whence Constantinople draws its water supply.

In such circumstances the moment hardly appears to be well chosen for the supersession of the International Sanitary Commission by a locally appointed and purely Ottoman body. The functions of the former board did not embrace an oversight of the water supply of Constantinople, but the moral effect of the change at this time is not good. Still, there is little to be said in praise of the Sanitary Commission, and if it lies in the power of the Porte summarily to dissolve it in this way it will pass into history unhonoured and unsung.

The triumph of Essad Pasha Toptan in Albania, won by methods mediæval in conception and almost Teutonic in execution, is a triumph also of Italian influence. In the days that are past Italy and Austria both wooed the all-powerful Minister of War—Italian blandishments were the more successful, so the then Mpret was inspired to exile his formidable servant. The Austro-Catholic party, momentarily victorious, collapsed with the dynasty which it had supported, and, for the purposes of the plot, the Young Turks and the Italians for a few weeks saw eye to eye in matters Albanian. This was not really surprising: the Young Turks and the Epirotes had combined before. Now, however, Italy is shaking her finger at the former allies of her Moslem friends, and the latter have turned and rent their Orthodox supporters. Prenk Pasha Bib Doda is reported to have bowed before the storm, and has recognized the new Grand Vizier. Thus the Catholic party, deprived of Austrian support, has made its peace with the rising sun, and the Nationalists, who hoped to be Albanian, rather than Moslem, Catholic or Orthodox, have had to retire into exile. Essad Pasha Toptan is believed to enjoy the countenance of the authorities in Nish, so perhaps the situation will be improved along the Serbo-Albanian frontier. Whether the situation in the Principality itself will be ameliorated is still open to question, as is also the nature of the future relations between Burhan-ed-Din Mpret and his Grand Vizier.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, September 30.

Enver Pasha's Activities.

Recent events have by no means improved a situation which was bound to remain unsatisfactory so long as the German officers and crews of the "Goeben" and "Breslau," despite official assurances, remained in Turkish service. The advent of more German fighting men has been followed by the dispatch of officers to the provinces. Limann Pasha is now at the closed Dardanelles superintending the installation of two of the famous 42 c/m. Krupp mortars, and sundry other less formidable but quite modern pieces. But mere armaments are of less importance than are the movements of Turkish ships and regiments. At the end of last week the British Ambassador made strong representations to the Porte concerning the menacing concentration of Turkish forces estimated at 25,000 men, with, in addition, 6,000 Bedouin auxiliaries at and around Gaza, within striking distance of El Arish. A smaller concentration is also reported from Akaba, whither Germans have been sent with the dynamite brought from the requisitioned s.s. "Peter Rickmers." As any such concentration must have the effect of causing us to detain in Egypt troops which will be required for the primary theatre of war in Europe, the Ambassador's protests were necessary. The Porte seems really to have been kept in ignorance of all this by the Minister of War and his Germans. One of the leading officers on the frontier is Mumtaz Bey, Enver Pasha's Aide-de-camp in Cyrenaica, and it is supposed that he was mainly responsible for the propaganda now being spread among the nomads on the Egyptian border.

The Dardanelles Question.

Meanwhile, the Porte had been repeatedly warned that any warship flying the Ottoman flag which attempted to leave the Dardanelles would be stopped by the Allied fleets unless the German staff and crews left Turkish service. Nevertheless, a torpedo boat went out last Sunday, and was stopped and sent back. Thereupon General Weber, who is in command at the Dardanelles, closed the Straits by laying mines across the navigable channel that still remained open. This measure, undertaken it would appear on the initiative of the German officer in question, was confirmed by the Government, which issued a communiqué wherein it was explained that the belligerent British and French fleets off the Dardanelles having stopped and searched merchantmen, and thus caused prejudice to the use of the Dardanelles as a commercial thoroughfare, the Government had closed the Straits, which would remain closed till the departure of the said fleets. Having thus cut off its nose to spite its face, the Porte is now said to be contemplating the communication of a note to the Powers, offering to open the Straits if the British and French fleets retire to Tenedos. Knowing what we do of German mine-laying tactics, it is not to be supposed that the British and French Governments will agree to this unless it obtains very solid guarantees concerning the German contingent now in Turkey!

Work of the Press Bureau.

Meanwhile, the papers are making much capital out of what Russians say is a purely imaginary success scored over Russian frontier guards in the Caucasus by a Persian band of the Somai tribe. There are those who say that the Somai tribe is of Stambuli and Kurd origin, and that its chiefs are the notorious O—— N—— Bey, M.P. for A——, C.U.P., etc., etc., and the Daghestanli Emir Hashmet, long an exile here and a friend of many Russian revolutionaries. The zeal wherewith the Press Bureau has urged the local Press to publish these great tidings is singular indeed. Complaints of England's "odious tyranny" in Egypt, and of the manner in which the Allies are now "trying to force war" upon innocent Turkey, are filling the columns of certain newspapers; and altogether it would seem that the military chiefs are doing what they can to force the Entente Powers to attack Turkey in self-defence. As for Balkan affairs, though articles concerning lost Salonika and its Turcophile Jews continue to be published, and though the Press, as ever, gives excellent advice—from the Turkish point of view—to all the Balkan States, there is not quite the same enthusiasm as was formerly the case. Turkey, instead of preparing an offensive to the North, seems now to be taking a more defensive attitude.

Expiry of the Capitulations.

To-morrow the Capitulations expire, and we come under Turkish law, a prospect which none of us look forward to with any enthusiasm at all, and which is the more gloomy in that at present the military seem to be able to do absolutely what they please, whatever the civil authorities may have to say. When will some manager of the Levantine Folies Diplomatiques arise from the box in which he has long dozed, and shout "Off stage, and quick about it!" to the uniformed comedians who have been trying our patience for the last two months?

ROUMANIAN LETTER.

(From Our Own Correspondent.)

Bucharest, September 21.

German Representatives.

The sudden recall of Dr. von Waldthausen, the German Minister to the Roumanian Court, has caused general astonishment and not a little comment. Dr. Waldthausen came here under specially favourable auspices, bearing indeed an autograph letter of introduction from the Kaiser to King Carol. The sudden removal of the German Legation from Sinaia to Bucharest did not cause much remark; for, although the Austrian and German Legations are usually the first to move to the summer quarters each year and the last to return, this year several foreign missions, notably the French and British, did not go to Sinaia at all, while others remained there for but a limited period. But the sudden departure of the German Minister two days after the return of the members of the Legation made people commence to put two and two together, especially when within twenty-four hours his predecessor arrived, "to take charge," it is said, though it is well known that M. Waldthausen will never return to Bucharest.

The reasons for this sudden recall are variously given. On the one hand, it is said that his Excellency objected to doing "dirty work," such as handing to the Press here the fantastic news daily supplied from Berlin; on the other hand, it is openly stated that the King himself requested the Kaiser to recall his representative, who did not hesitate to spread broadcast among his acquaintances the most private statements of his Majesty. And this at a moment when the latter's position has been for some time distinctly a difficult one. According to one of the Sunday papers, what brought matters to a climax was a peculiarly gross breach of confidence on the part of the Ambassador. At one of the very private audiences which he has lately accorded to the Minister, His Majesty declared that "nothing was more disagreeable to him just now than having to receive the representatives of those countries which are at enmity with Germany." And this the indiscreet diplomatist is reported to have lost no time in reporting right and left.

Be that as it may, his substitute, Herr von Busch, has presented his credentials, and has lost no time in taking up a typically German, that is to say, bullying, attitude towards this country. Only two days after his arrival he informed a certain Court functionary that in the event of a Roumanian army entering Transylvania it would certainly meet a German army there, and that not a man of it would return to Roumania!

The War Feeling.

The position at the present time is a very curious one. The army is concentrated and ready for action: half a million men under arms. It and the public generally are clamouring for a declaration of war on Austria and an advance into Transylvania, and this is the wish of the entire Opposition and of a goodly part of the Government as well. On the other side are the King and a very few supporters bent on a continuance of strict neutrality.

Many demonstrations have been made in favour of a bold policy. It is generally known that Russia is ready to guarantee Roumania in the event of her occupying Transylvania (in which case it is held by many people that France and England will also back her effectively). Bulgaria, too, has during the past few days given positive assurances of her strict neutrality. And it is hard, therefore, to see why the country does not move.

Public and Press are somewhat free in their criticisms of the King's conduct. But his Majesty keeps to his bed and refuses all audiences.

Anti-Austrian Feeling.

The extraordinary enthusiasm which anything French or British calls forth is worthy of note. Russia seems to be a somewhat poor third in the matter of popularity. As to all things Austrian and German, they are hated with an intense hatred, and very soon if things go on as they are now it will be dangerous to speak German anywhere in public. The passing through Roumania of ammunition for Austria and of German sailors and officers for Turkey has called forth a veritable storm of indignation in the Press, and the question whether or not this is an infringement of neutrality is freely discussed. Equally so is the fact that German and Austrian agents are buying wheat and other cereals in large quantities in this country, and exporting their purchases by means of German and Austrian trucks sent into the country for the purpose. Roumania is in a position to supply large quantities of foodstuffs. For though this year's crop is slightly below the average, it is more than sufficient to supply the country's wants, and owing to the Balkan Wars having practically put a stop to all trade from the Danube last year, the former season's crops remain ready for exportation. Germany is said to have offered 2,000 covered railway trucks for the transport of grain (i.e., 20,000 tons) from Roumania. To-day, however, comes the news that a number of trucks ready loaded with wheat for sending abroad have been refused by the Roumanian railways; and the Director-General of Railways now announces that all trucks with grain destined for Germany and Austria viâ the Predeal frontier are to be detained. Whether this is only on account of congestion on the line or whether it is an excuse to cut off the supply of grain to the belligerent countries, in response to the agitation in the Press, it is difficult to say. Almost fabulous prices are being offered by German agents, which seems to show the want of foodstuffs in Germany just now; and should the exportation cease for one reason or another, it will be a serious misfortune for the Teutons.

Return of the Albanian Volunteers.

The Roumanian volunteers who set out for Albania some time ago amidst such enthusiasm are now returning in a deplorable state. Most of them are suffering from the effects of starvation. Many are in rags and bare-footed, having had to sell nearly everything they possessed to buy food. And a cheap and roughly made Albanian medal is all they have to show for the hardships they have suffered in their ill-starred adventure. Barely a penny have they received in pay, although a bounty of 300 francs and pay at the rate of 2 francs per day was promised to each man.

CYPRUS AND THE WAR.

A Cyprus correspondent writes:—As one effect of the war, some little unpleasantness has been caused here by manifestations of pro-German feeling amongst a few of the Turkish community. This has been in connection with the rankling ill-feeling caused by the detention of the Turkish Dreadnoughts. German anti-British intrigues do not fail to penetrate all parts, and, of course, reach Cyprus, but the Turks in general are too sensible to be likely to act in any manner which would disturb the peace of the island, and local provision is made for any contingencies that might, but are unlikely to, arise.

THE NEAR EAST.

THE NEAR EAST is on sale at all Bookstalls and Newsagents in the United Kingdom. Should any difficulty be experienced in obtaining the paper, readers will oblige by notifying the Manager. Abroad THE NEAR EAST may be obtained in:

PARIS. Librairie Hachette, 79, Boulevard Saint-Germain; Librairie Galignani, 224, Rue de Rivoli, and at Railway Bookstalls.
CONSTANTINOPLE. Economic Co-operative Society, Pera; Benjamin Rawe, British Oriental Bazaar; D. Marianopoulo, 280, Grande Rue de Pera; and The Nautical Bazaar, Galata.
SMYRNA. Dem. Tzannou, Petite Rue de Rose, and F. S. McVittie.
JERUSALEM. Palestine Educational Store, Jaffa Road.
CAIRO. Diemer and Company, Shepheard's Buildings; The British Library, Sharia Kasr-el-Nil; C.M.S. Bookstall, 15, Sharia Madabegh; and at Railway Bookstalls.
ALEXANDRIA. Librairie Schuler, Rue Cherif Pasha; Nacamulli and Company, 12, Rue Sesostris; Librairie Calebotta, Rue Cherif Pasha Librairie Cauro, Rue Cherif Pasha; The Eclectic Bookstall; F. Diemer, Cairo Station.
PORT SAID. Charles Evans, and on board vessels in the harbour.
KHARTOUM. Sudan Stationery and Bookstore, and Victoria Bookstall
BEYROUT. Sarrafian Brothers.
CYPRUS Cababe and Wilson, Nicosia.
SALONIKA. Librairie Francaise, Rue Sabri Pasha.
ATHENS. Eleftheroudakis and Barth, Place de la Constitution.
SOFIA. Librairie de la Cour.
BUCHAREST. Socec and Company, Calea Victoria
BELGRADE. La Librairie Internationale, 16, Rue Prince Michel.
NEW YORK. The International Bibliopole, 118, East 28th Street.

Readers in France who desire to secure THE NEAR EAST regularly are informed that any Newsagent in that country can obtain the paper for them through Messrs. Hachette, in Paris.

SERBIAN LETTER.

(From Our Special Correspondent.)

Nish, September 22.

Prolonged Fighting.

After the brilliant Serbian victory at Tcher and Jadar and after the Serbian troops had crossed the Sava and occupied the enemy's territory—that is, Semlin and the adjacent fortified position, Bezhanija, it was supposed here that in a few days the inhabitants of Belgrade would be able to return to the capital. But the Austrian troops, showing renewed activity, have again crossed the Drina, and for the last ten days desperate fighting has been going on along the whole line, Lioubovija—Lozhnitza, especially in the direction of Krupanje, and to-day the citizens' return to Belgrade appears to be as distant as ever it was . . . . (*Passage excised by Censor.*)

Flocking to the Colours.

Recruits and also men formerly exempted from military service are joining the forces in large numbers. For several days I have seen each day six hundred marching in batches into the fortress at Nish. These, I am told, are recruits from the newly acquired Serbian territories. There has been heavy fighting; the Serbian victories have cost many lives and an immense number of wounded; and not only must these gaps be filled up, but a great many more men are wanted for the advance far into the enemy's territory when the time arrives to join hands with the Russian troops besieging the capitals of Hungary and Austria.

The hospitals of Nish are crowded with wounded, and so are those of Kragujevatz, Valjevo, and other Serbian towns.

Prince George has been wounded for the second time. He received his first wound in the fortress at Belgrade, and this, his second, when leading an assault at the head of his battalion. Although the wound is said not to be dangerous it has been found necessary to transport the Prince to Krupanje.

Charges Against the Austrians.

War always brings with it a tale of horrors, but the cruelties and depredations practised by the Austrians and Hungarians in this war seem almost incredible in this Twentieth Century of advanced civilisation. The following extracts are from some of the Serbian official communications:—

"Constantly when penetrating into the enemy's territory our army becomes acquainted with crimes committed by Austrian officers and soldiers. When the Austrian 64th Regiment marched through the village Trouptzi, in Bosnia, the officer commanding the 1st battalion of these Austrian troops ordered four peasants and a child of Serbian nationality to be executed because they were unable to say whether the Serbian Army was in the vicinity; and the same officer ordered two peasants in another village to be shot because they had in their hands some empty cartridge cases."

This same battalion after a combat, says the report, locked seventeen peasants in a house and caused them to be burnt alive.

Serbian priests were especially cruelly treated. At Rouda the soldiers of the 64th regiment hanged a Serbian Orthodox priest to the clock of the church, and set fire to the Serbian library and to the houses and shops inhabited or owned by Serbians. At Kozlouk a Serbian priest was hanged on the simple denunciation of a woman, who asserted the priest had cried out: "Long live King Peter!"

A Racial War.

I was conversing yesterday with a Serbian military doctor, who remarked to me: "This war is a war of race against race. There are many Croats prisoners, and prisoners who are Austrian subjects of Serbian nationality, and also Bohemian prisoners whom I have taken as hospital nurses, and whose services are appreciated by the wounded Serbian soldiers, but if by chance I take into the wards a Hungarian prisoner or an Austrian prisoner, our wounded men at once cry out: 'Take him away, doctor, and shut the door!'"

Many of the Austrian prisoners of the Orthodox faith relate that they fought against their will, and that the officers, revolver in hand, threatened them with death before going into action, and that the Slavs amongst the Austrian troops were placed in the first line and Hungarians and Germans behind them.

A Serbian Lady's Experiences.

A friend of the wife of a Serbian doctor relates to me that the latter, with her husband, resided at Krupanje before the Austrian troops first crossed into Serbian territory, and that her husband, thinking it unlikely that the Austrian forces would ever enter Krupanje, left her there, whilst he went elsewhere to attend to his military duties. When the Austrian troops entered Krupanje they indiscriminately put to death women and innocent children; and she owed her life simply to the fact that they saw surgical instruments in the house, and learnt that she could be useful in attending to the wounded, bandaging them and aiding in other professional and hospital duties. But the Austrian officers warned her that on the first shots fired by the Serbians, should the Serbian troops approach, she and her child would be put to death. The Serbian forces did attack them, and, in the first hubbub and excitement, she hid herself in the cellar, and in this way saved her life and that of her son. Supplication on bended knee, and the tears and cries of her child were useless, said she, and one Austrian Catholic priest said that it was well to exterminate such vermin.

A wounded Serbian soldier who was at Shabatz, relates that when the Austrian troops took Shabatz they plundered all the shops, and what they could not take away they wantonly destroyed. Private houses and shops were maliciously wrecked. In the vaults of the wine and beer stores the casks were broken and the liquid ran to waste, flooding the cellars with wine and beer and spirits. Many civilians were cruelly treated, some being put to death and some taken away as prisoners. Women were violated and beaten.

Such is a description of the state of civilisation as it exists among the Austrian and Hungarian soldiers who invaded Serbia.

SERBIAN RED CROSS APPEAL.

Mme. Grouitch, the wife of the late Serbian Minister in London, who is now nursing Serbian wounded at the front, has sent the following telegram to Dr. Seton-Watson, hon. sec. of the Serbian Relief Fund, 22, Berners Street, W.:—

Heartfelt thanks Serbian Relief Committee for noble sympathy and endeavours. People here deeply touched by coming of British Red Cross and Lady Paget's mission. English nurses I brought are doing noble work here. Received with great joy news of the splendid sums being raised in England for sufferers from war, and we pray that if from their abundance something more can be spared for Serbia that you will send us bedding, blankets, pyjamas, dressing gowns, and slippers for wards, and general hospital stores. Every available building in all the towns near the front has been converted into a hospital, and still wounded must sometimes sleep on floors in corridors and sheds. Surgical supplies running short. Often wounds can only be dressed every third or fourth day for want of bandages and gauze. Surgeons are working eighteen hours a day; nurses and local committee are exhausted from strain.

"Rattlin' good game, old man. What?"

"Yes! An' a rattlin' good wind-up with a 'burra' peg of Perfection."

"I thought you'd like it. It's the only whisky I've drunk since I've been out. Jove, man! It's the finest spirit ever bottled. Never reminds you that you've got a liver, and it's always as welcome as promotion. I'd sooner a peg o' Perfection than a case of any other."

LETTER FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, September 24.

Mobilization Hardships.

The measures adopted by the military authorities in connection with the general mobilization are bringing many and real hardships in their train. Up-country districts are denuded of men, and families are starving. Horses, carts, camels, donkeys, and bicycles have been almost cleared out and forwarded by rail to Constantinople. No receipts are given in many cases, and the owners consequently have little or no chance of recovering their property or obtaining any adequate compensation. The Ottoman Aidin Railway Company has recently come in for its share of unwelcome attentions, and three of its powerful main line locomotives have been commandeered and sent to run on the German railway from Haidar Pasha. Three more were seized later on, and it is probable that these half-dozen will not satisfy the Turks. In Europe, in time of mobilization, soldiers are billeted on private householders: here in Smyrna the Turks go one better, and in several cases have ejected whole families and taken over their houses without any compensation. In villages inhabited principally by Greeks, only women and children and old men are left, and great misery prevails.

Abolition of the Capitulations.

The announcement by the Turkish Parliament of the abolition of the Capitulations on and from the first of October was a veritable bolt from the blue, and has caused widespread consternation amongst all classes of foreign residents. At first the news was not treated with much respect, and most people regarded it as a piece of bluff; but the fateful date has almost arrived, and no action has yet been taken by the Powers to prevent the coming into force of the Turkish laws. There is still time, of course, but everything seems to point to the possibility that the Capitulations will be at any rate suspended. The Turks have chosen a moment when the Powers are too busily occupied to be able to devote their attention to Turkish questions, but, unfortunately for itself, Turkey has seldom shown such unfitness to govern as at present. The country is in a state of stagnation and bankruptcy; the bulk of the natives are hard pressed to find food; the soldiers and non-commissioned officers are plundering and illegally levying contributions on poor people; thousands of hard-working labourers and small farmers have been forced to quit the country; and the policy of driving the Greeks out of Smyrna is still being continued under the energetic, although misguided, rule of the Committee of Union and Progress. This state of affairs can scarcely be attributed to the great war raging in Europe. The policy of expulsion began long before the Kaiser thought fit to plunge Europe into strife. The cause is directly due to the bitter anti-Greek and anti-foreign policy being carried out throughout the whole of Turkey.

Smyrna's Trade Paralysed.

Smyrna is dependent on its great export trade. The war has naturally caused a stringency of gold, but, as Turkey is not at war and it is quite against her interests to go to war, the severe restrictions passed by the Government preventing the banks from paying out gold were not necessary; and they could easily be withdrawn, with incalculable advantage to the whole country. This is the season when Smyrna should be working night and day. The fruit crops have been good and cargo steamers are lying in port ready to transport them, but the Government measures prevent the export trade from being carried on. The Austrian and German markets are, of course, closed to Smyrna fruit exporters, but the English and American markets are open and able to take up large quantities of fruit.

This, then, is the time chosen for the abolition of the Capitulations. Is it in any way strange that foreigners should dread the state of affairs likely to result when the safeguards of the Capitulations have been swept away? Primarily, the Ottoman Courts of Justice have always been notorious for their peculiar ideas of justice. The new regime would mean that everyone would be amenable to Turkish laws and Turkish justice. This would be too awful to contemplate. Business, which is already carried on under sufficiently difficult circumstances, would become almost impossible. The answer of the Turk to this is that if the Europeans do not like Turkish justice the remedy is simple, and that they are at full liberty to leave the country. There are plenty of homeless *muhajirs* who would be quite ready to occupy the empty homes.

A Pinprick for the Entente.

The Capitulations in Turkey embrace the foreign post offices. The Turkish Post Office, like the Courts of Justice, has until recently been one of the miscarriages of this country. A short time ago a Christian was placed at the head, and he has succeeded, especially in the capital, in establishing a good service in many directions. Nothing but praise has been meted out to him, but one man cannot conduct a whole postal department, and it is not certain how long his fellow Ministers will allow him to remain at his post. Jealousy was always a strong point in the character of the Turk. The suppression of the foreign post offices would consequently result in chaos for some considerable time. Can the Turks in a fortnight arrange to manage the affairs of the foreign post offices, which have taken years to arrive at their present state of efficiency? The foreigners do not think so, and are not looking forward with complacency to their post offices being closed.

The announcement of the abolition was followed one or two days later by that of the increase of Customs duty from 11 per cent. to 100 per cent. on high-class boots and shoes, cloths, and spirits. It is interesting to note that these come principally from France, England, and Russia. Other articles were added subsequently to the list. To supply these articles native industries would require to spring up, but will it be possible to find any one willing to risk money? For a country whose business has been in a parlous condition for two or three years this sudden increase in duty will be most prejudicial.

THE SITUATION IN PALESTINE.

The following passages are extracted from a letter received from a Jerusalem correspondent, and dated September 26: —

All the Christians of Jerusalem and Palestine, as well as the educated Mohammedans who are not connected with the C. U. P. party, sympathise with the Entente Powers; employees of the German and Austrian Consulates, merchants, and missions, together with most Government officials and the military, side with the Alliance Powers. If it had not been for the proclamation of martial law immediately after the outbreak of hostilities, I believe many societies in this district would have urged the Government to maintain the strictest neutrality.

La Palestine, the best Arabic organ, is among the local papers suppressed by the Government. No editor dares to publish any information concerning the Turkish military measures. The German, Russian, French and Austrian Consulates in the city send copies of war telegrams received by their Ambassadors in Constantinople to the post offices of their respective countries in the city, as well as to the local banks. H.B.M. Consul sends copies of telegrams received by Sir Louis Mallet to the Young Men's Christian Association's Reading Rooms, where the best educated young men assemble. He also sends French copies to the French post office.

There are thousands of soldiers in and around Jerusalem awaiting orders. It is rumoured that Turkey is going to attack Egypt, and that many thousands of soldiers have been concentrated in the southern parts of Palestine. But the whole population of Palestine, with the exception of the military party, are indignant at the rumour. They believe that, if Turkey enters the arena she is going to lose her territories. Rumours have reached Jerusalem this afternoon to the effect that Enver Pasha, the Minister of War, has been deposed, and the general opinion is that, if this is true, Turkey will surely remain neutral

Steps have been taken by the Government to prevent the raising of the prices of food stuffs. For the first few days of last month prices were raised, but the Government has since fixed the prices of food. The export of food stuffs and grain to foreign countries is strictly forbidden, and even their transportation from one district to another in the country has been prohibited lately, but the most trying problem in Jerusalem is the supply of water, for a good deal of water in the city has been consumed by the soldiers, their horses and mules, and unless in a short time the early rains fall, Jerusalem is going to suffer greatly.

BAGHDAD AND THE WAR.

Mobilization Mania.

Letters lately received in London from Baghdad and Busreh present a gloomy picture of intrigue and incompetence—intrigue on the part of Turkey's self-styled friends and incompetence on the part of her own officials. Writing from Baghdad on August 9, a correspondent who has a long acquaintance with the Baghdad district and knows both Turk and Arab remarkably well, deplores the madness that appears to have overtaken the Turks. In connection with the mobilization, they are, he reports, "dragging the miserable citizens from their homes in thousands, and taking them off to a place in the desert, where they are confined with nothing to eat all day and not even enough water to drink." To add to the folly, the conscripts were being put into winter clothing, although, of course, August is one of the hottest months in Irak, and the intention of the Government at that time was to march them to the Russian frontier! The authorities also seized all available transport animals, but, after holding them a few days, found they could not feed them. The animals were, therefore, returned to their original owners, who had to hold them at the disposition of the military authorities, and to feed them in the meantime. The writer remarks (quite truly, one feels) that such an exhibition of sheer folly and incapacity can seldom have been given, and he adds: "The military value of this rabble is absolutely *nil;* for hardly any of them have had any training, and they are all traders—townsmen who never take any kind of exercise, and could not without extreme fatigue march from here to Ma'adem (about two miles from Baghdad). But the effect of their being taken upon the city and its trade, combined with the European War, has been absolutely lamentable."

A "Holy War."

The Government of the vilayet, he goes on to say, "are entirely C.U.P. men, they are all solidly pro-German, and they are doing their best to make the people so. A violent pamphlet exhorting the people to embark upon a Holy War was discovered in time to enable the British, Russian and French consuls to get it suppressed, but others may appear at any time. The intention is to divert the exasperation of the populace from the Government to the foreigners, and if this kind of thing goes on that will undoubtedly be the end of it. . . . I hope that when the European War is over England will not forget the extremely unfriendly feeling that is now being shown here towards her. This is in the air everywhere, and is undoubtedly inspired from Constantinople."

In a postscript, added on August 10, he reports:—"The position is even worse. We were awakened at midnight last night by messengers proclaiming a state of siege. Military law is in full force. Conscription is going on on every side, and the authorities are persistently spreading the news that there is going to be a Jehad." The only news received up to the time of writing was of German victories, and "Government circles" were "rejoicing," but all the European residents—with the exception of the Germans, of course—were in a state of not unnatural anxiety. "If anything happens to any of us up here," the writer says, "you will know and let it be known who is responsible."

In his next letter, which is dated August 16, the writer reports that the position "is as bad as ever," mobilization is still in progress under the same conditions of inefficiency, and business of every nature is at a complete standstill. "The bazaars are in a worse state than I have ever seen them before, even during the most severe cholera; nearly all shops are closed, and grain prices are rising to famine level, though there is abundance of grain and other foodstuffs in the country."

Financial Chaos.

Such trifles as these are not deemed worthy of the notice of the authorities, who appear to be too much occupied in levying blackmail in the form of fees for exemption from military service. Jews and Christians are described as making frantic efforts to raise money to pay these fees; but even rich men find it difficult, if not impossible, to do so. The writer reports that worthy Jews of his acquaintance, men worth ten thousand pounds or more, have visited him to beg the favour of a loan of £20 or £30. For no bills are being met; the financial machine is at a standstill; and even sovereigns and gold ornaments have hardly any value. The Government will not accept anything but *liras* in payment of the exemption fees; so *liras* are the only coins of real value. "People are offering to deposit gold as security for far over the value required, and to pay 4 and 5 per cent. per month for loans; but even on these terms money is not to be had. . . . Everyone, from the Bank downwards, is hoarding for the worse times that are, it is feared, to come."

Farmers' Fears.

The trouble is felt throughout the surrounding district also. Most of the farmers are in a good position as regards their grain, and so forth, but they cannot turn their stocks into money. With commandeering in full swing, they will, naturally, not risk bringing their goods into the city. They dare not even winnow the grain lest the authorities should seize it, and if it were winnowed they could not get anyone to convey it into the market. This state of affairs, the writer declares, cannot be improved until the Levies are sent away, and commandeering by the Government stops. Unfortunately, at this time, he writes, "the main body of the rabble is still in Baghdad," though small bodies of the troops have been moved to the north.

Stirring up the Tribes.

The fear that the Turks "are on the point of being dragged into war with England by the Germans" is described as being generally felt, and the writer goes on to say that the Mohammedans are being encouraged to submit to the mobilization by the cry of "Jehad"—which is in this instance interpreted as meaning a holy war against England and Russia. The Government, moreover, "is in correspondence with the tribes, writing to them that the time has now come for them to draw the sword for Islam, etc., etc." Knowledge of this fact adds, of course, to the general feeling of insecurity; and upon the whole, one can hardly be surprised to learn that the Jews and Christians are "scared to death."

The writer mentions that all the telegrams that come from Constantinople are strongly pro-German—which will not surprise readers of THE NEAR EAST—and that the German Consul publishes a daily bulletin of "news," so decked out, of course, as to fan the feeling against Great Britain and Russia.

NEAR EAST BOOKSHELF.

FROM EAST TO WEST.*

There are many ways of seeing the world. There is the way of the conventional globe-trotter rushing through ancient cities and gaping to order at the show-places, the way of the journalist adventurer in search of copy with a weakness for Royal personages, high Ministers of State, diplomats, and men of light and leading. Then there is Mr. Stephen Graham's way. He takes his pilgrim's staff and mingles with the crowds of obscure wayfarers. Mr. Graham's way is not the obvious way, but it has the advantage that it leads to the heart of things. In this way he has discovered Russia for us—the real Russia of the mute patient millions, whose voice is heard even now sounding above the clash of arms.

In "With Poor Immigrants to America" Mr. Graham records his voyage in an emigrant ship from Liverpool to New York and his impressions of America chiefly from the immigrant aspect. With a touch as masterly as George Borrow's, but without that writer's diffusiveness, and with an attitude towards life very different from the polemical Lavengro's, he writes of the things he sees, illuminating by a dialogue with a fellow tramp, or farmer, or some chance acquaintance on the road, the manifold life of the New America in the making.

Mr. Graham meets men, women and children of all races of Europe. And in the throng of eager pilgrims to the Western Land of Promise there are types from the Balkans and Asia Minor. Amongst Mr. Graham's interlocutors are Peter Deemeff, Mr. Poledor, the one a Bulgarian, the other a Greek; a Syrian, a family of Roumanian Jews.

To the question, What will the American of to-morrow be? the writer makes a cautious reply. He gives some remarkable examples of the strength with which the American spirit influences these many different types. One we cannot refrain from quoting:—

> Even to-day an American is distinctly recognisable as such on the pavements of London, Berlin, or Paris. You know him by his face; he does not need to speak to reveal his nationality. You can even tell a man who has spent five years in the country; something new has been moulded into his face and has crept into his eyes. I have even noticed it in the faces of Russian peasants returning from America after two years away from Russia, travelling in a Russian train to their little village home.
>
> "You are American?" I asked of them.
>
> "Yes, boss, you are rait," they replied, and smiled knowingly.
>
> Then they began to enlarge on what a wonderful place America was—just like American tourists in Switzerland.

These men are represented in the armies of the Tsar.

After laying this book down the reader will understand why the American is so supremely interested in his own country.

NEAR EAST BOOK NOTES.

We have received as a White Paper, Miscellaneous No. 11, 1914 [cd. 7,626], a translation of the Russian Orange Book. The Government is to be commended for publishing at so reasonable a price (threepence) not only its own case against Germany, but also the important contributions of our Allies to the collection of *pièces justificatives* for our action in the early days of August.

Messrs. Hodder and Stoughton are publishing Professor Sir William Ramsay's new work, "The Bearing of Recent Discovery on the Trustworthiness of the New Testament." In this book the writer sets out the evidence that convinced him that the story told in the New Testament is an admirable statement of historical fact.

Two new books on Egypt by Dr. E. A. Wallis Budge, Keeper of the Department of Egyptian and Assyrian Antiquities in the British Museum, will shortly be issued by Messrs. J. M. Dent and Sons. The titles are "The Literature of the Ancient Egyptians" and "A History of the Egyptian People." The publishers state that the "volume on the literature is the first attempt to place before the public a summary of the principal contents of Egyptian literature in a popular form." The other volume is an introduction to the fascinating study of ancient Egyptian history. The price of the two volumes is 3s. 6d. net each.

Readers of "The Fringe of the East," and of the delightful sketches from the pen of Mr. Harry Charles Lukach published in THE NEAR EAST, will look forward with much interest to the publication of "The City of Dancing Dervishes," announced by Messrs. Macmillan.

Another book of great interest to be issued by Messrs. Macmillan is "Arabia Infelix," by G. Wyman Bury. The book is the result of close study and a long acquaintance with the country, and the author writes of the inhabitants as living men and women, not mere curiosities.

"Gunboat and Gun-Runner" is the title of a boys' book by Fleet-Surgeon T. T. Jeans, R.N., which is in Messrs. Blackie's Autumn list. It is described as "A Tale of the Persian Gulf," and the Gulf affords a capital background for any tale of adventure. As the story is based on "actual occurrences which took place ten years ago," described to the author by participators in them, the book should be good reading.

As vampires are generally supposed to have had their origin in the Near East, it may interest some of our readers to know that a volume entitled "Vampires and Vampirism," by Dudley Wright, is announced (Rider).

"My Lady of the Yellow Domino" is a story of Balkan adventure by Mr. A. W. Marchmont, published by Messrs. Hodder and Stoughton.

* "With Poor Emigrants to America." By Stephen Graham. (Macmillan. 8s. 6d. net.)

EXPERIENCES OF A HAIFA VOLUNTEER.

A Haifa resident who wished to volunteer for service in France sends us the following account of his experiences:—

The outbreak of the European war prompted many of the inhabitants of Syria to demonstrate their respective tendencies by volunteering to fight for the nation they side with. Although public feeling in Palestine is distinctly Anglophil, young men wishing to volunteer for the British Army were, of course, practically unable to do so. Despite the fact that volunteers anxious to serve France are required to proceed to that country at their own expense for enrolment, many young men in the midst of the financial crisis that followed the declaration of war willingly made the journey in the hope of being accepted. In this way I myself travelled to Marseilles in order to place myself at the disposal of the French Government, with the request that they would make use of me in any way they chose. The French representative in Haifa encouraged me to a great extent to pursue this course.

On my arrival at Marseilles, in company with numerous other volunteers, I immediately presented myself at the *bureau de recrutement* and submitted my Consular certificate, indicating my desire, where, in accordance with military regulations, I was referred to the Medical Commission to undergo medical examination. I had perfect confidence in my physical efficiency, as in college I was an athlete of satisfactory standing. I noticed, however, that considerable disappointment prevailed among the great assemblage of volunteers because of the French Government's refusal to accept them upon various pretexts. My consternation was intensified when after medical examination I was pronounced physically unfit. My hopes, which had begun to rise, fell below zero. As my other colleagues were also refused I naturally concluded that France had apparently more men than she needed. Alas! we had committed the unpardonable folly of travelling to France—at our own expense, be it remembered—to be met with disappointments that we could not escape. My subsequent efforts to join the Red Cross likewise failed on account of the staff being complete, and on my explaining my situation to the chief of the recruiting office he advised me to return home.

Hopeless and disconsolate I had to leave France, compelled to remain only an onlooker at this Titanic conflict.

Two thousand Serbians from the United States have returned to their native country and have been formed into two battalions for service against the enemy.

W. N. WILLIS'S GREAT BOOK,

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 48-50, Waterloo Rd., London.

TANGIER TO TEHERAN.

According to Mr. Punch, a gentleman in the Antipodes appears to have formed a habit of using Balkan place-names by way of expletives. Many of them are mouth-filling and satisfying—perhaps they are effective—but surely if anyone really wishes to impress a collar-stud, a lost train, or tin-tack, or any other of the objects which are customarily objurgated, he should go to the map of Poland for names which look as though they were cacophonic. Try, for example, the effect of Szczebrzeszyn or Zdziechowice, and certainly the correct pronunciation of Lwow would abash a bargee.

***

The Censor is very obliging; he always does his best for those who collect stories about him. So I must not be too hard upon his professional efforts. On Saturday, it will be remembered, the Admiralty issued a statement about Marines and Naval Brigades, and what they had done to help the Belgians defend Antwerp, and of the disaster which befel them. So far so good. It was duly published in the Sunday papers and, presumably, cabled all over the world. On Sunday night, however, the Censor awoke from his week-end doze. Gallantly determined to earn his pay, he sat down and excised references to the removal of British wounded from Antwerp on the ground that the publication of such news might betray to the Germans the fact that British troops had been operating in Belgium. Pious man, the Censor does not appear to break the Sabbath morn's repose enough to read the Sunday papers—or pay attention to the publications of Government departments other than his own.

***

I have read in one of the papers that the late King Carol found delight in hanging his pictures himself without the help of servants or officials. According to the story, he might sometimes be observed at home perched on a pair of steps and hammering in nails with great satisfaction, just like any householder in humbler walks of life. It may be true. I have not heard the story before. His late Majesty was a great collector of pictures, and spent large sums for the gratification of his taste. At any rate, the story satisfies the longing of ordinary folk to penetrate the mysterious divinity which hedges kings to the core of humanity which they believe it encloses. King Carol was a reserved man, and much respected for his great and rare qualities, but he lacked that geniality which wins popular affection for rulers deserving infinitely less the gratitude of their people. Of this I am sure. If King Carol did hang up his pictures himself, it was purely a private affair, and not for the delectation of a curious populace.

***

The extracts from the letters of a European resident in Baghdad which will be found on another page make melancholy reading for anyone who would like to keep alive friendly feelings for Turkey, and for anyone who remembers how Englishmen have worked for the regeneration of Lower Mesopotamia. But still more melancholy must be the effect they must create upon anyone—if such there be—who fancied that when Enver Pasha went to the Turkish War Office that department would become highly efficient. Unfit Baghdadis dragged from their stalls in the bazaar out to the desert, kept there with little to eat and less to drink, then crammed into winter kit in August and ordered off to the Russian frontier! Could ineptitude farther go? What childishness! From another letter written from Baghdad on August 17 I learn that these invaluable recruits are said to be part of a force to be used against Egypt. The writer of this letter says bluntly:—

> "Wherever it goes this force will be useless. It was marching through Baghdad yesterday on one of the hottest days of the year with heavy winter clothing on. The poor fellows were half dead by the time they got to the North Gate after coming from the Ordygah outside the South Gate, a fraction of a day's march. The route they traverse will be strewn with corpses, sacrifices to the mad folly of——"

And there the letter becomes personal. But really, does it not look as if the "mobilizing" of these "forces" was merely window-dressing, for the benefit of Constantinople and, perhaps, Berlin? "So many thousand Arabs called to the colours" sounds quite pretty. But, as a matter of fact, Constantinople (and Berlin) can rest assured that there is hardly one genuine Arab in the crowd, which is composed of small shopkeepers, Mohammedans, Jews, and Christians, nearly all townspeople, whom the Turkish authorities find it easy to bully.

***

Which reminds me that the real Arab of the Mesopotamian plains is quite as ready to take advantage of the Osmanli's various embarrassments as is the Osmanli to take advantage of the embarrassments of the European Powers. Quite recently a Government convoy was attacked by the Ishmaelites when only some twenty miles from Baghdad, and forty camels that had been commandeered by the military authorities were commandeered again—and found their way back to the black tents of their own tribe. Again, trouble broke out at Shattra, and the Vali of Baghdad thought it expedient to give way all along the line. The chief Sheikh of the Bedouin has since issued a notification to the tribes that so long as they pay to him the dues that they formerly paid to the Government all will be well with them. Which is neat, but not very flattering to the "power" of the Vali and his myrmidons, to say nothing of their German backers. For my part, I should not care to give a sovereign for all the "dues" the Government are likely to get out of the Sheikh.

***

I notice that in one of the excellent articles on the War which he is contributing to *The Evening Standard*, Colonel F. N. Maude refers to "the old reputation of the British infantry, which has endured, whatever the weapon may have been, since we first mastered the long-bow, that we had copied from the Turks even before the Norman conquest." He adds: "The long-bow did not come originally from Wales." I confess that this puzzles me considerably. That the bow is a weapon of Asiatic origin is generally conceded, and the Assyrian sculptures prove that it was in common use in the days when they were worked. But I am curious to know what authority there is for the statement that we took the idea of the long-bow from the Turks—and especially before the Norman conquest! The Arabs, perhaps. But the Turks? It is interesting, however, to note that at the end of the Eighteenth Century some record shooting with the bow was done by the Secretary to the Turkish Embassy in London. Shooting with the wind he sent a light arrow well over 450 yards, and shooting against the wind he sent it over 400 yards. To-day all records with the "long-bow" (modern type) are easily held by General Stein and other Germans.

***

Apparently "news" of the kind that is "made in Germany" is about the only export of the Vaterland at present; and it looks as if the Teutons who devote their energies to this branch of commerce are endeavouring to make up for all their country's losses in other branches. At any rate, to the activities of these gentry and their agents in Turkey there appears to be no end. Complaints regarding the energy of the "deckers out" of "news" reach THE NEAR EAST from all parts of the Sultan's dominions; and, though we may find it hard to believe, there can be no doubt that serious harm is done by them. Here are some extracts from a letter sent by a firm that has an intimate acquaintance with Turkey and the Turks:—

> The anti-British campaign in the local Press is engineered at the German Embassy, and is the most vigorous campaign that has ever been carried on in this country at any time. No nation has ever been vilified by the Turkish Press as the British have been during the last six weeks.
>
> The seizure of the "Reshadieh" and the "Sultan Osman" was taken up by the Press, and for days the Turkish papers poured forth their wrath on England.
>
> As regards the result of the present war, the Turks are of one opinion—namely, that Germany will win. This has been so hammered into them that they cannot see any other point of view or believe that the German Army is not invincible.

There is the point. It is the "hammering it in" that tells with the Turk. And it is a thousand pities that we have been unrepresented by a news agency of our own.

LETTERS TO THE EDITOR.

SERBIAN IDEALS.

To the Editor of THE NEAR EAST.

SIR,—Referring to the attention given in your recent issues to Serbian ideals and to the spirit of the people as expressed in their national songs and legends, I should like to draw the attention of those who do not know of him to Ivan Mestrovic, the Dalmatian sculptor, whose wonderful work to the glory of the Southern Slavs is too little known here. At Rome, in 1911, round his dominant personality, were gathered the various members of this great race, and a unique exhibition of art was shown to the world in the Serbian Pavilion. At the present International Art Exhibition at Venice is to be seen Mestrovic's model for "The Temple of Kossovo," a monument to those who fell on the unhappy battlefield in 1389, and a shrine for all those hopes so passionately held during weary years, and which, taking new life and significance in the enthusiasm of the younger generation of Southern Slavs, have resulted in deeds which should hasten the coming of that long-looked-for day of victory and freedom. Mestrovic himself is but 34 years of age, and in England, where heroic sculpture is practically unknown, artists, and, indeed, all who seek the revivifying influence of supreme art, would do well to study this Slav, already a master who, as Mr. Dimitrije Mitrinovic has so well expressed it (in *The Outlook* for September 26 last), "has given to the world in the Temple of Kossovo the highest synthesis of the Hellenic-Byzantine and the Slavonic spirit."—Yours, etc.,

ERNEST H. R. COLLINGS.

THE PRESENT REGIME IN TURKEY.

To the Editor of THE NEAR EAST.

SIR,—Turkey is now passing through a very critical period in her national life, and it remains to be seen whether her Government is capable of pulling her through with success.

It is reassuring to note that the outbreak of emotion at the beginning of the war is cooling down. To impartial observers it is very difficult to imagine in what way her rulers expected to profit, whether she took the field on the side of the Triple Entente or on that of the Austro-German Alliance. Just recovering from the effects of the Balkan War, and apparently in a fair way to adjust her differences with Greece, it is difficult to visualise the phase of mind which initiated her recent mobilization. There are no indications that she feared another aggressive war on her integrity; even then an alliance with any of the Balkan group would appear a more rational method of proceeding than to jump into a state of mobilization and create a crisis which is shattering the recovering credit of a nearly bankrupt country.

Has she suddenly become imbued with the Bernhardi view of world power or downfall? Some of her young rulers have undoubtedly drunk largely at the springs of German "Kultur," forgetting that the ancient Oriental culture is far more sound and far more inspiring, stamped as it is with the experience of centuries, and not a mushroom growth of a few years.

The real underlying fact is that her young rulers are too young. The Turk is imbued with respect for greybeards, and though for a time he may be led by the rushing enthusiasm of his young apostles, he will slowly but surely return to his normal ideals, and the present brand-new Constitution will merge into a Senate of older Pashas or the rule of a beneficent autocrat.

Undoubtedly the best form of rule for Turkey would be a federated Empire of large provinces. This, in fact, was the rule under Abdul Hamid, who, although he took great care that the local Governors were his own men, allowed them a remarkable freedom in their own vilayets. And that form of administration was undoubtedly better than the present. The writer, who lived twenty years in Turkey and has been there off and on for twenty-nine, has found the differences very marked in this way since the Constitution. In former times one applied to the local Governor and could get things done. Since the Constitution the local appointments by the Central Government are generally of new men, very zealous, no doubt, but exceedingly afraid of responsibility, who for every little thing have to telegraph to Constantinople for advice. The reason is obvious: the Central Government was unable to find local men of good class who would submit to this grandmothering, and had to fall back on clever but inexperienced young men, in whom the local people had no confidence.

But yet since the establishment of the Constitution a marked improvement in some not unimportant matters has taken place, notably in the welfare of the soldiery and in the extraordinary rapidity of the municipal improvements in Constantinople. Between a visit paid to the country in 1911 and a visit this year in May the transformation, especially of Stamboul, was marvellous. This shows, at any rate, capability, and there is no doubt that with a Government sympathetically adapted to the habits and temperaments of its population, and not a Government too inclined to refer everything to the arbitrament of the sword, the future of Turkey, with its wealthy and as yet hardly populated regions in Asia Minor, should become healthy and flourishing.

Englishmen resident in Turkey are and have been invariably Turcophil, and it is difficult to account for periodic waves of hostility against England, and the writer feels certain that they do not emanate from the vast majority of the Turkish population.—Yours, etc.,

TURCOPHIL.

Holland Park, London, October 12, 1914.

THE PRESS ON THE NEAR EAST.

The United States and Turkish Capitulations.

The American view of Turkey's announcement regarding the abolition of the Capitulations is thus expressed in *The Independent* (September 28) in an article, "The Trick of Turkey":—

Turkey has taken the wrong time and the wrong way to rid herself of her treaty obligations in regard to foreigners residing within her territory, and in regard to her foreign trade. It is the wrong time because she has attempted to take advantage of the preoccupation imposed upon the Powers by the Great War to do what she would not have dared to do in time of peace. It is the wrong way because Turkey has no right to put a summary end to the capitulations without consulting the other parties to them.

The Capitulations, says *The Independent*, affect the United States mainly as to the protection given to missions and schools in Turkey, for American commercial relations with the country are inconsiderable. The article concludes:—

The United States has shown in the case of Japan that it will not demand extraterritoriality for its citizens a day longer than is really necessary. The capitulations with Japan were abrogated, by mutual consent, in 1899. But the action was only taken by us when the persons and privileges of Americans in Japan had become secure through the action of the Japanese Government. It is perfectly safe to say that so far as the United States is concerned the capitulations will not remain in force with Turkey a day after American citizens have become as safe there as they are in Japan. It is equally safe to say that we shall not allow Turkey to rid herself.

The Jerusalem Bishopric.

Dr. E. W. G. Masterman contributes to the current *The East and the West* an article upon "The Anglican Bishopric in Jerusalem: Its History and Possibilities," which is full of interest. On the ever-recurring question of proselytism he thinks it probable that there will always be difficulties:—

The non episcopal missions have, not unnaturally, no scruples in attracting all they can to their communities. The Roman Church also finds none, but eagerly gathers in not only individuals but whole communities, dissatisfied—may be merely temporarily—with her priest or bishop. Each successive bishop of our church in Jerusalem has had many opportunities of doing the same, but happily has consistently refused them, to the loss no doubt of numbers, but to the gain of the spirituality of the native Protestant Church, and of increasing goodwill from the authorities of the Eastern churches. Indeed, on several occasions within recent years an Anglican priest has been able to tide over a crisis and actually prevent a final rupture of a dissatisfied Greek congregation from their spiritual mothers.

Towards the close of his article Dr. Masterman mentions a thing which, as he justly remarks, "Many would like to see accomplished":—

Jerusalem ought to become more a centre of study for the clergy of the Church of England, as it is increasingly a place of learning for other communities. The proposed Jewish University in Jerusalem is sure to attract Hebrew students. The American, German, and the French (R.C.) all have institutes for Biblical archæology and allied subjects. England alone is backward in this respect. A great opportunity presents itself to make St. George's College an intellectual centre where theological students or young clergy could reside and, under the direction of the bishop, or some principal appointed by him, could take up some of the many lines of study which residence in Jerusalem and the Holy Land suggests and encourages. Six months passed in study in Palestine should be of enormous benefit to any teacher of the Bible, and the Church of England as a body appears to have been singularly backward in making provision for anything of this kind.

Prince Alexander.

"The Crown Prince of Serbia" is the subject of an interesting note in the current *World's Work*. In the Near East there is very much in a name, as the writer says:—

It is the fashion in the East End of Europe to hang heavily upon historical memories and to build faith on prophecies. When, therefore, it comes to the naming of princes, provision is always made for the fact that they may at some time follow in the footsteps of Alexander the Great or Constantine the Magnificent. If the Greeks fully believe that a king of theirs named Constantine will reign once more in Constantinople, so also do the Serbians believe that another Alexander the Great will come out of Macedonia.

So far the young man of twenty-six has served his apprenticeship with great credit, and bids fair to fulfil the promise of his name:—

Prince Alexander's chance came in the two Balkan wars in which his country was involved. Setting out at first with but that titular Commandership-in-Chief which is often bestowed like a decoration on a Royal prince without conferring any power upon its wearer, this young man came home from the wars a very General-in-Chief indeed.

A German Gadfly.

To the current *Fortnightly* Miss Edith Sellers contributes an article entitled "Austria and the Sons of Zeruiah," which makes interesting if somewhat painful reading. She throws into clear relief the sinister part played by Herr von Tchirsky, the German Ambassador in Vienna, in the events that led up to the Serbo-Austrian War, and through it to the great European War in which we now find ourselves. The late Archduke and Count Aerenthal both thoroughly mistrusted Herr von Tchirsky.

The Archduke, indeed, in his silent, effective fashion, shackled and muzzled him for a time, thus frustrating his first attempt to "capture" the Austro-Hungarian General Staff; while the Count again and again proclaimed aloud the suspicion with which he regarded him. And they were well advised in what they did; of that there was strong evidence before the Archduke had been dead a week. It was not without good reason that so courteous a diplomatist as Sir George Buchanan dubbed him officially a violent Russophobe; or that Sir Maurice de Bunsen, his own colleague in Vienna, wrote of him that he had desired war from the first. Not only had he desired war, but he had worked night and day to bring it about; worked first indirectly . . . and later directly. This is a point on which no Viennese who thinks has now a doubt. . . .

At the very time when the Emperor Franz Josef and his Austrian Ministers were striving their hardest to avert war, straining every nerve to keep the people calm and prevent their clamouring for war, Germany's agents were going about from café to café in Vienna—in Buda Pesth, too, perhaps—deliberately stirring up strife. Wherever men congregated there was always someone or other at hand to excite them, to kindle their wrath against Serbia, to tell them that Serbia despised them and had killed their Archduke in sheer wantonness; to tell them, too, that a war against Serbia would be a mere picnic, a pleasure jaunt; that within a week of war being declared Serbia would be prostrate before them, and their flag would be flying over Belgrade.

While his Excellency's carefully disguised agents were doing this work among the people, he himself . . . was doing much the same work in higher quarters, in society, at the Ballplatz, even at Court, among the Archdukes and Archduchesses.

The Southern Slav.

In the current *Fortnightly* Miss Elizabeth Christitch writes on "The Soul of the Southern Slav" with understanding and insight. The predominant trait, she says, is brotherly love:—

The tie between brothers is the most sacred of family ties. It is quite apart from, and superior to, the parental, filial, or conjugal tie, none of which approaches it, or is expected to approach it, in depth or intensity. The love of a brother for a brother, or of a sister for a brother is the favourite theme of Southern Slav poets, the inspiration of the noblest deeds, the sentiment that awakens most sympathy. Any attempt to gauge the complex soul of the Southern Slav will fail if this factor is not borne in mind. The story of Cain and Abel is still the most horrible that can be conceived by the Slav. The national legends in these parts represent fratricide as a more heinous crime than parricide. The villain in the drama is not he who has betrayed or slain the heroine, but he who has played his brother false. The most touching deeds of devotion and the most daring exploits are always performed for a brother. It is difficult for a foreigner to differentiate the degrees of "brotherhood." The sons of distant cousins are still brothers bound to one another by common blood. From sons of the same mothers—the closest tie—to members of the same family, and finally to men of the same race, there is a fine gradation; but that the humanity of the Southern Slav extends to all mankind is very evident to the stranger within his gates.

The Southern Slavs have a race solidarity which transcends mere political frontiers. In the words of the writer:—

The Serbian "Fatherland" as an entity is not enshrined in the hearts of the Serbian people, nor is the aim of discontented Croatia or Dalmatia mere political independence. The common aspiration is to the reunion of separated brothers. How strong is the flame of persistent fraternity was shown during the arduous conflict with Turkey. Girls came from remote villages in Istria to assist in nursing the wounded, and bands of volunteers for military service managed to cross the Save, in spite of stringent prohibitions. The total of the funds collected in Austro-Hungarian territories for the Slav armies will never be made known. The money was never sent by cheque, but conveyed in bags of gold coin by priests or persons of high social standing. In this and in many other ways was race solidarity made manifest.

Articles to Note.

"Near Eastern Diplomacy," in *The Outlook* (October 10).

"The Neutral Powers," in *The Spectator* (October 10).

"The Future of Turkish Arabia," by Samuel Marinus Zwemer, D.D., in *The Homiletic Review* (October).

THE WAR.

PRESS AND PUBLIC OPINION.

British Moslem Society's Resolution.

At a meeting of the British Moslem Society held at the Mosque, Woking, on Sunday, September 20, the following resolution was proposed by its president, Lord Headley, seconded by Maulvi Sadr-ud-Din, and carried unanimously:—

We desire to offer our whole-hearted congratulations to our Eastern brethren now at the front, and to express our delight to find that our co-religionists in Islam are fighting on the side of honour, truth, and justice, and are carrying into effect the principles of Islam as inculcated by the Holy Prophet Muhammad.

Serbia and England.

The following is an extract from the message sent by the Nish correspondent of *The Times*, under date of October 10, published in the issue of that journal of October 12:—

The marked expressions of sympathy with Serbia recently manifested in England have greatly touched all classes of Serbians. M. Pashitch has personally conveyed to me the appreciation of his Government, and at the same time voiced the universal desire of his countrymen, that Serbia and Serbians shall become better understood in our country.

The Lookers-On.

The writer of an article, entitled "Neutral Sympathies," which appears in *The New Statesman* (October 3), points out that, in spite of Germany's gratuitous distribution of "news," neutral opinion is on the side of the Allies in all countries save Turkey and Sweden:—

With these exceptions the Allies can look round the world and find that, while no neutral Government thinks of attacking them, no neutral people withholds its sympathy. The unanimity, we think, cannot be explained by any accidental convergence of different national interests. If it were, it would be primarily an affair of the Governments, whereas it is in fact much more an affair of the peoples. This appears strikingly in such interested cases as Italy and Roumania. The statesmen of these countries have obvious difficulty in deciding in which direction to seek their national advantage. Those of Rome are thinking of Tunis as well as of the Adriatic; those of Bucharest, of Bessarabia as well as of Transylvania. And the personal biases of the Marquis di San Giuliano and King Carol have alike been strongly pro-German. What has nevertheless compelled both countries to withhold aid from Germany and Austria, and may even draw both into war on the side of the Allies, is the irresistible current of popular opinion.

He concludes his article:—

The neutrals, the lookers-on who proverbially see most of the game . . . have decided which combatant is fighting the battle of civilisation. Probably no important international part which Great Britain has ever played has evoked such a chorus of approval from civilised mankind (outside the immediate ranks of her enemies) as her part during the past ten weeks has done. After all, neither the sanctity of treaties nor the liberty of small nations are phrases merely. It is not easy to dispute that both of them are at stake in the war, and that if Great Britain fails, or if she had declined to act, both might be injured irreparably.

Lord Headley and Islam.

To the current issue of *The Islamic Review* Lord Headley contributes an article entitled "Comrades in Arms." We quote below:—

If the spontaneous support forthcoming from all the British Colonies has elicited admiration, the equally spontaneous and affectionate outburst of loyalty and devotion from all parts of the Indian Empire has called into being a new consciousness of brotherly love—the somewhat cold and phlegmatic temperament of the Briton being thoroughly warmed to enthusiastic delight by the whole-hearted and noble offers of his Eastern brother. There has been no hanging back, and the spirit which hundreds of years ago animated the Holy Prophet Muhammad when he was compelled to draw the sword in the cause of freedom, truth, and justice now dominates all Britishers and Muslims who are fighting shoulder to shoulder in this war righteously undertaken in defence of right against the might of arrogant oppression.

Rival Influences.

The following extract from a neutral source, *La Gazette de Lausanne* (October 8), gives an interesting sketch of the opposing influences in Constantinople:—

La guerre est loin d'être populaire, car le peuple, après plusieurs années de luttes et de guerres perdues, aspire au repos. Sans doute, le peuple ne compte que pour peu dans les destinées de l'empire; mais aujourd hui, ce peuple simple et bon, moutonnier à l'excès, se voit encouragé et soutenu par le sultan lui-même et par le prince héritier Youssouf Izeddin. Le sultan tremble qu'un acte irréfléchi du parti au pouvoir—de quelques membres, devrais-je dire—ne jette au Bosphore le trône qui symbolise plusieurs siècles de domination toute-puissante.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Shewing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. Oct.	1914. Oct.		1332. Julkada.	5675. Tisseri
16	3	Friday	26	26
17	4	Saturday	27	27
18	5	Sunday	28	28
19	6	Monday	29	29
20	7	Tuesday	30 Julhilja	30 Heshvan
21	8	Wednesday	1	1
22	9	Thursday	2	2

We regret to have to chronicle the death of His Majesty King Carol, the Founder of Roumania, which occurred at the Castle of Pelesh on Saturday morning last at 5.30 a.m. in consequence of a cardiac attack.

To-day is the twenty-first birthday of H.R.H. the Crown Prince of Roumania.

To-morrow is the birthday of H.I.H. Princess Wilhelm of Baden, mother-in-law of Princess Maximilian, who was born a Princess of Cumberland.

To-morrow is the birthday of H.R.H. Princess Adelgunda of Bavaria, grand niece of the late ex-King Otho of Greece.

To-morrow is the birthday of H.R.H. Prince Réné of Parma, half-uncle to H.R.H. the Crown Prince of Bulgaria.

To-morrow is the birthday of H.I.H. the Grand Duke Michael Michailovitch of Russia.

Sunday is the birthday of H.R.H. Princess Karl Antoa of Hohenzollern, sister of his Majesty the King of the Belgians and sister-in-law of his Majesty the King of Roumania.

Sunday is the birthday of H.H. Prince Roman Petrovitch of Russia, son of H.I.H. the Grand Duchess Peter, née Princess Militza of Montenegro.

Sunday is the birthday of H.I.R.H. the Dowager Duchess of Edinburgh and of Saxe-Coburg and Gotha, mother of her Majesty the Queen of Roumania.

Monday is the birthday of H.R.H. Princess Sophie d'Orleans, daughter of H.R.H. the Duke of Vendôme and Alençon and niece of his Majesty the King of the Belgians.

Monday is the birthday of H.H. Princess Adelaide, sister of H.R.H. the Duchess of Albany and of Saxe-Coburg and Gotha.

Thursday is the birthday of Her Imperial Majesty the German Empress, mother of her Majesty the Queen of the Hellenes.

Thursday is the birthday of H.R.H. Prince Ludwig Ferdinand of Bavaria, nephew of the late ex-King Otho of Greece.

By command of H.M. the King, the Hon. Sir Arthur Walsh, the King's Master of the Ceremonies, called at the Roumanian Legation on Monday morning and expressed his Majesty's condolences on the death of King Carol. There were many other callers at the Legation in the course of the morning.

By command of H.M. the King, the Court has worn mourning for his late Majesty the King of Roumania since last Tuesday. The Court is to go out of mourning on Monday, the 26th inst.

The new King of Roumania has replied to the telegram of sympathy sent by Mr. Venizelos in a cordially worded telegram. His Majesty says that his thanks are all the more sincere because the sympathy comes from a country whose friendship for Roumania is based on many common interests.

Our Bucharest Correspondent writes (September 21):—H.M. Queen Eleonora of Bulgaria passed through Roumania yesterday on her way to the estates of H.M. Tsar Ferdinand in Hungary. She was received at Gingeno by Mr. Radeff, the Bulgarian Minister.

H.R.H. Prince George, formerly Crown Prince of Serbia, has again been wounded in action.

We regret to learn that H.H. Prince Oleg Constantinovitch of Russia has died of wounds received in East Prussia. Great sympathy will be felt with the Grand Duke Constantine and his wife, who was born a Princess of Saxe Altenburg, as they have now lost three sons in the war.

The funeral of Lieut.-Colonel the Hon. Sir William Carington took place at Folkestone Cemetery on Monday. The King was represented by the Prince of Wales, and the Queen by Prince Albert.

It is notified in the *London Gazette* that the King has been pleased to appoint his Highness Sultan Ali bin Ahmed, Sultan of Al Hauta (Lahej), and his Highness Sultan Ghalib bin Awadth Al Kayti, Sultan of Shehr and Mokalla, to be Honorary Knights Commanders of the Order of the Indian Empire.

Mme. Take Jonescu left London on Saturday last for Bucharest.

We learn from *The Egyptian Gazette* of October 2, just received, that Mr. P. C. Blair, one of the selected Oxford and Cambridge candidates for the Egyptian Civil Service, arrived in Cairo on September 30, and reported himself at the Finance Ministry on the following day. Our contemporary states further that Mr. Blair was born in 1891, and was educated at Fettes, where he became head of the school, and was in the Rugby team there for two years. He was also Cadet Officer in the O.T.C. at Fettes and in the Shooting Eight. Mr. Blair subsequently proceeded to King's College, Cambridge, where he was senior classical scholar and obtained a first-class in the Classical Tripos. He was a Rugby Blue in 1910-11-12-13, and Scotch International in 1912-13. He was also in the hockey eleven at King's.

In the same issue are given particulars of the School and University careers of Mr. R. M. Gent and Mr. O'Donoghue, who are also among the selected candidates for the Egyptian Civil Service, and are arriving later. Mr. O'Donoghue is in the Special Reserve, and is now engaged in drilling recruits in musketry at Dublin Castle Barracks. He was at Trinity College, Dublin, and his speciality is the O.T.C. Mr. Gent was at King's School, Canterbury, where he was head of the school and captain of the cricket and football teams. He was senior classical scholar at Trinity College, Oxford, where he obtained a second in classical moderation and in Greats. He just missed his Rugby Blue, and was captain of the Trinity Rugby Fifteen. He was a member of the Authentic C.C. and a member of the O.T.C.

The Rev. J. H. Molesworth was expected back in Cairo last Monday.

The Egyptian Gazette (October 2) states that Mr. Willoughby, of the Alexandria City Police, has left for England to join the Army, and that Mr. Nelson L. Sutar left for London the previous week with the same object.

Mr. J. E. Stevens left Khartoum for England on September 24 to rejoin his Territorial regiment.

The Halfa correspondent of *The Sudan Times* writes that a committee of Egyptian, Syrian, and native officials and merchants, has been working hard there to raise subscriptions for the Prince of Wales's Fund. Up to the present the collections amount to about £E120.

Miss Katherine Wheatley, who had been asked by the Turkish Government to conduct a nurses' training organisation, is now serving with the British Expeditionary Force.

The engagement is announced of Louis Hall Rickards, of Alexandria, and Winifred, youngest daughter of the late John Picard and of Mrs. Picard, 9, Vicarage Gate, Kensington.

The Egyptian Gazette reports that the inquiry into the circumstances of the death of the late Mr. H. F. C. Parkinson, general manager of the Khedivial Mail Steamship Company, on board the s.s. "Kosseir" on September 23, was concluded at H.B.M.'s Consulate-General at Alexandria on October 2, when the Consul-General found that Mr. Parkinson was killed accidentally and by misadventure through his own careless handling of an automatic pistol. All the witnesses agreed that Mr. Parkinson while on board had been very cheerful, and under the circumstances they could not believe that the act was intentional.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels. High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light, Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.

Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.

For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(Proprietor of the Army and Navy Stores).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

Digitized by Google

The marriage took place on October 3, at Plymouth, quietly, on account of the war, of Lieutenant Douglas Brooke Charles Sladen, R.G.A., son of Mr. and Mrs. Douglas Sladen, The Green, Richmond, to Miss Eleanor Thorold Dinorbin Hughes, daughter of the late Mr. Percival Hughes, Colonial Civil Service, and Mrs. Hughes.

The marriage took place on October 3, at St. Augustine's, Tunbridge Wells, of Mr. Constantine Carolon, of Athens, to Miss May Elizabeth Chapman, daughter of the late Frank Chapman and Mrs. Chapman, of Beech Hill House, Wadhurst.

The Hon. Sir Charles Fremantle, K.C.B., who died on Thursday of last week, was British representative on the board of the Suez Canal Company from 1896 to 1903. Sir Charles was vice-president of the Corporation of Foreign Bondholders, on the board of the Egyptian Delta Light Railways Company, and interested in many other important commercial and financial undertakings.

Lieutenant-Colonel Ernest Montague Jackson, late of the 88th Carnatic Infantry, of the Indian Army, whose death is reported to have occurred at Arosa, Switzerland, at the age of fifty, served with the Dongola Expeditionary Force as a special service officer in 1896. He was mentioned in despatches, and received the Egyptian medal with two clasps and the medal.

Mr. John Pullen, who was buried with semi-military honours at Camberley on Saturday, served in both the Crimea and the Indian Mutiny. Among those present at the funeral were Lieutenant-General Sir Henry Geary and Major-General T. Bland Strange, veterans of those campaigns.

Admiral Gerald Charles Langley, of Lhassa, Camberley, Surrey, who saw service in the Egyptian war of 1882, and who died April 18 last, aged 65, left unsettled property of the gross value of £1,866.

The will of Mr. William Augustus Gordon Hake, of Brighton, the oldest barrister in England ("called" in 1835), who died aged 103 years, has been proved for £14,732. He was a first cousin of General Gordon.

The will of Lieut.-Colonel Raglan Wykeham Barnes, aged sixty, of The Cottage, Herringstone Road, Dorchester, and late of the Royal Army Medical Corps, who saw service in the Nile Expedition, has been sworn at £560.

Yesterday, at the British Museum, Mr. Banister Fletcher gave a lecture on "Egyptian Temples."

Some interesting particulars concerning the members of the British Naval Mission to Turkey is given in *The Army and Navy Gazette* of last week. Rear-Admiral A. H. Limpus, the chief of the Mission, succeeded Rear-Admiral H. P. Williams in April, 1912, and has thus held the position longer than either of his predecessors, for Rear-Admiral Williams occupied it for two years only, and Rear-Admiral Sir Douglas Gamble for little more than twelve months. Of the staff, Lieutenant-Com. G. W. Hallifax, a torpedo officer, went out in May, 1912, as did Engr. Lieut.-Com. Gerald Moore, but Engr.-Lieut. G. W. Le Page had been in Turkey since April, 1911. The gunnery officer, Lieut. Frank Elliott, has already received an appointment to the new battleship "Agincourt," formerly the "Sultan Osman I.," and as the date of his joining that vessel is shown as August 4, it may be assumed that he was already in her, and had come to England to supervise the gunnery trials. Other officers serving under Rear-Admiral Limpus included Staff Paymr. A. E. Stack and Naval Instr. H. H. Holland. There was a report some time ago that the latter officer was in Germany when war was declared, and has become a prisoner of war. The chief of the staff is, or was, Com. A. L. Ashby, who went out with Rear-Admiral Limpus in April, 1912. Like Lieut.-Com. Algernon Faught, his predecessor, who is now first and navigating officer of the battleship "Monarch," he specialised in navigation.

APPOINTMENTS, PROMOTIONS, ETC.

The appointment of Mr. P. Hadjimischeff is announced from Sofia as Bulgarian Minister to the Court of St. James's in succession to Mr. Madjaroff, who left on Wednesday last to take up his new appointment as Minister in Petrograd.

Mr. Hadjimischeff, after being First Secretary of the Bulgarian Legation in London for two years, was sent as Minister to Athens in November, 1910. On the outbreak of the second Balkan War he had to withdraw from Greece, and since then has been in charge of a Commission for settling Bulgarian refugees in Thrace, and has acted as Director-General of the Foreign Office in Sofia. The new Minister, who was educated at the Bulgarian School at Salonika and is a Doctor of Law of the University of Paris, has written on the status of the Dardanelles from the point of view of international law. Mr. Hadjimischeff speaks English very well and is married to an American lady.

Mr. A. B. Geary, who had been temporarily transferred from the Alexandria Consulate-General to the Consulate at Port Said, returned to Alexandria on October 1.

Mr. A. C. W. Ware, who has been appointed Assistant in the Consular Service at Port Said, has arrived at his post.

Major-General Zupelli has been appointed Italian Minister of War. He is a native of Istria, in Austria, and was the first Italian to land at Derna in the Tripolitan War.

The German Government has delivered their exequaturs to the following Bulgarian representatives:—Mr. Mandelbaum, honorary Bulgarian consul in Berlin; Mr. Steub, honorary consul at Munich; and Mr. Klœhne, honorary consul at Dortmund.

KING CAROL'S WILL.

The Balkan Correspondent of *The Times*, telegraphing from Bucharest (October 13) says:—

"The late King's will, which was opened yesterday, is a most interesting document. It is dated 1899, with a codicil of 1911.

"His Majesty recalls with legitimate satisfaction the important position to which Roumania has been raised during his long reign, notwithstanding the difficulties which confronted him and the calumnies and suspicions to which he was exposed. He hopes that his successor will adopt the principle which has always guided him, 'all for country, nothing for self.' He thanks all who worked with him for the good of the country and forgives those who calumniated him and threw doubt on his good intentions.

"The King desires to be buried in the undress uniform of a general. The funeral should be simple, prayers being offered both by Orthodox and Roman Catholic clergy, but the last benediction is to be given by a Roman Catholic priest. The bier should be adorned with natural flowers, if in season, otherwise by branches of fir. The coffin when closed should be placed on one of the gun-carriages captured at Plevna, which is to be drawn by six white horses without black drapery. The King's own wish is that he should be interred in the monastery of Curtea de Argesh, and that this should be the future burying-place of the dynasty; but in case the citizens of Bucharest so desire, a mausoleum may be erected in the city.

"The King recommends Queen Elizabeth to the care of the nation. He bestows on her estates producing an annual income of 400,000 frs., together with the use during her life of the Castle of Pelesh and apartments in the Palace at Bucharest.

"King Carol leaves a large number of legacies to various institutions. The total amount of his personal property is stated to exceed 100,000,000 frs. (£4,000,000)."

DOMESTIC ANNOUNCEMENTS.

BIRTH.

WILSON.—On September 18, at Westcombe, Sutton Scotney, Hampshire, the wife of L. W. O. Wilson, Cairo, Egypt, of a son.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.

FRIDAY, OCTOBER 16, 1914.

THE DESTINY OF ROUMANIA.

The clash of the mightiest conflict of all time offers an appropriate setting to the death of the soldier-King of Roumania. For seven centuries Roumanian history had been a record of continual struggle, when a true conception of their destiny prompted the people to embark afresh on the work of reconstructing Roumania under a ruler of foreign blood. Fighting was still in store for it, but the country had recognised the need for peaceful internal development and for the advantages of a sober and steady foreign policy. The Roumanians were happy in their choice. By example, even more than by precept, the late King led the nation along the path that was to bring it to the realization of its own strength. How arduous that path has been we may infer from a comparison of the country as it first revealed itself to the new ruler's astonished eyes with the Roumania of to-day. Even though we cannot picture, as Prince Carol saw it, the rude structure that was to serve him as a palace, we need only think of a land with no railways, no good roads, and no industries, and then turn to the modern State which provides Europe with no mean portion of the grain and petroleum necessary to its existence. But to win the heart of a nation schooled in long centuries of conflict, the Prince had himself to be a fighter, and he gave at once an earnest of his qualifications by engaging in a systematic organization of the army. His opportunity was not long in coming. Eleven years after his election as sovereign the storming of the lines and redoubts of Plevna not only gained world-wide recognition for the prowess of the Roumanian army, but among the Roumanians themselves fired a spark of pride in their new ruler which long years of successful economic development would not have kindled. In after years King Carol's judicious direction of Roumania's foreign policy left him and his people free to devote their whole attention to the material progress of the country. The confidence that he felt from the outset in the destiny of the country over which he had been called to rule proved to have been justified. He was proud of Roumania, and before he laid down his task, after forty-eight years of loyal service, the Roumanians had good cause also to be proud of their country and of their elected sovereign. But King Carol's military bearing, no less than his faithfulness to a military uniform, which he always wore, and in which he expressed the wish to be buried, revealed the soldier at heart. It is, therefore, a fitting coincidence that his death finds Roumania once more at a landmark in her stormy history, and even without the remark attributed to him on his deathbed, the nation would feel confident that, while urging prudent reflection, the late King would bid it press on to the realisation of its ideals.

"By ourselves alone" are the proud words engraved on the Roumanian crown, made from a gun captured at Plevna. To King Carol they afforded a guiding principle in national policy, and the spirit they breathe befits a fighting race striving to attain its destiny. It was not to be expected, therefore, that the Roumanians would remain indifferent to the stupendous conflict now raging in Europe. They would, however, have belied both the generalship and the statesmanship which characterized King Carol's direction of the country's affairs if they had rushed into the struggle without the most careful premeditation. The quiet confidence of King Ferdinand's proclamation indicates that there is no real divergence of opinion between the waiting policy of his Government and the warlike enthusiasm of the people. But in preparations for war there is much hidden from the man in the street which the authorities have to take into consideration. With Germany's example before her Roumania will have no wish to hamper her military action with errors of omission or commission on the part of her diplomacy. She will be setting out on her enterprise in no blatant desire for mere conquest, but in the consciousness that in the promised reconstitution of Europe she is called upon to perform a definite task with a view to the establishment of peace on a permanent basis. German militarism has sought to make the existence of other nations dependent upon the will of Germany. Its defeat will secure for the nations of Europe, whether they be weak or strong, the right to an honourable independence, and, in order that this aim may be fully attained, the unwilling subordination of large communities to a foreign Government must be terminated. In the heterogeneous empire of Austria-Hungary are substantial "unredeemed" portions of Italy and Roumania. They have been kept in subjection by the armed might of the Hapsburg Monarchy, and the continuance of existing conditions will always constitute a menace to the peace of Europe. If the task which the Powers of the Triple Entente have set themselves is to be done thoroughly these danger spots must be eliminated. It would prove distasteful to the national prestige of both Italy and Roumania that the work of "redeeming" these stretches of country should be carried out wholly by others. But as no quarrel was at the outset thrust upon them they had perforce to stay their hands until the real significance of the fierce struggle deliberately provoked by Germany and Austria-Hungary had been revealed to the world. That stage has already been reached, and if Roumania still delays to strike we may infer that she is anxious to make sure that her co-operation in the war will not only make for the realization of her own destiny, but will be of practical assistance to the Allies who are indirectly fighting her cause.

The prudence which the late King Carol will have enjoined, and which King Ferdinand will be ready in an equal degree to observe, will have prompted the Roumanian Government to watch with special care the course of events in Turkey. Little help could be given to the Allies, if, after a forward movement to the north, the Roumanian army was called upon to ward off a Turkish attack. The interests of the Ottoman Empire are eloquent in the cause of neutrality, but the actions of the Porte inspire little confidence that statesmanship will obtain a hearing in its Council-chamber. If Turkey were to strike a blow on behalf of Germany and Austria-Hungary, the best service that Roumania could render to the Allies would be to deal with Turkey and leave the emancipation of Transylvania to follow as the natural sequence of the ultimate victory of the Triple Entente. In the light of recent events it would appear that the period of uncertainty regarding Turkey's intentions was about to come to an end. The fall of Antwerp threatens to dissipate the last hope that wise counsels would yet prevail in Constantinople. The "Goeben" and "Breslau"—the borrowed German men-of-war—under German officers and manned by Germans, have entered the Black Sea and an untoward act is already reported in the forcible liberation of two vessels detained in Roumanian waters by order of the Government. The addition of these two units to the Turkish Fleet renders the Roumanian coast particularly vulnerable to bombardment. It would be natural, therefore, on Roumania's part to be unwilling to begin operations on her northern frontier until the menace from the Turkish Navy had been removed. Turkey's action, however, will leave her no alternative to taking up arms on the side of the Triple Entente to free Europe from the spirit of aggression which the evil genius of Germany has represented to the Porte as the essence of statecraft. There may be fresh successes in store for the "Goeben." Turkey may even claim her Louvain and Antwerp, and flatter herelf that she is carrving all before her. But the final word will rest not with the Porte, but with the outraged conscience of civilisation, which will not sheathe the sword until it has written *Finis* over German militarism and—with regret, be it said—the Ottoman Empire in Europe.

THE THRONE OF ROUMANIA.

ACCESSION OF KING FERDINAND.

The succession to the throne of Roumania, although it has the appearance of being in strict conformity with hereditary right, is in point of fact on this occasion not hereditary at all. The late monarch had no surviving children, as was the case with the first King of Greece, and, possibly warned by the experience of the latter Sovereign and the wearying question of succession which distracted the Court of Athens for years, he decided to provide for the future of the Crown of Roumania in his own lifetime. King Carol the Founder was an elected King, his nephew and successor, King Ferdinand, is equally an elected King, as he reigns in virtue of a special Act of Parliament. His elder brother, now the Prince of Hohenzollern, forwent the opportunity of being King of Roumania, preferring to live as a subject at Sigmaringen, on the head waters of the Danube, to becoming a Sovereign on its lower reaches.

HIS MAJESTY KING FERDINAND OF ROUMANIA.

Prince Ferdinand Victor Albert Meinrad of Hohenzollern thus became Prince of Roumania, with the style of Royal Highness, on March 18, 1889. In January, 1893, he married Princess Marie of Edinburgh, then in her eighteenth year, whose father a few months later became Sovereign Duke of Saxe-Coburg and Gotha. Their Majesties have six children, the eldest of whom, the Crown Prince Carol, celebrates his twenty-first birthday to-day. Princess Elizabeth has seen her name mentioned in the Press of Europe as the possible bride of almost every marriageable Prince of sufficient rank who is either Anglican, Orthodox, or Protestant. The youngest son, Prince Mircea, owes his name, it is believed, to the fact that Silistria was politically prominent at the moment of his birth, and that tradition ascribes the first conquest of that town to a black ruler of the name of Mircea.

King Ferdinand, as a Roman Catholic, is able to be a Knight of the Austrian branch of the Order of the Golden Fleece, and is also enrolled among the knights of the Italian Order of the Annunziata, the Danish Order of the Elephant, the Swedish Order of the Seraphim, the Russian Order of St. Andrew, the Pressian Order of the Black Eagle, the Bavarian Order of St. Hubert, and the Saxon Order of the Rue-Crown. He is colonel of two Prussian infantry regiments, and of the 96th Austrian regiment, as well as of a Russian regiment.

As will be seen from the genealogical table which is published on another page, the new King and Queen have a wide circle of relations among the Royal Houses of Europe. Between them they are sib with King George, the Tsar, the King of the Belgians, and the King of the Bulgarians. It is curious that King Ferdinand is nearly related to the head of the junior branch of his own family, the German Emperor, only through his Queen, who is a first cousin. The King, like his uncle and the other members of the elder branch of the Hohenzollerns, is a Roman Catholic. The Queen is an Anglican, but the Crown Prince and the other children have been brought up as Roumanian Orthodox, in conformity with the Constitution. Such divisions of religious opinion are not uncommon among the reigning Houses in the Balkans. The late King of the Hellenes was a Lutheran, but his Queen and his children were Orthodox, and the Tsar of the Bulgarians is a Roman Catholic, his Queen is a Lutheran, his eldest son is an Exarchist, and his other children Roman Catholics. In the next generation these differences will tend to disappear, as all Balkan Constitutions prescribe the religion of the Sovereign. King Ferdinand, alone of Balkan rulers, has had experience as a legislator, as since 1889 he has been a senator of the Kingdom of Roumania. This also is part of the Constitution, and the new Crown Prince now succeeds to his father's vacant chair as a senator. King Ferdinand was thirty-three when he became Crown Prince in 1889, but his son, who reaches man's estate to-day, attained his official majority three years ago.

KING CAROL THE FOUNDER.

By J. D. BOURCHIER.

Among the conditions essential to the welfare of the newly liberated States of South-Eastern Europe is the possession of a foreign dynasty. In these democracies, where the restraining force of long-established tradition is lacking and modern culture has not yet been assimilated, no native ruler, however great may be his merits, can hope to emerge unscathed from the political conflict or command the respect and deference which are conceded from the outset to the scion of a foreign reigning house, whose antecedents, education, august relationships, and wider political horizon differentiate him from those around him, convey a guarantee of high impartiality, and invest him with a certain remoteness which in these days must take the place of the divinity which formerly hedged a king. It is hardly an exaggera-

Digitized by Google

tion to say that almost all the attributes which go to make a successful Sovereign were combined in the remarkable man who has just passed away; but even his highest gifts of statesmanship would have failed to find a fruitful field for their activity had he not come as a stranger to the land he ruled so well. Once in Roumania he devoted himself heart and soul to the interests of his adopted country. Thoroughly imbued with the patriotic spirit of the nation, he became a Roumanian of the Roumanians, warmly sympathizing with the aims, the ideals, the ambitions of his people. But he was, nevertheless, a foreigner, and to this circumstance he owed in the first instance the high inviolate position which he occupied from the beginning, and which his innate dignity of character enabled him to strengthen and maintain amid the storms and vicissitudes of a long and eventful reign.

Election of Prince Cuza.

In 1848 the wave of revolution which swept over Europe invaded the Principalities of Moldavia and Wallachia, which since 1821 had been under the rule of native Hospodars or princes belonging to the privileged noble or *boyard* class. The Hospodars, though deriving their authority from Turkey as the suzerain Power, were for the most part little more than the puppets of Russia, which had established a protectorate over the Principalities in 1834. The popular movement of 1848, due to the increasing influence of Western ideas, inaugurated the prolonged struggle for political independence; it was suppressed, however, by Russia, and the administration of the Hospodars was placed under the supervision of Russian and Turkish commissaries resident in the Principalities. The situation during the next few years was such as to justify the dictum of one of the ruling princes:—"L'humiliation est la destinée du peuple Roumain." But the dawn of liberty was near. After the Crimean War the Principalities were emancipated from the control of Russia and placed under the collective protection of the Great Powers. Already the more patriotic and far-seeing among the national leaders had arrived at the conviction that the future of the race could only be assured by the union of the two provinces under a foreign prince, whose presence would put an end to the rivalries of the *boyard* families and assure to the new State a place among the nations of Europe. This programme was definitely formulated by the Moldavian and Wallachian Assemblies, known as the *divans ad hoc*, in 1857, but the Powers resolved on the maintenance of the *status quo*—in other words, the continued separation of the provinces under native rulers and the Sultan's suzerainty. Two years later (January, 1859) the elective Assemblies of Moldavia and Wallachia, rejecting the *boyard* candidates, chose one and the same person, Colonel Alexander Cuza, as Prince, and diplomacy, ever fertile in expedients, counselled the Sultan to issue two firmans of investiture, thus ratifying the election, but maintaining the separate existence of the Principalities.

Prince Carol Accepts the Throne.

The union, nevertheless, was practically achieved, but the Roumanians had to wait seven years longer for the foreign ruler whom they so earnestly desired. The united Principalities were governed by Prince Cuza till February 23, 1866, when he was forcibly abducted from his palace and compelled to sign his abdication. Among the causes which led to his fall was the suspicion that he aimed at the establishment of a native dynasty, and had fixed on his adopted son as his successor. During the interregnum which followed the country was fortunately guided by men of sincere patriotism, sagacity, and firmness of purpose, such as Ion Bratiano, Ion and Demitri Ghica, Demitri Sturdza, and others. On the day of Prince Cuza's deposition the Provisional Government, or *Lieutenance Princière*, in order to anticipate all dangerous rivalries, proclaimed as Prince of Roumania the Count of Flanders, who afterwards by a curious coincidence became the brother-in-law of the late Sovereign. But Napoleon III., who had since the Crimean War taken the Danubian Principality under his special protection with the object of establishing the "sister Latin nation" as a bulwark of French influence in the East, objected to the choice. The Count of Flanders refused the proffered honour, and the situation became critical in the extreme. It was necessary to find, and find quickly, a candidate agreeable to the French Emperor and to the other European Sovereigns. The representatives of the Powers had already assembled in conference at Paris, and might arrive at a decision fatal to the national hopes. On March 24 the Provisional Government received a cipher telegram from Mr. Balaceano, who, with Mr. Bratiano, was then in Paris, conveying the name of a new candidate, which, however, proved undecipherable. The Government promptly declared its readiness to accept the unknown candidate (March 25), and next day Ion Ghica read aloud to the assembled Ministers two telegrams from Paris, which were received with cries of joy by all present. One of these stated that Prince Charles of Hohenzollern would be favourably regarded by Napoleon, the other announced that he was the candidate of England. From this moment the situation became clear, and a few days later the news arrived that the Prince had accepted the Roumanian Crown.

Prince Charles Eitel Frederick Zephyrin Louis, second son of Prince Charles Anthony, head of the senior and Roman Catholic branch of the Hohenzollerns, was born at the ancestral Castle of Sigmaringen on April 20, 1839. His father and grandfather maintained the strictest discipline in their households, combined with economy and plainness of living. The family traditions in this respect were afterwards preserved at the Court of Bucharest, which set a useful example of simplicity to an aristocracy notoriously prone to extravagance and ostentation. The antecedents and early training of Prince Charles were such as to qualify him in every respect for the important duties which he was now called to exercise, and it was soon to become evident that his natural qualities were also peculiarly adapted to the task set before him.

On March 30, 1866, Prince Charles, who was then at Dusseldorf, received the offer of the Roumanian Crown from Ion Bratiano. Before signifying his acceptance it was necessary to obtain the consent of King William, the head of his house; this the King, though favourably disposed, felt bound to withhold, inasmuch as Russia and Turkey opposed the election of a foreign prince and even the continued union of the Principalities, and the conference at Paris had adopted their view by a majority. Meanwhile, a plébiscite in Moldavia and Wallachia confirmed the action of the Provisional Government (April 20), and the Prince's decision was finally taken a few days later after an interview with Bismarck, who advised him to solve the problem by proceeding at once to Roumania, after concerting matters with Napoleon and mollifying the Tsar by suggesting a matrimonial alliance with the Russian Imperial Family. The French Emperor, who warmly espoused the cause of the young Prince, offered to place a warship at his service for the voyage to Roumania, but the Prince discreetly resolved on a stealthy journey overland through Austria and Hungary.

An Adventurous Journey.

Accordingly, on May 11, 1866, two days after the mobilization of the Prussian army for the war with Austria, the elect of Roumania left his home, and, furnished with a second-class ticket, a pair of spectacles, and a false passport, reached Salzburg, on the Austrian frontier, on the 16th, accompanied only by Councillor Von Werner and travelling under the assumed name of "Karl Hettingen." Here he narrowly escaped from an awkward predicament, for when asked to state his name by one of the officials he found, to his dismay, that he had forgotten it; Von Werner, with much presence of mind, brusquely interrupted the conversation, thus giving his companion time to glance at his passport and refresh his memory. A moment later several Austrian officers whose acquaintance the Prince had made during the Schleswig campaign entered the waiting-room, but he fortunately escaped recognition. His tedious journey through Hungary by rail and by steamboat on the Danube was protracted by disorganisation of the traffic caused by the mobilization. At last, on May 20, his steamer touched Roumanian soil at Turnu-Severin, where Ion Bratiano was waiting, but until the Prince was safely ashore the Roumanian statesman was compelled to ignore his future Sovereign. As the Prince was about to leave the vessel the captain interposed, asking why he disembarked, as his ticket was for Odessa, but Prince Charles replied that he wished to spend a few moments on shore, and hastily passed up the gangway; Bratiano at once doffed his hat, and with a deep reverence showed the way to a carriage waiting on the quay, while the captain was heard to exclaim, "My God, that must be the Prince of Hohenzollern!"

No time was lost at Turnu-Severin, and the Prince and Bratiano left for Bucharest in a carriage drawn by eight horses, which travelled at a headlong pace throughout the ensuing night. Next morning at Craiova, where the news of his arrival had already been received, Prince Charles met with his first welcome from an enthusiastic crowd of his future subjects. From this point his progress was marked by a series of demonstrations. Before reaching the capital the new ruler made the first exercise of his prerogative by pardoning the Archbishop of Moldavia, who had been condemned for sedition owing to his participation in some recent riots at Jassy, provoked by the Separatist faction and the agents of Russia. The triumphal entry into Bucharest took place on May 22, when the Prince attended a "Te Deum" in the cathedral, and proceeding to the Chamber took the oath "to observe the laws of Roumania and to maintain her rights and the integrity of her territory." Eventually the State cortège drew up at a modest one-storeyed building, before which a guard of honour was stationed. "What house is that?" said the Prince to General Golescu, who sat beside him in the carriage. "That is the palace," was the reply. Scarcely believing his ears, the Prince asked, "Where is the palace?" while the general, overcome by embarrassment, silently pointed to

HER MAJESTY QUEEN MARIE OF ROUMANIA.

Digitized by Google

the humble domicile before them. The interior of the "palace," however, proved to have been comfortably upholstered and furnished; its windows on one side commanded a spectacle still familiar to the less fashionable quarters of Bucharest—a quagmire of deep mud, in which the pigs of a gipsy encampment wallowed.

The task set before the young Sovereign was of no ordinary difficulty. The political situation, internal and external, was full of dangers. The country had been impoverished by the avaricious rule of the Phanariotes and the boyards, or native aristocracy, and desolated by a long series of invasions and foreign occupations. During the first half of the eighteenth century it had been traversed ten times by Russian, Turkish, or Austrian armies. Between 1711 and 1834, when she established a paramount influence in the Principalities, Russia fought nine campaigns in these lands; after the seventh, in 1812, she appropriated Bessarabia; in 1848 her troops again crossed the Pruth; a little before the Crimean War she seized Moldavia and Wallachia as a pledge for the satisfaction of her claims against Turkey. The Phanariote princes, who ruled from 1711 to 1821, were members of wealthy Greek families at Constantinople, who bought their appointments for enormous sums; their term of office was usually short, the Porte being always eager to obtain the price of another investiture, and they lost no time in securing their profits by plundering the wretched population. The native Hospodars, who succeeded them, were no less corrupt and tyrannical; the peasantry, ignorant, degraded, and dispirited, had lost even the desire for improvement; large numbers, finding the conditions of existence intolerable, fled across the Danube to Serbia and Bulgaria, where their descendants still remain, and many of the villages were totally depopulated. A series of reforms had indeed, been inaugurated by Prince Cuza, who emancipated the peasants from serfdom, but the effect of these measures was scarcely yet apparent; disorganization prevailed in every branch of the public service, and corruption and favouritism were rampant. The dominant boyard class was divided into factions; party spirit ran high, and party interests obstructed all genuine improvement. The financial situation was almost desperate, and the treasury was empty. The country, moreover, was scourged by a visitation of cholera in the year of the Prince's arrival, and famine was threatening in Moldavia.

Political Difficulties.

The external situation was equally gloomy. Europe declined to countenance the *fait accompli*, while the Sultan refused to accept the Prince's letter announcing his election, and even declared his intention of asking the sanction of the Conference at Paris for an armed occupation of the Principalities. So threatening, indeed, was the attitude of the Suzerain Power that it was decided to mobilize the Roumanian army, and the Chamber voted 8,000,000 francs for military purposes. The deplorable condition of the national defences then became evident; military stores and ammunition were almost totally lacking, and some of the ill-disciplined troops mutinied and refused to leave their garrisons. In the hope of raising a loan in Paris to meet immediate necessities, the Prince applied to Napoleon III. "In accepting the Throne of Roumania," he wrote, "I knew that the duties devolving on me were enormous, but I confess that the difficulties to be surmounted are even greater than I thought."

Happily a respite was gained, the Powers refusing to acknowledge the right of the Sultan to occupy the Principalities without their previous sanction. Long negotiations with Turkey followed, for the Porte insisted that the princely dignity should be elective, not hereditary, that Roumania should be bound to render military aid in any war which the Sultan might undertake, that she should not have the right of coining money or conferring decorations, and that she should be declared an integral part of the Ottoman Empire. Eventually these conditions were in part abandoned, in part modified, the French, British, and Russian Ambassadors exerting themselves on behalf of Roumania, and the question of Prince Charles's recognition by his Suzerain, and consequently by the Powers, was finally settled on October 20, 1866. The Prince at once proceeded to Constantinople in order to receive his Firman of investiture from the hands of the Sultan. At the first audience, which took place in the Dolma-bagché Palace, the Padishah was seated on a divan, near to which a chair was placed for the vassal ruler; but Prince Charles preferred to seat himself beside his Imperial Majesty. The interview, however, was marked by great cordiality, and exceptional honours were accorded to the Prince during his stay in Constantinople.

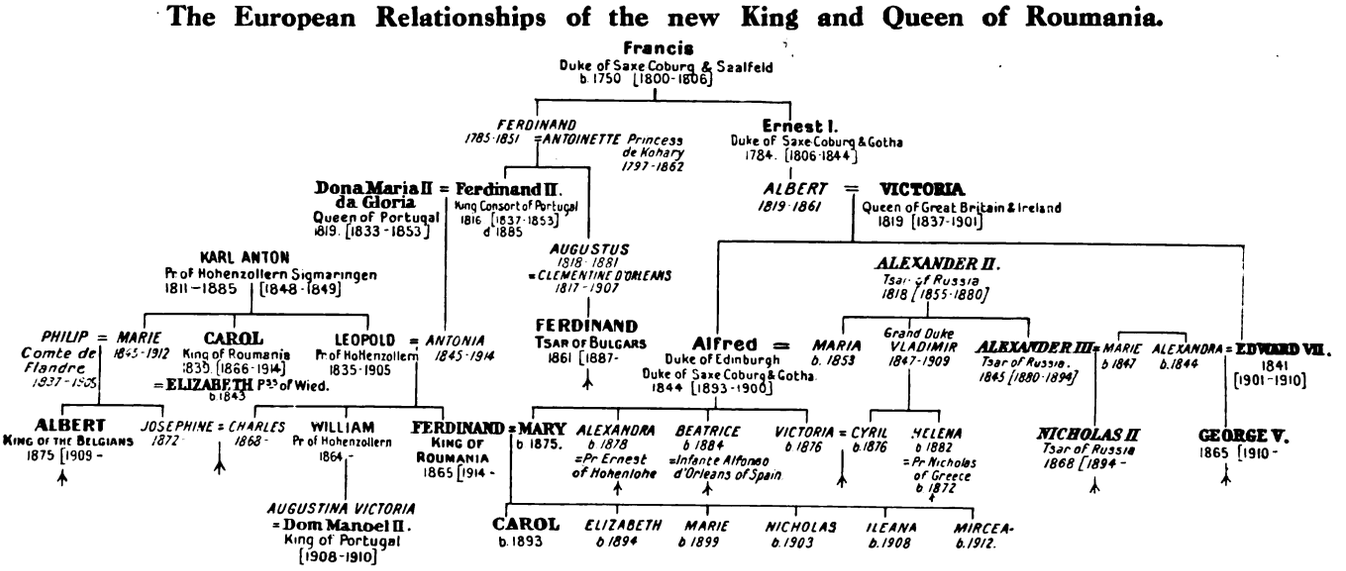
Events from 1866—1876.

The period of ten years (1866-1876) between Prince Charles's arrival and the reopening of the Eastern question, which resulted in the Russo-Turkish War, was one of fruitful activity in all directions, which developed the resources of the country, increased its military strength, consolidated its international position, and thus enabled it to weather the storm which broke over Eastern Europe in 1877.

The national edifice built up during these years of incessant labour was based on the new Constitution, which was voted soon after his accession, and in which he insisted on a Second Chamber—the only Upper House in Eastern Europe—and on an absolute right of veto vested in the Crown. A clause in the draft of the Constitution providing that "religious beliefs shall be no obstacle to naturalisation in Roumania" led to violent anti-Semitic riots and the destruction of a new synogogue at Bucharest, which Prince Charles afterwards rebuilt at his own expense. For many years the Jewish question involved a serious danger to the Prince's position; any tendency of his Government towards liberality provoked furious denunciations at home, especially in Moldavia, where the anti-dynastic party fanned the flame of popular hatred.

The financial situation throughout all this period was grave indeed, and at times seemed almost desperate. "We have not a penny," wrote Prince Charles in 1866, "in the literal sense of the word." It was clear that the economic progress of a country wholly dependent on its agriculture must be contingent on the facilities provided for the exportation of its produce. So deficient, however, were the means of communication that in 1867 only a quarter of the corn and timber intended for export could be shipped from the Danubian ports. The completion of a railway system was of the first importance, but for this the country could not provide the requisite capital. Concessions for railway construction were granted to Austrian and Prussian syndicates in 1867 and 1868, and considerable progress was made during the next few years, but in 1870 Strousberg, the head of the Prussian syndicate, declared its inability to pay interest to the bondholders. The State, which had guaranteed the

The European Relationships of the new King and Queen of Roumania.



Digitized by Google

interest, was unable to meet the claim, and the cause of the German bondholders was taken up by Bismarck, who appealed to Turkey as the Suzerain of the Principalities. Intense excitement prevailed in Roumania, where sympathy with France during the war of this year had increased the popular animosity towards everything German, including the "German dynasty," and a storm of obloquy broke over the Prince. In March, 1871, anti-German riots took place in Bucharest, and Prince Charles, who for some time had felt his position intolerable, summoned the members of the former provisional Government and announced his decision to abdicate. Fortunately for Roumania, they succeeded in dissuading him from his purpose.

The troubles of 1871 marked the culminating point of the anti-dynastic agitation; a reaction soon set in, and a period of comparative calm followed. A Conservative Ministry was formed under Lascar Catargi, which, in contrast to its short-lived predecessors, held office for five years. During this interval much solid progress was made in every department of the State, though the financial situation always remained precarious. The tension resulting from various foreign complications also somewhat diminished; the disappearance of Napoleon III. from the field of European politics brought a certain relief; although his protection had been invaluable at the beginning, the vexatious interference of his Government had been a frequent source of trouble. At one time French jealousy was aroused by the employment of German instructors for the Roumanian army, at another by the efforts of the Prince, in accordance with Bismarck's advice, to keep on good terms with Russia. The relations with Austria-Hungary were frequently strained, owing to the sympathy felt in the Principalities for the Roumanians of Transylvania in their efforts to resist the process of "Magyarization" at the hands of the Hungarian authorities, and difficulties also arose with the Porte, owing to the formation of Bulgarian bands in Roumania, where much sympathy was felt for the neighbouring race in its struggle to shake off the Turkish yoke.

Bratiano's Premiership.

In August, 1876, the Liberal party, which, exasperated by long exclusion from office, had formed a conspiracy for the expulsion of the Prince, returned to power after some months of violent agitation, and Bratiano became Prime Minister. That remarkable man was now destined to aid the Prince in the accomplishment of the great work of his life—the realization of Roumanian independence. In this glorious achievement the national army played a brilliant and decisive part. From the day of his arrival in Roumania Prince Charles never failed to look forward to the time when the political existence of his adopted country must be vindicated on the field of battle, and amid all the vicissitudes of party conflicts and the distractions of the external situation he steadily devoted his energies to the task of military reorganisation. Every Hohenzollern is a born soldier; and Prince Charles's inherited instincts, as well as his nine years' early experience of active military life, peculiarly fitted him for the important work of building up the national defences. How he succeeded in the space of eleven years in providing the nation with a military force sufficient to turn the scale in a great campaign cannot now be described; the reforms which he carried out were at first hindered by the prevalence of party spirit and insubordination among his officers, and at all times hampered by lack of the requisite funds. But *labor omnia vincit*, and when the hour for action struck, Roumania was able to mobilize an army of 120,000 men, in no respect inferior to friends or foes in discipline, courage, and endurance.

The reopening of the Eastern question was heralded by the outbreak of an insurrection in Bosnia and Herzegovina in 1875. This was followed, in May, 1876, by a rising in Bulgaria, which was repressed with hideous cruelty, and in June Serbia and Montenegro declared war against Turkey. Prince Milan, who possessed many family connections in Roumania, urged Prince Charles to make common cause with him in shaking off the suzerainty of the Sultan, but the Roumanian ruler maintained a cautious reserve and inaugurated the Fabian policy which he pursued with such success during all this critical period. Meanwhile, Russia concentrated her troops on the Moldavian frontier, and General Ignatieff declared, in presence of the Roumanian representative at Constantinople, that his Government contemplated the seizure of the Danubian Principalities. It was already clear to Prince Charles that Russia was bent on war, and from the beginning he had made up his mind as to the course to be pursued. Roumania could only side with the stronger, and he determined to conclude a military convention with Russia, and, if necessary, to join her in a campaign against the Turks. But the co-operation of Roumania was not to be had for nothing; the national army must not in any sense figure as a contingent of the Russian, and the country must derive every possible advantage which could be extracted from the situation. It was therefore necessary to proceed with the utmost caution and reserve; to obtain every guarantee from Russia for the independent position of Roumania, and at the same time to avoid a premature rupture with Turkey, which might expose the country to the risk of becoming the theatre of the approaching conflict. A temporising policy was adopted, and the suggestions of Russia were met with evasive replies; in October Mr. Bratiano, who was sent on a mission to the Tsar at Livadia, succeeded in reserving a free hand for his master, notwithstanding the mingled enticements and threats of Gortchakoff and Ignatieff, who aimed at concluding a convention for the passage of the Russian troops through Roumania.

Meanwhile, a conference of the Powers had assembled at Constantinople in the hope of averting war, but its labours came to an unsuccessful close in January, 1877, the Porte having met its proposals with an absolute *non possumus*, and on April 16 a convention was concluded between the Tsar and Prince Charles granting a passage to the Russian troops through Roumania and pledging Russia to maintain the integrity and political rights of the country. On April 23 Russia declared war, and on the same day the Russian troops entered Moldavia. On May 11 the Roumanian Chamber declared that a state of war existed with Turkey. At first the Grand Duke Nicholas demanded the active support of the Roumanian army, and Prince Charles agreed to cover its right flank on the left bank of the Danube, stating at the same time his intention to keep his troops under his own command. Presently, however, an announcement came from the Tsar that "Russia has no need of the support of the Roumanian army, her forces being more than sufficient to achieve the high object the Tsar has in view." On May 27 the Prince superintended the bombardment of Vidin from Kalafat, and his coolness under fire was much appreciated by his troops. On July 20 the Russians sustained their first defeat before Plevna, and they now begged the Prince to occupy Nicopolis and to take charge of the prisoners of war. Prince Charles agreed to garrison Nicopolis, but declined to undertake the police duties assigned to him; "my army," he wrote to the Princess, "is too good for that." At the same time he insisted on a separate base of operations in Bulgaria and the undivided command of his army. Urgent request for help from the Russians followed as the situation before Plevna became worse, but the Prince remained obdurate until the question of the command was finally settled in his favour. At last, on August 20, the Tsar appointed him generalissimo of all the troops before Plevna, and five days later the main body of the Roumanian army began crossing the Danube.

The Plevna Campaign.

The brilliant capture of the Grivitza redoubt on September 11 covered the young Roumanian army with glory. The attack, which cost the lives of 2,600 Roumanians, was undertaken against the judgment of Prince Charles, who held that Plevna could only be taken when the expected Russian reinforcements arrived. This opinion proved correct, for it was not till three months later (December 10) that the gallant Osman Pasha surrendered, handing his sword to a Roumanian officer. The capture of Plevna decided the fate of the campaign, and Prince Charles now laid down his command and returned to Bucharest, when the population of the city turned out to welcome their victorious ruler. But popular rejoicing was soon to give way to bitter disappointment. On January 29, 1878, Prince Charles was informed from St. Petersburg that Russia was resolved to regain possession of Roumanian Bessarabia and that Roumania was to receive in exchange the delta of the Danube and the Dobruja. The decision of Russia was stated to be unalterable, and a few days later General Ignatieff arrived at Bucharest with the object of impressing on the Roumanian Government the necessity of submission. The indignation in Roumania was indescribable, and both Senate and Chamber declared the resolution of the country to defend its integrity by force. Russia thereupon found pretexts for increasing her troops in the neighbourhood of Bucharest, and the Tsar threatened to disarm the Roumanian army. The reply of Prince Charles on this occasion is worthy of record: "The Roumanian army which fought so gallantly before Plevna under the eyes of the Tsar may be annihilated, but will never be disarmed." But he, nevertheless, recognized the futility of resistance to the Russian demand and exerted himself to calm the prevailing excitement.

In the negotiations for the armistice of Adrianople and the peace of San Stefano Roumania was not allowed to take part. When the Congress of the Powers assembled at Berlin, Prince Charles sent Mr. Bratiano to plead the cause of Roumania, though he foresaw that little support was to be expected from any of the Powers. In point of fact, Lord Salisbury and Count Shuvaloff had already agreed that Russia was to annex Bessarabia and Batoum in return for the division of the Big Bulgaria of San Stefano. It was generally understood that Bessarabia was a *sine qua non* for Russia, and the recognition of Roumanian independence was, by Article XLIV. of the Berlin Treaty, made contingent on the cession of that province. Another con-

Digitized by Google

dition which was also imposed—the abolition of all restrictions on the attainment of civil and political rights by persons of all creeds (Article XLIV.)—provoked great agitation in Russia, inasmuch as it implied the admission of the Jews to the franchise, and its practical application has always been evaded. The bitter feeling excited by Russian ingratitude has not yet died out in Roumania: "in politics," as Lord Beaconsfield observed at the time, "ingratitude is often the reward of the greatest services."

In February, 1880, the independence of Roumania was formally recognised by England, France, and Germany, and in the following year Prince Charles, at the request of the Chambers, assumed the Royal title. His coronation took place at Bucharest on May 22, 1881, amid universal rejoicing, the crown being made of steel from a Turkish gun captured at Plevna. "May the first King of Roumania," he said, when accepting the vote of the Legislature, "enjoy the same love that has supported the last Prince through all his troubles! The affection of this noble and brave nation, to which I have devoted my whole existence, is more to me than all the greatness and brilliancy of a crown." That prayer was amply fulfilled in the year which followed, for the interesting ceremony marked the final consolidation of his position, and the beginning of an era of peaceful progress comparatively free from domestic troubles and foreign interference. It is true that in 1888 a serious rising among the peasantry, in part due to the prevailing distress, in part to the unscrupulous agitation of M. Bratiano's enemies, and in part to the machinations of Russia, threatened at one time to assume an anti-dynastic form. But tranquillity was soon restored, and M. Bratiano retired from office, having held the premiership for twelve eventful years. Agrarian riots again took place in 1899, when, owing to a failure of the harvest and the improvident financial policy of successive Governments, the country was threatened with an economic crisis which was eventually averted by the policy of rigid retrenchment carried out by M. Sturdza, with King Charles's approval. There can be little doubt that the confidence which the King's rule inspired in the foreign financial world largely contributed to save Roumania from national bankruptcy at this critical epoch. When the financial difficulty was at its height the King gave evidence of his sagacity and calm judgment by refusing an offer for the exploitation of the Roumanian petroleum springs by an American trust, thus preventing the alienation of a potential source of great national wealth. During his latter years King Charles had the satisfaction of witnessing the completion of a great series of public works—the immense system of fortifications defending the capital and the line Fokshani-Galatz, the magnificent bridge over the Danube at Tchernavoda, and the extensive harbour at Constanza.

King Carol's Jubilee.

In May, 1906, King Charles celebrated the jubilee of his accession to the Throne amid great rejoicings. In the spring of the following year a great insurrection of the peasantry took place, due in the main to the causes which had led to the previous risings, as well as to the exactions of a new class of Jewish middlemen. For some days Bukarest was in danger: large bodies of troops were called out, and the revolt was suppressed with ruthless severity. During the Balkan crisis of 1908-9, brought about by the declaration of Bulgarian independence and the annexation of Bosnia and Herzegovina by Austria, King Charles maintained a policy of reserve, but the growing strength of Bulgaria, which was regarded with no little jealousy by his subjects, and Greek aggression on the Kutzo-Vlach element in Macedonia alike disposed him to favour a close entente with Turkey, which had recognised the ecclesiastical rights of the Kutzo-Vlachs.

When, however, after formation of the Balkan Alliance, war broke out between Bulgaria and her allies on the one side and Turkey on the other, King Charles, in accordance with his usual policy of circumspection, remained neutral and confined himself to demanding territorial compensation from Bulgaria for the prospective expansion of that Power in Macedonia and Thrace. The question was left to the decision of the Ambassadors of the Powers at St. Petersburg, who adjudged the town of Silistria and some neighbouring territory to Roumania. But after the outbreak of war between the allies, Roumania declined to abide by the award, and the dispatch of her troops into Bulgaria, where they met with no opposition, effectually brought the war to a close. It is no secret that King Charles was deeply reluctant to take this step, but, as he explained in a telegram to King Ferdinand, he was unable to resist the popular demand for military action. The assemblage of Balkan statesmen at Bucharest for the purpose of making peace (July, 1913) indicated the leading position which Roumania had now attained among the Balkan States. Under the Treaty of Bukarest (August 10) a considerable extent of Bulgarian teritory was ceded to Roumania, which practically succeeded to the hegemony of the peninsula, and the triumph of King Charles's policy was complete.

In November, 1869, Prince Charles married Princess Elizabeth of Wied, the gifted "Carmen Sylva," of whose brilliant literary and artistic talents only passing mention can be made here. The union was a happy one, and from the day of her arrival in Roumania the Princess took an active share in her husband's labours, devoting herself to works of charity and taking a keen interest in the intellectual and moral advancement of the people and in the improvement of their social condition. The only child of the marriage, the Princess Marie, died in 1874, at the age of four, and the grief of the bereaved parents was shared by the whole nation. As the succession to the Throne had been declared hereditary by the act of Prince Charles's election, his nephew, Prince William of Hohenzollern, eldest son of his brother, Prince Leopold, became heir, but renounced his rights in favour of his brother, Prince Ferdinand, who in 1889 received the title of "Prince of Roumania" and took his seat in the Senate at Bucharest. In 1893 the heir-apparent married Princess Marie, daughter of the late Duke of Edinburgh, Duke of Saxe-Coburg-Gotha.

Trained in the best traditions, with a deep sense of duty, high ideals, a steady purpose, a sober, judicial temperament, much intuitive sagacity, and an enormous capacity for hard work, King Charles was peculiarly fitted by Nature and by education to discharge the great task which fell to his lot. His calmness, his supreme indifference to calumny and even insult, and his unwearied industry shone by contrast among an impulsive, excitable, and somewhat indolent people, in whose character a sensitive *amour propre* is no small ingredient. In private life his habits were of the simplest; he disliked all luxury, show, and ostentation, and there was nothing theatrical in his disposition. He was never more happy than when spending his time in the beautiful woods around his mountain home at Sinaia, where he was able to gratify his fine appreciation of Nature, which was shared by the Queen, and to indulge in his favourite pursuit of forestry. He lived to witness the realisation of the dream of his early life, and to see the people whose destinies he shared leading the march of progress in Eastern Europe. The best record of his long and useful reign will be found in the present condition of Roumania: *si monumentum requiris circumspice.*

We give below a few extracts from the Press on the late King:—

In the person of her first King, Roumania has lost a great ruler and statesman, the real creator of the leading State in the Balkan Peninsula. King Charles has governed her for nearly half a century; he has worn her Crown for more than a generation. Her polity, her internal constitution, her position in the Balkans and in Europe, her Army, her finances, agriculture and trade, her education, and the whole mind and outlook of her people, have been transformed since he came amongst them, and in the transformation he has been the guiding brain and his the controlling hand. —*The Times* (October 12).

For forty-eight years he has governed Roumania as a constitutional monarch, with so much judgment, tact, and decision that during most of that time, and especially in recent years, his ablest Ministers have been the first to recognise that their king was their first and best statesman, ruling the country by the Divine right of being its best citizen.

—*The Morning Post* (October 13).

King Carol of Roumania will need no monument in the country of which he was the first independent Sovereign. Its growth in wealth, prestige, and civilisation is so intimately connected with his leadership and government that his name will ever be the foremost in patriotic memory. His kingly career in a new and strange land might have proved a mere adventure, like some that we have watched in more recent days; but ability and character enabled him to guide Roumania into paths of true development and to leave her a Power of genuine standing and a formidable quantity in the calculations of Europe.

—*The Pall Mall Gazette* (October 12).

The King of Roumania was little known in this country, but there is no man who during the last thirty years has won for himself a more honourable position in the commonwealth of Europe. Born to a position in which he had all the pleasures and advantages but none of the responsibilities of Royal birth, at the age of twenty-five he voluntarily undertook the task of ruling a half-civilized, undisciplined people. It was a position in which few could have expected he would succeed; the best that his friends could hope for him was that he should at least fail with honour. —*The Manchester Guardian* (October 12).

NOTES AND NEWS.

Devonshire Square,
London, E.C.

In last week's issue of THE NEAR EAST the Cairo correspondent referred to the dealings and doings of German banks in Egypt, and pointed out that, in the case of the Deutsche Orient Bank, a special feature had been to lure small Egyptian depositors by a high rate of interest and by the belief that this generous act on the part of the Teutons "was all done for love of the Moslems." If rumour is right, the bank in question, at the last moment before the outbreak of hostilities, sent an important sum to Germany On the other hand, the latest action of that institution has been to try and wriggle out of the obligations imposed upon it by the moratorium by pretending that the payment made under the first moratorium had to be deducted from the larger one authorised under the extension. From which it is evident that the small native Egyptian depositors have been fleeced by the Teutons to facilitate the bombardment of Antwerp and the sacking of Louvain. In the words of our correspondent, "it is to be hoped that, since his pocket is touched, the Egyptian will at length realise the true value of the Teuton's avowed friendship for him, and that he will draw a comparison between the position of the D.O.B. and the local British and French banks, which have remained open all the time, and have by no means insisted on adhering to the bare minimum imposed by the moratorium."

***

I have lately been shown a recent report sent from Constantinople to a Lancashire firm, in which reference is made to an almost similar attitude on the part of the local German banks, whose treatment of their depositors can in no way compare with that adopted by the British and French banks. Yet it is the Germans who are to-day the rulers at Stamboul, the self-appointed friends and protectors of Islam! But surely they are going the wrong way to show their friendship and protection? I cannot help thinking that the intelligent Turk, like his cousin in Egypt, is beginning to curse the day when the "scraggy Eagle" nested in the Ministry of War overlooking the Bosphorus.

***

But it is not only as regards the banks that the Germans have shabbily ill-treated their friends at Constantinople. The mobilisation of the Turkish Army, its transport and upkeep, together with a hundred extraordinary expenses, have practically depleted the Turkish Exchequer, ruined the shreds of its credit, and coniured away its borrowing powers abroad. For all of which Germany must be thanked. The rotting of ungathered crops, the starving of countless thousands whose food supplies have given out, the misery, black and sinister, of thousands of Moslem peasants throughout Asia Minor and Syria, are other phenomena of the situation for which Germany must again be thanked. The closing of the Dardanelles and of the Bosphorus, the stopping of all trade between Constantinople and the outer world excepting through Bulgaria, the paralysing of shipping between the Black Sea and the Mediterranean are so many instances of Turkish subserviency to crypto-Prussian militarism, for which the Germans must be thanked, and which are destined still further to ruin Turkey's prestige and to bring up against her not only the Allies, but all neutral States throughout the world. Finally, and as though the above list did not suffice to convince Turks of the folly of their ways and of the isolation which stares them in the face, it must be remembered that Germany's expense in sending, in her own interests, soldiers, sailors, ammunition, and howitzers to Turkey will have to be paid by someone, and that the person to foot the bill will inevitably be Turkey. How this will be done the gods alone know. In the meantime the Ottoman Empire is estranging itself from Great Britain and France, the two great lending Powers, and meekly following the German star—blindly, and without realising that Berlin has no money, and that even for the construction of a railway in Asia Minor the Germans were obliged to borrow—in Switzerland!

***

The whole matter is involved with more serious consequences than I dare think of. From what I know personally of such men as Talaat Bey, Djavid Bey, Djemal Bey, and Bustani Effendi, I am inclined to think that they, in their innermost selves, can be no willing partners to a state of affairs that smacks of the grotesque. They are not the men voluntarily to risk the future existence of the Ottoman Empire for, let me say, a mess of pottage. Financial disaster threatens it, trade dislocation is weaving its meshes around it, foreign sources of capital are closed to it, and, instead of being able to dispose normally of its crops and to send them across the seas under the protection of Anglo-French fleets, they are rotting where they fall, the while interests are accruing and the wherewithal to meet obligations is slowly disappearing. For the sake of what? For the shadow of a friendship that is thraldom, for the ghost of a protection that spells ruin. Surely the Young Turks must realise this? Or must the old adage of none so blind, etc., be applied even to men of Talaat Bey's understanding, to men of the financial perspicacity of Djavid Bey? If so, may the blame lie with them—and the responsibility. But the true friends of Turkey—and their numbers in Great Britain are legion—will regret it, for the sake of the Empire.

***

From the business man's point of view, the reports that are reaching this country regarding Turkey's mobilization make extraordinary reading. For, as carried out by the provincial authorities, it seems destined to deal the final blow at the never too robust commerce of the Ottoman Empire. This sounds pessimistic no doubt, but surely this number of THE NEAR EAST contains material that amply justifies such pessimism. What do we find? At Smyrna the fruit trade is at a standstill, and the whole export business is, in fact, in similar plight. In the Mesopotamian region the agriculturists are afraid to take the necessary steps to realise their crops; in Baghdad itself the merchants and shopkeepers are being driven into the ranks, and trade is at a standstill; at Busreh the shipping trade is utterly demoralized; in Constantinople itself "business is dead or dying." And the same story reaches us from every part of Turkey. It is not within my province to inquire into the whys and wherefores of the mobilization. But I would point out to the powers that *ought* to be in Constantinople just now that the richest country in the world could not stand this sort of thing long. And Turkey is not the richest country in the world. With the Ottoman Ministers who desire to put an end to this ruinous state of affairs I must heartily sympathise. For the firebrands who are responsible for it I, as a plain business man, have nothing but hearty contempt.

***

Since writing the above, I read that an official communication to the Press announces that foodstuffs imported into Constantinople are to be exempt from requisition for military purposes. Unfortunately I have heard of similar assurances given before now by the authorities at Stamboul, but when the foodstuffs did arrive the order went forth that they were to be requisitioned in spite of edicts, decrees, and standing orders. It is so easy to revoke old decrees. Not that it affects us either one way or the other, because we are not exporting foodstuffs. But, on the other hand, it clearly proves to what depths of economic poverty Turkey has fallen under Prussian guidance to be obliged to publish such a statement when wheat, oats, barley, and other foodstuffs are rotting at home and are not allowed to be picked owing to German interference.

***

There is a scarcity, I read, of oil and rubber in Germany. I predicted as much some time ago, so that it comes as no surprise. Up to the present, however, the Roumanian fields, in which Germans have invested a considerable amount of money, are still open to the Teutons, the oil being sent overland via Austria. As a matter of fact, the most recent issue of the Roumanian *Moniteur du Pétrole* to hand states definitely that there has been a decided increase of oil exports by tank trains to Germany. How long is this going to last? It is difficult to say; but if, as is presumably going to be the case, the Russians link hands with the Serbs across Austria, good-bye to Germany's last source of oil supply. As it is, the path is already a very narrow one, and it is growing narrower. Regarding Roumania, it might be argued that any such happening would seriously affect her own exports. Not so much as is apparent at first sight, because the wells from which Germany draws her supplies are owned and exploited by German companies, and very few other wells send oil thither. So that the loss to Roumania is minimised.

War on German Trade.

THE LEATHER INDUSTRY.

In continuation of our series of extracts from the bulletins issued by the Board of Trade, we give this week particulars from the same source of the openings for trade in leather, exclusive of boots and shoes, which present themselves in the Near East:—

GLOVES.

Germany's exports (1912) amounted to £1,621,000, those of Austria (1913) to £1,453,000, and those of the United Kingdom (1913) to £370,000.

[The Near East is, comparatively speaking, a small market, but both Roumania and Turkey are important buyers of leather gloves and glove leather. Austria's exports to the Near East are the most important, Roumania alone taking from the Dual Monarchy gloves to the value of over £10,000 per annum. British-made gloves (for gentlemen) have the best reputation of any throughout the Near East, but their price, on the one hand, and Austrian cheap competition in the same line on the other, act against their more general use. If a British firm sought to make itself known in places like Bucharest, for instance, and made trade terms less onerous for the tradesman, it could easily establish itself.]

The following remarks from the Bulletin refer to Near Eastern countries:—

Egypt.

In his report for 1911 the Austrian Consul at Cairo states, that as regards leather gloves, that all qualities ranging in price from 15s. to 45s. a dozen for ladies' gloves and 25s. to 75s. for gentlemen's gloves are in demand, but the total requirements are not large. The former are almost exclusively of French manufacture, while the latter are for the most part of English origin.

Roumania.

According to a French Consular Report, the trade in glove leather in Roumania is entirely in the hands of Austria-Hungary.

Serbia.

In a survey of the leather and leather goods trade, the German Consul at Belgrade points out that German manufacturers could without doubt secure a greatly increased share of this trade if they sent out their own expert travellers to study the actual requirements of the country, and to obtain information as to prices, terms of payment, etc. By adoption of this method a number of German firms have met with a considerable measure of success in the Servian market.

Leather gloves are stated to be imported principally from Austria-Hungary and Germany.

MACHINERY BELTING.

Germany exported in 1912 machinery belting to the value of £735,000, Austria in 1913 to the value of £23,200, and the United Kingdom in the same year to the value of £1,619,000.

The following leather belting was imported in 1912 and 1913 by several Near Eastern countries:—

	From Germany, 1912.	From Austria, 1913.	From the U. Kingdom, 1913.
	£	£	£
Bulgaria	2,100	4,130	1,200
Roumania	13,000	4,330	11,700
Turkey	3 250	1,150	9,200
Egypt	1,000	—	12,400

The figures for machinery belting of woven hair or cotton are:—

Bulgaria	400	..	70	..	40
Roumania	12,150	..	170	..	2,100
Turkey	1,050	..	—	..	3,800
Egypt	3,150	..	—	..	6,400

The figures for machinery belting of other materials than leather, woven hair or cotton are:—

Bulgaria	700	..	—	..	—
Roumania	2,950	..	260	..	800
Turkey	450	..	—	..	500
Egypt	200	..	—	..	1,000

[The total German and Austrian trade in the countries mentioned above which can be acquired by us is not less than £50,000 per annum. Half of this amount can be taken by Roumania alone—a circumstance that ought to persuade British manufacturers to pay special attention to this market, in spite of the fact that it is beginning to manufacture its own leather belting.]

The following further details are published by the bulletin:—

Bulgaria.

An Austrian Consular report on the Trade of Bulgaria for 1911 mentions that in that year leather belting was imported in increased quantities from Austrian manufacturers, and German firms also secured a fair share of the trade. The consumption increases annually, and manufacturers of leather belting are advised that the Bulgarian market is well worth their attention.

Roumania.

According to a report by the German Consul at Bucharest for 1912, camel hair belting of excellent quality is manufactured in Roumania; consequently the imports of this article, which is principally employed in the petroleum industry, have steadily decreased. The production of leather belting has also become an important industry in Roumania.

Turkey.

H.M. Vice-Consul at Smyrna in a recent memorandum on the leather trade of Smyrna writes:—Belting leather comes mainly from the United Kingdom. France and Germany are only of secondary importance in this article. Prices vary indefinitely with size, but, as examples, a 6-inch single band is sold at 3s. 3d. and a 6-inch double band at 5s. 6d. per foot, with 40 per cent. to 55 per cent. discounts off listed prices according to quality. Usual terms are three to four months' discount.

MOQUETTE TRADE IN TURKEY.

Although there are no precise statistics of the trade in moquette carpets at Constantinople, states *The Bulletin* of the French Chamber of Commerce of that place, the imports of this article are increasing both for use in the country and for export to Russia and Persia. France is the principal supplier. Patterns with a garnet red ground are most in demand. Then come those with a blue ground, whilst carpets of a cream colour are little bought. The principal sizes of these carpets, with their wholesale selling prices, including cost of carriage, customs duties, other expenses, and a small profit for the vendor, are as follows:—Size, 65 cm. by 115 cm., 3s. 2d.; 65 cm. by 125 cm, 3s. 4d.; 85 cm. by 150 cm., 5s. 10d.; 100 cm. by 165 cm., 7s. 6d.; 130 cm. by 180 cm., 9s. 6d.; 130 cm. by 190 cm., 10s.; 138 cm. by 200 cm., 10s. 6d. The following articles in moquette are also imported:—Portières, 150 cm. by 350 cm. and 100 cm. by 325 cm. at 42s. to 67s. a pair, and from 30s. to 50s. a pair, according to quality; cantonnières, size, 65 cm. by 325 cm., at from 25s. to 42s.; cushions sold at 1s. 4d. to 2s. 6d. each, and from 2s. to 3s. each in sizes 55 cm. by 55 cm. and 50 cm. by 70 cm. Moquette is also sold by the metre, 130 cm. wide, at prices from 4s. 6d. to 7s. 10d. a metre.

ENTENTE TRADE LEAGUE.

Under the above title a new organisation has been created, with offices at 2, Broad Street Place, E.C. The Chairman of the Executive is Lord Desborough, and his colleagues on the Council include Colonel Sir J. E. Bingham, Sir William Crawford, Sir John Taverner, Mr. Richard Burbidge, managing director of Harrod's Stores; and Mr. John Lawrie, managing director of William Whiteley, Limited.

ATHENS SAMPLE ROOM.

Writing to *The British Trades Journal*, Mr. C. S. Butler, of Athens, analyses the above scheme, frequently referred to in the columns of THE NEAR EAST, and suggests that, in view of the endeavours now being made to increase the volume of British trade abroad, special attention should be paid to the creation of a show-room at Athens, "where samples of British manufactures could be exhibited and their merits pointed out to local importers, and, what is still more important, to the large number of Greek merchants from Turkey, Asia Minor, Egypt, and the various Balkan States, who at one time or another find their way to the capital of their Motherland." The writer then adds:—

"The obstacles in the way of the development of the plan have hitherto been twofold—firstly, the lack of the proper channels to make it widely known in Great Britain, and consequently in getting a sufficient number of manufacturers to take an interest in it; and, secondly, the difficulty in apportioning the ratio of expense to be borne by each firm desiring to make use of the show-room. Once started, this latter obstacle would be overcome, for the manufacturers or exporters would contribute in the proportion of the benefits derived by them.

"The case may be stated roughly as follows:—Business firms are in the habit of allowing commissions to their agents on orders influenced by them. Now, supposing that Firm A does a turnover of £5,000 in a year, meaning a commission of, say, £150 to their agents, and Firm B does only £200 worth, involving a commission of £6, A and B would contribute, nominally, £150 and £6 respectively to the funds of the show-room. But as the total sum in so-called commissions would probably far exceed the expenses, the balance would be divided up and credited to A and B in ratio of 50 to 2. Thus all exhibitors would pay their fair share of the expenses only; those doing a larger business paying more, and those doing a smaller business less. The advantages derived by the patrons of the show-room are obvious; they would save considerably on agents' commissions, and their samples would be constantly and publicly exposed in a manner that would be impossible in the offices of agents.

"The above is a rough outline as at present proposed, but there would, of course, be other considerations affecting the scale of contributions, such as, for instance, the amount of space occupied by the exhibits of various members. The chief difficulty, as I have already pointed out, lies in the starting of the institution, for no firm would be able to make an estimate of what their proper proportion in the expenses would be, not knowing in advance how much business they would do. It is for this reason that all members would have to contribute for the first year an equal sum, irrespective of their probable profits."

THE SITUATION IN SMYRNA.

Messrs. C. J. Giraud, of Smyrna, in their report dated September 9, review the situation of the local market as follows:—

"The whole situation in the country has been disorganised by the Government utilising for the movement of troops the two railway systems serving our town, and commandeering all forms of transport both in the town itself and all over the interior of the country. The suspension of all mail services practically throughout the month of August, and the severe restrictions imposed on the receipt and despatch of telegrams complete the existing chaos.

"Although the mail services are presently somewhat better organised, there is little improvement to report in the general situation. Gold is scarce, exchange is not negotiable, and where some sight drafts or telegraphic transfers are taken up, the rate of exchange for these operations represents a discount of about 15 per cent., adding thereby proportionately to the sterling equivalent price of commodities.

"Freights have been increased by 50 to 100 per cent. in some instances, and shippers have also to pay high rates for insuring war risks. All efforts to import gold from abroad have so far been fruitless."

Digitized by Google

SPECIAL TRADE OPENINGS.

We extract the following items from a list under the heading of Special Openings for American Trade which appeared recently in the *Daily Consular and Trade Reports.*

Athens.—Some of the principal import products include sheet iron, coal, paper, pharmaceutical preparations, dry goods in general, suitings, electrical supplies, hardware; and for Government, military equipment of all kinds, including motor trucks, automobiles, blankets, uniforms, field telephones, horses, matches. Market desired by Greece for sulphur oil, valonia, manganese, marble, emery stone, wines and brandies, silk thread, raw silk, sheep and goat skins, sponges, citrons, tobacco, olive oil, olives.

Salonika.—Market in need of cotton cabot cloth, drugs and pharmaceuticals. Ready for export: Opium, poppy, fennel seed, kid, lamb and sheep skins, wool, leaf tobacco.

The city of Athens probably supports more horse-drawn cabs in proportion to its population than any city of Europe except Paris. The more progressive cab owners have already gone over to motor cars and have profited greatly through the tourist trade. Places of interest in the interior, which formerly could be visited by travellers only by submitting to great discomfort, not to mention hardship, covering several days, are, since the advent of the motor car, merely one-day excursions. Thus far no taxicab companies have begun operations in Athens, although it is currently reported that an English company is about to establish a service. One feature of local conditions that should add to the success of a taxicab service is the distance separating Athens from its seaport, Piræus. A service between Athens and Piræus would contribute greatly to the convenience of travellers, and with the increasingly large number of tourists arriving in this port between the months of January and May should be a profitable venture.

COMPETITION WITH GERMANY AND AUSTRIA.

In connection with the campaign undertaken by the Board of Trade on the advice of their Advisory Committee on Commercial Intelligence to assist British manufacturers and merchants to secure trade formerly in the hands of German or Austro-Hungarian firms, the Board have received a very large number of inquiries for names of sellers or buyers of articles of which the sources of supply or markets have been interfered with by the war. Special arrangements have been made in the Commercial Intelligence Branch of the Board of Trade for dealing with the inquiries and lists are being prepared and circulated of articles which inquiriers desire (a) to purchase, and (b) to sell. The first and second lists were published on August 29 and September 18, respectively; the third list, in which is incorporated the first and second lists, is now ready and may be obtained on application to the Branch. Firms interested in any of the goods mentioned, either as buyers or sellers, should communicate with the Director of the Commercial Intelligence Branch, Board of Trade, 73, Basinghall Street, London, E.C.

TRADE WITH TURKEY.

On Friday, at a meeting of the Liverpool Chamber of Commerce, it was stated that the proceedings of the General Trade Committee included "a letter from the Foreign Office stating that the boycott of Christian traders in Turkey was a political quarrel between the Greek and Turkish Governments, but that his Majesty's representative might be relied upon to see that British trade did not suffer more than was inevitable."

BOARD OF TRADE BULLETINS.

The following bulletins were published during the past week:—Cotton yarns; straw plait and straw hats; linen manufactures, including yarns; scientific instruments and apparatus (except electrical).

Applications for copies of any of the above or of those published in our previous lists should be addressed to the Director, Commercial Intelligence Branch, Board of Trade, 73, Basinghall Street, London, E.C.

DRUG SHORTAGE IN EGYPT.

In connection with our reference two weeks ago to the shortage of drugs in Egypt, we read in *The Egyptian Gazette* that on September 14 a meeting of Cairo chemists was held to consider what measures should be taken to ensure that Egypt should be provided with a sufficient supply of the most necessary drugs. The following decisions were adopted:

1. To ask the Government to allow Egypt to share with British Colonies the same treatment in respect of the supply of drugs as is already in force in regard to coal.

2. To prepare a list of medicaments, drugs, and other necessaries of which the supply is likely to run short and to make the necessary arrangements for ordering these supplies from England or neutral countries.

There is a great shortage in certain pharmaceutical requisites, says *The Egyptian Mail*, the supply of which has hitherto been almost entirely in German hands, notably glycerine, boracic acid, amidon (starch), etc. As regards glycerine, such firms as hold small stocks are now asking about double the usual price. Importers have turned to Italian chemical manufacturers and these have increased their usual prices by 25 per cent., 15 per cent. of this increase representing the rates of Italian marine insurance. The great British chemical manufacturers have as yet made no apparent effort to secure the trade in these lines which Germany and Austria have lost. The position seems largely to be that, to secure it, the effort will have to come from them. With a present shortage in some lines, and a prospective one in others, local buyers have turned to the source from which they can receive fresh supplies quickest. That source is Italy. British manufacturers desirous of securing the business must canvass it by traveller or local representative.

THE ELECTRICAL INDUSTRY.

As has been rightly said, no section of British manufacturing is more eager to carry the trade war into the German domain of commerce than the electrical industry. The Near East will offer in this respect a happy ground for the expansion of our trade at the expense of the German A.E.S. and the kindred Austrian firms. In the past we were unable to stand up against Continental firms in Turkey, Roumania, Servia, etc., but with a little energy on our part we should soon be able to turn the tables to our own advantage. As *The Times* points out, it is not too much to say that our manufacturers of plant and machinery, cable and accessories, have long looked forward to "the day" when Germany should be debarred from continuing her unfair competition in this market. The knowledge that this was one of the most favoured trades in the eyes of Berlin officialdom; that the greatest electrical factory in Europe was a special *protégé* of the Kaiser; and that its operations abroad were backed by the financial resources of the leading bank and the diplomatic power of the Government made German competition almost hopeless to withstand. With for so many years no practical comradeship among British firms, it was as though each of them had singly to struggle in the market against the determination of the German Empire to dominate this trade. Orders went abroad from public authorities, from factories, rolling mills, collieries, all of which could have been just as well executed at home.

CHAMBER OF COMMERCE JOURNAL.

The current issue of the Chamber of Commerce *Journal*, which consists of forty-six pages of matter, sold at the usual price of 6d., gives interesting particulars as to the possibilities of competing, both at home and overseas, in various lines of goods hitherto supplied by Germany and Austria-Hungary. In this section of the *Journal* there are long and exclusive lists of concrete demands from firms requiring to purchase goods in place of those formerly obtained from foreign sources, as well as offers of home manufacturers to make such goods in addition to their usual lines of manufacture.

These lists can be of the greatest utility to British manufacturers, exporters, and merchants, and we recommend them to study them carefully. The mentioned trade opportunities in Italy and Spain will also be most serviceable.

BUSINESS CARDS.

The Cotton Crisis.

Proposed Reserve.

There has been considerable activity during the past week in circles interested in the cotton trade. Unfortunately, the irregularity of the mails prevents our publishing this week our customary Egyptian Notes.

World Crops.

In connection with the interview with Sir Charles Macara, Bart., published in last week's issue of THE NEAR EAST, the paragraph dealing with the difference in price between a 12,000,000 bale world crop and 16,000,000 bale crop, had best be illustrated as follows:—The supply of raw material is subject to great fluctuations as is illustrated by the American crop of 1910-11. In that year, as Sir Charles pointed out, the crop was 12,000,000 bales, the value of which in round figures was £185,000,000. In 1911-12, the cotton crop of 16,000,000 bales was only valued at £165,000,000, a falling off of roughly ½d. per lb., or £20,000,000 in the value of the whole crop, even with 4,000,000 additional bales.

Crop Restriction.

We wish again to draw special attention to the letter on "Egyptian Cotton Restriction," published in last week's issue of THE NEAR EAST. The writer, Mr. J. M. Mezger (by the way, owing to a clerical error, his name did not appear at the foot of the letter) takes up a strong attitude against the Egyptian Government's proposal to reduce the acreage under cotton next year. In this respect Mr. Mezger does but voice the opinion of Lancashire, and more particularly of that section of spinners who are the big purchasers of Egyptian cotton. We, therefore, recommend the arguments put forward to the serious consideration of the proper authorities, the more so, considering that, whatever divergence of opinion there may be as regards Sir Charles Macara's reserve scheme, both he and his opponents agree in condemning the hasty attitude adopted by the Egyptian Government.

AN AMERICAN PROPOSAL.

Sir Charles W. Macara received the following cablegram on Wednesday from Colonel R. M. Thompson, a prominent man in the American cotton world:—

"A movement has been started to take up and store in State-licensed warehouses in the South the surplus cotton of this year's crop, say five million bales, the warehouse receipts being made by legislation absolutely good for the cotton against all claims. The Federal Reserve Board is encouraging the formation of a banking syndicate to advance $150,000,000 on these receipts on the basis of $30 a bale, the cotton to be carried for one or two years. What, in your opinion, is a fair price per pound for the balance of the crop if it can be arranged that the loans be made with option to the lenders to sell cotton for account of borrowers when price advances above an agreed price? Would you favour the movement, and would it be possible to get subscriptions to stock of the corporation that is to stand between the producers and the banks and eventually to sell the cotton on commission?"

To this cablegram Sir Charles has sent the following reply:—

"Heartily support scheme for establishment cotton reserve which since war began have been urging British and American Governments to take up. Schemes to be effective must embrace cotton crop of the world, England being responsible for Indian and Egyptian crops, representing about one-third world's crop, and America two-thirds. England possesses 40 per cent. of the cotton machinery of the world and America about 20 per cent. Both Governments are vitally interested in preventing further serious losses to growers, cotton merchants, spinners, manufacturers, operatives, and distributers of cotton goods. Stable price of nine cents would do this. Cotton organisations, either national or international, could not cope with situation, which can only be dealt with by co-operation of two Governments named guaranteeing minimum price through ordinary commercial channels, with restrictions as to maximum to guard against gambling. Such guarantee would probably result in confidence being restored all round, which is so urgently needed to bring about revival of trade. Again with certainty of extended cultivation of foodstuffs to make up shortage caused by war and consequent reduction in cotton acreage, the reserve would ensure the running of English and American mills during next cotton season."

The Manchester Guardian, analysing the above, opines that the cablegrams will be read with interest by the cotton trade, although they are not likely to meet with general approval. It then argues as follows:—

"Sir Charles says quite rightly that if a cotton-holding scheme is decided upon it must embrace India and Egypt, as well as America, and it must be done by the British and American Governments. We need not point out again all the difficulties there are in the way of Government action, and especially the financial one, for that is obvious. Sir Charles Macara speaks constantly of establishing a cotton reserve. That, however, needs no establishing. The cotton is in existence, and there is bound to be a surplus, or reserve, at the end of the season. The practical question seems to be whether it is desirable to have a share of it here, under our own control, and whether it would be a dead-weight or a steadying influence upon prices as long as it existed. Sir Charles Macara's idea, we understand, is that the two Governments should deal with the crops as the British Government has done with sugar—that is, buy them up and sell what is required through the usual channels, giving those who do the work fair remuneration, but imposing both a minimum and a maximum on prices. His idea of a proper price is 9 cents in America. The idea of the growers is that they should have 10 cents, which would cover their expenses, but would leave little or no margin of profit. There is, as far as we can see, no chance whatever of their getting 10 cents now, and in view of their recent falls in prices in the South it seems very doubtful whether Lancashire spinners as a whole will endorse a scheme which aims at 9 cents as a minimum. There is a great fear, no doubt, of the consequences of heavy depreciation in stocks, but those who are not exposed to that danger will certainly clamour for cheap cotton and will resist the use of a big sum of public money to defeat their object."

THE LANCASHIRE MARKET.

On Tuesday *The Financial Times* devoted its leading article to the cotton trade crisis, from which we reproduce the following extracts:—"The condition of the Lancashire trade seems to be growing worse, and as existing contracts are worked off mills are closing down and the output is steadily decreasing. The position has been complicated by the heavy fall in the price of raw cotton, the quotation for "Middling American" being now over a penny lower than at the outbreak of war, and showing a fall of over 2d. since the beginning of July, equal to nearly 30 per cent. Such a drop is sufficient to disorganise any industry, and while the Lancashire spinners and weavers are sufficiently badly hit by the falling demand, the position as regards the growers in the United States, Egypt, and India is very nearly as serious. In each of these countries petitions have been made for Government aid to help planters over an exceptional crisis. . . . The New York *Commercial and Financial Chronicle* admits the difficulty, but considers that the South ought to be left to work out its own economic salvation. This authority puts the probable total cotton crop in the United States at well over 15,000,000 bales, but even higher figures are being talked of owing to the exceptionally favourable weather conditions. Taking the crop at 15,000,000 bales, the *Chronicle* estimates that there will be a surplus of from five to six million bales of this season's crop to take care of, while the price has fallen from 13 cents to 8 cents. . . . From the point of view of the Lancashire trade the danger is that the crisis may lead to a very large reduction in the area planted with cotton, and that a temporary glut may be followed in a year or two by an equally severe shortage."

MANCHESTER MARKET.

(FROM OUR OWN CORRESPONDENT.)

MANCHESTER, October 14.

The tone in the market during the past week has continued decidedly flat, and it is impossible to say that the prospects are brighter. The waiting policy which has been adopted by buyers for many weeks is still very pronounced, and no news is coming through which is likely to bring about a change of attitude on the part of our customers. Matters are very irregular with regard to the raw cotton situation, and official prices in this country remain on an artificial level. There is not much alteration in the outlook for supplies in the raw material. Very few offers have been met with in piece goods for export. Inquiry for India has been of quite retail dimensions, any bids put forward being quite out of the question. China has done scarcely anything, and advices from Shanghai are not at all encouraging. One or two of the minor outlets of the Far East, such as Singapore and Java, have provided odd lots. A little business has been mentioned for Greece, but for the Levant and Egypt the position leaves much to be desired. Speaking generally, the home trade is giving more active support at the moment than shipping. From time to time fair Government contracts are placed, and certain manufacturers in this way experience a little relief. There is a tendency for less weaving machinery to be worked, and unemployment is increasing.

ALEXANDRIA REPORT.

The Alexandria General Produce Association in its monthly crop report, dated October 6, says:—

Lower Egypt.—Though not unfavourable to cotton plants the temperature during September has been, however, somewhat irregular, with several cool nights and days. The bollworm is reported everywhere, and in some localities the pink bollworm is reported in large quantities. Some very heavy fogs and mists have also been reported. These various factors caused a certain amount of damage, which seems to be somewhat greater than in 1913. First picking has begun, and should have been as in 1913 had not the general situation caused delay. Results seem to be about equal to those of 1913, but second and third pickings will apparently give an inferior yield to 1913. Most of the ginning factories not having begun working, ginning yields are not yet known, but from information received it seems likely to be considerably less than in 1913.

Upper Egypt and Fayoum.—Temperature has not been favourable, being colder than usual; frequent mists and bollworm have caused some damage to pods of first and second pickings. Owing to the financial situation first picking progresses slowly, and is therefore later than usual; results seem to be about equal to 1913. As regards second picking it seems it will be of inferior quality, but the out-turn will depend largely on the temperature during October. Owing to the small amount of cotton ginned up to date it is not possible to estimate the ginning yield, but it seems likely it will be considerably less than in 1913.

OFFICIAL STATEMENT.

The Egyptian *Journal Official* of September 22 contains a Decree restricting the area of cotton cultivation to 1,000,000 feddans (about 1,038,000 acres) during the 1915 season. It is explained that this step is taken in view of the present limited demand for cotton, and the possible rise in the price of cereals. Cotton cultivation in the basin lands of Upper Egypt is entirely prohibited. It is forbidden to devote more than one quarter, or, where the land is unsuitable for growing cereals, one-third, of estates to the cultivation of cotton.

The following were the quantities of cotton manufactured piece goods exported to the countries of the Near East in August last, as compared with the corresponding period of the two preceding years:—

	1912. Yards.		1913. Yards.		1914. Yards.
Greece	4,334,000	..	2,424,300	..	1,693,800
Roumania	3,771,100	..	582,800	..	1,127,100
Turkey	47,168,600	..	28,182,900	..	10,082,300
Egypt	20,581,000	..	27,193,000	..	9,812,000
Persia	6,619,000	..	2,378,000	..	1,628,600
Anglo-Egyptian Sudan	—	..	—	..	385,60

Cotton Cultivation in Palestine.

(By Our Haifa Correspondent.)

In connection with the successful experiments for testing the cultivation of Egyptian cotton in various districts in Palestine over a period of three years, it will interest British cotton cultivators to learn something regarding the prospects. The experts who were carrying out the experiments affirm that there are many tracts of land in Palestine quite suitable for cotton growing, and that some of them are similar to Upper Egyptian lands.

The Eastern Ghor lands have been pronounced the best for cotton cultivation, and efforts have been made to form a company with a view to collect the necessary funds to enable operations to be started without delay. Having studied the project thoroughly and collected reliable information from authoritive sources, I propose to deal at some length with the subject in order that readers of The Near East may be informed of the prospective developments of cotton cultivation in Palestine.

Eastern Ghor Lands.

These lands have the advantage of being situated on the Haifa-Damascus Railway line, two hours distant from the former by train. Their northern extremity is the Beesan Station. They stretch about two kilometres southwards beyond the Zarka river, and are bounded on the west by the Jordan river, and on the east by a chain of hills which rise gradually to a mountain. The whole region is about forty kilometres from north to south, and four kilometres in the opposite direction, and is composed of two plateaux. The one which adjoins the hills is larger and varies in width from three to three and a half kilometres. It extends in one plain running from east to west. This is followed by a fall of about 20-50 metres. The second plain runs alongside the Jordan valley. The continuous smooth level of the plateau, however, is broken up by a few ravines and dunes.

Nature of the Soil.

The soil of the higher plain is loamy black and free of gravel. Its fertility is evidenced by the high wild grass and growing wheat, but it is poorly cultivated, not more than 25 per cent. of the area being used for wheat, which, in spite of the shallow ploughing, looks very healthy. The rest of the land is in a state of neglect; it is left for grass which is used for cattle grazing. The lower plain, which forms the borders of the Jordan, is of a black rich soil; very little of it is used for cultivation.

Irrigation.

Four springs emerge from the hills and traverse the region from east to west. They are diverted in some places for irrigation purposes, but if properly canalised would be sufficient for winter irrigation. One-third of the upper plateau can be watered during the summer, and the lower can be watered during the summer in two different ways—viz., by pumps from the Jordan, the lift being from two to three metres, and by gravitation if a dam at a small cost is built in the Zarka river, which commands one-third of the whole area.

The fall of the two plateaux facilitates their draining into the Jordan, which runs down the valley on the edge of the property.

The temperature is favourable for cotton cultivation; it is almost like that of Upper Egypt. The upper plateau, 200 metres below sea level, is cooler and airier; the lower bed is 250 below sea level.

The soil is excellent for cereals, vegetables, and cotton. Cotton has been tried lately and has given satisfactory results. There are cotton crops now near the Jordan river on the opposite side. In the lower as well as in the upper plateau cotton cultivation is being carried on, and in both is doing well.

Labour.

Manual labour is quite abundant. If houses and proper accommodation are prepared and facilities accorded to the ignorant peasants for finding their cattle and cultivation requirements, such labour will greatly increase.

However, taking the country as a whole, labour is rather scarce in view of the continual and persistent emigration of the fellaheen wishing to escape military service. Nevertheless, those who start business on a proper basis will have as many hands as required. The fact must not be overlooked, however, that if machinery is used for ploughing, as will be the case by and by, less hands will be wanted than at present. Wages vary from one to two shillings per day, with about half this sum for boys and girls.

System of Working.

There are two systems for working these lands. The first is to give out the land on the leasing system to be paid in kind—*i.e.*, the peasants provide everything and the landowners take from 30 per cent. to 40 per cent. of the annual production.

The second system is for the lands to be worked by their owners, hand labour to be paid partly in grain and partly in cash. Failing this, labourers can always be paid in cash.

Not many houses exist at present. Houses for managers and cottages for labourers can be built on the adjoining hills, where the heat is not so excessive and nights are pleasant.

On the western side of the Jordan the Government owns land, but the lands on the eastern side have a better supply of water. The former are owned by Bedouin chiefs who live on the mountains above the plains.

The whole area of the two plateaux is about 35,000 acres, of which 15 per cent is uncultivable. About 15,000 have been offered for sale. The remaining 15,000 acres are separate, but can be easily acquired if a good price is offered. The Government land domains are in great demand by many companies. They are supposed to be very good cotton lands. It is stated that the would-be purchaser is offering to pay £10 a feddan for these Government domains.

The following table shows clearly the expenditure that has to be incurred to carry the Ghor enterprise into effect:—

	£ Sterling.
Permanent Capital:—	
To complete the purchase of land	20,000
For buildings and canalisation (£1 per acre)	15,000
Working Capital:—	
Price of machinery, etc.....	15,000
Rolling working capital.....	10,000
	60,000
Yearly Net Profits:—	
14,000 acres cereals (£1 10s. per acre)	21,000
1,000 acres cotton (£6 per acre).....	6,000
	27,000

The above is calculated on a minimum average for the first few years only. Revenue will increase yearly, and may come to double the above between the fifth and the tenth year.

For further particulars concerning the Ghor Estate apply to the offices of The Near East.

An agent of the Bradford Manufacturing Company at Mersina, writing under date September 15, states that "there is not an order to be had in the whole place. Further, the Customs will not release any parcels, but keep them for the military."

DELICIOUS COFFEE.
RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

BAGHDAD FRUIT.

"The conditions of climate, abundant water supply, and freedom from insect pests" (writes Mr. F. W. Popenoe, in *The Gardiner's Chronicle*) "Baghdad seems preeminently suited to fruit culture. With its vast undeveloped resources Mesopotamia has much to expect of the future, and in the development of its fruit industries should be given the attention it deserves." The following are particulars concerning some Baghdad fruit as referred to by Mr. Popenoe.

Dates.

The culture of the date is the most important horticultural industry of Baghdad. It has been roughly estimated that there are, in the district contiguous to Baghdad, one million palms. The plantations vary in size from a few acres, or even a few trees, to the immense property of the late Kazim Pasha, seven miles above the city, whose extent the Arab describes by saying that one can enter it at sunrise, walk all the morning, and not have reached the other side by noon.

Water is drawn from the river by means of a primitive contrivance called the *kirid*. In a few of the plantations oil engines, introduced by an enterprising European firm in Baghdad, have displaced the *kirid*, and have made a decided hit with the Arabs.

With the exception of the famous Khalaseh date, produced in the Turkish province of Hasa in Eastern Arabia, the dates of Baghdad are the finest in the so-called Persian Gulf region. Furthermore, there is probably no other region in the world where so large a proportion of all the varieties cultivated are of excellent quality. Zahidi is the most extensively grown of all varieties. It is not a high-class date, and has only obtained its popularity because of the fact that it is extremely productive. It has the advantage that the fruit can be sold either soft or dried; in the soft or fresh state it is called Zahidi Kursi, while the dried fruit goes under the name of zahidi yabis. Next in popularity comes khustawi, an excellent soft date, rather small in size, but of excellent, rich flavour. It cannot approach in quality either sukkari, maktum, or tabirzal, the choicest varieties of the region, but these, with the exception of maktum, are rarely offered for sale. Asharasi, a large dry date, is also popular, and must be classed as one of the finest dry dates in existence.

Oranges.

Next in importance among commercial fruits comes the orange. Baghdad oranges are famed throughout the Persian Gulf. Nearly all grown in Baghdad are produced as subsidiary crops under the date palms. The reason for this is not economy of space so much as the necessity of giving the trees some protection from the occasional sharp frosts of winter. The Baghdad orange—*portugal* it is called by the Arabs—is a brightly coloured, thin-skinned fruit, with few seeds and abundant juice of excellent flavour.

Limes and Lemons.

Several other citrus fruits are fairly common. The most valuable is probably the *lumi hamith*, or lemon, of which the local variety, although rather small and somewhat seedy, is not to be sneered at. The sweet lime or *lumi halu*, a fruit that is absolutely tasteless to a European, while to the Arab it is far and away the best of the citrus tribe; is scarcely as common at Baghdad as it is on the borders of the Persian Gulf. Its large size and bright appearance are very attractive, but the pulp, although extremely juicy, has almost no flavour except an insipid sweetness. In addition to these, one sometimes sees the *narinja*, or mandarin orange, and also the *turunja*, or citron.

Pomegranate.

In late autumn the pomegranate is almost as popular as is the orange during the winter. Most of the fruit sold in the Baghdad bazaars is said to be brought in from the surrounding towns, although the shrub is grown in almost every Baghdad garden. A number of varieties exist, some of them being of good quality, though it is doubtful if any of them are as fine flavoured as the masqat pomegranates. Neither do they show any tendency to become seedless, as is claimed for some varieties both in Southern Spain and Afghanistan.

Near East Markets.

PERSIAN AND TURKEY PRODUCE.

Messrs. F. W. Bowyer and Bartlett report for the month of September :—

Gum Arabic.

Owing to a sudden demand at the beginning of the month, prices advanced for ordinary Kordofan sorts, and a large business was done up to 60s. per cwt., since which time arrivals of fresh supplies have had the tendency to lower prices, which are now down again to 50s. per cwt. Good white selected and soft kinds have not moved to much extent in price, and can still be bought at 60s., 67s. 6d. per cwt.

Gum Tragacanth.

Although not large, a steady business has been done during the month, and practically all fine and medium grades have been cleared from the market at very extreme prices. The present remaining stocks appear heavy, but the selection and quality is so poor that it does not attract buyers. Stock 10,110 packages

Opium.

Since our last report the Government has endeavoured to assist business by granting permits for the exportation of opium whenever practicable, which naturally has stimulated both buyers and sellers, and whereas last month there were many sellers and no buyers, the position is now reversed. Druggists.—The demand for this description of Turkey opium has been almost entirely from America, and a good business has been transacted at considerably advanced prices—viz., 19s. to 19s. 6d. for 11 per cent.; and 20s. to 20s. 6d. for 11½ per cent. "Soft Shipping." —Owing to the difficulty of obtaining opium from Turkey, there has been a considerable inquiry in this market for this class of opium, but as the small stock is very firmly held, business in consequence is restricted. To-day's quotations are : Good to fine, 21s.; and finest, 22s. 6d. and 23s. per lb. Persian. —Owing to the export of Turkey opium from this country to America, manufacturers here are using Persian for making morphia and its various salts, and in consequence there has been a good demand for 9 per cent. and over; the prices ruling to-day are : 10 per cent. at 18s., 9 per cent. 16s. 9d. and 17s. 3d. and lower 14s. 6d. and 16s. 6d., according to quality.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending September 25 :— Since forwarding our last report of the 5th inst. some 150-160 cases of opium have been shipped to London and New York, mostly on consignment for account of our holders. Some opium, however, has been bought by shippers to fulfil old engagements or fresh orders that may have come now, but for these 24s. has been paid for extra Carahissar selected, and 19s to 22s. for lower grade mixed goods. The export price of opium has advanced owing to the abnormal low exchange existing, which obliges the merchant to sell his London cash draft at a loss of 20 to 25 per cent. The sowings have not began, and owing to the disturbed state of the country no sowings of opium will be carried out this year except what the peasant women and children can do. Anyway, we may from now reckon on a very short crop of opium next year; therefore the article will maintain very high figures, if even the moratorium is off and exchange on London recovers its usual rate. The arrivals are 1,171 cases against 3,025 at same date last year.

The London correspondent of *The Manchester Guardian* says that, in spite of the heavy demands for opium for war purposes, there are still large supplies available for general use. There has been no advance in the price of Persian opium, and Turkish opium has only gone up a shilling or eighteenpence a pound. Imports are arriving almost weekly, and a ship due to reach England on Saturday has 118 cases on board, weighing about 160 lbs. each. One of the largest opium brokers in London has about a thousand cases to sell at present.

FRUIT REPORT.

Messrs. C. J. Giraud and Co., of Smyrna, report as follows under date of September 9 :

Sultanas.

Arrivals so far are exceedingly small. It is estimated that barely 1,800/2,000 tons have come to market, mainly from the immediate surroundings of Smyrna Under normal conditions at least 10,000/12,000 tons of fruit should have been available for shipment.

Reports from all districts concerning the outturn of the vines are distinctly unfavourable. A very heavy percentage of the yield at Cesme, Fokia, Caraburnu and Vurla has perished owing to lack of hands. Farmers are everywhere encountering great difficulties in the collection of their crop, and as the vines are also yielding poor results it is feared that the eventual quantity of fruit that will be gathered in will not exceed some 30,000 tons.

Shipments to date have been as follows :—

S.s. "Andalusian," for Liverpool, about 14,000 boxes.

S.s. "Crios," for New York, about 2,500 boxes.

S.s. "Doravore," for London, about 65,000 boxes.

In the above shipments some 10,000 boxes of last season's fruit are included. The s.s. "Antonio" is now loading for London, and it is reckoned that, inclusive of transhipments for United Kingdom outports, Australasia, etc., some 70,000/80,000 boxes will be shipped.

Figs.

First arrivals were timed to reach the market for August 21, but consequent on the unsettled conditions prevailing farmers have been compelled to withhold supplies.

The first figs reached market yesterday morning, consisting of a tentative lot of 1,200 loads. Qualities on the whole show well, a portion of the fruit, however, being tender, having remained in bags some three weeks, pending despatch to market. Comparative arrivals to this date last season amounted to 24,288 loads. So far no business has been done, packers still hesitating to buy owing to the financial difficulties existing. The packing of figs is an expensive process, and unless means can be found to raise cash resources it is to be feared that the few packing houses that will open will before very long find themselves under the necessity of closing down. The bulk of the crop will doubtless have to be slowly exported in bags in a natural condition.

Some 25,000 loads have already been gathered in the various producing districts, but unless farmers obtain more encouragement shipments to Smyrna will be of limited volume and may occasionally be suspended.

Prospects.

The summary we have given above exposes in some measure the difficulties facing shippers and the disastrous conditions with which farmers have to contend. In view of the expulsion from this province of thousands of hardy Greek farmers, the inadequate return which the vines and fig orchards are likely to give to their proprietors, the scarcity of money, and other conditions which are too well known to be enumerated, agriculture and fruit farming are likely to receive a set-back, the consequences of which will certainly be reflected for some years.

Within the first three weeks of the season we have shipped or are shipping a quantity of some 45,000 boxes and cases. Market at present is decidedly firmer, and we believe that prices are likely to advance very considerably before long.

ALBERT SINGER
KHARTOUM SUDAN

EXPORTS OF GUM ARABIC AND SUDAN PRODUCE.

Agency for firms desirous of introducing their brands of goods into the Sudan.

Established 1900.

PRODUCE REPORT.

Sugar.

London, October 15.

Owing to a feeling of uncertainty as to the course of action with regard to Government sugars, buyers are not operating with freedom, and the market has been rather quiet, with little doing. British refined is still very difficult to secure owing to the Government requisitions. Quotations are :—Tate's cubes, No. 1, 33s. 6d.; Lyle's, No. 1, granulated, 30s. 6d.; No. 2, 30s. Foreign refined in second hands is selling as follows :—W.S.R., R.T., and Meyer's cubes, 33s. 6d. First marks, granulated, 30s. 6d. American granulated, Oct. shipment, 23s. 9d. c.i.f.; Italian crystals shipped sold at 23s. c.i.f.

Coffee.

A very poor demand is being experienced this week. Prices ruled rather irregular, mainly due to consideration of quality, but on the whole there was but little alteration to note. Washed Dumont medium to bold was sold at auction on Tuesday, 54s. to 60s.; unwashed bold, 55s.; Colombian mid. to good mid., 56s. to 66s.

Currants.

In spite of prognostications, no excessive quantity of currants is in prospect of shipment to this country. Arrivals up to the present have been mostly cleared, and only a small assortment is at present on offer on the market. Prices, however, are slightly in buyers' favour, as merchants desire to avoid holding stocks for the present. Provincial is somewhat unsatisfactory, but all other growths fully maintain the first promise of excellent quality. Provincial are quoted 24s. to 25s., Amalias 25s. to 26s., Patras 26s. to 28s., Vostizza 28s. to 36s., Island 28s. to 29s., and Smalls 27s. to 33s.

Sultanas.

There is a good demand, but buyers are cautious. It seems, however, that for the present, at least, no excessive supplies will be received here, as the world's demand, apart from Germany, is active, and only checked by some curtailment of general shipping facilities. Prices, in the meantime, are unchanged, Smyrna from 21s. to 60s., Greek 40s. to 50s.

Figs.

Figs sell somewhat slowly, high prices being asked for the recent arrivals per "Antonio." The market will, however, soon be fully supplied.

Dates.

There is no definite news of new crop being shipped at present. Spot prices continue steady. Persians are quoted to-day 12s. 6d. to 14s.

Seeds.

Linseed market is rather slow; London-Calcutta spot and afloat, also for shipment up to Nov.-Dce., 43s. asked. Rapeseed is quiet, but well held for late rates. Cottonseed has been fully steady; London-Egyptian loading is quoted £8 2s. 6d., and new crop Oct. £8 5s.; Bombay to Hull spot £6, and Sept.-Oct. £6 3s. 6d. per ton.

Oilcakes.

Linseed cake has been in a better demand, and it is generally anticipated that as the winter approaches prices will harden, so that crushers and holders are already demanding a premium for future delivery, while, on the other hand, spot values remain quiet but steady. Best London made £8 10s. to £8 15s.

SERBIA'S UNINTERRUPTED EXPORTS.

A Reuter's message, dated October 14, from Nish stated that the following semi-official communique has been published :—"Austria-Hungary is threatened with famine, and the Chambers of Commerce and Industry have urged the Government to abolish the import duty on foodstuffs of all kinds. On the other hand, the Serbian Cabinet considers that the cattle and foodstuffs in Serbia are more than sufficient to continue to allow the export of cattle in general and of foodstuffs, such as beans, peas, cheese, etc. That shows the inaccuracy of the recent Austrian communique which talks of famine in Serbia."

Shipping Intelligence.

THE DARDANELLES.

The following is an extract from a leading article, entitled "The Dardanelles Must Be Free," which appeared on October 7 in *The Shipping World*. Referring to the closing of the Dardanelles for "an unstated period of time and for a reason that we are told is genuine," the article states that the reason cannot be commercial, and if it is naval and military, it is suspect. It then asks :—

"What naval and military reasons are there to induce Turkey to take such a step at this moment? The Powers of the Triple Entente have clearly intimated that they will respect her national and commercial integrity provided she observes neutrality. Even during the Balkan War two years ago, when Turkey was a belligerent, the Dardanelles were closed only for a portion of that period, and the waterway was thrown open because of the protests of the neutral world of trade and shipping. Similarly to-day Turkey must recognise at once the necessity for throwing and keeping open such an important artery of oversea trade. The Dardanelles must be free, even in a larger sense than is the Suez Canal. It is a natural channel, and the only one for the seaboards of three or four nations. There is no alternative waterway. As the sole entrance to the Black Sea it should be for all time an international sea route, free to the ships and commerce of every nation

"At the moment Bulgarian vessels may not go from their home ports of the Black Sea to their home ports on the Ægean; and there are greater anomalies in the treatment meted out to Greek and Russian interests The complete internationalisation and neutralisation of the Dardanelles seems to be demanded by every argument that can be adduced; and certain it is that Turkey's genuine reasons for closing the Straits will require to be more definite."

The *Moniteur du Pétrole* (September 20) states that during the past two months only two oil tank steamers were loaded at Constantza: on August 20, the British s.s. "Aral," for France, and on September 9 the Dutch s.s. "Mydrecht," for Egypt. These boats remained several weeks at Constantza, owing to the insecurity of the passage through the Dardanelles. German and British oil tank steamers are not circulating, the former for obvious reasons, and the latter, with the exception of the "Aral," because of the situation in the Dardanelles.

GREEK HULL DAMAGED.

The Greek steamer "Anastassios Coroneos" (says *Syren and Shipping*) is reported to have sustained serious damage during an attempt to float her after she had gone ashore. The point in connection with the accident is whether the claim will fall under general average or particular average. This cannot be ascertained until the surveyor's report and opinion is to hand. The vessel's hull is insured in London for £12,000.

RUSSIAN NAVIGATION COMPANY.

Until further notice a boat will leave Constantinople direct for Odessa every Monday, Wednesday, and Saturday. A boat from Constantinople will leave every Thursday and Sunday for Bourgas, Varna, Constantza, and Odessa, and on Tuesday and Friday one will leave for Heraklea, Samsoun, Kerassund, Trebizond, and Batoum.

NEW ELLERMAN LINER.

The steel screw steamer "City of Florence," built at the Hebburn shipyard of Palmers' Shipbuilding and Iron Co., Ltd., was taken to sea for her trial trip on Tuesday, says the Newcastle correspondent of *The Journal of Commerce*.

The vessel is about 422 ft. long, and carries a deadweight of nearly 9,000 tons; she is classed 100 A1 Lloyd's, and has a cruiser stern and two complete decks, with poop, bridge and forecastle; water ballast is carried in the cellular double bottom all fore and aft; also in deep tank adjacent to after engine room bulkhead; she has six large cargo hatches to holds and 'tween decks; side girders and built pillars fitted to give clear space for shipping heavy cargoes; accommodation with saloon is provided in large deck house at fore end of the bridge deck, with captain's and chart room in house above; the engineers' accommodation is in the house built around the aft end of the engine room casing on the bridge deck; the petty officers, etc., are in the aft end of the bridge; and the Lascar crew of firemen and seamen are berthed in the poop; Marconi house for wireless telegraphy is fitted on the bridge deck; special attention has been given to the derrick arrangement for the quick handling of the cargo, and the vessel has thirteen steam winches.

She is fitted with triple expansion surface condensing engines of 48 in. stroke.

The steamer was taken for several runs over the measured mile, and carried through a series of circle trials and anchor gear with perfect satisfaction; the engines worked very smoothly throughout, and the trials were in every way successful.

NEW STEAMSHIP SERVICE TO JEDDAH.

The U.S. Vice-Consul at Dalny, the Japanese leased territory in Manchuria, reports that the South Manchuria Steamship Company has inaugurated a steamer service between Singapore and Jeddah, Arabia, covering about 4,000 miles, principally for transporting Mohammedans travelling on religious pilgrimages. The steamers will be the "Teikoku Maru," 4,997 tons, and the "Hokoku Maru," 5,300 tons. Such service has been maintained exclusively by the British-India Steamship Navigation Company and the Blue Funnel Line, both of which annually carry about 700,000 Mohammedans.

"BRESLAU" IN THE BLACK SEA.

According to a Central News telegram from Bukharest, the cruiser "Breslau" arrived off Sulina on October 12. Her commander, a German, declared, "with a menacing air," that he had come to escort the German steamers "Seresos" and "Leros" carrying materials for Constantinople. Eventually the two steamers left Braila under the "Breslau's" protection. Their departure was reported by wireless to the Russian fleet.

EGYPT'S COAL IMPORTS.

The following are, according to Messrs. R. J. Moss and Co., of Alexandria, Egypt's imports of coal from January 1 to October 1, 1914 :—

	Tons.
Welsh	435,922
Newcastle	182,619
Scotch	18,836
Yorkshire	94,801
Other qualities	188,392
Total	1,021,560

as against 1,095,016 tons for the same period last year.

BY APPOINTMENT.

JOPP'S BLEND

Old Highland Whisky.

AGENTS for EGYPT and the SUDAN:

COMMERCIAL & AGENCY CO. OF EGYPT, LTD., Alexandria & Cairo.

NEWS FROM ALL SOURCES.

The value of British imports in September was £45,051,937, a decrease of £16,303,788, or 26.6 per cent., as compared with September, 1913; whilst the total exports amounted to £31,948,142, a decrease of £17,329,735. The exports of produce and manufactures of the United Kingdom show a decrease of £15,750,763, or 37.1 per cent., as compared with September, 1913; whilst there is a decrease of £1,578,972, or 22.9 per cent., in the exports of foreign and colonial merchandise.

The offices of the British India Steam Navigation Company have been removed to 13, Leadenhall Street E.C. Telephone, 17,377-8 London Wall.

The Russian naval bases in the Black Sea (says the Naval Correspondent of *The Morning Past*) are "Sebastopol and Nicolaieff, in which foreign firms are employed, the British firms being Messrs. Vickers and Co. and Messrs. John Brown and Co. Messrs. Vickers own a concession to establish gun works at Tzavitsyn, in the Volga. The concession is being worked by the Russian Artillery Works Company, which has the sole right to manufacture naval guns and field artillery after the Russian Government." On the other hand, Messrs. Sir W. Armstrong and Vickers, Ltd., have the concession for the Turkish arsenals and docks, as mentioned in another page of the current issue of THE NEAR EAST.

The Alexandria correspondent of *The Morning Post* states on October 8 that a Judge had arrived from England, and was making arrangements for holding a Prize Court in Egypt. The status of enemy ships at Port Said and Suez is under consideration. They received permission to depart, but refused.

At the meeting of the council of the British Cotton Growing Association, held on the 6th inst., it was reported that in view of the present financial troubles, and the low price of cotton, it is feared there may be some difficulty during the coming season in buying and financing the Uganda cotton crop, which is estimated at about 50,000 bales, and a scheme has been drawn up by the Association, whereby all the necessary funds can be obtained, amounting to about £600.000, and which will ensure that the native producers will be able to market the whole of their crop. The scheme has been submitted to the Government for their approval, and is at present under consideration.

We have received a booklet on the subject of "Alternative Benefits for Children," of which the perusal will fully repay the average parent. How best to provide for the younger generation is an anxious problem. The booklet shows the most convenient, safest and most economical method of solving the problem. It is issued by the North British and Mercantile Insurance Company. The exposition of the advantages of the endowment policies offered by this well-known Office and the well-arranged tables setting forth the terms give all the information wanted. As this particular department of insurance business is for the benefit of children the booklet includes a coloured pictorial and rhyming alphabet.

The Commercial Agent for Roumania in London has forwarded to the Board of Trade the following list of articles the exportation of which from Roumania is prohibited according to a communication received from the Roumanian Ministry of Industry and Commerce dated August 28 :—Carriages, carts, automobiles, horses, oxen (vehicles and animals for transport in general); wool; gold coin of any kind; all kinds of packing material; oats, hay and other fodder stuffs; foodstuffs, either amimal or vegetable (except barley, wheat, maize, and the flour thereof, peas, lentils, colza, linseed, millet seed, sunflower seed and bran); residues of petroleum; haricot beans; sulphuric acid; and all pharmaceutical products.

The Board of Trade are in receipt, through the Foreign Office, of a telegram from H.M. Minister at Bucharest, dated October 3, reporting that the exportation of flour from Roumania has been prohibited.

Engineering Notes.

Board of Trade Bulletins.

In dealing here with the engineering trade, as well as with other trades in the Near East, it is expedient to point out to British manufacturers and shippers that the information given in the bulletins issued by the Board of Trade is based on trade returns during the years 1910, 1911, 1912, and 1913. As it happened, these four years have been the most critical in the history of the countries in the Near East; for during that period there has been the war between Turkey and Italy, which was soon followed by the war between Turkey and the Allied Balkan States, which was again followed by another between the Allies. These desperate wars had, of course, affected directly and indirectly all sections of the commercial, industrial, and agricultural communities of the belligerent, as well as their neighbouring, States in the Near East. Yet it is noteworthy that the figures given in the Board of Trade bulletins, as representing the import trade of these countries, although nothing is mentioned of the abnormal state of affairs existing there, have been admitted as very appreciable. With these remarks we wish to suggest that in considering the opportunities of capturing German trade in the Near East, British manufacturers, and especially engineering manufacturers, and shippers should bear in mind that the purchasing power of those markets is much greater than represented in the bulletins which, as mentioned already, are based on returns dealing with abnormal times.

Combustion and Explosion Motors

In stationary combustion and explosion motors Germany has been doing very good business throughout the Near East, but particularly in Roumania, Egypt, and South Russia (districts east of Black Sea). In 1912, when war was going on in the Balkans, we see that Roumania bought such motors from Germany to the value of £96,000; Bulgaria, £14,000; Greece, £8,000; Turkey, £14,000; Egypt, £52,000; and Russia, £452,000. The latter country is included here because we calculate that at least one third of the above sum represents the value of motors which, through the Black Sea ports of Batoum, Poti, Novorossisk, Nicolaieff, etc., went to the inland fertile and prosperous districts of Southern Russia. These districts, which use more engines and machinery than any other part of the Russian Empire, were, in years past, like their neighbouring districts of the Levant, great buyers in the English machinery markets. The same changes, however, that happened in the other countries of the Near East happened also in these important districts. The Germans came upon the scene, and, having found the points at which it was possible to attack the British engineer-manufacturers, were soon able to oust them. Additions or alterations to suit local conditions and designs, allowing a reduction of prices, have helped them in their success. They offered what was required, and they succeeded. In Roumania, for instance, oil engines working on benzine are preferred, while in Serbia, Bulgaria, Asia Minor, South Russia, and Greece, engines burning crude oil or ordinary paraffin are more suitable. Local conditions should be studied by the manufacturer, as, often buyers from those regions, having no technical knowledge, order "an oil engine of such or such power," and leave the details to the maker. Small power engines, from 2 to 20 h.p., are more in demand in Bulgaria, Greece, Turkey-in-Europe, Syria, and the Ægean Islands. In the price of this class British makers are, as a rule, beaten, for they usually built 4-cycle engines, while their competitors built 2-cycle engines up to 20 or 25 h.p., which allows them to sell at much cheaper rates than the British can.

Steam Engines and Boilers.

In this line, again, the Germans have made considerable progress during recent years, and now supply countries in the Near East which have been supplied before exclusively by England. In the class of portable engines for agricultural purposes the question of fuel is of great importance. Coal is very expensive, in some districts costing £1 10s. and sometimes £2 per ton. The arrangement, therefore, of supplying such engines with an enlarged fire-box for burning straw is very suitable for Roumania, parts of Serbia, and Russian districts; while for Greece, Bulgaria, Turkey, Syria, and the Islands, where the straw is required for fodder, and is as valuable to the farmer as the grain itself, the fire-box should be constructed to burn wood and coal when required. The same may be said for stationary boilers that are to be used in inland districts of the above-mentioned countries. Wood is plentiful and cheap, and boilers constructed for such fuel are much appreciated.

Pleasure Cars in Greece.

We extract the following from a report by the U.S. Consul-General at Athens:—"In the line of pleasure cars American makers have already begun to cultivate the Greek market with some success. Most of the cars, however, are of French, Italian, or German make, and the smaller models enjoy the greatest popularity. One of the favourites seems to be a ten horse-power model recently placed on the market by one of the leading Italian makers. This car is seen in constantly increasing numbers. The predominance of the smaller models of European cars, coupled with the fact that there is not in Greece a large wealthy class, would indicate that there will be in future, especially in Athens, a reasonably profitable market for medium-priced cars. The market should be attacked at once, however. At present it may be said that motoring is in its infancy in Greece. While the Royal family has owned cars for the past five years, it is only in the past two years that the general public has taken up motoring. These two years have seen large sales and convince the observer that history will repeat itself in Greece, as in all other countries where the automobile has penetrated. In fact the motor-car's future popularity in Greece is assured.

TENDERS INVITED.

EGYPT.

Stores, Clothing, etc.—Tenders will be received at the Lunacy Division, Abbassia, Cairo, for the supply of stores, clothing, and other equipment needed for Abbassia and Khanka Asylums for twelve months commencing April 1, 1915, and ending March 31, 1916. November 30.

EGYPTIAN RAILWAY NEWS.

Decreased Receipts.

Writing on September 18, the Cairo correspondent of *Railway News* said:—"The great decrease in railway earnings all over Egypt, largely occasioned by the drop in imports consequent upon the war, continues. The State Railway receipts, about £E10,000 a day in normal times, are said to be about £E4,000 at present. The Fayoum Light Railways are reported in Cairo to be earning less than their expenses, despite great retrenchments. The receipts of the Delta Light Railways are, on the whole, the most satisfactory, as the latest published figures place the decrease since April 1 last at under £E7,000. The energy shown by the management in meeting the situation is at least partially accountable for this. The débâcle will come, of course, if some arrangements are not made to finance the Egyptian cotton crop, from the movement of which the lines of the country derive such a large part of their earnings. Active negotiations to this end are, however, proceeding between the Government, banks, and other interested parties.

Suggested Increase in Fares.

It is stated in the local Press, though as yet no official announcement has been made on the subject, that the State Railways intend shortly to increase all first-class fares by 10 per cent., and second-class fares by 5 per cent. The idea is, of course, to increase revenue, but it is doubtful if this will be the case. The country is too hard up to be able to pay expensive railway fares, and if we are to judge by what has occurred in connection with the State telegraph receipts lately, this will be the case. Shortly after the war started telegraphic charges were doubled, yet the receipts continue to keep below the expenses of the Department.

The Sudan Mail Trains.

The Sudan mail trains are running with only a slightly reduced service. Mails arriving in Egypt by British boats leave Cairo every Wednesday, arriving at Khartoum on the following Sunday. Those arriving in Egypt by French boats leave Cairo every Saturday, and arrive at Khartoum on the following Thursday.

THE POSITION IN THE CITY.

(By Our City Editor.)

Fall of Antwerp.

There is no doubt but that the fall of Antwerp has completely stopped all business in the City—at any rate for the time being. The newspapers pretend that the surrender was not a matter to make any fuss about. But this is not the view taken by the City, neither, I may add, accepted by the Belgians themselves. To put it in the mildest way, the retreat has complicated still further a situation which is none too rosy.

Fixed Prices.

The fixed prices made by the Committee do not work, because no one can sell, as the dealers are all sellers themselves and will not put stock on their books. We are all wondering what will happen when the Stock Exchange reopens. The tale goes that it will reopen some time in November—as soon as possible after the moratorium ends. But I am very doubtful. No doubt if the news from the front were good the reopening might buck us up. But dealers and brokers alike find all their clients anxious to realise. There is very little buying.

L.S.-W. Issue.

The London and South-Western Railway, through Lloyds Bank and Boulton Brothers and Company, offered a million 5 per cent. 10-year preferred stock at £99 15s. per cent. The issue was subscribed in a few hours. No one could be surprised at this, for 5 per cent. in a trustee security looks remarkably cheap with all other trustee stocks at fixed prices giving only about 4 per cent. to 4¼ per cent. I can find nothing but praise for the clever way in which the railway and the bankers made the offer. The money was urgently needed, and it could only be obtained by offering splendid terms. The main point was that the finance was successful. The business showed keen insight and great courage. I am at a loss to know why the newspapers should have declared that the railway company acted unwisely. The result proves that they showed much acuteness.

Armament Shares.

The demand for armament shares seems to have slackened. But this is still the principal market in the street. Kynochs remain round 12, and wild stories run round of huge contracts both at Witton and Arklow. Birmingham Small Arms are 55s., and do not seem over-priced at this figure. Cammell Lairds are steady at £5. The concern has been badly managed in the past, but it is now full of work, and has some big interests in other large armament houses who are also working day and night. All the Sheffield people are simply smothered in orders. John Brown and Co., Vickers and Armstrongs are going without cessation, and no one should sell shares in these companies as large bonuses must result from the big business they are doing. The New Explosives is also full up for two years, and these shares look cheap at 17s. Nobels are as busy as they can be, and presumably the German branch of this great house is also fully occupied. I think that those who make up an armament trust to-day will probably double their money in two years.

Oils Promising.

There is excellent news from Egypt. The Anglo-Egyptian Oilfield reports big oil from the Hurgada field; this is most satisfactory, and should put heart into holders of Anglo-Egyptians, Suez and Eastern Petroleum. Both the latter concerns have large interests in land which will probably be taken up by the Shell company. Next to armament shares, oil shares appear the soundest purchase, for the combatants are using huge quantities of oil for motors. Work in Galicia and Roumania is almost at a standstill, but in Russia the war has made very little difference. The Ural Caspian report an output for the week ending October 2 of 8.081 tons, mainly from a spouter in Well 23. The Emba Caspian has also struck good oil in Well No. 6, so that holders of both shares should do well. The field has taken a long time to develop, and has not been quite satisfactory, but it now looks like repaying the speculator

Egyptian Market.

There is no business of any kind in Egyptian shares. The cotton crop will be financed on the lines already announced in The Near East. But the share market is dead.

FOREIGN MORATORIA.

Egypt.

Reuter's Agency reports from Cairo, under yesterday's date, that a Khedivial Decree has been issued prolonging the moratorium until November 1 on the same conditions as before, except that all cotton and cotton-seed contracts on the Alexandria Bourse are now excluded and remain solely under the Decree of September 3.

Turkey.

The Turkish moratorium has been prolonged for a period of three months, that is to say, presumably until the middle of January.

IMPERIAL OTTOMAN DOCKS.

The legal position of the bondholders of the Imperial Ottoman Docks, Arsenals, and Naval Constructions Company of Constantinople (Sir W. G. Armstrong, Whitworth and Co., Ltd., and Vickers, Limited) is not momentarily affected by the present situation. Principal and interest of the 5½ per cent. guaranteed bonds are covered both by a special and a general guarantee by the Ottoman Government, and the Council of Administration of the Ottoman Public Debt is charged with the collection and disposal of the revenues, and has agreed to pay out of such revenues, as and when collected, to the National Bank of Turkey for the service of the loan the amount required for each half-yearly coupon and sinking fund, which will be held for account of the trustees for the bondholders.

Up to the present the Ottoman Government have not refuted any of the stipulations agreed to by them in their contract with the Imperial Ottoman Docks, and therefore the situation from the bondholders' point of view need inspire no uneasiness. Should war break out between Turkey and this country the situation will certainly change, but not necessarily, or definitely, contrary to the interests of the bondholders or the firms engaged in constructing arsenals and docks for the Turkish navy.

Six hundred thousand pounds 5½ per cent. guaranteed bonds, part of a total authorised issue of £1,100,000 like bonds, were issued to the public late in July of this year. The bonds are unconditionally guaranteed as to principal and interest by the Imperial Ottoman Government, specifically secured by the assignment of an annuity payable from the tithe revenues of the Vilayet of Sivas. They are repayable on or before November 14, 1943, by means of a cumulative sinking fund of 1½ per cent. per annum, commencing forthwith, and to be applied by half-yearly drawings at par or by purchase below par.

The bonds are to bearer in denominations of £20, £50, and £100 each, with half-yearly coupons payable on May 14 and November 14 in each year. They bear the signatures of the Ottoman Minister of Finance, of the President of the Council of Administration of the Ottoman Public Debt, and of a representative of the company, and are countersigned in London by a representative of the Ottoman Government which has granted that the bonds and coupons shall be exempt in the Ottoman Empire from all duties and stamp dues.

NEW COMPANY.

Societe Roumaine du Petrole.

Under the above title a new company has been registered in Bucharest with a capital of 1,600,000 lei in 8,000 shares of 200 lei each. The capital can be increased, wholly or partially, to 10,000,000 lei by the issue of new shares. The latter can only be held by Roumanian shareholders. The object is to acquire and exploit oil properties, to erect or acquire refineries, and to engage in the transport of petrol, etc. The financial year begins on January 1. Profits are to be distributed as follows:—10 per cent. to reserve; a first dividend of 5 per cent. on the capital to the shareholders; 25 per cent. of the remainder to be devoted to various subsidiary funds (15 per cent. to the board), and the balance to be distributed as a second dividend to the shareholders.

COMPANY RESULTS, &c.

Land and Mortgage Company of Egypt.—The numbers are announced of seventy-nine four and a-half per cent. debenture bonds (Series "B"), which have been drawn at the offices of the company and will be paid off at par on November 11.

Ottoman Railway from Smyrna to Aidin.—Receipts for the week ended October 10 amount to £11,260, compared with £13.045 during the corresponding period of last year.

Suez Canal.—The traffic receipts for the 11th inst are estimated at 140,000 frs., against 350,000 frs. corresponding date last year.—Reuter.

Soma-Panderma 4 per Cent. Loan.—Coupon No. 7, falling due on October 1, can be presented daily, excepting Friday and Sunday, at the Caisse Centrale du Tresor, Constantinople.

ANGLO-EGYPTIAN OILFIELDS.

The Anglo-Egyptian Oilfields, Limited, has received several telegrams from Gemsah giving information as to developments at Hurghada well No. 1. A cable from Gemsah, dated 12th instant, gives production 1,590 tons (previous week, 1,630 tons); Hurghada, 240 tons (previous week 124 tons) ,and adds: "Hurghada well No. 1 struck oil 1,670 ft. Produced, four hours, 134 tons. Estimate production least 500 tons daily; plugged pending tankage transport arrangements."

Another telegram was dispatched from Gemsah the same day stating:—"Hurghada 1—Oil struck in sand and sandstone. Considerable quantities sand have been ejected. Specific gravity oil, 917 at 62. Forwarding sample this mail.'

On the 13th inst. a further telegram was received from Gemsah which stated:—"Hurghada 1—Broke in again very strongly; ejecting oil sand and stone; gradually destroying casing head fittings. Estimate pressure and production equals 13. Gemsah general manager and additional staff proceeded Hurghada this morning, endeavour control and save production. Will keep you fully advised."

THE CAPITULATIONS.

Writing on September 17, the Constantinople correspondent of Messrs. Irvin and Sellers, of Bootle, refers to the abolition of the *Capitulations* as a "very important and far-reaching move." They embody rights granted to foreigners by which they enjoy extra territorial privileges. Thus:—

"Foreigners pay no income-tax, although this is paid by all Ottoman subjects; foreign mails come to post offices of the respective nationals; legal actions are heard before a mixed court of three Ottoman judges, two assessors of the same nationality as the adversary to the Ottoman subject, and in the presence of a Consular official; no summons can be served except through the Consulates; no judgment executed except by the Consulates; no domicile of a foreigner can be visited except with the consent of and in the presence of a Consular official. All these privileges are now to be swept away. The consequences of the loss of the legal privileges are very far-reaching indeed, as Turkish law is based upon the old cheriat or religious law. Everybody who studies the matter at all must admit that it is gross injustice that Ottoman subjects should pay taxes which the Government cannot apply to foreigners; also that they cannot alter their import duties without applying for permission to do so to the Powers, and also that each of the Powers has its post office here competing with the Turkish Post Office. But while few people wish to refuse the withdrawal of the rights we enjoy in respect of taxes, duties, and post offices, everybody is unanimous in saying that the legal rights we enjoy must be maintained.

"It remains to be seen what the Powers will do in the face of the notice served on them by the Porte. Our opinion is that there will be a compromise. The fiscal and postal rights will be waived, and ultimately the legal rights will also go by the board, but not until Turkey has shown herself better able to govern justly than she has in the past."

NOTES OF THE WEEK.

The fighting in the West during the past few days has been fuller of incident, and therefore more appreciable by the public than that which occupied so many days in the area of the Aisne. Perhaps, on second thoughts, one should say "fuller of published incident," for we know of many deeds of which the record would have stirred the heart of every reader had they been divulged. But these took place along the Aisne and must as far as possible, by the Censor's decree, be shrouded in inviolable secrecy. In Flanders, however, our Allies have mentioned names of places—towns famous in history have been captured from the foe—it is explained that his front stretches from a point on the coast a little to the south of Ostend to a point just west of Lille, describing a considerable curve eastwards on the way. We learn that the Allies have made a substantial advance in that quarter and that the loudly-announced German advance to Calais has taken the form of a German retirement from positions already held. We were informed that the Belgian Army was definitely out of action for a long time as a result of the fall of Antwerp. We now gather that the utmost efforts of the Teutons have failed to win the passage of the Yser in face of the strenuous resistance of the Belgian Army. We were menaced with an immediate attack on Dover itself by means of guns mounted on previously prepared emplacements near captured Calais. It appears on the contrary that it is the German positions that have been captured, while their artillery has been handsomely handled by British gun-fire from the sea.

Ostend is still under the heel of the invader, but as we write news comes that hints are being dropped near the town by the British Fleet that it were better for the Germans to retire. The occupation of Ostend by the Germans has had a double effect. It has convinced the British public that the Germans really have over-run Belgium, and really are a menace to decent folk, and it has impressed upon the Germans that in case of necessity the British frontier can be found nearer to the Continent than it appears on the map. Naval guns firing from ships have killed a comfortable number of Germans on shore in Belgium, just as the Allies a few miles away on land, have thrust the invaders back into the areas wasted and soiled by their previous advance. The Germans consider it a great achievement to have reached the sea. Having reached it they find but little profit in their new possession and no encouragement to remain.

While the invaders have been unable to retain their positions in Flanders, in Artois and to the south they have failed to dislodge the Allies, and this in spite of repeated efforts. They have made no progress along the Aisne, and on the Upper Meuse near St. Mihiel the French are recovering lost ground with the one hand while they hold the Germans from further advance with the other. The French appear to have recrossed the river in the face of tremendous opposition, and by pressing forward on both flanks have seriously imperilled the enemy's advanced positions, whence he had hoped to break through the "fortified frontier" and march once more into eastern Champagne. It is further understood that apart from the losses suffered in consequence of their numerous unsuccessful attacks in France, the Germans are exposed to the ravages of the various diseases which result from the inadequate sanitation of their positions.

In the Eastern theatre of war the position of the invaders of Poland appears to be highly unfavourable from their point of view. They have failed to force the passage of the Vistula, as they failed to force the passage of the Niemen. They have approached Warsaw only to be rebuffed with such vigour by the Russians that they lost many men and much material in the process of falling back upon fresh positions. In endeavouring to cross the Vistula to the north of Sandomierz they omitted first to clear the left bank of Russian troops, and appear in consequence to have fallen victims to a flank attack at the moment that their advance was being thrown back under Russian artillery fire from the opposite side of the river. Now, having poured immense masses of men into western Poland they find themselves caught by the autumn rains. The country has turned into quagmire, many of the roads by which they advanced have now foundered behind them under the weight of their service communications, and to add to their discomfiture, a defeat in the neighbourhood of Warsaw has disorganized part of their front and thrown it back in disorder.

In Galicia the Kaiserlichs have recovered a good deal of their lost territory, and are making every effort to raise the siege of Przemysl. The Russians, however, continue to hold the line of the San—which, roughly

Digitized by Google

speaking, is the boundary between the area inhabited by Catholic Poles and the country of the Uniat and Russian-speaking Ruthenians—and the Austrians have been unable to dislodge them from the high land to the west and south-west of the beleaguered fortress. Like their allies in France, the Kaiserlichs in Galicia are beset by disease, and cholera itself has made its appearance.

In the southern theatre it is, as usual, very difficult to discover exactly what has occurred. Another invasion of Serbia by the Kaiserlichs appears to have failed, and the territory of that Kingdom has once more been cleared of the invaders. Near Belgrade, however, the Serbian offensive has made small progress. A small strip of land just to the south of Semlin is held by King Peter's troops, but from the hills behind Bezhanija the Kaiserlichs still follow their customary occupation of bombarding—if not Belgrade—at least the Save bridge. Serb forces are operating in Bosnia and are believed to be near Serajevo, where the State trial is now in progress. But no siege of the Bosnian capital has been formed, and there is no information to lead us to anticipate such an event in the near future. Cattaro still holds for the Emperor, but the Franco-British Fleet in the Adriatic has cut off access to the Bocche from the sea, while French guns on Lovtchen mountain may at any moment make the place untenable. Thus is history reversed. A century ago British co-operated with Montenegrins to take Cattaro from the French for the ultimate benefit of Austria. Now French and British fight side by side against the Austrians in order to help the Montenegrins win Cattaro for themselves.

The new reign in Roumania has opened with a Crown Council, a natural proceeding in the circumstances. No fresh decision was arrived at affecting the neutrality of the kingdom; however, since the meeting, it was resolved to interdict the passage of warlike stores through Roumania destined for Turkey. This action appears to have led to a protest from Berlin, which is a somewhat sarcastic comment both on the neutrality and the liberty of action of the Porte. The Roumanian action in respect of this consignment of war-material is, moreover, logical, in that as orders for ammunition for Bucharest itself could not be delivered owing to the war, it was only natural that Roumania should object to a favouritism towards Turkey which might well be to her own hurt.

Reports of a rapprochement between the two monarchies of the lower Danube still lack confirmation. Roumania is unwilling to embark upon an aggressive policy of national liberation with a discontented Bulgaria at her back. Bulgaria is not inclined to go out of her way to give satisfactory assurances to a recent enemy for the sheer love of seeing an already formidable neighbour nearly double its size. It is argued in Sofia that if the acquisition of Ottoman territory by Bulgaria a year ago so affected the Balkan balance of power as to make a rectification of frontier in favour of Roumania essential, so does any further aggrandisement of Roumania render a rectification of frontier in favour of Bulgaria even more necessary. In view of the disinclination of the Bulgarian people to do anything either to assist Serbia or Roumania or to distress Russia, it is interesting to see that in a recent issue of the *Russky Invalid*, a Russian military organ, it is expressly recognized that Bulgaria is justified in her present attitude. Such an acknowledgement on the part of a Russian newspaper is remarkable in view of the general attitude of that Press.

The attempt on the part of an Ottoman subject to murder Mr. Noel Buxton and his brother in the streets of Bucharest on political grounds was, fortunately, unsuccessful, and although the ruffian was able to wound both gentlemen we are assured that the injuries are less serious than was at first reported, and that no surgical operations will be necessary. The crime is curiously like that which was perpetrated in Paris a little time ago when General Sherif Pasha also happily escaped the bullet of a would-be assassin. We are inclined to suspect that the two attempts are connected, and that their real authors will never be indicted, although the miserable agent in this case duly suffer. This opinion finds a certain confirmation from the fact that an attempt was made to arrest an individual of the name of Rosenberg, who had been in Braila, ostensibly as being connected in some way with the criminal. Now Rosenberg is also known as Iskander Bey. At the present moment it is undesirable to go into this matter further, and we will content ourselves with wishing the wounded brothers a complete and speedy recovery, a recovery in which they will doubtless be assisted by the touching expressions of sympathy which have been conveyed from all sides, and particularly from their numerous friends in Bulgaria.

In Turkey affairs have not improved, the burthen of complete mobilization is upon the land, and there is no trade. There is as yet no war with any Power, but there is likewise very little neutrality. Parliament has been again prorogued, and will now not meet until the middle of December, and a fresh recrudescence of anti-Greek propaganda, accompanied by persecution and expulsion, has to be chronicled. We regret what is happening within the Guarded Realms, we deplore alike the powerlessness of the Sovereign, who has to see his pacific inclinations set at naught by bellicose advisers, and the fate which has subjected the Sublime Porte to the influence of foreigners who seek to draw the sword of Mahomed Fatih not for the benefit of the Ottomans or of Islam, but solely as a makeweight wherewith they may redress the balance of power when the fortune of war no longer inclines in their favour. The Sultan, it is true, has made an attempt to impose a respect for his person and his throne upon an alien-ridden faction in appointing his Heir to positions of importance in both army and navy. It remains to be seen whether his Imperial Majesty's action has been in time to have the desired effect. Meanwhile, the Dardanelles are closed and uneasiness, to say the least of it, prevails in Stamboul and Scutari as well as in Pera, and it is reported that the Government has invited the Œcumenical Patriarch to withdraw—according to one report—from the capital—according to another—from the Empire.

Essad Pasha Toptan is plainly determined to permit no ideas of regionalism or cantonalism to interfere with his authority in Albania. The energetic Grand Vizier, acting in the name of the absent Mpret, or, possibly, in his own, has notified the Maltsors of the north, Moslem as well as Catholic, that they must "come in" and be his men. The Mirdita may follow the lead of their chief, Prenk Pasha Bib Doda, and rally to the new regime, but there may be trouble with some of the other clans. For the moment the Grand Vizier represents authority usurped it may be, but still authority. If he unites all Albania under his own, or his Sovereign's sway, his authority will be the greater. It is possible that Essad Pasha Toptan may weld Albania into a coherent state with vigour and violence—the mountain principality is perhaps still young for the strong wine of constitutionalism and can only stomach the mild milk of autocracy with which the Grand Vizier and Burhan-ed-Din Mpret are likely to feed it.

Many years ago certain merchants of Amalfi founded a hospital in Jerusalem. From this origin arose the great confraternity of the Knights-Hospitallers of the Order of Saint John of Jerusalem, which provided accommodation for the sick and wounded, not only at its original seat, but also at Acre and other cities, before transferring its activities to Cyprus, Rhodes, and Malta. In these hospitals Moslems as well as Christians were cared for, and it is historically appropriate that its modern representative in this country should be caring especially for the welfare of our Indian troops now engaged in Flanders. The historical fitness of residents in the Levant contributing to the funds of the Order is abundantly obvious, and no gifts of money at the present moment would be better applied than those sent to the Chief Secretary, at St. John's Gate, Clerkenwell, London, E.C.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, October 5.

The Financial Adviser's Note.

The most important event of the week, since practically everyone in this country depends, directly or indirectly, on the cotton crop, has been the publication of the Financial Adviser's note on the situation, and of the arrangement whereby means are to be found to finance the crop and assist the cultivators. Lord Edward Cecil's note is regarded as a straightforward statement of the situation, and the local tension has undoubtedly been removed by the general announcement made. Very rightly, he warns the taxpayers that they must be prepared to make some sacrifice, if they do not wish the credit of their country to be damaged and far more serious trouble to befall them than that which has faced them since the outbreak of war. There are a certain number of people, some of them sensible, shrewd men of business, who criticise the Egyptian Government for not having done more to protect the cultivator. Whether, as these critics aver, the latter is in the end to be the main loser, time alone can show; but it is only reasonable to assume that if that anticipation shows any signs of realization the Government, which has always manifested such solicitude for the welfare of the agricultural element, will take steps to ensure that the balance is readjusted.

Unquestionably the action of the British Government in consenting to guarantee Egyptian Treasury bonds up to £5,000,000 has saved the situation, and the Egyptians should be very grateful for the timely assistance thus afforded them. After all, the deadlock that threatened is entirely due to the obstinacy and lack of foresight of the Egyptian cultivator, who, preferring a large and immediate return for his money, has, of course, had to take the risk which a high rate of interest always implies. For years, regardless of the advice freely proffered him on all sides, he has persisted in cultivating cotton on a large scale to the increasing exclusion of cereals, which constitute his food, and for the supply of which he has been becoming more and more dependent on foreign markets. The facility with which he effected the exchange of his cotton into wheat and other necessaries strengthened him in his idea that he alone knew what was best, and gave him a false sense of security. The outbreak of war has pricked the bubble, and the Egyptian cultivator finds that as his main source of income he is producing a commodity that for the time being has no value in terms of the articles that are his necessaries of life, which he has been accustomed to import from abroad. But for the opportune intervention of the British Government very real privation would be staring him in the face. As it is, he is now given a door of escape from the dilemma into which his own greed and folly had brought him.

Egyptian Loyalty and Sympathy.

Lord Edward Cecil states that the British Government's assistance should be regarded in the light of an appreciation of the calmness of the Egyptians and of the sympathy and friendship towards Great Britain that they have evinced. One is glad that some official recognition of this attitude should be placed on record; for amid all the publicity given to the demonstrations of loyalty that have been forthcoming from every land where British rule in some form or another exists the part played under trying circumstances by the Egyptian nation has been somewhat overshadowed, and there has been some risk of its being overlooked. Much has been said of the Germanophile tendencies which the Egyptians have been displaying, and the writer himself has drawn attention to them, but, all said and done, this sympathy for the Teuton has been confined to one section, the inhabitants in the towns, principally Alexandria, and the masses have been unaffected thereby.

Determined efforts have been made by Turkish and German agents to undermine British prestige and generally to excite the native mind, but they have been utterly unsuccessful; the mass of the people has not swerved from its loyalty, and has maintained throughout the same calm attitude and self-control that it displayed during the Tripoli and Balkan Wars. This loyalty has, indeed, found practical expression in the generous subscriptions that have flowed in from the provinces. Great difficulty has been experienced in ascertaining for which purpose each subscription was intended. In very few cases was the contribution accompanied by an indication as to its precise destination, the main wish of the donors being evidently to show their sympathy by contributing to a British fund as such. Perhaps the most pleasing features have been the decision of the Egyptians to form their own separate Prince of Wales' Fund and the contribution of £1,000 made to the British Red Cross by the Egyptian Red Crescent. In addition, numerous Egyptian officers, on the active as well as the retired list, have offered their services to the British authorities, and have declared themselves ready to serve anywhere. All these facts should suffice to silence any lies as to the disloyalty and discontentment of Egypt that are being propagated by the German agencies.

German and Austrian Residents in Egypt.

Apropos of the remarks anent the German and Austro-Hungarian colonies that have appeared in this correspondence in previous weeks, Lieut.-General Sir John Maxwell, in his capacity as General Commanding the British Forces in Egypt, this week issued an order to all German and Austro-Hungarian subjects resident in the country to register themselves at the chief town in the district of their domicile before the 10th inst., under pain of being arrested by the military authorities. This step has given great satisfaction, and has afforded intense relief to the British colony, as well as to the Entente and neutral element. Considerable surprise, even in native circles, had been expressed at the free manner in which Germans and Austrians were being allowed to circulate in the country, and the frequent rumours of the detection and arrest of persons of these nationalities suspected of spying added thereto a certain feeling of alarm. It has also appeared somewhat extraordinary that German and Austrian Government officials should be allowed to retain their positions. The Egyptian situation is, however, a complex one, and many factors not present in other countries have always to be considered before any decisive action can be taken. In this instance the authorities were fully cognisant of what was going on, and have taken steps to regularize the position at the earliest opportunity. German and Austrian Government officials have in some cases been put on pension, or, owing to their absence, have been considered as having resigned, and in the remaining cases they have been removed to posts where they can do no harm. If events prove the necessity, the order to register will be followed by one restricting the liberty of circulation, but it is hoped that the attitude of the German element—the Austrians have given little cause for anxiety—will not force the authorities to take this step. It is worthy of note that the order to register is addressed to those "born of German and Austro-Hungarian parents." It has evidently not been considered necessary to include "protected" subjects.

sidency of the Regent on Saturday last. After mature deliberation the Egyptian Government has decided, after all, to send the Mahmal to the Hejaz this year, but only to Mecca. At the same time, after consultation with the Grand Mufti, who declared that there existed no objection to such an action, the Ministry of the Interior issued a circular recommending the people not to make the pilgrimage this year, and insisting on the payment of a heavy deposit by all those who, despite the warning, persist in proceeding to Mecca. The Government's reasons for discouraging pilgrims are, first, that there are insufficient steamers to transport them to and from Jedda; secondly, that it is exceedingly difficult to send provisions to that part; thirdly, that for financial reasons the necessary sanitary precautions cannot be taken by the Government; and, fourthly, that for the same reason it has not been possible to take adequate measures for the protection of the pilgrims from attacks by the Arabs. The latter is a serious consideration, and it is to be hoped that very few pilgrims will venture to Mecca this year; for the Arabs, who have not received their usual tribute, will certainly be on the look-out for plunder.

The Question of the Foreign Post Offices.

One result of the abolition or modification of the Turkish Capitulations will presumably be the disappearance of the foreign post offices which operate at Constantinople and elsewhere. This will be a serious matter for foreign residents, and even some Ottomans, for these post offices were the sole means of getting letters and papers into and out of Turkey without the control of the Ottoman authorities, and consequently were the sole channels through which accurate information on internal events could be obtained. It will be interesting to see whether the French post offices that still exist at Alexandria and Port Said, as the sole outward sign of Gallic influence on the banks of the Nile, will follow the example of their prototypes in the Levant.

The Mixed Courts.

About the middle of October the Mixed Courts resume work. So far, no decision has been come to as to the manner in which they will proceed, but it is understood that work will be carried on just as usual. The only difference that will be made will be that the Austrian and German judges will not resume their seats. The quinquennial period comes to an end early next year. It is too soon to talk about whether the mandate will be renewed. All will, of course, depend on the progress and result of the war. If it is not ended, or if no decision as to Egypt's status has been come to, the mandate will have to be renewed presumably for a short period.

On Tuesday the Court of Criminal Appeal dismissed the appeal of Seham Yousry, who claims to be an Egyptian princess, against a sentence of six months' imprisonment passed at the Old Bailey for criminally libelling Major Connolly, late of the Egyptian Army. The prisoner, it will be recalled, had asserted that she had lived with the Major in Egypt as his wife, which was denied. She came to England, and wrote a number of letters of a libellous character. The ground of appeal was that there had been a misdirection of the jury, and misreception of evidence. Mr. Justice Coleridge said the Court agreed that counsel for the prosecution had made use during the trial of a document which was irrelevant, but, in spite of that, the jury could not help bringing in a verdict of guilty. Therefore, there had been no miscarriage of justice.

THE POWERS AND ALBANIA.

(From an Albanian Correspondent.)

Italy's Changing Policy.

For some time past the attitude of Italy towards Albania has been the subject of remark amongst the friends of the latter country. At the beginning of the Balkan War, Italy was in close agreement with Austria, and was, in a way, one of the creators of Independent Albania; but little by little her enthusiasm has cooled down and fresh interests have claimed her attention. And at last she has come to see in the Albanian question nothing but the question of Valona, a port that would assure her a position of very great strength in the Adriatic. Thus, while in the north Albania was evacuated by the Serbs and the Montenegrins, in the south the so-called Epirus suffered from Greek intrigues, groaned under the so-called Epirote Government, and was devastated and ruined. Italy remained an indifferent spectator of all this, although at the Conference of Ambassadors in London she had raised the question of the Straits of Corfu and had obtained the extension of the Albanian frontier as far as Cape Stylos. A little later she seemed bent on deliberately stirring up discontent amongst the Albanians by the protection she offered to, and the sympathy she showed for, Essad Pasha, who was generally regarded as an adventurer pure and simple. At the same time she left no stone unturned to discredit the patriots and the Nationalists, affecting to regard them as the tools of Austria.

Essad's Acknowledgments.

And now Italy rejoices to see Essad at Durazzo. The Minister Aliotti and Captain Castoldi hastened to salute him, to acclaim him; and Essad himself has declared that it is to Italy that he owes everything, and that it is thanks to her that he has been able to return once more to Albania—where he has nothing but enemies.

But what is far more serious is that Italy at one time was seriously considering the question of a landing at Valona. The advance of the so-called Epirotes towards Berat and Fier was not unrelated to this Italian plan. The Italians wished to find out how the land lay; for though a landing at Valona had a great attraction for them, they had no wish to find themselves embarked upon another Tripoli adventure. Therefore they have lately been sounding public opinion in Albania; their consuls have been extremely busy; and the result of their enquiries has gone to show that Italian action at Valona would result in very unpleasant consequences for them.

A Lost Opportunity?

Many people in Albania are of opinion that Italy is letting slip a splendid opportunity of securing a preponderant position in Albania. To secure such a position she ought to have acted in the best interests of Albania, beginning by obliging Greece to evacuate the southern part of the country and to put an end to the sorry Epirote comedy. She ought, moreover, to support the Nationalist party frankly and sincerely, breaking with the reactionary party.

Essad Pasha Toptan, who has returned to Durazzo, as your readers will doubtless have learned long before this letter reaches you, was accompanied by a band of followers recruited in Serbian territory, and in the pay of Serbia. He was wise in his way to secure such an escort, for he would never find sufficient supporters in this country. He need no longer wear a mask; his intrigues with Slavs and Greeks are no longer unknown to the public; but Heaven only knows what the future has in store for us, what scenes and quarrels we shall have to witness.

The Epirote Raid.

The pseudo-Epirotes, the Zographists, have made a raid as far as Berat and Fier, marking their progress with their usual excesses. But their triumph was short-lived, for the enraged populace rose and drove them out, with considerable losses in men and material. This action of the Greeks has led to a return towards patriotic feeling. The reactionaries are already beginning to see their mistake, and doubtless they are not without some feelings of regret. And this fact, added to the feelings of the mountain folk of Hasi, Luma, Dibra, and Mati, strengthens the patriotic and legitimist party.

Digitized by Google

A Pawn in the Game.

I cannot conclude this letter without referring to the feelings aroused here by the great European War. These feelings are decidedly mixed; for if the Albanians have a marked aversion against Russia and France, the protectors of the Slavs, and the Greeks—that is to say, against the natural enemies of Albania—they have, on the other hand, a great respect for the British people and the British Government. But again, while they know little of Germany, they cannot regard the fate of Austria with entire indifference. For latterly Austria has been the only Power really interested in Albania.

What everybody recognizes is the harm that has been done to Albania by the outbreak of the great conflagration and the suffering that has come upon the Albanians as a result of the jealousies of the Great Powers. In fact, Albania, newly-born, could not grow in a normal way by reason of the rivalries of the Powers, who, in order to annoy their rivals, could find nothing better to do than to bring about the destruction of a nation by creating all manner of difficulties for it, by fostering all kinds of intrigues against it, and by supporting the monstrous and iniquitous pretentions of its greedy little neighbours.

ATHENS LETTER.

(From Our Own Correspondent.)

Athens, October 7.

Statement by Mr. Venizelos.

The new session of the Chamber began last week without any Speech from the Throne. The President of the Council, however, gave a brief sketch of the situation of the country in regard to its foreign policy. The Government, said Mr. Venizelos, has declared that Greece will remain neutral during the European War, but at the same time it has not lost sight of its treaty of alliance with one of the belligerents, Serbia. Greece had contracted obligations, which she intended to fulfil faithfully if a *casus fœderis* should present itself; that is, that she would go to the assistance of Serbia if the latter were attacked by one of the Balkan States. "It goes without saying," he added, "that above all things Greece hopes that such a case will not arise, since she does not wish that the terrible conflagration that is sweeping across Europe should spread to the Balkan States, whose people, tried by two wars, feel the need of rest. Therefore, in as far as it depends upon Greece it may be regarded as certain that nothing of the sort will happen, and if the other peoples of the Peninsula are inspired by similar feelings, we may rest assured that peace will be maintained in the East until the finish of the European War."

With regard to Greco-Turkish relations, and more especially as to the Islands, the President of the Council announced that, while regarding the question as definitely settled from the international point of view, not only by the treaties of London and of Athens, but also by the arbitration, so to say, of the Powers, Greece had nevertheless expressed its willingness to give Turkey satisfaction to a certain extent, in order to establish good relations between the two countries on a solid foundation. It would have been a *sine qua non*, however, that the Islands should continue to be occupied, ruled and administered by Greece in the same way as other provinces of the kingdom. But the breaking-off of the negotiations by Turkey had left the question undecided.

Finally, Mr. Venizelos deprecated the attitude of certain journals, "which, not content with expressing the sympathy that is so natural, have given way to violent outbursts against some of the belligerents" (meaning, of course, the Germans). He exhorted these journals to refrain from such attacks in the future.

These declarations have served to reassure the public, who, seeing the military preparations that the Government was pushing forward as a precautionary measure, were under the impression that we were on the eve of a general mobilization. It has now been made clear by the declarations of Mr. Venizelos himself that the engagements entered into with Serbia form the basis of Greek policy at the present time, and that this country will only abandon its neutrality if it is forced to do so by others, in order to defend its own interests. Such an attitude is natural enough in the circumstances, since Greece has little to gain by taking any part in the great European conflict. Having done fairly well in the way of conquests during the two Balkan Wars, she ought to devote her chief attention to keeping what she has gained. Besides, it is considered certain here that if the Triple Entente emerges victorious from the war, Greece will receive Northern Epirus, and will be guaranteed in the possession of her islands. Such a reward, it is pointed out, would be well merited by the services she has rendered to the cause of peace in the Orient. For, had she not let it be known as soon as the Austro-Serbian War broke out that she would defend Serbia against aggression on the part of any of the Balkan States, her ally would have been attacked (it is said) by Bulgaria, probably in combination with Turkey, in which case Roumania would not have been able to maintain her neutrality as she has done so far.

The Turkish Attitude.

From all this it is clear that what Greece will eventually do depends upon what the other Balkan States may do; which leads up to the query whether any action on the part of Turkey—which seems to-day very probable—would cause her to abandon her neutrality. The ministerial *Patris* replies to this query by stating that everything depends upon the circumstances, and explains the situation as follows:—If Turkey is content to attack Russia alone, the attitude of Greece will depend upon the manner in which the attack is made and the attitude of the Entente Powers. But if Turkey, instigated by Germany, should become aggressive against Russia and Roumania simultaneously, or against the latter alone, with a view to prevent Roumanian action against Austria, it seems tolerably certain that Bulgaria would mobilize for action either in Roumania or in Turkey; and in that case Greece also would be compelled to mobilize her army. Thus, it would seem, the attitude of Greece really depends in the long run upon the attitude of Bulgaria.

As for the intentions of Turkey towards this country, it is still thought here that Turkey will not think of attacking Greece at the same time, at any rate by sea, since she will have need of all her naval forces—Turkish and German—for service in the Black Sea. She will, it is thought, be content to follow the systematic war against Greece that she carries on by means of persecution of the Greeks within her borders.

The Refugees Question.

Replying to the Turkish protest against the installation by the Macedonian authorities of Greek refugees in the properties abandoned by the Ottoman emigrants, the Cabinet reminds the Sublime Porte that the Greek authorities have acted in conformity with the spirit of the Turkish proposal to exchange the properties abandoned by the refugees from the two countries, and that they are acting just as the Turks have done in Moslem Thrace and in Asia Minor. This notwithstanding, the Greek Government declares itself ready to abandon the properties occupied by the Greeks if Turkey will undertake to allow the Greeks who have had to emigrate from Asia Minor to return to their homes.

The Turco-Greek commission which had been constituted in Smyrna to study this question and fix the amount of indemnities to be paid has done nothing at all up to the present. It has just been transferred to Constantinople, where, directly under the supervision of the Ottoman Government and of the Greek Legation, it may probably achieve something.

Proposed Army Increase.

Amongst the Bills before the Chamber is one providing for a series of reforms which aim at rounding off the reorganisation of the army. By the measures proposed, the effective forces will be very considerably increased.

SERBIAN LETTER.

(From Our Own Correspondent.)

Nish, September 29.

The Weariness of War.

The fugitives from Belgrade are ill at ease. Day after day and week after week pass and still the prospects of their returning to their homes are as distant as ever. Summer has passed. During the last few days it has been continually raining, the chills of winter are beginning to be felt, and the weather is gloomy, bringing no cheer to the weary refugees here. Rest and peace are idle words for those whose fathers, sons, brothers and other kindred are away fighting for the protection of their native land, and exposed to the inclemencies of this bleak weather as well as to the fierce attacks of a heartless and relentless foe.

At one time the prospects of an immediate return to Belgrade seemed to be very bright, the Serbian Army having captured Bezhanija and occupied Semlin. But, alas! the small force which had accomplished this fine feat of arms was required on the Drina to aid in repelling the invader, and this, unhappily, enabled the Austrian troops to reoccupy these neighbouring positions. Hence the prospects of an early return to the capital faded away as the warmth of the fast-passing summer has faded.

Serbian Steadfastness.

As to Belgrade, which unfortified town the enemy's artillery has so pitilessly bombarded and ruined, the Austrian commander had the audacity to think he could take possession of the place simply on the strength of demanding its surrender.

On September 22, in the afternoon, Major-General Gustave Golfe, commanding the troops at Semlin, sent a flag of truce with a letter addressed to the Commander of the Belgrade garrison, of which the following is the text:—

In order to obviate the bombarding and total destruction of Belgrade, you are invited to surrender the town, in which case the officer in command of your garrison, with his entire Staff, accompanied by representatives of the Belgrade Municipality, must present themselves at the river quay at Semlin before the expiration of an hour—that is, at the latest at six o'clock this evening.

The reply to this demand was a steady artillery fire directed upon the Austrian warships, and a few shots at Semlin. The only explanation of this Austrian manner of proceeding is that, beaten by the Russian Army in the East and by the Serbian troops on the Bosnian frontier by the Drina, the Austrian Major-General tried to obtain by bravado what his troops could not acquire by force of arms. It must certainly be painful to Austrian *amour propre* not to have been able to vanquish the army of a small state like Serbia, and the possession of Belgrade, whether by capture or by surrender, would have compensated in some measure for the numerous defeats of the Austrian army, and the ill-success of Austrian diplomacy.

Evidently the Austrian commanders believe that the failure of their army is due to incapacity on the part of its officers; for among the dead of those troops that had endeavoured to cross into Serbian territory over the Sava, in the vicinity of Belgrade, were those of Austrian officers on whom documents were found in which the Austrian commander blames his officers for want of energy and activity, and accuses them of incapacity. In effect, the result of the battles on the Drina shows that more than once the defeat of the Austrian troops ended in a panic, the officers having lost all control over the soldiers.

Slav Solidarity.

Late in the afternoon of September 16 the sound of rifle and machine-gun firing was plainly heard on the Serbian side of the Sava, and as there were then no Serbian troops in the region whence it came it gave rise to much speculation at the time. But later the mystery was cleared up. A prisoner, belonging to the 26th Regiment of the Austrian Landsturm, relates that, after the Serbian troops had evacuated Srem, the villages whose population was of Serbian nationality were burnt, and the people ill-treated and many of them killed. This was done, it is asserted, by order of the Hungarian officers, and it so incensed the Austrian soldiers of Serbian nationality that a conflict between them and the other soldiers broke out.

The Serbian troops who, after several battles, had got to Vishegrade, and from thence were marching towards Serajevo, the capital of Bosnia, were, after passing Rogatiza, joined by the Montenegrin troops, who had also fought their way up to that point from another direction. The further advance of these allied troops was a triumphal march, the Slav population of Bosnia receiving them with immense enthusiasm, and joining their ranks in considerable numbers.

Nish, October 6.

A Gallant Feat of Arms.

In my last letter I informed you that General Golfe, commanding the Semlin troops, had invited the Commander of the Belgrade troops to present himself at the river quay at Semlin and to surrender Belgrade. The Austrian invitation was too flattering to be refused. The Serbian Commander accepted it in his own way. He sent his troops over to Austrian territory and drove the Austrian troops out of Semlin and out of their positions near that town at Bezhanija. The enemy's heavy artillery was dismounted and rendered useless, and the smaller pieces were triumphantly taken away. The Serbian troops then returned to their positions. This was a more agreeable proceeding than allowing the Austrians to continue the bombardment. As to surrendering, if the Austrian would-be host had remained at home to receive his guests as he had proposed, it would have been he that would have had to surrender.

The Return to Belgrade.

The Serbians have taken all the precautions necessary to ensure the safety of Belgrade, and the Serbian authorities have given permission for the inhabitants of that city to return to their homes. The day before yesterday, yesterday and to-day, that permission has been thankfully made use of, and thousands are returning from Nish and from other provincial towns. But for some time it will not be the Belgrade of former days. Many buildings have been injured, and some houses totally destroyed. There will also be a scarcity of firewood, and winter is approaching, and the days here are already chilly. Then, too, the water supply must be put into thorough order, the electric lighting will have to be reinstalled, and the tramcar service reorganized. But the saddest difference will be in regard to the people, for the flower of the male population will still be on the field of battle.

The Government is likely to remain at Nish, and the sittings of Parliament will also continue here for some time yet. In short, as regards the official world, Nish will still be the capital, possibly until the close of the war.

Serbia and Great Britain.

News of the proposals to raise a subscription in England for Serbian sufferers and wounded has been received here with gratitude, and the speech of Mr. Lloyd George has created a very favourable impression throughout the whole of Serbia. That part of the speech referring to Serbia has been translated into the Serbian language and was published yesterday in the official *Gazette*.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, October 5.

The Capitulations.

In The Near East of September 4 it is said that the Hellenic Government is to be congratulated upon the action of Great Britain in recognising its annexation of the new territories, in consequence of which the Capitulations come to an end, and the Hellenic authority is fully established throughout the whole of the territories acquired from Turkey after the Balkan war. Yes, the Hellenic Government is rightly to be congratulated on this recognition, whereby the area of Greece is nearly doubled, and Salonika is acquired with a larger population than has Athens itself. As a matter of course, the Capitulations come to an end, as they were never in force in Greece; but whether the alien element and people of other religious faiths in the new territories are to be congratulated time alone will show.

Judging from what, during the last two years, we have seen of the methods of government of the different Balkan States we are disposed sometimes to wonder whether any one of these small States is sufficiently experienced to rule unaided over alien races. That there are enlightened statesmen in each country is undeniable, but it would seem as though they have not the necessary trained and capable men under them to carry out a pacifying and progressive policy.

A Press Trial.

What we have seen here of the vagaries of the war has not been calculated to inspire us with great confidence. For instance, there was recently concluded the case of Mr. Arditti, the editor of the Judæo-Spanish paper *Avanti*. Some four months ago he was arrested and imprisoned for venturing to question the right of the police to order the closing of shops, etc., on the King's "Name Day," a charge of thereby insulting the King forming part of the indictment. In vain did some of the most eminent Jews in the town, even the Grand Rabbi himself, affirm that there was nothing in the article, properly translated, that could be construed as insulting the King. Mr. Arditti was kept in prison, notwithstanding very large bail being offered for his temporary release. Finally, his arms bound to his body with cords, like a common malefactor, he was walked through the streets to the railway station and taken to Serres for trial. This trial came off about a fortnight ago, the Grand Rabbi and others going to that town to give evidence; but everything was unavailing, and it ended in a verdict of guilty, and a sentence of a year's imprisonment.

According to a law promulgated by the present King on April 14 last the statutory holidays are Christmas Day, the Annunciation, and Easter Monday; so this unfortunate Jewish editor was really condemned for criticising the action of the police. A feature of the trial was the evidence of the editor of the Greek paper *Nea Alithia*, who, on his examination in court, had to own to publishing in his paper recently a somewhat violent article against the King, whom it accused of "Germanism." Yet he was in court as a free man, while Mr. Arditti, not having written anything against the King, was being tried as a criminal. Is it surprising that the Jews are convinced that there is one legal balance for the Greek and another for the Jew? And if there are two balances in which of them will other aliens be weighed?

Police Regulations.

Then with regard to the police: here again there seems a complete dearth of intelligent subordinates to carry out the various orders issued. From time to time the head of the police administration elaborates and publishes some excellent regulations for the welfare and comfort of the public in general, but the greater part of them are stillborn. Take, for instance, our tram service. A long document in Greek and French, signed by the Minister of the Interior himself when Governor-General of Macedonia, has for months been posted up in the cars, forbidding, under pains and penalties, the getting on and off the cars when in motion, overcrowding, talking to the drivers, smoking, spitting, etc., every separate article of which is a complete dead-letter. So it is throughout, and these police regulations, admirable in themselves, are scoffed at and disregarded because, apparently, it is nobody's business to see they are enforced.

With the Capitulations go, of course, the foreign post-offices. Well, that is only just and right; but, unfortunately, even now the postal administration has difficulty in meeting the requirements of its present limited service. What the situation will be when all the foreign mails pass through its hands is a subject one does not care to contemplate. If the authorities are wise they will keep on, under their own supervision, the foreign offices with their present staffs, allowing the latter to carry on the work in their accustomed way, until suitable buildings are constructed, capable men trained, the whole service reorganised on modern lines, and all the streets named and numbered.

Wounded Serbs at Ghevgheli.

Many Serbian wounded are being brought down and taken straight on to Monastir, but 30,000 wounded and sick are talked of, and so, we hear, a large hospital encampment is to be formed at Ghevgheli, the first Serbian station from here after passing the frontier. Several hundred Russian reservists have lately been arriving, and more are on the way, in steamers of the Russian volunteer fleet, en route for their own country, viâ Nish, the Dardanelles being again closed.

THE ATTACK ON THE MESSRS. BUXTON.

A dastardly attempt to assassinate Mr. Noel Buxton, M.P., and his brother, Mr. Charles Buxton, was made by a Young Turk on Thursday last week in Bucharest. Fortunately, Mr. Noel Buxton's wound, though serious, is not dangerous, and his brother has escaped with only a slight wound. According to the account of the incident given by the Balkan correspondent of *The Times*, the brothers had taken their seats in a motor-car with Mr. Gueshoff, son of the former Bulgarian Premier, for the purpose of making an excursion in the country, when the would-be assassin approached the car and fired five shots with his revolver. Mr. Gueshoff had a marvellous escape, one bullet penetrating his hat without wounding him. The criminal was immediately overpowered and disarmed by the chauffeur of another automobile named Damian, and arrested. The attack took place at the moment when King Carol's funeral procession was starting from the Palace, and information was conveyed to the members of the Government on the arrival at the station. After the arrest the prisoner stated that he could not tolerate the propaganda of the Buxtons in favour of a *rapprochement* between the Balkan States and England and a revival of the Balkan Alliance to the detriment of Turkey. He gave the name of Redjib, but his passport and visiting cards bore the inscription "Hassan Tahsin Effendi, Journalist, Salonika." He appears to have come from Constantinople to Sofia, where the Messrs. Buxton were staying, subsequently following them to Bucharest, where again he took quarters at their hotel. He was well dressed, and, apparently, amply supplied with funds. His passport was issued at Galata. On Friday morning the Secretary to the Minister for Foreign Affairs called on the Messrs. Buxton for the purpose of expressing the regret of the Government for the odious crime of which they have been the victims. Later reports state that a man called Rosenberg, a presumed accomplice of the Young Turk, has been arrested.

"Try a chota peg o' Perfection.
"Notice how mellow and silky it is?—not a touch of 'bite' or harshness. That's the effect of maturing in sherry casks. Makes it a little darker in colour, too.
"You'll order a case of Perfection?
"Well, everyone of 'ours' is doing the same. They all like it. Here's a toast, old man. Drink up—To Perfection, the best whisky in India, from the everlasting hills to the plains."

BEYROUT LETTER.

(From Our Own Correspondent.)

Beyrout, September 26.

The Capitulations.

This is perhaps the last letter that I shall be posting with a feeling of security, for the delay granted by the Ottoman Government to the Capitulatory Powers for the abolition of their administrative, judicial, and financial privileges expires on October 1. All the Ambassadors have already protested, but as the Consuls here have so far received no further instructions from Constantinople it is believed that if there be any opposition at all it will be of a platonic nature and confined to a maintenance of the protest, and that, therefore, the foreign post offices will be closed under protest. In notifying the post offices here of the Government's decision the Director of Posts and Telegraph clearly intimated that, in case of opposition, armed force will be resorted to.

As regards the "temettu," the European case can scarcely admit of any pleading. It is elementary justice that foreigners transacting business in this country and feeding on the fat of the land should at least contribute, like the native, to the Government's revenue, more especially when this Government is in sore need of revenue. But, on the other hand, the judicial side does not present the same irrefutable argument in favour of the Ottoman case. Perhaps opposition on the part of the European Powers in this connection may prove salutary, inasmuch as it may stimulate the authorities to greater efforts to purge the judicature of its evils.

From the Ottoman point of view, the Capitulations are admittedly a humiliation that cannot well be tolerated by a Government that aspires to rank among the civilised nations. Moreover, as all the Powers seem determined to turn this great War to their own profit, the Turks, who are still smarting under the effects of the last wars, and eager to efface the disastrous impression created thereby, are naturally not going to be behindhand in getting their share. This explains the noise and flourish with which they made the announcement to the populace through the Committee. To flatter national pride, long trodden down, the Committee had to declare that the Capitulations were privileges that had been granted as favours and acts of grace to Europeans, who, however, in course of time, came to look upon them as rights and obligations lawfully due. The humiliating position resulting from such an abuse could no longer be considered compatible, they said, with the dignity of a constitutional Government. The population was enjoined to celebrate this proud and glorious day with great rejoicings, and the local authorities, having received the advice late at night on the 11th instant, hastened to communicate the message to the inhabitants the same night. Women joined in the demonstration, and their shrill singing of "Zalagheet," coupled with the pistol firing of the men, caused at first some alarm among the inhabitants, who were asleep, and were abruptly awakened by their womenfolk, scared by the idea that a massacre was at hand. On the next day a rather undignified procession, consisting mainly of the rabble, made a demonstration before the foreign post offices, when the German and Austrian flags were exhibited, and saluted by frantic acclamations from the crowd. The procession shouted out a popular ditty expressive of admiration and love of the Germans, and of gross abuse of the French.

The Lebanon.

Unfortunately, some fanatical allusions were made to Christians and to the imminent reversion of the Lebanon to Ottoman rule. The ignorant masses interpreted the abolition of the Capitulations as involving also the suppression of all foreign concessions, such as railways, harbours, tramways, and even the privileges of the Lebanon. The question of the Lebanon has, for some time, been the burning topic of the day. The fact of a large number of those called to the colours having taken to flight thereto, and of mules, horses, and carts having also been passed into Lebanese territory to escape commandeering, was calculated to cause no little irritation to the Ottoman authorities; and for some time wild rumours of a Turkish invasion of The Mountain were being freely circulated, until the climax was reached when a drunken man is said to have trodden under foot one of the Ottoman flags displayed on the occasion of the Sultan's birthday, in a village where the Vali of Beyrout is spending the summer. The Lebanese authorities were summarily called upon to deliver the offender to the court martial at Beyrout within 48 hours, failing which, strong measures would be taken against the Province. The Governor-General of the Lebanon acted, however, with coolness and wisdom, and replied to the Mushir, who is said to have made the demand at the request of the Vali, that as both derived their authority from Constantinople the matter had to be referred thereto. The tension was relieved when the reply came from headquarters that the Lebanese tribunals were competent to judge the case. The extreme penalty provided by the law governing such offences was applied; the man was condemned to three years' imprisonment; and the Lebanese question at last became normal again.

Mobilization Troubles.

It is to be hoped that the much more important question of the general mobilization, and the great unrest it has caused, will similarly have a peaceful solution as soon as the crisis caused by the abolition of the Capitulations is passed. But it is rather difficult to suppose that the affair of the Capitulations alone has determined a measure that has bled the country to such an extent.

Unfortunately, requisitioning is said to have been allowed to degenerate in certain cases into practical pillage, women's silk stockings, children's shoes, and such like articles having been taken from the shops. Of course, these may be only minor offences committed by subordinates without the knowledge of their superiors. But if such things have happened under a Vali energetic, wide awake, and well-meaning as the present one, what may not have happened in other vilayets, less favoured in the matter of their governors?

When all the facts are considered, one cannot help fearing that the Government has further designs, and that it is too far committed to Germany. To all well-wishers of the Turks this would be a matter of deep regret. German influence seems to be still paramount. It is said that there are about 500 German officers in Turkey. At one time the publication of the official communiqués sent by the embassies of the Allies to their respective consulates here was prohibited, and the local papers could only publish the war telegrams of the "Agence Syrienne," which is another name for the German Wolff agency. Fortunately, such unwarrantably strong measures have been quickly withdrawn.

Beyrout, October 6.

A War Panic.

Contrary to expectation, October 1, on which date expired the delay granted for the closing of the foreign post offices, passed off quietly and without even an attempt at popular demonstration. The only incident that challenged attention was the posting up of a notice on the doors of the French post office to the effect that the offices were temporarily closed. The local authorities, however, were quick to have this notice removed. But, contrary to expectation again, Thursday was far from marking the end of popular anxiety and excitement. The news of the transfer of the registers and staff of the Kaimakamliks of Tyre, Sidon, and Haifa into the interior was calculated to perturb the public mind here considerably, and the nervousness culminated in a panic when it was known that preparations were being made at the Serai here for the eventual transfer of the archives and staff of the Beyrout Vilayet headquarters to Ain Sofar, in Mount Lebanon, and when the military authorities were said to have received instructions from Constantinople to hold themselves in readiness for departure at short notice. The Moslem population, anticipating a foreign occupation of the coast, and still labouring under the false belief that the French soldier and sailor do not respect the Moslem

Digitized by Google

woman's privacy, sent all their womenfolk into the interior. The women themselves were seized with such unreasonable fear that, in order to make sure of room in the crowded morning trains, they spent the night huddled together at the station. The panic soon spread to the Christian element when a mischievous rumour was circulated that the exodus of the Moslem women was the result of preaching in the mosques, and was meant as a preparation for setting the whole town on fire. The educated and enlightened classes finally succumbed to the epidemic when they learned that the German subjects in Beyrout were advised also to leave. The Christians fled to the northern part of the Lebanon, which is inhabited almost exclusively by Christians, because it was feared that the presence of Turkish troops in those districts partly inhabited by Druses might lead to trouble.

The Vali's Action.

It must be mentioned in this connection that the Vali, a few days ago, paid visits to the neighbouring villages in the Lebanon, and appealed to the loyalty of the people, assuring them that the privileges of the Lebanon will be respected. It is said also that His Excellency counselled the people of Beyrout to desist from such light-headed behaviour, and to further reassure them brought down his family from the Lebanon; but in such circumstances nothing but an official proclamation and the exercise of mild official pressure can stop the wild panic. This wholesale exodus resulted in the temporary arrest of the commercial life of Beyrout, and has especially caused serious material harm to the lower classes, already on the verge of destitution. It is said that some carried away with them the portable part of their merchandise of appreciable value, and that some poor people, in order to procure cash to travel with, had to sell their chattels at iniquitously low prices.

It seems that at Latakia the panic assumed no less serious proportions. The crowd of panic-stricken people eager to fly to Cyprus was so large that the Khedivial steamer, then in port, found it desirable to change its regular itinerary, and proceed to Larnaca instead of to Tripolis and Beyrout. There might be a shadow of justification for the panic at Latakia, owing to the proximity of the wild Ansairi tribes. In Beyrout, however, the panic was all the more unwarrantable as, be it said to the credit of the Vali, public security was all along perfectly preserved.

Continued Mobilization Troubles.

Still, the persistence of the Government in the general mobilization cannot fail to cause a feeling of uneasiness in the most phlegmatic. On Sunday the return from the railway station to the barracks of a quantity of furniture, such as bedsteads, bedding and blankets, etc., made the public conclude that a partial demobilization was imminent, but this soon turned out to be the result of a mistake on the part of the captain of what may be termed the Cadet Company. He is said to be now on trial, although he pretends that the copy of the general order enjoining readiness for departure at short notice reached him so mutilated as to convey the meaning of immediate departure to Damascus. The requisitioning of stuffs for military hospitals continues as vigorously as ever, and it is said that, apart from the quantities of medicines and surgical instruments which the pharmacists of the town have already contributed, the whole existing stock is now to be further requisitioned, leaving for the pharmacists only a two months' supply. In the face of such activity on the part of the military authorities one cannot help asking: What next?

U.S. Warship's Visit.

It was stated yesterday that following strict orders from the military authorities the families of all Government officials have to return immediately to Beyrout. This is expected to lead to a restoration of public confidence. Meantime the presence of the American warship "North Carolina," arrived from Alexandria the day before yesterday, is exercising a calming influence, and if, as it is said, she is to be stationed here permanently during these critical times, it will materially help towards a large influx into Beyrout of its now scattered inhabitants.

PROGRESS IN TABRIZ.

By MIRZA FIROOZ KHAN.

TABRIZ.

Medical Practitioners.

Acting on the advice of the Russian Consul-General, Shuja-ed-Dowleh lately decreed that nobody should practise as a doctor unless he held a proper medical diploma. Before that time, from time immemorial, and all over Persia, the pharmacist acted as doctor and the doctor as pharmacist, indifferently; barbers were surgeons, and butchers were even called in to replace dislocated joints and bind up fractures; and old women who had been mothers of ten children were authorized to act as midwives.

True, during the days of Mashroota the Anjuman made a similar order to that just referred to; but in a month or two it was a dead letter, and the barbers, butchers, and watchmaker-dentists were as busy as ever.

Let us hope that Shuja-ed-Dowleh's order will not fall into oblivion also. Meantime, it reminds me of the following incident, which occurred in the days of Mashroota, at the rooms of the Anjuman. That body had appointed a committee of the native "doctors" to examine all the 400 or more doctors and surgeons of Tabriz, and to grant a special certificate to those who had a medical diploma authorizing them to practise.

The president of this august body was a native "doctor," who had "studied his profession" by serving a Russian doctor as a pharmacy clerk for some years; who had never been inside a hospital one single day; and who never dissected even a cat. But this is by the way! European doctors also were compelled to attend, and to bring their diplomas, and the large room was filled with grave-looking medicos, native and foreign.

In due course a doctor with a foreign M.D. presented his sheepskin, written in Latin. The President looked at the document, turned it upside down, tried it every way, but could make nothing of it. At last, turning to the owner, he asked:

"Doctor, is this in the French tongue?"

"No," replied the doctor.

"In English?"

"No."

"Then in what tongue is it written?"

"In Latin."

"I know of no *Firenghi* nation called 'Latin.' Will you leave the document here until our next meeting. Perhaps we can get the President of the Anjuman to read the Latin tongue for us."

The doctor, however, declined to part with his diploma, and left the hall declaring that if the examiners could not read a diploma they ought not to ask for one.

Opium Smoking.

The Government has forbidden the use of morphine, but opium smoking is spreading like a plague. Even the ashes of the once-smoked opium—called "shira"—are collected in the smoking houses and sold to special officials, who in turn sell them to the "morphine fiends" at a much higher price than the opium itself. This "shira" is, so to say, the essence of opium, and has the power and strength of pure morphine. Hence it costs more than opium, and is bought and smoked by the most abandoned victims of the habit.

The "Idarei Sélasé" is the name of the department which was created by Yeprem with the object of heavily taxing opium and alcohol. Every year that tax brings in more and more, and consequently the use of alcohol and of opium becomes less restrained and more openly recognized. And yet the Government forbids the use of morphine, because "morphine is harmful to the health of the citizens"!

Yeprem, it may be remarked, created the Idarei Sélasé in order that his *fedais* might be employed in this branch of Government service when the whole country had been pacified and peace and constitutionalism reigned everywhere. They would thus have been in receipt of fat salaries, and able to live in luxury. But fate has willed it otherwise; Yeprem is dead, his *fedais* scattered; and the department now employs men who used to serve in public coffee houses or gambling saloons.

LETTERS TO THE EDITOR.

The columns of THE NEAR EAST *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* THE NEAR EAST.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

"A SERBIAN LADY'S EXPERIENCES."

To the Editor of THE NEAR EAST.

Sir,—As one who knows something of "Austrian" priests and more particularly those splendid Serbian patriots, the Croat and Dalmatian Catholic clergy, I protest against the silly story of your Nish correspondent's "doctor's wife's friend," which carries its own refutation in line after line. That any priest would have said, "It is well to exterminate such vermin," of a mother and child, will not be believed by sane minds; and the statement that "supplication on bended knee and the tears of the child were useless" is contradicted by the fact that the narrator survives to tell the tale. This story is on a parallel with the bogus one of the Scotch nurse "mutilated by Germans," calculated to discredit the real grievances of the Serbian frontier folk, plundered and massacred by the invading Huns. The calumniation of Catholic priests no longer serves any good end now that Serbia's rightful claim to lands which are mainly Catholic is about to be crowned by victory.—Yours, etc.,

(Madame) ELISABETH CHRISTITCH.

TURKEY AND THE WAR.

To the Editor of THE NEAR EAST.

Sir,—If the Concert of Europe had shown a united front against Serbia, and if pressure had been brought to bear upon her the Powers would not only have saved themselves from an ignominious war; but would also have saved Austria from being humiliated by a minor state like Serbia. If the Powers had been true to their words and if the *status quo* had been maintained as it was proclaimed, the semi-savages of the Balkans would not have had the moral courage to flout the Concert of Europe. The Epirotes, assisted by Greece, had the audacity to violate the neutrality of Albania and perpetrate the most heinous crimes before the very eyes of the consuls of the Powers. As long as the "unspeakable Turk" remained in the Balkans he was flouted and harried; and as long as the Crescent flew over Macedonia there was equilibrium in the Balkans. Even the severe critics of Turkey cannot help admitting that the state of Macedonia and Albania is worse than it was under the Turkish yoke

Poor Prince William has proved his incapacity to rule the highlanders of Albania; and how could he be expected to govern the hardy Albanians when Turkey herself had experienced the greatest difficulty in governing them? What the Albanians demand is a Moslem prince, and no one can deny that their claim is just and reasonable; and no Moslem State other than Turkey is strong enough to rule Albania. If the Albanians chose one of their chieftains as their ruler, Italy and Austria would thwart his rule. Now that Serbia is involved in a life and death struggle with Austria, Turkey might be tempted to retrieve her lost possessions and prestige. In that case, she will have to confront not only Greece and Serbia, but also Italy, who is only waiting for an opportunity to kidnap the "foster-child" of Europe. Turkey is neither strong enough, nor would she be well advised if she were to avail herself of the opportunity left to her.

The best and wisest course for Turkey is to maintain strict neutrality, since she is not bound by treaty obligations to assist either Germany or Great Britain. It is true that the Turk can hardly remain a passive spectator when his co-religionists are butchered and ill-treated in Macedonia and Albania. But unless he himself governs his rayahs properly and puts an end to the wanton ill-treatment and expulsion of the Greeks, how can be expect Greece or any of his Christian neighbours to treat their Moslem subjects with equity? The unwise and unstatesmanlike attitude which the Porte has assumed towards the Greeks in Asia Minor will reflect very much on its sincere intention to carry out reforms in Armenia. The Turk is noted for his kindness to strangers: let him prove more humane and hospitable than his Balkan rivals.

Clouds threatening a heavy tempest are gathering on the Armenian frontier, and there is no knowing when it will burst. The flower of the Ottoman chivalry having been annihilated, the newly enlisted soldiers, who are raw and ill-disciplined, cannot withstand the onslaught of the Cossacks, the Treasury is practically empty, and the Armenian is ever discontented. Armenia is an open door to Russian invasion, in that it is devoid of railway communications and modern fortification. Worst of all, the Ottoman Navy, which was compelled to take shelter in the Dardanelles by the Greek Fleet, would melt away before the fire of the Russian warships. Taking all these things into consideration, how could the "Sick Man" embark on a scheme of aggression or *revanche*? Of late the relation between the Turk and his powerful neighbour has much improved, probably owing to the existence of the Russo-Turkish Association. Statesmanship, rather than sentiment, demands that he should maintain good relations with his neighbours; and this could be attained only if he maintained the strict neutrality he has already declared. If the Turk adhered to the very letter of his neutrality and governed his rayahs properly he could count upon, nay, claim, the sympathy and succour of not only Great Britain but also of Russia.

Neither Great Britain, France, nor Russia has any political aspiration in Albania; hence Turkey could court their assistance to regain Albania for herself. If Dame Europa restored her foundling to the proper guardian, she would not only relieve herself of a heavy responsibility but also save Italy and Austria, the two rivals, from cutting each other's throats. Now that Italy has deserted her allies, Germany would be only too glad to assist Turkey to secure Albania for herself. The fact that the Albanian insurgents demanded that an Englishman should be chosen to mediate between their Sovereign and themselves goes to prove that not only India and Egypt consider Great Britain as the greatest Moslem Power, but also other Mohammedan countries. Almost all the Moslem countries know that Germany, unlike Great Britain, is guided by motives of self-interest, and that the Kaiser of Hindustan has a better claim to be the champion and protector of Islam than the Kaiser of Germany. The arbitrary attitude of Russia in Persia and the lukewarm interest taken by Great Britain in Turkey has tended greatly to lower the prestige of Great Britain in the Near East. Germany has taken advantage of Great Britain's indifference, and pretends to be the champion of Islam. If Turkey has shown any sympathy towards Germany it is not because the Chauvinists at Constantinople are pro-German, nor because the policy of the Porte is anti-British, but because of Great Britain's hostile attitude towards Turkey. How sad it is to recollect that the efforts to bring about a *rapprochement* between Turkey and her traditional ally have been frustrated on account of the bellicose attitude of a certain section of the British Press! Great Britain has alienated Turkey by showing undue sympathy towards Greece. To make matters worse, she has forcibly taken over the two Dreadnoughts which were purchased by Turkey despite her financial straits. However, Turkey has not deserted her traditional ally and joined Germany, showing thereby that she still entertains best regards and gratitude towards Britain.

In conclusion, let it be admitted to the eternal credit of Great Britain that it was with the greatest reluctance she took part in this Continental warfare. In sooth, the sword was thrust into her hand by Germany, who, in the height of her audacious pugnacity, has not only menaced the peace of Europe, but also violated the neutrality of the minor states of Europe. Britannia rules the waves, and may she also rule Europe! Not as a dictator and oppressor like the Kaiser, but as the champion of law and liberty!—Yours, etc.,

A. HAMID.

Calicut, September 24.

TANGIER TO TEHERAN.

An enthusiastic optimist writes to ask what are the arms of Trent and Trieste, as he thinks some change in the sovereignty of those cities is imminent. The latter can certainly be esteemed as being within the purview of THE NEAR EAST, but what about the former? Still, one should always try to be polite. The shield of Trent is a simple *silver, a black eagle displayed armed, and guttée as to the body gold, langued gules.* Trieste proclaims how Austrian it is in every charge upon its shield. *Party per fess, in chief gold a double-headed eagle sable crowned of the field in base Austria, gules a fess silver charged with a fleur-de-lys gold.*

***

I learn that a Turkish comic journal is about to be started in Stamboul with the highly appropriate name of *Nasr-ed-Din Hodja.* If it prove to be as witty and as funny as its eponymous hero it will be assured of circulation and prosperity, and I suggest that the editor regale his readers from week to week with some new Hodja story—a complete collection of which (in the original *bien entendu*) would be a perpetual source of laughter. Turkish humour has a fine savour of its own, and I hope *Nasr-ed-Din Hodja* will be true to its name in dealing with the rich native article and in eschewing thin and doubtful foreign importations.

***

According to *L'Opinion*, a Salonika journal, it is reported in Persian circles in Constantinople that the Shiite hierarchs at Kerbellah and Nejef have issued a manifesto to the Persian nation and the tribes declaring that the time is ripe to deliver Persia from the Russian yoke. Sardar Malik Khan was also reported to have crossed the Russian frontier at the head of the Shahsevand tribes and to have advanced along the coast of the Caspian as far as Kizil Agatch, north of Lenkoran. The report goes on to say that the German Embassy is working hard to bring about a rupture of the Anglo-Russian-Persian accord. The latter statement at least I have no difficulty in accepting.

***

The mention of Persia reminds me that we have heard little or nothing about the doings of the Turco-Persian Frontier Commission for a very long time, the latest mention of it that I saw in the Press being a somewhat inaccurate account of an attack by Kurds upon certain members of the party and the wounding of Mr. Hubbard, the secretary to the British Commissioner. As a matter of fact, the Commission completed its labours some weeks ago. The work of the Commission was not exciting after all, but it was of real value, and the fact that it was done so quick-

Digitized by Google

ly reflects much credit on all concerned. A Persian correspondent informs me that the Turkish and Persian Commissioners could not agree on any single point officially, and that everything was consequently "submitted to arbitration" on the spot; so the British and Russian Commissioners were kept busy. But all is well that ends well, and if only Turkey and Persia can persuade their unruly subjects in the frontier districts to respect the boundary now marked out, another step towards real progress in the Near East will have been taken. I would urge the Shah and the Sultan to set a good example to their brother monarchs in the West.

***

Nowadays we get our news in very roundabout ways—hence delays which might even strike our ancestors of the pre-electric days as odd. For example, we may gather from an Amsterdam reproduction of a Berlin Agency telegram from Rome that a Bucharest journal learns from its Constantinople correspondent that it is being currently reported in Cairo that a neutral resident, recently arrived from Tangier, was informed at Algeçiras that the German Ambassador in Madrid had heard from his wife's uncle in Vienna that severe fighting was supposed to be in progress in Russian Poland. Or we may be told in a French official communiqué that the Germans have lost many guns in Belgium owing to British naval gun-fire—and we are not allowed to report it for fear the Germans may thereby learn that they have been engaged on the coast of the North Sea when they really believed that they were operating against the Serbians in Northern Anatolia, and were upon the point of occupying Dongola, instead of Dunkirk.

***

The Censor is rapidly becoming a national institution, and as a natural consequence shares in the obloquy which a nation of grumblers accords to its most valued possessions. We carp, we criticise, we complain—of course, nothing that can be said or written can any more affect the Censor than it can the House of Lords or the Nonconformist Conscience—and without doubt many are unreasonable in their accusations. For instance, I am told in tones of horror that there is a Censor in London who has a German wife and two sons now serving against Our Sovereign Lord the King in the field. Well—what of it? Are we not inhabitants of a free and tolerant country which has been brought up to love its enemies and let its own sons starve rather than do a poor foreigner out of a job which no Englishman would do for the pay? But perhaps the plaint has no foundation in fact—I merely refer to the matter to show how captious the public has become under the privation of the latest betting, all the winners, and foreigners from Europe. Why, we shall actually be hearing complaints next because the Censor has seen fit to employ an able-bodied alien enemy in a position of trust and emolument!

***

One of the most respected of our evening contemporaries this week published the statement, for which the authority of a Reuter's telegram was alleged, that the Crown Prince of Bulgaria had been promoted to the rank of captain on the occasion of his twenty-first birthday. As Prince Boris was born in January, 1894, he must still wait more than two months before he is twenty-one. To amend the text, for Bulgaria read Roumania. I cannot guess how the error originated. Perhaps it is another case of "my illegible handwriting"—the plea which was put forward by the Naval correspondent of a contemporary in extenuation of a geographical monstrosity which crept into one of his daily columns last week. If I remember rightly, Sumatra was removed from its home and placed at the entrance to the Red Sea. But, apart from *lapsus calami* and bad caligraphy, I can suggest nothing else. There is, however, a pit into which the unwary may fall owing to the identity of the names of the sires of the two young Crown Princes—a complication of the Balkan situation which has not, to my knowledge, been pointed out. The existence of two Ferdinands as Sovereigns of neighbouring Balkan States should provide plenty of confusion until we get accustomed to distinguishing them.

***

Although they cannot, naturally, expect a particularly good season, I am glad to see that both Egypt and the Sudan are maintaining that cheerful spirit which, we are told, is of such great value in time of war. One of the leading hotel-owning companies announces that it has already received so many inquiries for accommodation from old patrons that it will open five of its hotels in Cairo and its neighbourhood; and there is good reason to suppose that several parties are going to the Sudan on sporting trips. This is all to the good, inasmuch as it will help both countries over a trying period. German and Austrian visitors may be conspicuous by their absence, but Americans will be as welcome as ever in the Nile Valley, and our own country is likely to be fairly represented, though young men will doubtless be less numerous than usual.

CORSAIR.

THE WAR.

PRESS AND PUBLIC OPINION.

Needs of the Serbian Wounded.

A dispatch from the correspondent of *The Times*, at Valievo, under date of September 25, published in its issue of October 18, gives a mournful picture of the miserable plight of the Serbian wounded. The urgent need of our gallant ally is a sufficient reason for quoting at some length in the hope that the appeal may reach those who are in a position to help, and that the writer's concluding sentence may be falsified:—

And in the streets—what misery! The lamed, the halt, the maimed. Men with damaged leg or foot hopping along painfully by the aid of a friendly bâton; men nursing broken arms or shattered hands; men with bandaged heads; men being carried from operating shops to café floors; men with body wounds lying on stretchers—all with ragged, blood-bespattered remnants of what once were uniforms. One sees little of the glory of war in Valievo. The Serbian medical staff, deprived on this occasion of outside assistance and short alike of doctors, surgeons, nurses, and material, is striving heroically to cope with its task. Where they have been able to equip hospitals the work has been very creditably done. One building is almost exclusively devoted to cases where amputations have been necessary. It is clean, orderly, and the patients are obviously well cared for. Here, when I entered a ward of some thirty beds in which every man lay with a bandaged stump where his leg should be, I think I saw the Serbian spirit at its best. They had been newly operated upon, their sufferings must have been great, and for them all the future is black with forebodings. There is no patriotic fund in little Serbia. Yet amidst all the pain of body and uncertainty of mind that must have been theirs they did not complain. All they desired to know was whether the Schwaba (Austrians) had been beaten out of Serbia. But it is when one leaves the organized hospitals and wends one's way through the crowds of wounded who block the pavements, and enters a lower-class café, that the appalling tragedy of it all fills even the spectator with a sense of hopelessness. There, like cattle upon their bed of straw, lie sufferers from all manner of hurts. They remain mute and uncomplaining, just as they have been dropped down from the incoming oxen transports. Their wounds—three, four, or five days old—have yet received no attention save the primitive first-aid of the battlefield. Blood poisoning is setting in; limbs that prompt dressing would have saved are fast becoming victims for the surgeon's knife. Most of them know the risk they run, for this is their third war—often, too, their third wound—in two short years. Yet the doctors cannot come, because every man of them is already doing more than human energy allows. It is a heartrending sight to look down upon this helpless mass and to realize that many of them have been sentenced to painful death for mere lack of primitive medical attention. One wonders whether, now that half Europe has been transformed into a vast slaughter-house, appeals for sympathy can be other than in vain.

The Turkish Grievance.

How deeply the grievance which has arisen out of the action of the British Government in taking over the two Turkish warships rankles in the Turkish mind may be judged from an outburst of the *Tasvir-i-Efkiar*, one of the most nationalist organs of the C.U.P. party, in its issue of September 16. A correspondent has sent us a translation of the article in which our Turkish contemporary relieves its feelings:—

Just at this moment the fiercest and most terrible of storms which has ever been recorded in the history of the European nations rages in Europe. The Ottoman Government, whilst declaring its neutrality, is, however, taking all military measures necessary to be able to face any emergency. It is, however, painful to note that, without our having yet taken any steps towards mobilization, England has already dealt us a first blow in laying an embargo on our Dreadnought ("Sultan Osman"). Great Britain had taken some steps towards preventing the breaking out of the international war in Europe, but would it not be a mistake to believe that wars may be prevented when such acts as that of the seizure of our Dreadnought, which we can call by no other name than piracy, can be committed? It is not the first time we have been the victims of such arbitrary action and usurpation, but we must acknowledge that it falls to very few to be swindled in the same ungenerous manner as we have been by Great Britain.

In our opinion England has, before even declaration of the general war, descended to the lowest depths of debasement, because of which we, who as a nation having nothing to do with the war, find ourselves the victims of one of the most dastardly decisions of the British Government. . . . It is certain the seizure of our Dreadnought will raise the greatest hatred among the Ottomans and Mahometans against the British, and the fact that the English had not even the least right to make this seizure will make us eternal enemies of the English. . . . The British Government stated that the value of our Dreadnought would be paid. Would it not be better for the British Government *not* to pay also that money, and so commit a double rascality?

The article continues in the same strain for another half-column.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. Oct.	1914. Oct.		1332. Julhijja	5675. Hesvan
23	10	Friday	3	3
24	11	Saturday	4	4
25	12	Sunday	5	5
26	13	Monday	6	6
27	14	Tuesday	7	7
28	15	Wednesday	8	8
29	16	Thursday	9	9

To-day is the birthday of H.S.H. Princess Marie of Hohenzollern, niece to His Majesty the King of Roumania.

To-morrow is the birthday of Her Catholic Majesty the Queen of Spain.

To-morrow is the anniversary of the wedding at Schwerin in 1896 of H.R.H the Grand Duke of Oldenburg, nephew of the late ex-Queen Amalia of Greece, to H.H. the Duchess Elizabeth of Mecklenburg.

Sunday is the anniversary of the wedding at Rome in 1896 of Their Majesties the King and Queen of Italy.

Tuesday is the birthday of H.R.H. Prince Waldemar of Denmark, brother of Their Majesties the Queen Mother and the Empress Marie of Russia and of H.R.H. the Duchess of Cumberland, and uncle of Their Majesties the King of Denmark, the King of Norway, and the King of the Hellenes.

Tuesday, being 7 Julhijja, is the birthday of H.H. the Azud es Sultan, son of the late Muzaffar ed Din Shah and uncle to His Majesty the Shah of Persia.

Tuesday is the anniversary of the wedding in 1328 of H.I.H. Shadieh Sultana, daughter of the ex-Sultan Abdul Hamid Khan and sister of H.I.H. Burhan-ed-Din Mpret to Damad Fahir Bey.

Wednesday is the birthday of H.R.H. Princess Blanche d'Orléans, sister-in-law of Her Majesty the Queen-Dowager of the Two Sicilies and of the late Empress of Austria.

Wednesday is the anniversary of the wedding at Athens in 1889 of Their Majesties the King and Queen of the Hellenes.

Wednesday is also the anniversary of the wedding at Petrograd in 1867 of Her Majesty Queen Olga to the late King of the Hellenes.

Wednesday, being 8 Julhijja, is the birthday of H.I.H. Mediha Sultana, daughter of His Imperial Majesty the Sultan and wife of Senator Damad Ferid Pasha Bushati.

Wednesday is the birthday of H.H. the Salah-ed-Dauleh, son of the late Muzaffar-ed-Din Shah and uncle to His Majesty the Shah of Persia.

Thursday is the birthday of H.R.H. Princess Marie, second daughter of His Majesty the King of Roumania.

At noon on Sunday, at the conclusion of the ordinary service in the Greek Church of St. Sophia, Moscow Road, Bayswater, a solemn Requiem Mass was sung for the repose of the soul of his late Majesty King Carol of Roumania. The service was conducted by the Great Archimandrite, Dr. Constantine Pagonis, assisted by the Archimandrite, the Rev. Agathangelos Moschovakis. H.M. the King was represented by Lord Sandhurst, the Lord Chamberlain, who was accompanied by the Hon. Sir Arthur Walsh, Master of the Ceremonies. T.R.H. Princess Christian of Schleswig-Holstein and Princess Henry of Battenberg were represented by Lieutenant-Colonel the Hon. Francis Colborne. Captain Ralph Glynn was present on behalf of H.R.H. Princess Louise Duchess of Argyll. Sir Edward Grey was represented by Mr. Walford Selby, and Sir Walter Langley attended on behalf of the Foreign Office.

H.R.H. Princess George of Greece has sent from Denmark, where she was at the time, to Mme. Poincaré the sum of 50,000frs. to be equally shared between the Society for the Help of the Wounded and the Union of the Women of France.

It is reported from Amsterdam that H.R.H. the Duke of Brunswick, eldest son of H.R.H. the Duke of Cumberland, has been taken prisoner. No confirmation has as yet been received.

It is reported that H.H. Prince Maximilian of Hesse, nephew of her Majesty the Queen of the Hellenes, has been killed in action.

The death in action is announced of H.S.H. Prince Wolfrad Friedrich of Waldeck and Pyrmont, half-brother of her Majesty the Queen-Dowager of the Netherlands and of H.R.H. the Dowager-Duchess of Albany.

H.H. Prince Arsene Karageorgevitch, brother of the King of Serbia, has arrived in Petrograd to join the Russian Army, in which he fought during the Russo-Japanese War, when he was present at the battles of Mukden and the Shaho.

El Mokattam learns, "on the best authority," that H.H. the Khedive has not left Constantinople, nor does he intend to leave for Europe this year. The rumours of his departure are all groundless.

We are informed that H.H. Nasr-ul-Mulk, ex-Regent of Persia, is now in London. We understand that the visit is strictly a private one.

Sir Francis Elliott has returned to Athens.

We understand that Sir Percy Cox will shortly be returning to Bushire.

Mr. Hadjimischeff, the newly appointed Bulgarian Minister to the Court of St. James', will arrive in London shortly. Mr. Constantin C. Mincoff, First Secretary, is acting as Chargé d'Affaires.

We understand that the Chancellor of the Exchequer has received a telegram from a number of influential Serbians, thanking him for the generous references to their country in his recent speech at the Queen's Hall.

At the Royal College of Physicians, on Monday, Major Sir Ronald Ross was presented with the Bisset Hawkins Memorial Medal, in recognition of his researches on malaria.

We understand that Canon MacInnes, the new Bishop in Jerusalem, expects to leave England for Egypt at the end of November, and to stay there for three or four months.

A meeting of the officers of the 1st Infantry Battalion of the Egyptian Army was held on October 6, at the Continental Hotel, Cairo, to say farewell to Kaimakam C. Little Bey, the Commanding Officer, who has been promoted Assistant Adjutant-General at Khartoum. A speech was made on behalf of the officers by Yuzbashi Sabet Hassan.

A correspondent writes:—The many friends of H.E. Yacoub Pasha Artin and Mme. Artin are glad to know that he reached Egypt safely after a trying journey. He was at Leipsic at the time of the ultimatum to Serbia, and at Munich when war was declared by Germany against Russia and France. After this no trains were available from Munich, and it was necessary to hire a motor-car. Armed with a pass from the military authorities, he made a start, but the pass was lost by the chauffeur. The party, after obtaining a fresh pass, was detained at various places, losing much time. They were, indeed, stopped forty-five times during a distance of 250 kilometres. Finally they reached Italy, and were able to secure passages to Egypt from Naples after a delay there of twelve days. Artin Pasha was due to reach England in September. Professor Sayce was expecting him on a visit at Edinburgh early in the month, and his friends in London were hoping to see him here soon after for a visit of some duration.

Major-General Hubert Ion Wetherall Hamilton, C.B., D.S.O., who has been killed in action, served in the Egyptian campaigns of 1897-9, including the battles of Atbara and Khartoum, being three times mentioned in despatches and receiving the D.S.O. After the South African war he accompanied Lord Kitchener to India as his military secretary.

We regret that by an oversight we referred to Mrs. Elizabeth Christitch as Miss Elizabeth Christitch in our last issue. The error is the more inexcusable seeing that Mrs. Christitch has a son in command of a cavalry squadron, fighting with the Serbian Army.

Lieutenant-Colonel A. Blewitt, late of the 60th King's Royal Rifle Corps, who has been selected to command one of the new batta-

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

lions of the Royal Warwickshire Regiment, served with the Nile expedition in 1896, when he took part in the action of Abu Hamed, was mentioned in despatches, and awarded the Egyptian medal with two clasps. In 1898 he again saw active service in the same region, including the battles of Atbara and Khartoum. Twice mentioned in despatches, he received a brevet-majority and two clasps to the Egyptian medal. In the following year a third clasp was added to his Egyptian medal.

On Friday, September 25, the Egyptian officers were at home at their club to entertain Lieutenant-Colonel Wallace and the officers of the 1st Battalion Suffolk Regiment before their departure to the front. His Excellency the Governor-General, with H.E. Colonel Bernard Pasha, El Lewa Drake Pasha, El Lewa Smyth Pasha, V.C., El Lewa Bray Pasha, El Kaimakam Symes Bey, El Kaimakam Kennedy Bey, El Kaimakam Karrol Bey, and El Bimbashi Edward, arrived at the club, together with Lieutenant-Colonel Wallace and the officers of the Suffolk Regiment. Ahmed Bey Fakin, the president of the club, after welcoming the guests, read an address to which Lieutenant-Colonel Wallace replied. His Excellency the Governor-General also addressed the Egyptian officers in Arabic. Tea was then served in the club gardens.

It is understood that the Marchese Imperiali, now Italian Ambassador at the Court of St. James's, may succeed the late Marchese di San Giuliano at the Consulta. It will be remembered that the late Italian Minister for Foreign Affairs was himself formerly Italian Ambassador in London.

A marriage has been arranged, and will take place very quietly on Monday afternoon next, at half-past two'clock, at St. Paul's Church, Knightsbridge, between Grace Mary, eldest daughter of T. Morgan Martin, M.B., of Sydney, Australia, and Lieutenant-Colonel E. A. Plunkett, Military Attaché, Sofia, Athens, etc., son of Lieutenant-Colonel G. T. Plunkett, C.B., of Belvedere Lodge, Wimbledon.

The marriage took place on Tuesday, by special licence owing to the War, in St. Mary Abbot's Church, Kensington, by the Rev. C. S. Durham, between Henry J. Higgs, Egyptian Irrigation Service and Special Reserve of Officers, R.E. (2nd Field Company), son of Joseph Higgs, barrister-at-law, of Indiana, U.S.A., and Gladys Winifred, daughter of J. Rawlings, J.P., of Hughenden, Hartlepool.

Owing to the dislocation of the mail service, letters and papers from Egypt are somewhat belated. From copies of *The Egyptian Gazette* just to hand we glean the following items of personal news :—

Up to October 3 no news had been received in Egypt since August 7 from Mr. Leysbeth, the Belgian Consul at Alexandria, when he wrote from Louvain, of which city he was a native.

Mr. and Mrs. Carton de Wiart arrived in Cairo on September 28 after their prolonged stay in Austria. Having secured a pass ensuring their safe crossing of the frontier, Mr. and Mrs. de Wiart motored from Trieste to Venice and joined the Italian steamer, arriving in Alexandria on the following night.

According to a recent issue of *The Egyptian Gazette*, about twenty-five British officials of the P.W.D. are either at the front or preparing to join the Army for active service in one capacity or another. Mr. Cooper, Director-General of the Blue Nile Barrage Projects, has joined the Flying Corps for service at the front. Mr. J. H. Scott, of the Law School, has been given a commission in the Scottish Horse. Mr. McLoughlin, of the P.W.D., has resigned from the Government and joined Lovat's Scouts. Mr. Stevenson, son of the Director-General of the Telephone Company, has joined the same corps. Messrs. A. G. Mitchell, E. A. W. Plumptre, and T. P. Williams, all of the Ministry of Education, have temporarily resigned in order to join the Army. Mr. H. Skil, of the Survey Department, has left Cairo to enlist in the French Army.

A meeting of the members of the British community in Khartoum, Khartoum North, and Omdurman was held on Tuesday evening, September 22, at the Skating Rink, in connection with the Prince of Wales's Fund. His Excellency the Governor-General presided, and was supported by Mr. Bonham Carter, C.M.G., the Legal Secretary, Colonel Bernard, C.M.G., Financial Secretary, Colonel Smyth, V.C., Colonel Drake, Colonel Bray, Mr. More, the Governor of Khartoum, Mr. Job, Mr. McGillivray, and the Rev. A. Lee-Warner. His Excellency and others spoke, pointing out the duty of the community to help the Fund according to their ability. As a result of the meeting a general committee was appointed with Colonel E. E. Bernard as chairman.

We regret to record the death of Judge A. J. Wakeman Long, which took place at Meadi, near Cairo, on the 7th inst., from a hæmorrhage. The late judge had been consumptive for the past two years, and some time ago he had a breakdown in health, since which he had never really recovered. Mr. Long was a judge of the Native Court of Appeal; previous to that he was on the bench at Tanta, where he was extremely popular. He was first appointed to a judgeship in 1905, before which he practised as a solicitor at Alexandria.

The death of General Neshat Pasha, one of the defenders of Plevna, is announced from Constantinople.

The death is announced of Lieutenant-Colonel Keith David Erskine, C.I.E., of the Indian Political Department. His last appointment was as Consul-General at Baghdad, whence he was invalided home last July.

The death occurred at Newlands, Ware, Herts, on Saturday, of Admiral Sir Henry Frederick Nicholson, K.C.B., aged seventy-eight. Sir Henry, who entered the Navy in 1849, commanded the "Têmêraire" at the bombardment of Alexandria.

The late Colonel the Hon. Augustus Murray Cathcart, who saw service in the Crimea with the Grenadier Guards, left £185,484.

Le Messager d'Athenes learns from The Hague that M. Goekop, the well-known Dutch archæologist and philhellene, has died from the effects of an accident. The late M. Goekop spent large sums in the interests of archæological research in Greece, and furnished Dr. Dörpfeld, director of the Archæological Institute of Athens, with the financial support necessary to make investigations at Leukos in connection with his theory identifying the Ithaka of Ulysses with Leukos. The Netherland Red Cross Mission to Greece during the Balkan wars was equipped at M. Goekop's expense. When his death was announced, Mr. Venizelos at once telegraphed to Baron Lehman, Consul-General of Greece at Amsterdam, to convey the condolences of the Greek Government to the bereaved family.

APPOINTMENTS, PROMOTIONS, ETC.

H.I.H. Yussuf Izz-ed-Din Effendi has been appointed Generalissimo of the Imperial Ottoman Army and Navy.

Cardinal Gasparri, the newly appointed Papal Secretary of State, was for some ten years—from January, 1898—Titular Archbishop of Caesarea, in Palestine.

Mr. Cooper, Director-General of the Sudan Irrigation Department, has been transferred to the Irrigation Service in Egypt, and will act as Inspector of the Gizeh Irrigation Works. The Sudan Department has suspended its works for the time being, owing to the war.

Mr. E. T. Brown has been appointed Director of Customs at Port Said in place of Goldstein Bey.

Mr. P. Tchernaieff, the recently appointed Bulgarian Consul at Serres, has, according to the *Journal des Balkans*, resigned his post.

DOMESTIC ANNOUNCEMENTS

BIRTH.

GILBART-SMITH.—On October 14, 1914, at Kasr-el-Dubara, Cairo, to the wife of Claud Gilbart-Smith, Ministry of Education—a son.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.
Are the Finest on the Nile.

Cairo.

HOTEL D'ANGLETERRE.
Comfortable and Quiet. Near Opera Square.

GRAND CONTINENTAL.
Central Situation. Opp. Esbekieh Gardens.

SAVOY HOTEL.
Most Fashionable Hotel in Egypt.

MENA HOUSE HOTEL.
At foot of the Great Pyramids.

GRAND HOTEL, HELOUAN.
Excellent Family Hotel, adjoining Golf Links.

HOTEL DES BAINS, HELOUAN.
Opposite Sulphur Baths Establishment.

HOTEL CASINO, SAN STEFANO.
Near Alexandria. Favourite Bathing Resort.

CAIRO.

HELIOPOLIS PALACE HOTEL.
The most luxurious and comfortable Hotel in the world.
Connected with the centre of Cairo by the Electric Metropolitan (10 minutes' journey).
Altitude, 40 metres above the Nile valley.
Splendid view over Cairo.
GOLF, POLO, CRICKET. HIPPODROME in vicinity of Hotel.
Under the same management—
HELIOPOLIS HOUSE,
A first-class Family Hotel, with moderate terms.

Alexandria.

MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Alexandria.

CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 80 per day.
G. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

Alexandria.

WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.
Inclusive Terms from P.T. 50 (10s.) per day.
Special Terms to Government Officials, Commercial Travellers, and for long stays.
Proprietor and Manager—AUG. van MILLINGEN.

PAN-GERMANISM AND ISLAM.

When Ulysses found himself in danger from the sirens he took the precaution to have himself bound to the mast and ordered the ship to maintain a straight course. Turkey's good ship of State has come within the sound of the siren voices of Germany, but instead of imitating Ulysses' example and binding itself to the mast of neutrality, the Government takes on board a German pilot and proceeds to steer an erratic course in dangerous waters. The sirens, meanwhile, assume many shapes, and their voices flatter as never before. On the one side it is a group of great siege guns which offer assurances of brilliant victories; on another a million sterling opens up vistas of full pockets to the unpaid crew nominally in charge of the unfortunate vessel; and all the time the siren voices tell of German successes, and hold out the promise of rich rewards for those who will throw in their lot with Germany. If flattery had not dulled the Turkish perception the country would be asking itself why the Germans had adopted this altruistic attitude. In former days Germany was ever ready to profess her friendship for the Ottoman Empire, but she preferred that the outward visible sign of such friendship should be lucrative concessions placed by the Porte in German hands. Now she offers Turkey two men-of-war on loan, with officers and men to man them, while throwing in as unconsidered trifles guns and a round million of money. Amid such protestations of friendship Turkey has forgotten to inquire why she has suddenly become the object of Germany's unwonted generosity. If it is because she shares with her the same high standard of *Kultur*, then we know that any victories won by Turkish arms will also follow in the wake of Louvain and Termonde as boons and blessings to mankind in general. If, on the other hand, Turkey is asked to strike a blow in her own interests, it must seem strange that Germany should be solicitous of Turkey's welfare at a time when her own line of battle has been flung back from Paris and the Austro-German armies have to acknowledge failure in every part of the vast theatre of hostilities. Clearly war has its disappointments, and it may be that Turkish hopes will be as rudely shattered as those of Germany on the Marne or Austria-Hungary's in Galicia. When the aim is high, failure, it is true, if it be not overwhelming, may bring its consolations. But we doubt whether the aims which the military clique in Constantinople has in view would seem lofty enough to good Moslems the world over to compensate for the penalty that would have to be paid for failure—the humiliation of the Khalif and his expulsion from Europe.

This war of the nations is the inevitable outcome of Prussian militarism, which has found a useful ally in Pan-Germanism. The objects of the latter are manifest. They are to impose the will of Germany on an unappreciative world in order that she may gratify her love of power and pose as the fountain-head of civilization. As the process requires the elimination of France, the subjection of Great Britain, and the crippling of Russia, it may be questioned where in the scope of German hegemony room will be found for the Ottoman Empire in any way commensurate with the present display of Germany's disinterested friendship for it. In the history of German dealings with Turkey we see little to justify the supposition that the Emperor William is prepared to admit Moslems into the German monopoly of the attentions of Providence. Of the attractions which the various Moslem communities of the world exercise upon the mind of the German Emperor we have abundant evidence. No Moslems, however, owe him allegiance, and for this reason the attraction cannot be explained merely by Imperial solicitude for their well-being. These same Moslem communities, on the other hand, do owe allegiance to the British Crown or to the French Republic, or, as in the case of the Ottoman Empire, are from geographical reasons brought into very close relations with one or other of the Powers of the Triple Entente. The Emperor William's interest in the Moslem world, therefore, will be found to spring much more from his international preoccupations than from altruistic concern for the welfare of Mohammed's followers. With Islam, indeed, Germany has nothing in common; but if its warriors can be induced to pick German chestnuts out of the fire, the Emperor William is ready to offer them every encouragement. Moslems, therefore, throughout the world are being incited by Germany against the very Powers whose direct interests in Islam mark out each of them as a true friend. How this incitement has been received in the majority of countries we know from the examples of India and the Senussi. The fact that only in Turkey have German intrigues found favourable ground prompts the question whether the destinies of the Ottoman Empire rest at this moment in good Moslem hands. What are the conditions which differentiate Ottoman interests from Moslem interests in all other parts of the world that the Porte alone should be hostile to the great Mohammedan Powers? We believe that there are none, and that the reason for the Porte's attitude must be sought in the potency of German gold over considerations of Moslem interests.

The danger that threatens Turkey is of her own contriving. "When Othman falls Islam falls," is the Mussulman belief that has done much to secure the dominion of the Ottoman clan, and so is responsible for the vitality of the Ottoman Empire. Othman has not yet fallen in the sense in which the old faith accepts the word; but the "Sultan of the Sky" has been shorn of much of the power of the Amuraths. Long years of misrule had prepared the people for the theory that any régime must be an improvement upon the terrorism of an Abdul Hamid. To-day, in conformity with the constitutional doctrine, the Sultan effaces himself behind his Ministers. When the system has worked long enough to ensure that the Ministers shall be the chosen representatives of the people, the country has only itself to blame if it feels that it does not possess the Government it deserves. But when in their inexperience the people allow their representatives to nominate themselves, there can be no guarantee that one despotism has not been exchanged for another. The new system may make for the better administration of the Ottoman Empire. With his temporal authority, however, it may happen that the Sultan has sometimes to delegate the functions of the Khalifate. His Cabinet may comprise exemplary administrators, but is there the same guarantee that their concern for the welfare of Islam will be as vigorous as that of the Padishah himself? In the military surroundings of Potsdam Mussulman fervour may cool and appreciation of Mussulman interests become blunted. We look in vain behind German siege guns and the German crews of ex-German men-of-war for solidarity of feeling in the Moslem world. It is as if the empire of the Othmans were to be sacrificed to the ambitions of a few who have eaten German salt and handled German money The Sultan is known to favour peace. His Ministers—or some of them—hanker after war. In this difference of opinion lie the destinies of the Moslem world, and the opinion of good Moslems alone should decide. While they ponder the issue and make their fateful choice, the siren voices of Germany will fade far into the distance, and who can doubt what the verdict will be?

CYPRUS HIGH COMMISSIONER.

In a letter written from Larnaca last month a Greek gentleman pays a well-merited compliment to the High Commissioner. He writes:—

"Cyprus owes a debt of gratitude to Sir Hamilton Goold Adams, its High Commissioner, for the efforts he has successfully made to save the Island from a financial crisis. He is always accessible, and no previous High Commissioner has ever displayed such keen personal interest in the agricultural and business affairs of the Island. Cyprus is fortunate to have at the head of its Administration such a man at the present juncture.

TRÖODOS IN WAR TIME.

By MARGARET BOVILL.

On Tröodos a handful of English people look down on the placid sea which circles the Island, straining their eyes to see the ship which will bring them news of the outer world. The weekly mail-boat from Egypt has ceased to run, and telegrams from Aden contain but meagre information about the war. This letter will in all probability be carried across in a sailing vessel.

A blue sky shines like a burnished mirror; the pine trees stand in maddening, quiet serenity, their dark foliage glowing in the sunshine; birds twitter and call; the woods are green aisles of peace. But Armageddon has cast its shadow! Startling rumours fly about, though Cyprus is under martial law, and a strict censorship exists. A wild-eyed Turk whispering in the kitchen tells of how the German fleet has been annihilated; the Greek cook implores the Panayia (Mother of God) to send victory to the arms of England; all the servants concur. Boy scouts, with red bands round their necks, are having a lesson in first aid; babies of six and seven learn how to tie up an artery; they go about with serious, important faces, and childish games are forgotten. The huts lie hidden among the trees, and twice daily a zaptieh rides along the winding paths which compass them. In his satchel he carries the latest telegrams; perhaps those in England, certain of their evening papers and their special editions, cannot realise how eagerly they are read. Though all hearts are strung with anxiety, a ladies' cricket match is taking place, played on the parade ground of the camp, where the company of British troops is quartered. Rows of spectators look on, dressed in flannel, white dresses, and gaily trimmed hats. If here and there a few detach themselves to talk in lowered voices, who can wonder? Through the tension, the anxiety, there is a great calm bred of the sense of the righteousness of the war, of the sailors and soldiers who will uphold it. Up to the sweltering plains a car rushes past, bringing Government officials who have been sent down on special duty to the port towns; later, as a violent sunset stains the sky blood red, a string of mules patters round a curve of the precipitous road. They are laden with tents and camp baggage belonging to one who has been away in the forests. Buried in inaccessible valleys, he has known nothing of the events which have stirred the world. Everyone gathers round him, telling him the great news. To a mind tinged with memories of calm streams bordered by vistas of pink oleanders, of blue-branched cedars, such news is overwhelming. The pine needles rustle, as a chilly night air rises with the gathering mists, and the crowd, shivering, disperses and melts away.

Two weeks ago it was a joy to wake on Tröodos, to watch through an open door how the pale sunlight filtered through the trees; to hear the wood pigeon's melodious coo; to watch a thousand spiders' webs draping the bracken in silver mail. Now the mind is jerked back into reality by the stern rein of memory, and struggles helplessly with the impossible idea, until the sunshine and the bracken become a mirage, the birds' song a funeral dirge and smiling nature a ghastly phantom. Such waking is a nightmare, a nightmare that does not fly, scared, back into the darkness from which it came. Soon the brain adjusts itself, and the immediate necessity is to dress, to see the start of the half-company which is being sent down into the plains. Away they go laughing and joking, a little band of khaki-clad soldiers infinitely small in numbers, caring nothing for the heat they will have to endure, delighted at having something to do. A film of dust hides them, and those who watched return home; the women to work, to read, to write, to do anything which will fill the time profitably.

The road which traverses the hill-top is more than usually full of natives leading donkeys carrying vegetables and fruit. For the war news has spread rapidly in the mysterious Oriental manner, and they are anxious to bring their produce to the best market. Glossy green apples are sold at six to nine piastres an oke (2 4-5 lbs.), melons, plums, almonds, and grapes show lusciously in the depths of cane baskets. They are bargained for by housewives, surrounded by fair-haired children, and for these the swarthy Cypriote, be he Turk or Greek, has always a smile. Galloping hoofs throw the yellow dust high as an orderly from Government House hurries past. For a moment bargaining ceases as the native mind dully recalls the fact of war (so much less important than the half piastre he hopes to gain). And the Englishwoman gathers the children closer and faces the future with a smile.

Two more scenes:

On the slope of Olympus is a small hotel, standing where the steep descent leads downwards to the capital. Built of tin and wood, it is exposed to every wind that blows, but the view from its verandah is one of the most beautiful in the Mediterranean. Facing east, the spectator can seen the sun rise from a dense bank of humid clouds, can see it slowly scale the heavens and disperse the drifting mist wraiths. Here, every moonlight night, a panorama is unfolded; where the hilltops drop gradually towards the plains, their scarred summits pointed defiantly towards the serene stars, the vague distance lost in purple obscurity. Lights shine in the dining-room. And at small tables are cosmopolitan groups: English, Germans, Greeks, Turks, Russians, Austrians, domiciled in Cyprus, or who have come to spend the summer on Tröodos. Scraps of conversation fly about:—"Good soldiers the Germans, but never been tried," "Remember Alsace and Lorraine," "The North Sea trawlers free to fish again," "No news from the Austrian frontier," and so it goes on; there is no animosity between any nationality. Perhaps war is sometimes necessary; this one, we know, was not sought by us. The fact remains, English, Germans, Russians, are good friends here while it is raging; let us hope that they will be still better ones when peace is declared.

In a far-away Greek monastery, built in the eleventh century, service is being held at nightfall. The *iconostasis* which spreads like a glittering shield before the "Holy of Holies" is blazing with light, gilded icons stare down from their jewelled frames, swinging silver lamps, dedicated to Orthodox saints, shine with faint lustre. The church is in semi-darkness, and black-bearded priests in rich robes of scarlet and purple intone the office; rows of monks line the narrow wooden stalls; some natives in coloured waistcoats, loose breeches, and long boots stand reverently in the body of the church. They are travellers from one village to another, halting with their animals for a night's rest. The whole building is strong, massive; heavily barred windows set into walls three feet thick stare across miles of wooded mountainous country; within, long stone corridors worn by countless feet, lead into a labyrinth of cells and offices. An unshaven acolyte, his lank hair bunched into a long coil, hastens with a telegram in his hand towards the abbot's chamber. Telegrams are unusual in such mediæval setting, and the acolyte holds it as if it were alive. It is! It contains the news of England's refusal to allow the violation of the neutrality of Belgium. Instantly the monastery is awake, throbbing with unbridled excitement.

So the great tide of war stirs the remotest corners of lands under the protection of the British flag.

NOTES FROM CYPRUS.

(From a Correspondent.)

Prayers have been offered in Greek churches for the success of the British arms. At Platres the Bishops of Kition and Papho officiated. The High Commissioner, being unable to attend the service, sent a letter to the Bishops, which gave great gratification. On September 27, at the great fair of Omodhos, another service was held at the Church of the Cross, which was attended by the High Commissioner. Greek feeling is strongly in favour of the Allied Forces.

Turkish feeling has become pro-German, but the proclamation of martial law and the proclamations issued by the High Commissioner have had the desired effect, and any open disloyalty would be at once suppressed. A Turkish Zaptieh has been sentenced by court martial to a year's imprisonment for using disloyal language.

All Commissioners of Districts are now Provost-Marshals, the Presidents of District Courts being assistants. The Commissioner of Limassol, Major Bolton, acted for four years in a similar capacity in South Africa.

The tariff which has been established for most of the necessary articles of foodstuff has given great satisfaction. Some fines have been inflicted upon tradesmen selling goods above the prices fixed, and some heavy penalties have been imposed on persons convicted of obtaining permission to export cattle under false pretences.

THE PRESS ON THE NEAR EAST.

Pierre Loti's Appeal to Enver Pasha.

The Egyptian Mail in a recent issue gives a translation of a letter written to Enver Pasha by Pierre Loti. We quote some extracts below:—

. . . . I well divine, alas! the pressure exerted on your dear country and on you by the abominable being in whom all the tares of the Prussian race are incarnate—ferocity, vanity and trickery. He must have abused your fine and glowing patriotism in enticing you by illusory promises of revenge. He has certainly known how to prevent the truth reaching you, for without that your loyal soldier's heart would have turned from him. He has known how to persuade, you as well as a part of his people, that he was forced into these butcheries, which on the contrary with an infernal cynicism were so long premeditated. He has succeeded in giving you faith in his victories, whilst he knows, with all the world, that the triumph will end by being ours. And, moreover, if the impossible happened, and we had to succumb for a time, Prussia and its dynasty of wild beasts would no less remain for ever fixed in the most shameful pillory in human history.

In conclusion, the writer says:—

I keep an unshaken faith in our final triumph. But on the day of our deliverance how my joy will be veiled with mourning if my second oriental country lies buried beneath the ruins of the hideous empire of Prussia.

A Southern Slav State.

In *The Sheffield Daily Telegraph*, of October 16, a report is published of a lecture on "Austria and Serbia," given by Dr. R. W. Seton Watson, at the Victoria Hall, Sheffield, on the previous night, in connection with the series of weekly lectures arranged by the University. We quote an extract:—

Serbia was essentially a "self-made man" among States—with, as a curse, the rivalry of three native dynasties. The history of the southern Slavs for the last century had been a slow movement towards national unity, sometimes hastened and sometimes paralysed by the rivalry of Austria and Russia for the hegemony of the Balkan Peninsula. Even if every man in Serbia were willing to prostrate himself before the Hapsburg throne there could be no real peace until the internal problem between Austria-Hungary and the southern Slavs was solved. We were witnessing the birth-throes of a new nation, the rise of a new national consciousness, the triumph of the idea of national unity amongst the three southern Slav States. Fate had assigned to Britain and to France an important share in the solution of the problem, and it was our duty to insist that this solution should be radical and permanent, based upon the principles of nationality and the wishes of the southern Slav races. "The old Europe," said the speaker, "has gone beyond recall. Let us bravely meet fate half-way and say 'We will have it so.' After this we want a new and a better Europe, and I ask you to join with me in welcoming the new Southern Slav State and wishing it a worthy place among the nations of a free Europe that is to be."

"El Gemel."

An amusing article in *The Globe* (October 12), in which "An Old Campaigner" gives a sketch of "El Gemel" as he knew him in the Sudan, will doubtless interest the large number of our readers who have met that useful but unlovely beast. He says:—

It is not easy to love a camel. Indeed, I should defy even the secretary of Our Dumb Friends' League to take a camel to his sympathetic bosom. Kindness is absolutely wasted on a camel. He does not understand it, and regards it merely as a sign of weakness and a direct encouragement to turn and "savage" you. A camel's bite is a very terrible thing. Strictly speaking, he chews rather than bites, but what matter his method of attack when, with his enormously muscular lips, he can quickly reduce a man's shoulder to pulp.

Here are some more of his amiable qualities described:—

In regard to work, the camel is a born trade unionist, and a firm believer in an eight hours' day. Although for ever filling the air with the most hideous lamentations, wheezings, and groanings, a camel will travel contentedly enough for eight hours at a stretch, during which a fast naga (a riding mare camel) will cover from 80 to 100 miles, but ask him to work overtime and he will kick. If he cannot take it out of you personally he will revenge himself by dying. Certain Orientals are credited with being able to shuffle off this mortal coil at will. This may or may not be true, but the camel certainly has the power of dying whenever he wants to. Annoyed, he will just lie down and prepare to die, that is unless you are quick to peg his neck down in the sand so that he cannot twist his head away under his left flank, this being the position in which every self-respecting camel must die. After a while a camel thus pegged down will give in, and with frightful moanings and gruntings intimate his willingness to continue an existence into which he wishes he had never been born. Eight hours for work, eight hours for food, eight hours for rest, that is the camel's daily day. A camel never plays. his nearest approach to human weakness is his love of tobacco. After a camel has been fed his driver will hunker down beside him, and lighting a pipe, strong enough to kill at forty rods, puff the pungent smoke into the nostrils of the camel, who for once in a way ceases his eternal plaints.

"Sketching in Morocco."

The October *Studio* contains a charming letter, under the above heading, by Miss Hilda Rix, a young Australian artist, in which she relates her experiences during a recent visit to Morocco. Here is an example of Arab courtesy:—

Often in the heat of work I am not conscious of the ring of people until with a snap a pencil breaks, and I hear a chorus of gentle groans of sympathy—and when I dropped a pencil the other day an Arab picked it up, and, seeing the point was broken, whipped out his large knife and sharpened it and presented it to me with a beaming smile.

But sometimes her sketching excited suspicion. She describes with a lively sense of the humorous how the owner of a camel that she wanted to sketch tried to foil her efforts, as he feared the effect of the "evil eye" on his property:—

So he planted himself in front of the beast, and a friend, looking equally fierce, joined him; the two of them, holding out their wide jelabas, succeeded in blocking out my entire view. Well, I looked pathetic for an instant, saying "La, la!" (No, no!) But finding them adamant, I went away amid much heated comment and laughter. Instead of going quite away, however, I made a little detour and returned to that corner of the Soko, but on the other side of the camel, and stood on a two-foot-high wall, from where I got a splendid view of my game. I proceeded to draw feverishly. Presently the crowd spotted me, and caught on, laughing; this caused the two angry men to look up, and seeing me at it again unbaffled, one of them again placed himself in front of the camel's head. In spite of this and the excitement around me, I managed to get the whole squatting body of the beast. But the owner's rage was at fever heat when my merry audience called to him that I had potted his camel. He jumped up, hoisted the loads on to its hump, untied its folded knees, and prodded it to get up and run. They ran—but so did I, drawing all the way while running, with a torrent of laughing, cheering Arabs beside and behind me. Oh, such fun! I chased them right up the hill, my pencil flying at work, head bobbing up and down—dodging squatting people, and laughing with the joy of the sport as I ran, until my game vanished round the corner up the hill. But I had won my point and got my camel's head, midst cheers and roars of laughter from the crowd of onlookers who had been intently watching my exploits. The owner's friend, who had been so furious before, came behind me and said, "Mizziaan! mizziaan!" which means "splendid."

Article to Note.

"A Proposito dell' Abolizione delle Capitolazioni in Turchia," by Dr. Giovanni de Benedetti Cerruti, in *L'Esplorazione Commerciale* (Milan, September 30).

FOR WOUNDED INDIAN SOLDIERS.

The determination to bring wounded soldiers from his Majesty's Indian Expeditionary Force to England will be a disappointment to many people in Egypt, but in the case of a man wounded in the north of France it is inhuman to subject his shattered frame to the torment of a long train journey to Marseilles for the sake of sentiment. The hospital accommodation in England is every whit as good as any which could be prepared in Alexandria, and the wounded Indians will find numbers of friends in this country to prove to them that they are not forgotten strangers in an inhospitable land. It is, indeed, highly probable that there are more men here who can from long experience cheer them with conversation in their own language than could be found even in Egypt. In view of what may be said by our enemies, we hasten to assure our readers that there is nothing "political" in this revision of arrangements. It is entirely due to the difficulties of railway transport, it being plainly impracticable while sending British wounded from Flanders to the nearest coast to dispatch Indian wounded to the furthest coast over lines congested by the service of supply, or understaffed on account of the absence of so many railway servants at the front.

W. N. WILLIS'S GREAT BOOK,

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist **LORD KITCHENER** in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 46-50, Waterloo Rd., London.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The announcement made yesterday by the Press Bureau, and quoted at length elsewhere, to the effect that the Egyptian Government are taking steps "to remove from the Suez Canal all enemy ships which have been long enough in the canal ports to show clearly that they have no intention of departing in the ordinary way," is excellent news, and will, I am sure, be heartily endorsed both at home and in Egypt. At last, it seems, we are beginning to realize that we are really at war, and not at war with a chivalrous foe, but with an unscrupulous enemy capable of taking the meanest advantage of any dodge, however low, that will act as a means to an end. In the circumstances it is only right and proper that that enemy's merchantmen, having sought a delightful and comfortable haven of rest in the Suez Canal, where peacefully to spend the winter and to escape falling into the hands of the British Navy, should be obliged either to come out and pay for the "Emden's" acts or else remain where they are—the nucleus of Egypt's future mercantile marine!

***

We reproduce on another page the Egyptian Government's official communiqué concerning the new loan, together with our Cairo Correspondent's comments. Inquiries in the City yesterday elicited no further information, as details of the scheme, more particularly of that relating to the £3,000,000 issue, as additional to the £5,000,000 issue already announced, have not been received from Egypt. The impression is that £5,000,000 will be placed in London, not by a public issue but by means of Treasury bills, and that £3,000,000 will be placed in Cairo. It is not thought likely that the loan will be issued to the public in the ordinary way, either here or in Cairo, but that both operations will be covered by an issue of Treasury bills. No date is mentioned in connection with either of the above operations.

***

The report of an earthquake in the Smyrna district has unfortunately proved true, though, I am happy to state, it appears that the news published in the Press has been greatly exaggerated. Inquiries at the offices of the Ottoman Railway yesterday elicited the information that the earthquake occurred on the morning of the 4th inst. The strongest tremor seems to have occurred between Isparta and Burdur, and the damage done is considerable. The Ottoman Company's rails were wrecked for a distance of about three miles, and the damage done to both rails and buildings is estimated at about £10,000. The line has, however, already been repaired, and trains are running normally. The amount of damage done to the whole district cannot be estimated, but it appears to be heavy, and the consequent misery will be great. Conditions in the interior have been bad enough as it is, and now, what with mobilization, the prohibition of exporting crops, and the terrors of an earthquake, the inhabitants will be in a pitiable state. By the way, I read that the Ottoman Government has gone a step further in its servitude to German rule, and has closed the Gulf of Smyrna to warships. There is no confirmation of the statement, but if it is true it will be deplored by all friends of Turkey. The question they all ask themselves is: Where will it all end, and how? Poor Turkey!

***

I have received many letters from correspondents in connection with the political activities of the Deutsche Orient Bank, about which frequent mention has been made in these columns, more particularly in connection with its doings in Egypt. These letters contain specific accusations against the bank of a nature which precludes our publishing them. For the time being, at any rate, the institution is under strict Government supervision, and, according to *The Egyptian Gazette*, its books are regularly examined by a Government official. Therefore, it will have little scope to pursue its Anglophobe tendencies at present. Later on, doubtless, the Government will introduce appropriate measures to prevent a recurrence of past tendencies.

***

I read with some surprise in the papers during the week that Germany had forwarded to Constantinople nine tons of gold bars to the value of £T1,000,000. I have received no official confirmation of the report, and, frankly, am inclined to doubt it. Should it be true, however, it will mean a corresponding pinch at home in Germany, and one that cannot be easily remedied. It will also be the last gold to be exported by Germany for many a long day. This being so, it is not likely that it will be rapidly spent, either by the Germans, for whose uses it is doubtless intended, or by the Turks, should they by any chance be favoured with a few crumbs.

***

Since writing the above, a correspondent who is intimately acquainted with Turkey, and who has just received letters from Jerusalem stating that after "the wholesale looting of the shops for the support of the thousands of recruits the city is practically penniless, and, indeed, the whole country is ruined for some years to come," adds that it is just probable that the Turks "may now turn round and pocket the £1,000,000 just sent through to the Porte and give Germany the slip." Though I am afraid that Germany's grip is too heavy for Turkey to escape it just yet, I hope, as do all who know and love the East, that the day is not far distant when Turkey will show sufficient will-power, independence, and sense to send the truculent Teuton home to his Vaterland.

***

The Sudan report published elsewhere makes inspiring reading. Events are following each other with such lightning rapidity on the Continent, new crises and developments are bursting forth upon us day by day with such intensity, and the curtain of horror, suspense, and sensation is so frequently lifted in front of our eyes, that the glare of these things blinds us to the fact that, in spite of them, "Empire in the making" is progressing to the south of Egypt in its own quiet way, and that, practically undisturbed by the commotion of shells in France and Belgium, the Sudanese fellaheen are sowing and reaping in peace and in plenty under British administration. The basins, canals, and other irrigation works are playing the part for which they were created, and the outlook is a good one. Wheat evidently is to be sown in quantities which may come in handy if the war is protracted, and the cultivation of cotton, though temporarily postponed on the gigantic scale proposed, is increasing steadily.

***

So far the effect on the Sudan of the war has been practically limited to the gum trade. In normal years Germany imports about 3,000 tons of gum from the Sudan, or about 20 per cent. of that country's total gum export. This market is now closed, and the Government is doing its utmost to have it replaced. In this connection I should like to refer my readers to the offer of "every assistance possible" that will be given to any persons connected with "this or any other branch of the Sudan export trade" quoted on our Sudan page, which contains, moreover, extracts from a valuable article which appeared in the September issue of the *Journal* of the Sudan Chamber of Commerce. The country's exports are excellent in every way; besides, a more model corner of our great Empire it would be difficult to find, and it is therefore deserving of our most assiduous attention.

***

Our Belgrade correspondent on the following page makes an appeal for a greater participation by the British in Serbia's trade. It is a matter which I have been advocating for years. Until Serbia obtained a *soi-disant* port at Salonika, intercourse between Great Britain and that country was perforce limited, and even the creation of that port had not improved matters much before the war broke out. Now all that will change. The fact is that when hostilities are over, in the course of which the brave Serbs have been fighting on our side against the common foe, Serbia will get her littoral on the Adriatic, and our ships will be able to reach her port, or ports. The market, it must be remembered, is an excellent one in its way; besides, our imports from Serbia can be considerably increased, so that there is no question of lack of cargo for returning bottoms. In this connection I strongly recommend to my readers the special articles which appeared on "Serbian Trade Opportunities" in THE NEAR EAST on June 5 and June 19 of this year, and in the meantime should like to point out two facts: the first is that many citizens having returned from Nish to Belgrade, the Austrian attack must, in spite of Austrian denials, be regarded as no longer effective, and the second is that Austrian statements regarding a famine in Serbia have received an official denial. The harvest has been an exceptionally fine one, and, as there have been no exports this year, it stands to reason that there can be no famine.

War on German Trade.

STONE, EARTHERN AND CHINAWARE.

In continuation of our series of extracts from the bulletins issued by the Board of Trade, we give this week particulars from the same source of the openings for trade in stone, earthen and chinaware which present themselves in the Near East:—

Germany's total exports in 1912 amounted to £3,556,900, those of Austria to £872,700, and Great Britain's to £2,527,000.

The Near East is one of Germany and Austria's most important markets. Thus, in 1912, Roumania imported from Germany to the value of £39,000, the largest item being table services of all kinds (£16,000); Turkey's imports amounted to £32,500 (table services £21,500), and Egypt's to £22,400 (table services £16,000). Germany's total given exports to the three above-mentioned countries amounted to £93,900, to which must be added her exports to Greece, Bulgaria, Serbia, and other Near Eastern countries.

Austria's exports to the Near East show the following figures:—Bulgaria, £5,000; Greece, £3,900; Roumania, £28,000 (of which £17,000 represents ornamental and painted chinaware); Serbia, £5,000; Turkey, £28,600; and Egypt, £9,300, or a given total of £79,800, which, added to Germany's figures, gives a grand total of close on to £200,000. This represents, roughly speaking, the trade which can be acquired by our exporters.

As it is, our exports to Servia and Bulgaria, among the countries mentioned above, are nil. For the other countries the following statistics are given:—Roumania, £1,000; Greece, £5,000; Turkey, £6,100; and Egypt, £18,200, or a total of £28,300, which does not even represent Germany's exports to Roumania alone in one year!

The following further particulars are given concerning the Near Eastern market:—

Egypt.

The Belgian Consul at Alexandria states in his report for 1912 that there was a falling off in the imports of earthenware and chinaware amounting to about £E20,000. Germany headed the list of countries from which these goods were imported, her share amounting to £E20,402, as against £E28,938 in 1911; Austria was second with £E19,466, and Belgium third with £E15,370. The imports from the United Kingdom and France were comparatively small. Germany supplied chiefly china of medium quality and cheap coffee cups; Austria, crockery, china and earthenware tea services and coffee cups, plates, and vegetable dishes; Belgium, faience ware; France, fine chinaware. The relatively small imports from the United Kingdom consisted principally of high-class crockery. Lately Italy has competed in the supply of chinaware."

Roumania.

According to a Belgian Consular Report for 1913, Germany supplies the greater proportion of household crockery, china and earthenware and majolica ware imported into Roumania.

Bulgaria.

The Austrian Consul at Varna states in a recent report that in his district German chinaware is in considerable demand, and competed successfully with the Austrian product; in 1911 the imports of china from Hamburg into Bulgaria amounted to 73,150 frs.

Greece.

A report received from H.M. Consul at the Piræus towards the end of 1913 states that the trade in earthenware is carried on with French, Belgian, Italian, German, and British firms, but principally with French firms. Trading terms are usually credit for six months. If paid in cash a discount of 5 per cent. is made. If a client purchases in a year goods of 10,000 frs. value a discount of 5 per cent. is allowed, if 15,000 frs. 12½ per cent., if 20,000 frs. 15 per cent. Customs and municipality duty is charged according to weight, and it is therefore advantageous for the plates to be as light as possible.

British manufacturers do a good trade only in plates made of granite, white and coloured, table services, and wash basins. They could, however, do a large trade in all kinds of earthenware, but they fail to do so, for the following reasons:—

(1) The delay in executing orders (six to eight months).

(2) Prices are a little higher (but not so high as to make it impossible to compete) owing to the difference of the freight and packing. The cost of packing is borne by the manufacturers.

The names of importers of earthenware in Greece may be obtained by United Kingdom manufacturers on application to the Commercial Intelligence Branch, Board of Trade, 73, Basinghall Street, London, E.C.

The following information is taken from trade reports drawn up by the Consular officers of Belgium, France, and Austria:—

Salonika.

The imports of china in 1912 showed a large decrease as compared with those of the previous year. The bulk of the trade was supplied by Germany, while Austria supplied a certain amount of better class goods. Earthenware, consisting chiefly of plates, dishes, bowls, etc., was imported from Belgium, Germany, France, and Holland. Earthenware milk bowls find a ready sale, but the imports of all kinds of earthenware goods show a tendency to decrease by reason of the increased use of enamelled ware.

Uskub.

The cheaper kinds of crockery are imported from Holland through the medium of wholesale merchants in Salonika, but small quantities of high-class goods are drawn from England and Hungary.

Damascus.

In this district there is a large consumption of china and earthenware, the value of the imports in 1910 from Austria and Germany amounting to £3,000 and £800 respectively. Manufacturers and merchants desirous of securing a share of the trade should be careful to study local tastes and requirements. The chief articles imported are small coffee cups and saucers.

Trebizond.

Imports of crockery, earthenware, and chinaware in 1910 amounted to 7,500 kilos, the principal suppliers being Germany and Austria. For purposes of economy, earthenware is used more than chinaware. White earthenware goods are preferred to the coloured, and flowers and leaves enter principally into the designs. These goods are sold by the dozen, not by the set, and the usual shapes and sizes are in demand. White plates with a blue border find a ready sale. Coffee cups are put in cardboard boxes and then packed in cases; other articles are wrapped in paper and packed in straw in cases. Prices are usually quoted c.i.f. in French currency, and the trade is usually done through the medium of agents in Constantinople, payment being made either at four months or for prompt cash, with from 3 to 5 per cent. discount.

BOARD OF TRADE BULLETINS.

The following bulletins were published during the past week:—Brewing and distillery machinery and apparatus; aluminium and aluminium wares; feeding stuffs (oil cake and bran); stationery (writing material, notebooks, etc.); and agricultural machinery.

CYPRUS TRADE OPPORTUNITIES.

(From Our Own Correspondent.)
Larnaca, September 28.

For the past six weeks the import trade has been almost at a standstill, and with the moratorium, which was extended until October 13, and the prohibition of the export of specie, business has been well-nigh impossible.

Importers and commission agents are showing great interest in the efforts of the English merchants to capture the German and Austrian trade, and are most anxious to get in touch with English firms. The majority prefer doing business with English houses, but a great drawback has always been lack of credit facilities and want of knowledge as to where to obtain in England the goods they require. English firms, once they are satisfied they have obtained the services of a thoroughly trustworthy and reliable agent in Cyprus, might give more facilities as regards credit, acting, as do the German and Austrian firms, on the advice of their local agent as to how far they may safely go in this direction.

GREAT BRITAIN AND SERBIA.

(From Our Own Correspondent.)
Belgrade, October 6.

The result of this war ought to improve the friendly relations between this country and Great Britain, and business with Serbia will doubtless expand, if British manufacturers will only come forward and meet the Serbians half-way. If all the facilities the Germans gave cannot be given, something more should at least be offered than hitherto, in order to meet the wants of this country.

THE SITUATION IN BEYROUT.

(From Our Own Correspondent.)
Beyrout, September 26.

The commandeering of all mules, horses, and camels has been so complete that the agricultural produce of the country, which is its main, not to say its sole, resource, has been immobilized, and runs the risk of its being washed away by the first autumnal rains where no depots are found, more especially as railway tonnage has been exclusively required for military purposes. Apart from this, enormous quantities of the country's produce, as well as of imported foodstuffs and textiles, have been requisitioned from native and foreigner alike, and this, coupled with the merciless collection of the military exoneration tax, even from those who, according to the last Imperial decree, are not liable thereto—since they had already acquitted the tax in the shape of fees, according to the pre-constitutional régime—and with the levying of war contributions at a time when money is most scarce, has left the country, never very flourishing, in a state of utter misery and ruin, from which it may not recover for years.

Serious Loss to Government.

The situation is bound to mean a serious loss to the Treasury. Already the effect of the mobilization is revealed in the tremendous falling off of the Custom House receipts, which, from the respectable figure of about £2,000 per diem in normal times, have dropped to between £10 and £30. Of course, with practically all the able-bodied men called to the colours—all the classes up to the age of forty-five having been called—and with the prohibition of the export of such produce as may be left after the wholesale requisitioning, trade, the only resource of the country, has been brought to a standstill. The import trade is, of course, also paralyzed, as the purchasing capacity of the population has been almost completely destroyed, and it will not be matter of surprise if soon it is discovered that a large part of the population cannot pay the Government.

With reference to the prohibition of the exportation of all alimentary products from Egypt, the Board of Trade are now in receipt, through the Foreign Office, of information to the effect that authority will be given by the Egyptian Government for the exportation of eggs in a quantity not exceeding each month one-half the quantity exported in the corresponding month of last year.

Sudan Crop Prospects.

Bountiful Harvest Expected.

The Monthly Report (August) issued by the Central Economic Board of the Sudan Government has just been received and makes most gratifying reading. Weather conditions have not been far short of ideal, the outlook is excellent, the cultivation of wheat promises to be a future aid to the abnormal situation created by the war, and, in spite of the latter, the development of our valuable possessions to the south of Egypt continues along favourable lines. The following extracts from a valuable report prove that though little is heard of British administration in the Sudan in these stirring times, progress in the country is steady and uninterrupted. The following summary, appended to the report, will be read with interest :—

General Position of Affairs.

"From the reports received it is clear that sufficient rain has fallen to secure a bountiful harvest throughout the whole of the country. The food supply of the native population is thus assured. They will have also sufficient grain to enable them to accumulate reserves for use in any future times of scarcity. As regards the food supply of the European population, there have been no difficulties up to the present time, save in one or two isolated instances, which have been dealt with, resulting from the war in Europe. Prices have, of course, risen to some extent, as was to be expected, but steamer services to Port Sudan have now been resumed, and at any rate for the time being there is no cause whatever for alarm.

Gum.

"The cessation of imports from Germany and Austria into the Sudan should have practically no effect on the general situation, nor will the stoppage of trade between the Sudan and these countries materially affect Sudan exports, with the exception of the export of gum. In the year 1913, 15,129 tons of gum were exported from the Sudan. Of this quantity 2,983 tons were exported to Germany. It is of great importance to find fresh markets for the gum that Germany has hitherto taken, and this office will be glad to exchange information with any persons interested in the trade. Every assistance possible will be given to any persons connected with this or any other branch of the Sudan export trade.

Cattle and Wheat.

"Owing to the closure of foreign sources of supply as a result of the war, the demand for cattle and sheep by Egypt from the Sudan should be considerable. Its amount will depend very largely upon the fortunes of the Egyptian cotton crop.

"It is to be noted by those interested in cultivation, especially in view of the coming winter season, that wheat will probably prove a valuable crop owing to the circumstances created by the war."

The following further particulars are extracted from the report in question :—

Grain.

"In the Nuba Mountain Province the Nubas who kept back a reserve supply of last year's grain till they could see what sort of a harvest they might expect this year are beginning to dispose of small quantities.

"In Khartum Province certain seed loans have been issued to the various districts, and the prospects are so far excellent. The grazing is also excellent. Similar conditions prevail in Sennar Province, where it is expected that after a month and a-half new supply of dura will be put on the markets. There was a scarcity of grain last year in the latter province as in those of the Bahr-el-Ghazal and Red Sea."

Rainfall and Cultivation.

Kassala Province.—The Gash reached Kassala on July 5, commenced to rise rapidly on the 9th, and on the 12th it was at its highest. As the water last year reached the outskirts of the Morghania Quarters of the town, two earth banks were erected this year, one to the south and the other to the north of the town, but, unfortunately, both were washed away and the water ran up to the main Halenga road. The flood throughout the month and the heavy rainfall all points to a fine crop. Reports during the month from the various districts are most satisfactory, and all expect an exceptionally good season. The rain crop in the various districts and around Kassala and the basins under the irrigation canal are excellent.

Mongalla Province.—In July good rains fell everywhere and crops were doing well. Cultivation was extensive throughout the province. In August the crops were reported good from every district.

Halfa Province.—The river rose very rapidly during the first three weeks of August. It reached its highest on the 24th, when the reading was 8·26 metres, since which date it has been falling gradually. In consequence of the high level reached water has entered the old canal at Debeira and Surra for the first time for many years. Part of the Koka basin in Mahas district has also been flooded for the first time since the inlet canal was made. The prospects of the autumn crop are very favourable, with the exception of certain places in Mahas district where the flood has covered land already sown and washed away the seed.

Bahr-el-Ghazal. — The rainfall generally seems later than usual. Indian corn which should ripen in July to carry natives over the interval before the reaping of the dura crop, is still green in ear, and round Wau "ful sudani," which is just ripening, is the staple food of the natives at present. At present there is reason to hope for a big crop, and excellent reports have been received from Rumbek district.

Kordofan Province.—Really good rains fell in August, and as far as the weather is concerned, all that is required to ensure really good crops is one good fall of rain in about a fortnight's time. Given either that or a continuance of light rains during the month, there is no fear except of pests, of which none have been reported to date. Later.—Crop prospects everywhere excellent.

Khartoum Province.—The month of August was inaugurated by heavy rain during most of the day and night. There were also considerable rains on the 4th, 8th, 11th, and 31st. Sowing was briskly carried on, and prospects of a crop are excellent, many areas being well watered which had not been cultivable for many years.

Dongola Province.—The Merowe Khor was "in flood" on July 29 and 30, and also on August 2, 7, 9, 16, and 22. During the latter month heavy torrents of water poured down the Khor. The irrigation bank, which was this year constructed across the Khor, has proved to be a great success. The water has been diverted on to low lying lands stretching from Merowe to Tangassi, a distance of seven miles. It is estimated that some 1,000 to 1,500 feddans have been flooded.

Red Sea Province.—The third good flush came down to Tokar early in the month and was of great benefit. Owing to its volume, a certain amount of water broke away from the Shereit and Eastern channels, and it was impossible to prevent this. After this flush sowing became general. It is reported that the area irrigated is a good deal larger than last year, and with normal climatic conditions the crop should be well up to the average. Rains on the hills have been very frequent during the month and all khors south of the railway line have received water. There should be much dura grown this year and grazing should be excellent.

Nuba Mountain Province.—Excellent rains are reported throughout the Province. The Khors in the neighbourhood of the station have not stopped running since the end of July, and this is always a sign that abundant rain has fallen. The prospects are excellent throughout the Province.

Berber Province.—The summer sakia crops have been good throughout the Province. The rains in Shendi district have been excellent. Practically all the Atmurs have been watered, most of them several times, and the prospects of good rain crops are excellent. Rains in the Butana and up the Atbara have also been good. The water entered the Kelli canal on August 4 and the basin was full by August 26. If the basin is to be a permanent success, it will probably be necessary to divide the basin into sections and to run the feeder canal right through the basin. As things are, no red water reaches the land except at the very beginning of the basin. This is not important this year, as the soil is good and has not been watered for five years, but it must be remembered in the future. The Fadalab basin has also been well watered, but the same remarks as to the red water not reaching the land apply to it. Cultivation prospects south of Atbara excellent; north of Atbara moderate, and areas small; Shendi areas unusually extensive.

White Nile Province.—The Province is green from end to end, and there is every prospect of a good rain crop. Unfortunately, considerable areas must go uncultivated owing to the lack of seed. Even in this month the distress has been very severe, but the critical time has passed now; grass has sprung up everywhere, the animals are returning from southern grazing grounds, and milk is obtainable. The certainty of food in plenty by November 1 enables natives to use up their last supplies of food, and the large quantities of Indian dura sold to the three northern districts has gone far towards saving the situation. There is no doubt that the arrival and distribution of this foreign dura has made a great impression, but very few individuals could be persuaded to drop their conservatism and experiment with it as seed.

THE SUDAN CHAMBER OF COMMERCE AND THE SITUATION.

In an article in its September *Journal* the Sudan Chamber of Commerce admits that the commerce of the Sudan has been temporarily affected by the situation in Europe, and the consequent closing of many markets where the produce of the Sudan has previously found a ready sale, and then adds : "The sea routes are now open, the shipping service to and from the Sudan has already been resumed, and it is hoped that before long steamship companies will be able to announce the arrangement of regular sailings. The news from the provinces is most encouraging, and the coming season's dura crops promise to be plentiful in most parts of the country; this should lead to increased purchasing power on the part of the native and consequent encouragement to those merchants engaged in the import trade.

"Events show that exporters must accept the fact that several European markets hitherto of great importance to the Sudan will not be open for business for some months to come and in all probability not until the next gum season is over. New markets must consequently be found for the produce which would in the ordinary course have been destined for those ports now closed.

With this in view, the Chamber of Commerce strongly urges all those engaged in the export trade promptly to take steps to get into touch with new markets where Sudan produce is required, and also to find new buyers in those markets which are already in touch with the Sudan."

SUDAN COTTON.

The monthly report (August) of the Sudan Economic Board contains the following reports :—

The Board of Trade has been notified by cable by the Sudan Government Commercial Intelligence Department that inquiry is made by local traders for the names of United Kingdom importers desirous of receiving supplies of gum arabic, sesame, earth nuts, ivory, hides and skins, tanning pods of "acacia arabica," vegetable ivory nuts, senna, millet, and dars. Further information may be obtained by United Kingdom importers on application to the Director, Imperial Institute, S.W., or to the Sudan Railways Office, 5, Northumberland Avenue, W.C.

Cotton at Zeidab is doing well (August), and picking of the early planted American is just beginning. The natives who take water from the company finally planted 380 feddans of American cotton.

Many chiefs in the Mongalla Province have become enthusiastic over cotton cultivation. The reports on the cotton sent down from Mongalla and Rejaf from last year's crop are most satisfactory in spite of the failure of the rains at the most important time of the year.

Near East Markets.

CYPRUS CROP.

(From Our Own Correspondent.)

Larnaca, September 28.

The carob crop appears to be much heavier than was expected except in the Kyrenia district, and the crop should far exceed that of last year, which was about 160,000 cantars; in some quarters it is hoped that it will approach 300,000 cantars. Several steamers have already left for the United Kingdom with full cargoes and other are expected. The prices are very good at present. There is also an awakening demand for terra umber, due no doubt to the paint manufacturers being desirous of laying in large stocks of this article ready for the termination of the war, when without doubt there will be an enormous and pressing demand for paint; 1,000 tons are being shipped by the "Trojan Prince" from Larnaca this week to Liverpool, and other shipments have been booked.

The prospects for raisin exports appear to be very bad, since most of the Cyprus raisins are exported to Roumania, which means passing through the Dardanelles. The export will probably in consequence be small.

Stocks of sugar and coffee in the Island are being rapidly exhausted, but there appears to be no fear of scarcity in any other articles of food.

SPECIAL REPORTS.

The following information is compiled from the weekly bulletins received at the London office of the Imperial Ottoman Bank from its correspondents in the Near East:—

Beyrout. September 1.

The following are extracts from the monthly report for August:—

The cereal crops this year are good; but unfortunately the requisitions of the Government have prevented supplies of wheat and barley from coming on the market. For the most part the crops remain in the country districts as the owners fear to send them to the market.

In consequence of the war in Europe business has practically ceased. The weavers have in the majority of cases been obliged to cease work owing to the money stringency prevailing; in fact only some of the most important master weavers continue their work, and unless the situation improves it is feared that even they will have to stop.

GREEK FIGS.

The U.S. Consul at Kalamata, writing on August 21, stated:—

Conditions for figs are worse than those for currants, as the principal fig-importing markets of Austria and Russia are closed on account of the war. At present no other market is open for figs except that of the United States. Up to August 22 indications were that the quality would be better and that the quantity for this fig year, ending October 1, would be about 10 per cent larger than that for the last fig year; but the storm considerably damaged the quality, so the exportable fruit available will be about 20 per cent. smaller than was expected prior to August 22, or about 10 per cent. smaller than that of last fig year. The average market price at present is about 1d. per pound, with little indication of increase, while the average price in the past was about 1½d. per pound avoirdupois.

Established 1900.

CURRANT REPORT.

The following are extracts from Burlumi's annual report on currants, dated October 15:

The shipment of currants from Greece during the year ended August 22, reached 118,000 tons. To the retention stores of the Privileged Currant Company there were delivered 28,000 tons; about 12,500 tons of fresh and dried currants were used for wine-making and other industrial purposes in Greece, and it was estimated that about 4,000 tons of old fruit has been carried over to the new season, making a total of 162,500 tons. Deducting 1,500 tons of old fruit brought over from the previous season of 1912-13, we find the crop of 1913 to have been 161,000 tons against 167,000 tons in 1912 and 157,000 tons in 1911.

The 118,000 tons shipped to foreign countries were distributed as follows:—To the United Kingdom and New Zealand, 65,500 tons, against 65,000 tons in 1912-13; to the United States and Canada, 17,700 tons, against 17,500 tons in 1912-13; and to the Continent of Europe, 34,800 tons, against 38,500 tons in 1912-13. Owing to the war difficulties of all sorts in exporting the new crop had been apprehended, but they have all been overcome and shipments for the United Kingdom and the United States commenced early in September. The s.s. "Cypria" arrived in Liverpool on September 18, and the new fruit found ready buyers at 25s. for Pyrgos in quarters and 27s. 6d. to 29s. for Patras.

The clearances for home consumption in the United Kingdom from August 1, 1913, to July 13, 1914, have been 63,016 tons, against 63,690 and 60,942 in the twelve months ended in July, 1913 and 1912 respectively. The clearances in the first two months of the new season have been 8,154 tons against 8,679 in 1913. The small decrease is no doubt due to the lateness of the arrival of new fruit. The universal consumption outside Greece has been about 116,000 tons, against 132,500 tons in 1912-13. The visible universal stocks at the end of August last were estimated at 2,500 tons, excluding stocks in Greece, against about 500 tons in 1913 and 2,000 tons in 1912.

The new crop would have been one of the finest but for the unfavourable weather during the harvest time. It is estimated that barely 70,000 tons have been secured sound and in a dry condition; the rest has been badly damaged by rain, and the bulk of it is considered unmerchantable. Both the Government and the Privileged Company are taking measures to prevent the shipment of this class of fruit, and their efforts are well seconded by the shippers themselves. The high retention creates a sufficient outlet for the unmerchantable quantity, and there is no excuse for any of it to be shipped to countries using currants for food. The area of currant vines uprooted in 1913-14 has been only 3,427 stremmas, equal to 857 acres, and the compensation paid to the owners amounted to £13,000, equal to £14 per acre.

The greatest sufferers from the rains have been the districts of Pyrgos, Amalias, Zante and Cephalonia. It is computed that the saved three-fourths of these crops have been, for the greater part, ruined in quality, while the other fourth has been washed away altogether. The estimates of the yield vary as usual; we put it at about 140,000 tons, including the unmerchantable portion. There is a great variety of opinion about the universal requirements under the present political conditions. There can be no question of a decrease in the consumption of the United Kingdom and of the Colonies nor of the United States. It is also expected that Holland, the largest consumer of currants per capita, will import her usual quantity. The doubtful consumers are of course Germany and Austria, and possibly Belgium. Their total together averages 20,000 tons annually. If we leave this weight out altogether, the world, outside Greece, will require about 100,000 tons, and the exportable weight of the new crop is barely that. A considerable quantity of new fruit had been sold to Germany in June and July c.i.f. Hamburg and Rotterdam for shipment in September, but, of course, not an ounce of it has been shipped so far.

PRODUCE REPORT.

London, October 22.

Sugar.

On Monday a supplement of the *London Gazette* was issued containing an Order in Council varying the existing Orders regarding exports from the United Kingdom. The Order withdraws the prohibition upon the following articles:—Molasses, invert sugar, and all sugar and extracts from sugar which cannot be completely tested by the polariscope. It also withdraws the prohibition of the export to all destinations of sugar unrefined, and of sugar refined, and candy, established by the same Order of Council so far as regards exports to the following destinations:—The Channel Islands, Malta, Gibraltar, Falkland Islands, St. Helena, the East Africa Protectorate, British West Africa Colonies and Protectorates. The market is unchanged. American granulated, to be shipped this week, was sold 22s. 9d. c.i.f. London.

Coffee.

A fair supply was offered at auction this week, and a moderate demand ruled at steady prices. Costa Rica, good bold, sold at 74s. 6d.; Colombian, good mid., 61s. to 62s.; washed Dumont, mid., 54s. to 63s.

Currants.

There is a moderate demand, and values are unchanged. According to reports from Patras, the attitude of the foreign shipping agents there is causing great indignation. They have formed a trust, fixing the freight for London at 37s. per ton, but when Greek steamers appeared and were taking cargo at 19s., which is the normal rate, the trust reduced the freight to 27s. 6d. per ton. Even that was considered exorbitant. In the meantime, all those who shipped on Greek ships were marked by the foreign agents' trust, and as a punishment they were asked 40s. freight per ton. The currant growers and merchants made an appeal to Mr. Venizelos, the Premier, who at once telegraphed to the Prefect of Patras to call the agents and ask them "to discontinue such improper conduct, otherwise the Government will be obliged to take legislative measures." The agents, however, having strict orders from their steamship companies in London, cannot change their attitude, and it is to be seen what the Greek Government has decided to do.

Sultanas.

There is only a moderate demand, and prices are practically unchanged.

Seeds.

Linseed is maintained, with a better demand, at 41s. 9d. for London-Calcutta, spot and afloat. Rapeseed is inactive: Hull, Ferozepore, 51s., Sept.-Oct., is asked. Cottonseed is quiet: London-Egyptian, loading and Oct., is quoted £7 7s. 6d. per ton. Haricot beans: A few Hungarian and Danubian are still obtainable at 85s. to 92s. 6d. Canaryseed is dull, and offered at recent reduced rates.

Oilcakes.

Linseed cakes: A check to the supplies of foreign descriptions has been noticeable during this past week, and, with apparent reserve of home manufacturers to effect sales, the market is well supported. Best London made £8 10s. to £8 15s. Cotton cakes: Only a very limited quantity of Egyptian is available, which commands full prices of £5 8s. 9d. to £5 10s., but at the same time there are sellers of October shipments at £5 6s. 3d. to £5 7s. 6d., ex ship. Bombay is quoted £4 15s. Decorticated cotton cakes are not offered at present, but some meal can be obtained at £8 5s. for present delivery, and £7 5s. for Oct.-Dec. shipments.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report for the week ending October 2, 1914:—The sales this week on our market amount to 11 cases extra Carahissar talequale at ps. 255 per oke, which, calculating ps. 95 the best possible exchange per £ sterling for cheque on London, is equivalent to 21s. per lb. Very little opium, however, is available, as the bulk of the Smyrna stock is deposited with the banks, and they will not part with it unless all the advance they made is returned in liquid money, very little of which is now in circulation on our market. The arrivals to date are 1,203 cases, against 3,136 at same date last year.

Egyptian Cotton Problem.

(From Our Own Correspondent.)

Cairo, September 25.

After long deliberation and study the Egyptian Government has decided that, in view of the present crisis in the world's commercial affairs, the area under cotton cultivation must be restricted next year. A decree was signed and promulgated on Tuesday last limiting the area that can be cultivated with cotton next year to 1,000,000 feddans. Cotton cultivation is entirely prohibited in the basin-lands of Upper Egypt, and no proprietor or tenant may cultivate an area exceeding one quarter of any one estate in cotton. Under certain circumstances the proportion of an estate free for cotton cultivation may be increased to one-third, if that estate is recognised as unfit for cereal cultivation.

The object of this restriction is, as the preamble of the decree says, to maintain the price of Egyptian cotton at a reasonable figure and also to increase the cereal production of the country, so as to obviate the necessity of heavy imports, which have been a feature of the past, and save Egypt from having to pay the high prices that this commodity will command. In addition, it is hoped, that if the area under cereals is sufficiently increased Egypt will be able to export and benefit by the above-mentioned high prices.

From what can be gathered this decision has met with general approval, for whatever may be thought of the details—i.e., the proportion limited to cotton, the principle is admitted to be absolutely sound. It is believed that now that the cotton crop for 1915 has been limited, no difficulty will be found in financing the present crop, since the restriction means about three million cantars less on the market.

It may be interesting to note the area under the various crops this year :—

	Feddans.		Average Yield per Feddan.
Cotton	1,750,000	....	4·27 kantars
Wheat	1,250,000	....	4· 6 ardebs
Barley	350,000	....	5· 2 ,,
Rice	35,000	....	5· 7 ,,
Maize.....	1 690,000	....	6· 8 ,,
Millet.....	240,000	....	7· 0 ,,
Sugar.....	48,000	....	446 kantars

From which it may be seen that the decrease in the cotton area will substantially effect the output of cereals, of which 355,000 tons were imported in 1913.

Reference to the financial operations connected with the Egyptian cotton problem will be found on our financial page (page 813).

The limitation of the area to be sown with cotton in 1915 has caused a great feeling of relief, writes the Alexandria correspondent of *The Pall Mall Gazette*. The crop now nearly ready for market may possibly not turn out quite so large as was expected, owing to bollworm ravages at the last, and also to delay in starting picking. It may be put at 7,500,000 cantars, and, allowing for spinners' needs, there may be 4,000,000 cantars in stock in August, 1915. The reduction in the 1915 acreage is about 45 per cent. The 1915 crop, when on the market, should then raise the amount in sight to 8,500,000 cantars, about the position in normal years. The action of the authorities in limiting the 1915 production is wise. It will facilitate finance, tend to keep prices up, and, above all else, will force the fellah to alternate cotton with other products, which he ought to have done all along.

EGYPTIAN AGRICULTURAL CIRCULAR.

The Egyptian Ministry of Agriculture has published a circular, stating that, in view of the probable depression in the demand for textile raw materials on the Continent of Europe in 1915, it is considered expedient to restrict the cultivation of cotton in Egypt and to recommend cultivators to substitute, to some extent, cereals and other food crops to meet the enhanced demand for those commodities which will occur, especially in the countries of the belligerents. As it is urgent that the sowing of the necessary crops be made as soon as possible, merchants and institutions in those countries where supplies are needed are asked to indicate clearly what kinds of food crops among the list given in the circular would be most in demand in their particular markets. Touching the question of cotton in particular, it is hoped that the restriction of cultivation referred to will enable holders to dispose of the surplus of this year's crop during the latter part of 1915, although it appears certain that lower prices will have to be accepted. In any case, it is evident that in the meantime cotton cultivators will have to pass through a very difficult period.

EXPORTS FROM EGYPT.

When the war started, says *The Egyptian Gazette*, the Government had decided to prohibit the exportation of all Egyptian products, including cotton.

However, this last article was made the subject of certain restrictions. In order to export any quantity of cotton certain regulations must be complied with. Certificates must be produced to the Customs authorities as regards the declination of shipments. This measure kept back the shipping of cotton to be sent abroad, as often the ship left the port before the required formalities could be terminated.

The Government, giving due consideration to the complaints of merchants and shipping companies, has just authorized the exportation of Egyptian cotton, nevertheless maintaining the former system adopted by the Customs regulations.

COTTON CONTRACTS.

At a meeting of the commission of the Bourse held on October 2 at the National Bank, Alexandria, it was decided to recommend the Government to issue an *arreté* ordering the payment of differences on the basis of $16 for November contracts, the last difference having been paid just before the beginning of the war at $17.

INTERVIEW WITH MR. J. A. HUTTON

Discussing with a representative of *The Manchester Guardian* the cotton situation, Mr. J. A. Hutton said :—

"So far as I can judge from our experience in business, unless something is done the bulk of the mills in Lancashire will be stopped very soon. In considering what we need to enable us to keep on doing business, four things are important—finance, insurance, a free market, and telegraph codes." Referring to finance, he said : "We need satisfactory finance, although it must be said that some of the Manchester banks and some of the Eastern banks are doing all that can be asked, and, indeed, they are going further. I know that some of them are giving credits which they would not give under ordinary circumstances."

Concerning the facilities for trading in cotton he pointed out that it is essential we should have a free cotton market. "It does not matter much what the price is. So long as our customers feel that cotton is in any way on an artificial basis they are not likely to buy. I do not think it is very material whether the price is 5d. or 3d., so long as it is felt that it is really a natural price and not an artificial one. I certainly think that everything possible ought to be done now to open the Liverpool market. The Liverpool Cotton Association have probably been perfectly wise in the steps they took during the early part of the war, but the time has now come when we really must have the market open. Trade would not, of course, become active at once, but many employers would have confidence to go on working to some extent. The alternative to the opening of the market is, I am convinced, the closing of the mills."

On going to press we learn that Mr. William Tattersall, former secretary to the Federation of Master Cotton Spinners and a recognised expert in the cotton industry, died yesterday at Hale, near Manchester. Mr. Tattersall was often consulted by the Government in relation to the cotton industry.

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, Oct. 21.

It cannot be said that any distinct improvement has shown itself in the market during the past week, but perhaps in some quarters in small lots a little more business has been done. Buyers are not at all disposed to anticipate future requirements, and the transactions have been of a sorting-up character. There continues much discussion as to raw cotton prices, and the artificial situation remains in Liverpool. It is thought that much difficulty will be experienced in establishing a cotton futures market here. Advices relating to the Egyptian cotton crop are somewhat irregular, and the ultimate yield is very uncertain. Not much interest is being taken in the progress of the American crop, it being realised that supplies will be more than sufficient to meet the needs of the world. In piece goods suitable for Egypt very few offers have come through, and mail advices do not encourage exporters to anticipate future requirements. The shipments against old contracts are being more interfered with. The Levant is no better, and there are plenty of goods in Manchester waiting to be shipped when the position is more encouraging on the other side. Occasional lots have been put through for the Mediterranean outlets. A little more demand has been experienced for China, chiefly in best shirtings. India buyers still lag behind, and owing to increasing stocks in Bombay and Calcutta there is not much expectation of any immediate revival of demand. Useful orders have been secured from day to day in goods suitable for the home trade. Makers of drills have met with fair lines. Owing to higher dyeing prices coming into force at the beginning of next month, there has been some disposition to arrange business so as to get in at the old rates The curtailment of production in all weaving districts is on a large scale, and tends to increase. At the end of last week prices in home American yarns slumped, but now appear to be grounding somewhat.

It cannot be said that there is any real improvement in the situation, and yet it is impossible to say that there is not a little, says *The Daily Dispatch*. Whether it will develop or not remains to be seen. Shippers to India continue to put a damper on any suggestions that they may possibly be in a position to move, say, some time towards the end of November. They have sufficient supplies—dear, of course—to enable them to look on. They would be glad to get rid of them, no doubt, at a time when it is possible to purchase probably 20 to 30 per cent. cheaper. The proposed action with reference to codes is naturally welcomed. Any modification of existing restrictions in this direction will be a convenience.

CYPRUS COTTON.

(From Our Own Correspondent.)

Larnaca, September 28.

The cotton crop is excellent both as regards quantity and quality. The crop should be about 6,000 bales. It will probably, as usual, all go to Greece, since so long as it is impossible to sell in the English market except on consignment there is no better market in Europe to be found, and the cost of transport is slight.

COTTON STATISTICS.

The Liverpool Cotton Association has published some statistics relating to the cotton season ended August 31. The total imports into Great Britain compared with the previous year show a decrease of 108.263 bales American, 21,744 bales Egyptian, 3,533 bales West Indian, and 3,181 African, and an increase of 84,020 Brazilian, 63,265 Peruvian, etc., and 127,903 East Indian, the total increase being 138,467 bales. The average weekly consumption of Great Britain for the year amounted to 81,360 bales, a decrease of 2,200 bales per week, or for the whole year of 114,682 bales. The total weight of cotton consumed in Great Britain was 2,077,289.597 lbs., against 2,177,955,889 lbs. in 1912-13. The total stock held by spinners is estimated to be 99,000 bales less than last year. The highest price of American cotton during the season was on September 29, 1913.

Engineering Notes.

Board of Trade Activities.

The prompt efforts of the Board of Trade in rousing British energies, and pointing out in a practical way the opportunities of capturing German trade, are having satisfactory results; for there is already evidence of activity in several branches of industry, and particularly in the engineering and iron trades. According to the Board of Trade returns issued some days ago, the trade shows a marked improvement, and we hear that the engineering and hardware exports of Birmingham during the last two or three months were better than those of the corresponding period of last year. Birmingham is doing large business in the Near East, and we presume that other engineering and iron trade centres are also busy for those markets.

Implements and Tools.

The Board of Trade bulletin tells that in 1912 (when the Balkan troubles had not yet ended), Roumania bought from Germany and Austria £189,450 worth of agricultural implements and tools, and only £300 worth from England; Serbia £2,300 from Austria, and nothing, or next to it, from England; Bulgaria, £46,100 from Germany and Austria, and little or nothing from England; Greece, £1,400 from Austria and £8,500 from England; Turkey, £24,800 from Germany and Austria and £800 from England; and Russia £636,100 from Germany and Austria and £2,300 from England. Of the above Russian purchase we can safely calculate the half as from Southern Russia. The apparently insignificant share of the trade in agricultural implements and tools which England holds in the above markets may be attributed to a certain extent to the cheapness of the German articles compared with those of English manufacture, but that cheapness is due to the fact that the Germans studied the local conditions and requirements, and produced implements which were giving satisfaction to the buyers, besides being cheaper than the English, which made, as a rule, on designs suitable for use in England and her colonies, were either unsuitable or not quite suitable for agricultural use in the Near East, and also much dearer. English ploughs, for instance, are fully appreciated and bought, where they suit the soil, as in some parts of Thessaly and Macedonia, in Greece, in some parts of Roumania, and in low-lying parts of South Russia; but in Serbia, Bulgaria, Turkey in Europe, most of the Roumanian and Greek districts, Syria and the Islands, where, as a rule, the soil is hard, stony, and, with very little exception, very uneven, a light plough is needed, one-handled, and suitable for a small and inferior class of animals. Swing ploughs have no demand except in some parts of Roumania. Drills and harrows are also required lighter and of simple construction. Axes, hatchets, and choppers of English manufacture are preferred in Serbia, but the difficulty of obtaining such in the hilly districts gives good opportunities to local German and Austrian agents to supply their articles at a price very little differing from that asked for those of English manufacture.

Pumps and Pumping Machinery.

As we have stated before, pumps and pumping machinery are in constant demand in almost every district in the Near East. In this line, again, Germany and Austria are in advance on sales, but England could undoubtedly secure a better position if manufacturers would pay more attention to the particular types that are needed. For quality and efficiency British pumps are preferred, but orders given by inexperienced agents or buyers have often caused disappointment to the latter and made others cautious, which would not have happened if manufacturers would take the trouble to ask full particulars, and to satisfy themselves that what is ordered is really suitable to the requirements of the buyer. Roumania is a big buyer of pumps and pumping plant from Germany, and this may safely be attributed to the energy of the local German agents and the conspicuous absence of agents or travellers of British firms. The same may be said with regard to Serbia and Bulgaria. Pumps of the simpler kinds are in great demand in Asiatic Turkey, long handles and stroke preferred. Centrifugal pumps are generally ordered from Greece, Syria, Turkey in Europe, and Serbia for irrigation purposes, while on the Tigris and Euphrates a great number are at work for the same purpose. In the Russian Black Sea region and the interior a large business is done in pumps of more or less small and medium size by Americans. A competent British representative could secure large orders.

Motor Wagons for Greek Army.

It is announced from New York that the Greek Minister to the United States has, on behalf of the Greek Government (says *Motor Traction*), placed a contract with an American concern for the supply of 2½-ton motor wagons. The vehicles, which are stated to be intended for use in the commissariat department of the Greek army, are standard in every respect and fitted with 4-cylinder engines rated at 36 h.p., the bore and stroke being 4½ ins. by 5½ ins. The vehicles, which have a wheel base of 11 ft. and a track of 4 ft. 9½ ins., are being equipped with a standard staked platform body.

Cars in War Service.

The U.S. Consul at Salonika states:—There are at present fifty to sixty motor-cars and trucks here owned by the Greek Government, and three cars in private possession. The Government-owned cars are being used for military purposes. Moreover, the Government maintains an automobile corps and repair shop here, and another at Janina. It is stated that it is so well satisfied with the results attained by the automobile service of the army during recent military operations that it has decided to equip a complete battalion of expert chauffeurs with 400 lorries. The Minister of War at Athens is the competent authority in all matters relating to army supplies. The motor lorries at present employed in the army service are of about 2-ton capacity and can make about 40 kilometres an hour. Cars are being used for carrying mails and for military traffic between Salonika and several points in the interior. A regular automobile service (private undertaking) is maintained between Cavalla and Drama in the tobacco-growing districts. Several other private lines are in operation in other parts of Macedonia. The cars in Government service are the Fiat, Benz, Renault, Itala, Ford, and Piccard-Pictet. The Fiat has so far been given the preference by the Hellenic Government for army purposes. Fore tires are plain and rear tires studded. Owing to the unsatisfactory state of the roads of the surrounding country and the rolling topography of Macedonia it is essential that motor vehicles for this market be durable and not of too light weight, and so far as cars for pleasure purposes are concerned, cheapness is a requisite. Under present circumstances only such vehicles as would have a commercial use would find a demand.

Trade Conditions.

"The best system of introducing goods of this class would be by sending large photographic prints for the use of agents, and catalogues published in the French language for general distribution. Terms of sale constitute an important factor. Until the present, European houses have been inclined to grant very liberal credit, but owing to the present business depression terms are now more stringent. Cash against documents, or part cash with order and balance against documents, are the customary arrangements at present. Salonika merchants prefer c.i.f. quotations. Too much care cannot be exerted in packing, as freight is subject to very rough handling before reaching Salonika."

THE CAIRO MOTOR CO., Ltd.
The Largest Motor Depot in the Near East.
SUPPLIERS OF
Motor Cars, Cycles, Launches, Marine Sets, Evinrude Motor Attachments, Dunlop Tyres & all Motor Accessories.
Head Office: RUE SOLIMAN PASHA, CAIRO, EGYPT.
Also at ALEXANDRIA and LONDON.

EGYPTIAN RAILWAY AFFAIRS

The Cairo correspondent of *The Railway Gazette*, writing on September 23, says:—

"There are probably few countries in the world, outside of the immediate area of the war, the trade of which has been so hard hit by the conflict, as Egypt. Import and export traffic has practically ceased, a state of affairs sharply reflected in the receipts of the different railway systems. Those of the State Railways and the Delta Light Railways have, these being the largest two concerns in the country, been most affected in point of magnitude of drop, though the pinch of the situation is being felt much more by the Fayoum Light Railway and the Basse Egypte Railway.

Increase in Fares.

"From the day before yesterday all State Railway passenger fares were increased by 10 per cent. in the first and second-classes, season ticket rates being similarly treated. Also all return tickets at reduced fares and cheap week-end tickets have been abolished. These new regulations are drastic, and there is considerable doubt among railwaymen locally as to whether any benefit in the way of increased revenue will accrue as a result.

Service Reduction.

"There has also, of course, been a considerable reduction in the train services on both main and branch lines. About half of the usual Cairo-Alexandra expresses have been cancelled, and one-third of the trains on the Pont Limoun-Mataria-Marg suburban line. The Cairo-Helouan Railway has halved its services, as have, more or less, the Delta Light Railways their services in Lower Egypt. The sleeping and restaurant car trains to Upper Egypt, with the Soudan connection, now run three times a week in either direction, leaving Cairo for Luxor on Mondays, Wednesdays, and Saturdays, and Luxor for the north on Sundays, Tuesdays, and Thursdays."

Prospects.

At present, continues the writer, there is great activity in connection with the movement of troops, and he concludes by saying:—"So far as prospects in Egypt are concerned, matters are now probably at their worst, and railway revenue will pick up gradually as trade tends to return to the normal. This, however, all depends upon the success of the arrangements now being made to finance the cotton crop which is ready for picking. If these mature, and the lint is transported as usual, the gain to the railways of the country will be appreciable. It is also very nearly time for the resumption of imports of coal, while flour and wheat also should shortly be coming in in large quantities, probably from India."

Up to the present 20 per cent. of the employees of the British Aluminium Co. have joined the King's Forces. Their places are being kept open and their dependants supported.

Shipping Intelligence.

ENEMY SHIPS IN SUEZ CANAL.

The Press Bureau announced yesterday that his Majesty's Government have issued a notification in the following terms to the Representatives of Foreign Maritime Powers in London, and have asked them to communicate it to their Governments : —

"Since the outbreak of war certain ships of enemy countries have remained in the Suez Canal.

"Some of these vessels were detained by the Egyptian Government on account of hostile acts committed in the Canal; some because there was reason to apprehend that they contemplated hostile acts; others, though perfectly free, have refused to leave the Canal in spite of the offer of a free pass, thus disclosing their intention to use the ports of the Canal merely as ports of refuge, a measure which is not contemplated by the Suez Canal Convention.

"His Majesty's Government do not admit that the conventional right of free access to and use of the Canal enjoyed by merchant vessels implies any right to make use of the Canal and its ports of access for an indefinite time to escape capture, since the obvious result of permitting any such course must be greatly to incommode and even to block the use of the ports and Canal by other ships, and they are consequently of opinion that the Egyptian Government are fully justified in the steps which they are taking to remove from the Canal all enemy ships which have been long enough in the Canal ports to show clearly that they have no intention of departing in the ordinary way, and that they are putting the Canal and its ports to a use which is inconsistent with the use of the Canal in the ordinary way by other shipping."

Writing on October 5, our Port Said correspondent gave the following particulars concerning German and Austrian ships in the Canal:—

As there seems to be a misunderstanding in home shipping circles as to the position of the German and Austrian steamers in port here, it may be of interest to give the following particulars regarding these vessels, the majority of which have been here since the outbreak of war.

In the first place, the steamers, with one exception, are not prizes of war, or even forcibly detained. They remain in port of their own free will, and fly their countries' flags and their own house flags.

As long as the Suez Canal and its ports remain international these vessels are afforded the same protection as in a neutral port, but certain necessary measures have been taken by the Egyptian authorities to enforce the strict neutrality of the Canal, and to prevent wilful interruption of its traffic.

The one exception referred to is the North German Lloyd steamer "Derflinger," which has been temporarily disabled by the removal of her steam pipes.

The wireless apparatus of all these vessels is dismantled, but otherwise they are not interfered with.

A large proportion of their European and native crews has left, but the captains and some of the officers remain, and may be seen in solemn groups at the various cafés, seeking solace with large mugs of lager beer.

A host of inquiries has been received from British firms interested in cargo in these vessels, and for the information of such firms the following conditions are imposed by the captain and agents of the steamers :—

1. Payment of full amount of freight to destination (provided freight is not prepaid).
2. Surrender of complete sets of bills of lading.
3. All expenses incurred in discharging the cargo, and shifting other cargo if necessary to be borne by the receivers; also the cost of replacing cargo removed and cost of repairing any damage caused to other cargo during discharging operations.
4. An average deposit of 10 per cent. must be made on the value of the cargo taken and average bond signed.

There is considerable doubt as to the legality of Clauses 1 and 4, and the formidable array of charges specified in Clause 3, which the agents estimate will average about 5s. per ton, may be sensibly modified by combined action on the part of owners of cargo and their representatives here. Steps are being taken to form a syndicate, so that on the arrival of complete documents the discharging can be carried out with a minimum of delay and expense.

CYPRUS STEAMER SERVICE.

(From Our Own Correspondent.)

Larnaca, September 28.

Now that the Mediterranean is clear of hostile ships and confidence has been restored, things appear much brighter than they did at the commencement of the war.

Khedivial Steamers.

Owing to many of the Khedivial steamers being required for the transport of the Indian troops, the only regular steamship service has been the weekly subsidized Government mail boat from Egypt, but once the transport work has been carried out it is hoped that the fortnightly line to Constantinople viâ Smyrna, will be resumed, which would enable exporters of raisins and lemons to get rid of their stock, which otherwise may be held up indefinitely, and it also provides an opportunity to passengers from the Syrian coast and Berout to reach Cyprus in a few hours instead of by the tedious and expensive route viâ Egypt.

Messageries Maritimes.

Hopes are also entertained that the steamers of the Messageries Maritimes company will be able to resume their service, now that they have re-commenced their line from Marseilles to Alexandria. Cyprus has always regretted the loss of the Italian steamers which, since the Turkish-Italian War, have ceased to call at the Island. The present moment would be an opportune one for them to resume their line to Cyprus viâ Rhodes, afterwards calling at Mersina and the Syrian coast.

S.S. "BELGIAN KING."

The steamer "Belgian King," which foundered shortly after leaving Trebizond for Constantinople, has had a long and varied career. She was built in 1881, and traded as a French liner for some years (says *The Mariner*), and was then bought by Mr. R. M. Hudson, of Sunderland. Under his ownership she "sailed the seven seas," being well known as the "Connemara." More recently, although still retaining her British registry, she has been trading between Constantinople and the Black Sea ports in the line managed by Mr. Gumuchdjian, of Constantinople.

NEWS FROM ALL SOURCES.

The Board of Trade are informed that the exportation from Cyprus of pack, saddle, and draught animals suitable for use in war to any place not being part of the British Empire is prohibited.

The National Bank of Egypt announces that it is about to issue banknotes for PT50 of a new design, which will circulate concurrently with those of the old design.

According to *L'Opinion*, Mr. Kantos, Inspector of the Greek Railways, Mr. Mouret, representing the Société des Batignolles, Mr. Masson, director of the works of construction, accompanied by Mr. Pizanis, chief of the engineering department, and by Mr. Aravandinos, Director of Public Works for Macedonia, left on October 5 to inspect the work of constructing the line Papoulia Ghidia between Papoulia and Plati. They intended subsequently to inspect the work on the branch line from the great bridge of the Vardar to Topsin.

During August 292,669 kilos of gum, valued at £8,546, were exported from the Sudan viâ Port Sudan.

By order of his Excellency the High Commissioner in Council, the Currency Commissioners of Cyprus are authorised to issue £5 and £1 notes to the maximum total value of £17,000 and £18,000, respectively.

Twenty-two Swedish steamers, totalling 31,836 tons, called at Malta in 1912-13, and six Swedish steamers were sighted off the island during day time.

Mr. Fred Swift, of Liscard, manager of the Ellerman Line of Steamships, died August 29 last, left £12,913 gross and £7,037 net.

Mr Henry Boutigny has acquired two Greek papers in Alexandria, the *Omonia* and *Tachydromos*. He recently acquired the *Ephimeris*, likewise an Alexandria Greek paper.

A daily express service between Constantinople and Budapest has been organised. It goes viâ Philippopolis and Rustchuk to Giurgevo, and links up with the Bucharest-Predeal service.

At the request of the Serbian authorities a conventional train service has been provided between Nish and Salonika, in addition to the ordinary train service.

The American Consul at Trebizond reports that merchant vessels of the belligerent Powers (exclusive of British bottoms) no longer stop at the port, and that the continuation of the Italian fortnightly service is also uncertain.

The Cairo correspondent of *The Railway Gazette* states that the Jaffa-Jerusalem line has stopped its services owing to lack of locomotive coal.

The Board of Trade are informed that in future no vessels will be allowed to enter the harbour of Mudros (Lemnos) by night.

Mr. Peter Bullough, J.P., has been elected a member of the council of the British Cotton Growing Association to fill the vacancy caused by the death of Mr. A. H. Gill, J.P.

CAVALLA OCTROI.

H.M. Acting Consul-General at Salonica reports that, according to information received from the Acting Vice-Consul at Cavalla, octroi dues are levied in that town as follows :—

On all goods imported (with the undermentioned exceptions)—1 per cent. *ad valorem* (the value for octroi duty purposes being the invoice value of the goods plus Customs duty).

On sugar and coffee—½ per cent. *ad valorem* (the invoice value of the goods being taken as the basis of the assessment of the octroi duty).

On tobacco—50 lepta per bale.

The Egyptian Loan.

(From Our Own Correspondent.)

Cairo, October 4.

The British Government's guarantee will enable the Egyptian Government to issue in London Treasury bonds to the value of £5,000,000. A further arrangement has been made according to which an amount of £3,000,000 will be placed at the disposal of the Egyptian Government in London against the securities of its Reserve Fund, which on April 1 this year amounted to £E4,500,000. Under these circumstances, the total amount that will be available to meet the temporary revenue deficiency and help more the crop will be £8,000,000.

The extra currency necessary locally for financing the cotton crop will be provided by means of an issue of bank notes secured by other Treasury Bills deposited in Egypt; the amount of these bills is never to exceed the figure of which the Government can dispose in London. As and when the local currency becomes redundant the Government will be able to withdraw notes from circulation against its drafts on London, and a proportionate amount of local Treasury Bills will be cancelled.

The bank notes will be issued by the National Bank of Egypt, which is now empowered to hold the above-mentioned local bills in guarantee of the extra issue, instead of, as is usual, having to hold part of the value of the notes in gold. The financing of the crop will be done by the National Bank of Egypt, entirely through the ordinary banking and commercial channels, and it should be clearly understood that, beyond arranging for the supply of extra funds, the Egyptian Government has nothing to do with the actual moving of the crop.

The Egyptian Government has published the following communiqué:—

The Egyptian Government will shortly issue Treasury bonds to the value of £E8,000,000, £E5,000,000 of which will be guaranteed by the British Government, and the balance by the Egyptian Government's reserve. The bonds will be redeemable from a period of three to six months, the latter being the maximum date, but are renewable if necessary. They will be issued in London and Cairo, preference being given to which of the two places is the more favourable, but as far as possible the decision of the Council of Ministers to issue five millions in London and three millions in Cairo will be carried out. In no case will the unit of eight millions be exceeded. The bonds issued in Cairo will be paid by the Government in National Bank notes, printed specially for the purpose; those issued in London will be paid in gold or notes of the same value.

The Egyptian Gazette of September 26 says:—"We understand that arrangements are being made between the Government and the National Bank which will settle the question of providing currency for moving the cotton crop. Pending the conclusion of these arrangements, the National Bank has already started making advances on cotton and other securities. In order that the funds now at their disposal may be as widely distributed as possible these advances will, for the present, be only on a small scale as far as each individual is concerned."

On October 3 the same journal adds:—"We are now in a position to state definitely that the Government is arranging to supply funds to the National Bank, which funds will be used for financing the crop.

EGYPTIAN PRIVILEGED AND UNIFIED DEBT.

The Egyptian Government announces:—

The coupons of the Privileged and Unified Debt, amounting to £E1,600,000, fall due on the 15th instant and November 1 next respectively, and this sum is ready for despatch to London and Paris at a suitable moment. However, once the Treasury bonds have been issued by the Bank of England the Egyptian Government will undertake to pay these coupons and will take delivery of the £1,600,000 deposited in the Caisse de la Detta.

EGYPTIAN MORATORIUM.

(From Our Own Correspondent.)

Cairo, October 8.

As was anticipated, the general moratorium of commercial affairs, proclaimed on August 8 and extended from September 15 to October 1, has been further extended under the same conditions as the last extension until October 15. It is quite possible that on that date a final extension with more concessions to depositors, etc., will have to be granted till November 1, as the moratorium in regard to negotiable instruments proclaimed on August 4 does not expire until that date. Of course, the general position may permit of the cessation of the commercial affairs moratorium on October 15, but it would seem only logical that the smaller banks, who hold bills that cannot legally be cashed until November 1, and who, possibly, have not sufficient floating funds to pay deposits in full, should be afforded some protection in the meantime.

The moratorium for commercial affairs, expiring on October 15, has been extended to November 1. Cotton and cottonseed contracts are especially excluded, and the liquidation thereof in Alexandria, which was, says *The Times* Cairo correspondent, indefinitely postponed, is now fixed for October 31.

TURKISH MORATORIUM EXTENSION.

(Special to "The Near East.")

The following is an exclusive translation of the extension of the Turkish moratorium referred to in the last week's issue of The Near East:—

Article 1.—The payment of all debts, pecuniary liabilities, and deposits in banks payable on July 21/August 3, 1330/1914, date of the publication of the first law respecting the moratorium, and of such as have become due between that date and August 20/September 2, 1914, and which have been carried over to September 20/October 3, in accordance with the law of August 18/31, 1914, is delayed by three months from September 21/October 4, 1914.

Nevertheless, debtors are required to pay—apart from the instalment of 5 per cent. payable in accordance with Article 1 of the law of August 18/31, 1914, and which has not yet been paid—an instalment of 10 per cent. on their debts due, and half of this 10 per cent. is to be payable as from September 21/1330/October 4, 1914 and the remaining half as from November 1/14, 1330/1914.

Article 2.—Payments effected since the promulgation of the law of July 21/August 3, 1914, will be deducted from the above-mentioned instalment of 5 per cent. Nevertheless, creditors of joint-stock banks shall have the right to encash from such banks the sum of £T10 as from September 21/October 4, 1914, and a further amount of £T10 on or after November 1/14, 1914, no matter what withdrawals they may previously have made, and even if the 5 per cent. of their credit be less than the sum of £T10.

Article 3.—The maturity of the debts due between August 21/September 3, 1914, and September 20/October 3, 1914, and extended for a month in accordance with the decree of August 18/31, 1914, is likewise extended to December 21, 1914/January 3, 1915. Nevertheless, debtors must pay, apart from the instalment of 5 per cent. to be settled in accordance with the law of August 18/31, 1914, a second instalment of 5 per cent. one month after the falling due of the debts, and a third instalment of 5 per cent. two months after such due date.

Article 4.—As regards debts falling due within the first month from the date of application of this law, 5 per cent. is to be payable at the due date, 5 per cent. at one month later, and the balance to be extended to December 21, 1914/January 3, 1915.

Five per cent. of debts maturing in the course of the second month after the entry in force of this law is to be payable at maturity, and 5 per cent. one month later. The payment of the balance is adjourned to December 21, 1914/January 3, 1915.

As regards debts falling due during the third month after the date of application of this law, 5 per cent. is to be payable at the due date, and the balance carried over to December 21, 1914/January 3, 1915.

Article 5.—The provisions of Article 4 of the law of August 18/31, 1914, relating to interest are to remain in force.

Article 6.—In accordance with the laws on the moratorium protests on bills and commercial paper must be made within eight days of their due date. However, a decree of bankruptcy may not be pronounced against a debtor until fifteen days after the expiry of the delay fixed by these laws. A fresh protest may not be made on bills already protested.

Article 7.—The moratorium does not apply to debts due to the Public Treasury.

Article 8.—Persons having bank deposits and who owe the Public Treasury in respect to dues and taxes must give cheques drawn in the name of the officials of the Treasury. Banks must pay the whole of the amounts of such cheques without deducting them from the sums due* to the depositors. The deposits of the Eykaf and of the "Caisse dez Orphelins" are not subject to the moratorium.

Article 9.—Fifty per cent. of rent due per month is to be payable. Allowance to be made for payments made in accordance with the law of August 18/31, 1914.

Article 10.—The provisions of this law do not apply to debts, contracts, or engagements contracted or entered into since the promulgation of the law of August 18/31, 1914.

Article 11.—This law is to take effect as from September 21/October 4, 1914.

Article 12.—The Ministries of Justice and the Finance are entrusted with the carrying out of this law.

BULGARIAN 5 PER CENT. LOAN, 1914.

The following figures are from an official communiqué published recently by the Bulgarian Public Debt Administration in the *Echo de Paris*.

On July 20 the Diskonto Gesellschaft, as an advance on the Bulgarian 5 per cent. Loan, 1914, placed *en disponibilité* to the credit of the Bulgarian Government, the net sum of 53,500,000 francs, after having reserved, as per arrangement, the sums of 27,000,000 francs and 30,000,000 francs to cover respectively (1) Bulgaria's liabilities with the Banque d'Escompte and others at St. Petersburg and (2) sundry Vienna banks.

Out of the sum held *en disponibilité* the Diskonto Gesellschaft placed immediately to the credit of the National Bank of Bulgaria, to be paid over to the Bulgarian Treasury, the sum of 41,250,000 francs. The balance of 12,250,000 francs has been made use of by the Public Debt Administration to meet successive liabilities abroad, and still has to its credit with the Diskonto Gesellschaft the sum of 1,000,000 francs.

EGYPT'S FINANCES.

On October 7 a special supplement of the *Journal Officiel* was issued containing a statement of the revenue and expenditure from April 1 to August 31. The total revenue amounted to £E6,114,750, as against £E6,036,898 for the same period last year. The following table shows the main sources of revenue for the period for 1914 and 1913:—

	1914.		1913.
Land tax	1,331,483	..	1,444,410
Custom dues	772,143	..	768,549
Tobacco	739.605	..	681,930
Railways	1,407,305	..	1,412,304
Posts	128 744	..	1 6.415
Mixed courts	351,912	..	368,829

The total expenditure over the same period was £E7,540,786, as against £E8,043,790 for 1913. There had been hardly time by August 31 for the stringent economies being made by the Government to have had much effect. In the next statement, says *The Egyptian Mail*, of accounts we shall see a considerable change in this direction.

---

* Under the Turkish Moratorium laws.

THE POSITION IN THE CITY.

(By Our City Editor.)

Re-opening the Stock Exchange.

There is much talk of reopening the Stock Exchange. But the bulk of the members are not sanguine. They believe that if the House reopened a flood of selling orders would bring about a complete *débâcle*. The dealers are not in a position to put stock upon their books, and the banks are not inclined to increase their advances. Indeed, some of the banks consider that they have loaned too much already.

Business Done.

A certain amount of business is done each day, but it is done under great difficulties, and no one can understand why the committee does not reopen a portion of the House unofficially and as a shelter. There is always a fair supply of buying orders whenever the news is good and the weather fine, but when it rains or when the outlook is gloomy not a bargain is done.

Bills v. Loan.

The Government succeeded in placing another batch of Treasury bills, but the rate was almost 3¾ per cent. There are now £86,600,000 outstanding, and the bulk of this money will have to be found in the first three months of 1915. It will be almost impossible for the Chancellor to continue borrowing upon short-dated bills. His revenue is falling away very rapidly, and his commitments increasing with each week the war continues. The banks cannot go on financing for ever. They like "floaters" in good times, but in days like the present they dare not lock up too much money unless they see a definite certainty of the bills being repaid at maturity. It is a thousand pities that a big War Loan was not made as soon as the war broke out. This could have been done if the terms of payment had been made easy and if the banks could have been provided with funds on less onerous terms than those exacted during the panic. Everyone lost their heads then, and the nation must now pay the penalty.

Brazilian Funding Scheme.

The Brazilian funding scheme issued by Rothschild's is clear and simple. It provides for the issue of £15,000,000 5 per cent. bonds which will be paid to the holders of Brazilian bonds in exchange for coupons. The smallest bonds are £20, but fractional certificates will be issued and will be saleable when the house reopens. The bonds will be secured as a second charge upon the Rio de Janeiro Customs. The scheme is similar to that adopted in 1898, and although it does not provide for the small investor who may have £100 bond, he can, at any rate, sell his fractional certificate, or buy more to make up the £20. Brazil only needs time and economy to put her finances in good order. She possesses immense natural wealth, but she is extravagant and unbusinesslike.

South American Rails.

The South American Railways are all doing badly. Buenos Ayres Great Southern, Central Uruguay, its extensions, and even the prosperous San Paulo, all issue bad reports and are compelled to reduce their dividends.

Armament Shares.

Armament shares have been dull. Most of the companies just manage to hold their quotations. That is the best that can be said. The Birmingham Small Arms are down to 53s. 6d. A very moderate price considering the large business now being done both in the armament and motor-car departments. These are working night and day. John Brown are called 27s. 6d., a rise of only 2s. 6d. since war began. Cammell Laird are £4 15s. ex div. Kynoch ordinary are a shade weaker at 11⅞. Vickers look cheap at 34s., for they made up at 35s. 3d. before the House closed, and the whole of the vast works are working continuously on splendid contracts. Armstrongs are actually 38s. 6d. ex div., which makes them appear cheap as compared with the pre-war price of 40s. Those who have any spare money to invest can hardly go wrong in buying armament shares to-day.

Anglo-Egyptian Oil Company.

The Egyptian share market is quite dead, and I cannot find any real business in any direction. The arrangements made by the British Government would appear to be most satisfactory. But naturally the demand for cotton has fallen away, and the fellaheen will feel the pinch severely. The one bright spot in Egypt is the very satisfactory developments at Hurgada. The Anglo-Egyptian Oil Company struck a big well, which gave 6,000 tons in a single week. That well has now been got under control, and further wells are likely to be brought in soon. The public does not seem to realise what the large Hurgada output means. It proves an immense oil-bearing area, as anyone who looks at the map can see. It means that the Anglo-Egyptian, after many disappointments, can now rely upon a big output, steadily increasing. The shares are very cheap at 11s., a purely nominal price. There are many buyers about, and hardly any sellers. Shells have the largest interest in Anglo-Egyptians. They must be finding great difficulty in securing supplies, as neither Russia nor Roumania can now export oil, and they have to rely upon their Far East fields. In Mexico and California reports from the oilfields speak of great depression.

DEUTSCHE ORIENT BANK.

(From Our Own Correspondent.)

Cairo, October 4.

It is generally wondered whether the Deutsch Orient Bank will open its doors when the moratoria are declared at an end. One of its managers has been allowed to proceed to Europe to arrange for funds, but under the circumstances his mission would appear to have not much chance of success.

THE PRIVILEGED CURRANT COMPANY.

Extracts from Messrs. Burlumi's Report.

The Privileged Currant Company received during the season in their warrant stores 10,500 tons of currants, of which 9,000 tons have been withdrawn and 1,500 tons have been carried over to the new season. They have bought for wine-making a quantity of fresh currants equivalent to about 9,000 tons of dried fruit. No dried fruit had been offered to the company by the growers for sale, as the market prices were higher than the convention limits before war had been declared. On the declaration of war the company's obligation to buy the surplus currants was suspended, as stated below, and the 1,500 tons of currants, on warrant, together with about 2,500 tons in private hands have been brought over to the new currant year. In their retention stores the company received 23,000 tons, making 38,000 tons with the balance brought over from the previous season. The land tax in kind on 180 millions of Venetian pounds exported has absorbed 30,000 tons, and the balance of 8,000 tons, represented by retention certificates in circulation, has been carried forward to the new season. The retention currants and the fresh fruit purchased by the company have been sold as usual to the Wine and Spirits Company and to local distillers. The total quantity of fresh and dried currants used for industrial purposes in Greece during the season has been 66,000 tons against 59,000 tons in 1912-13, and 46,500 tons in 1911-12. The stock of retention currants in Greece was, at the end of August, about 25,000 tons, against 50,000 tons at the same time last year.

The Privileged Company distributed to its ordinary shareholders a dividend of 4 per cent. for the year ended August 22, 1913, and the chairman of the board stated lately to a deputation of shareholders that the balance-sheet for the year ended August 22, 1914, shows profits sufficient to pay the whole statutory dividend of 6 per cent. The Wine and Spirits Company have paid 13 per cent. for the year 1913, and an interim dividend of 5 per cent. for 1914.

The declaration of the European war, and the unsettled political situation in the Balkans gave rise to serious apprehensions both to the Board of the Privileged Company and to the Greek Government. A panic might ensue amongst the currant growers, who would then naturally offer most if not all of their new crop to the company for sale on the terms of the convention, an obligation which the company could not possibly find the money to meet. To avoid such a catastrophe the Government consented to grant the company a sort of moratorium suspending the operations of certain clauses of the convention, and notably those binding the company to purchase currants and retention certificates. A legislative Royal Decree was issued to that effect on August 15. The obligation of the company to advance money on currants deposited with the company on warrants was modified by the reduction of such advance to drachmas 45, 50, and 55 per thousand Venetian pounds, according to the categories of quality specified in Article 10 of the original convention. The force of the decree, which is subject to parliamentary sanction, was to terminate on October 13, but it has, of course, been prolonged by a new decree, and it will be further prolonged as the case may require. By another Royal Decree the land tax on the currants exported after October 8 has been raised by 15 per cent. This additional retention is for account of the Treasury, in part payment of war risks and other outlays undertaken by the State for the benefit and protection of national products, and for facilitating their export to the foreign countries of consumption. To limit any possible rise in the price of currants by this additional restriction of the exportable supplies, the decree empowers and enjoins the Privileged Company to sell to the trade for export retention currants at 145 drachmas per thousand Venetian pounds, equal at the present price of retention and exchange to 22s. per cwt. c.i.f. London in quarter cases. The retention currants produced by the additional tax of 15 per cent. cannot be used for any other purpose except for the production of alcohol, and this alcohol cannot be sold for home consumption. The land tax in kind has been collected at the rate of 40 per cent. on the fruit of the Ionian Islands and at 35 per cent. on all the rest, up to October 8, and it is being collected at 55 and 50 per cent. respectively after that date.

COMPANY RESULTS, &c.

Anglo-Roumanian.—Week ended October 10, 307 tons.

Anglo-Egyptian.—Gemsah production for week 1,600 tons (previous week 1,590 tons), Hurgada 6,020 tons (previous week 240 tons).

Egyptian Markets.—Week ending October 9, £649 (decrease, £116); aggregate to date, £36,756 (decrease, £1,831).

Egyptian Delta Light Railway.—Receipts for the ten days ended September 20 amounted to £E3,665, a decrease of £E3,246 compared with the corresponding period of last year.

Egyptian Markets.—In view of the abnormal conditions now prevailing in Europe and Egypt, the directors have decided to postpone the payment of the usual interim dividend on the ordinary shares.

Ottoman Railway from Smyrna to Aidin.—Receipts for week ended October 17 amounted to £10,198, a decrease of £1,802 as compared with the corresponding period of last year.

Piræus-Athens Peloponnesus Railway.—Receipts for the month of August amounted to 612,473 drs. (decrease 203,751 drs.); aggregate from January 1, 5,358,864 drs. (increase 247,628 drs.).

Suez Canal.—The traffic receipts of the Suez Canal for the 18th inst. amounted to 90,000 frs., against 500,000 frs. last year.

Thomas Cook and Son (Egypt).—The coupon due November 1 next on the Five per Cent. First Mortgage Debentures will be paid by the London County and Westminster Bank, Temple Bar branch, on and after November 2.

The London and Lancashire Fire Insurance Company announce that as from October 19 their London office address will be 155, Leadenhall Street, E.C. Their old premises in King William Street have long since been outgrown, and the new building in Leadenhall Street will permit of the concentration of the staff, many members of which had been housed in temporary premises.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople every Saturday for Gallipoli, Dardanelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrout, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria every Saturday, and from Port Said every Sunday, for above ports.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL (SUMMER) SERVICE.

Steamers leave Suez Docks fortnightly on Friday, at 5 p.m., for Port Sudan, whence trains may be taken for Khartoum. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Port Sudan, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Offices, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.

NOTES OF THE WEEK.

The fighting in Flanders—the Battle of the Road to Calais, as it has been termed—has been of such a nature as to resemble, in places, a butchery. Numbers of raw levies have been thrown against trained British and Allied troops. They have been slaughtered in droves. Soldiers of the first line, the best men that Germany could produce, had been unable to break or obliterate the Allied line stretching from the mouth of the Yser in Belgium to Arras in France. It was a hopeless enterprise to hurl forward second and third-rate troops for the purpose of accomplishing what the others had been unable to do. Something seems to be lacking in the German system. The Osmanli Sultans in the old days used to exhaust their foes by driving up second line troops to the first assault. The Janissaries followed, and, matchless in their freshness and discipline, gave the *coup de grâce* to a wearied enemy. The Germans appear to have reversed the process and to have exhausted their Janissaries before bringing up their *Kanonenfutter*. The result of this strategy is apparent; they have been unable to reach Calais, and, at the moment of writing, the line of battle, which has swayed backwards and forwards across some twenty miles of country, is in a less favourable position for them than was the case some days ago.

In connection with this fighting, which, at a grievous price to the Allies, has yielded a mighty harvest for the Valkyries and the Valhalla which our enemies in their almost Pagan pride have revived in their ideals, it is with the greatest pleasure that we can regard the achievements of our Indian brothers-in-arms. At one time critics were not wanting to assert that the Native Army would never stand shell-fire, would never face white troops, and that it was a form of folly akin to madness to reckon upon Sepoys as a factor in a European campaign. The fears of the alarmists were wholly unfounded. The Indian troops treated shell-fire as a form of evil, perhaps, but with a fine contempt. So far from Sikhs and Gurkhas being unable to face white troops, it was the white troops who fled before the Native infantry. The upstart pride of Germany was not strong enough to hearten her sons to the pitch of exposing the fronts of their Hunnish hides to the immemorial steel of militant Asia. In the China expedition the Teutons were taught to look upon Indian troops as "coolies," and to think and speak of them as "niggers." Part of that insult has now been wiped out in blood, and the legions of the War Lord have done little in the process to persuade their new adversaries that they were mistaken in believing that the Germans are "Sweepers" and no Sahibs. If the Germans have made no progress in Flanders, and it is difficult to learn exactly what is happening along the Aisne and on the upper waters of the Meuse, it is at least satisfactory to gather from French official statements that the invaders have been driven clean out of French Lorraine. Hitherto the Allies have had no occasion to make use of their siege trains against a German fortress, and the enemy has been able to build a fine reputation upon the invincibility of his attacks on permanent works in France or Belgium. Now, however, the position of the French is such that an attack on Metz is no longer a dream of the distant future.

In the Polish theatre of war the great advance which was to have secured Warsaw as winter quarters for the German Army and Poland as a new realm for the Saxon King has completely failed. Even the attempt to make the middle Vistula a bulwark against the Russians has collapsed in disaster and retreat. The Russians have thrown back the invaders from the neighbourhood of the Polish capital, and the latest news to hand indicates that they have cut the main German line of communication with the base at Breslau by capturing Lodz, more than seventy miles from Warsaw, and with it the control of the railway. Just at present the autumn rains, coupled with the unaccustomed traffic, have so impaired the value of the Polish roads that the loss of so important a railway must be a more serious blow to the Germans in that quarter than would be the destruction or surrender of an army corps. If all that we hear about events in Poland be true, the retreat from Warsaw may well rival that from Moscow as one of the great military disasters of history.

In Galicia the unhappy Austrians have failed to relieve beleaguered Przemysl, although apparently they now wage war under the personal direction of German strategists and the supreme command of the German Emperor. That the successor of the Cæsars should be so humbled as to be compelled to allow his troops to

Digitized by Google

fight at the dictation of the heir of the Margraves of Brandenburg is, from historical reasons, more bitter than the defeats in Lombardy or the disaster at Sadowa. The Austrian Empire had always bid fair to go proudly to meet any doom which Heaven might decree against it—if it went down before Napoleon, it at least sank with colours flying—Austrian and *schwartz-gelb* to the end. Now it appears that the Hapsburg Dynasty may pass into the night of history as the henchman of the Hohenzollern. The subordination of cholera-stricken Vienna to Berlin, of Austria to Prussia, is the servitude of a conquered country, not the proud co-operation of an ally.

The progress of the Bosnian campaign seems to indicate that the Serb kingdoms have almost fought themselves to a standstill. Courage and enterprise are not lacking, but fighting men must now be few, and the material of war is sadly worn by excess of service. The fighting, we know, has been desperate, and the measure of Serbia's success has been already greater than could well have been expected even by her warmest friends. For so small a State it is a magnificent achievement to have rid her territory of a formidable and, at first sight, almost overwhelming invasion, and to have repulsed for weeks every attempt on the part of a vastly more numerous enemy to reverse the earlier verdicts of the campaign. But we must not expect the Serbian Army to maintain the uneven combat indefinitely. There are times when the quill of a Foreign Secretary can do more to achieve a victory than the bayonets of an army corps, and such a moment is now at hand. The Government at Nish has it in its power to deal a shrewder blow to the Kaiserlichs with pen and paper than is now in the power of the General Staff at Valjevo with the remnant of its war-worn army.

"With the Powers at bay the Porte will play." At least that appears to be the current Ottoman misquotation of the proverb. The Capitulations have been "abolished," the Consular post offices wound up and now we learn that the famous scheme for the better government of the Six Vilayets in Turkish Armenia has been annulled. More than that, Turkish soldiers in uniform, repining possibly over the recently accomplished demarcation of the Turco-Persian frontier, have invaded Azerbaijan and done their best to lay it waste. The Russian troops in that Persian province once more justified their presence in Urumia by restoring order, in which process they killed at least three Ottoman regulars as well as a number of Kurdish auxiliaries. We are fully aware that from time immemorial the existence of a frontier has been an irritant to a Kurd's pride rather than a check upon his action, and no one will seek to make a diplomatic mountain out of a frontier molehill. Still, the presence of Ottoman regulars among the raiders is disquieting, if only as being indicative of the general spirit which seems at the moment to sway the politicians of Stamboul.

The action of the Porte is not limited to these instances of its newly revived aggressiveness. We understand that submarine mines are being transported by way of the Hejaz railway for ultimate immersion in the Red Sea. When pious Moslems subscribed throughout the whole Dar-ul-Islam towards the expenses of building that railway for the benefit of pilgrims to and from Mecca they little thought that it would be put to such uses. In any case it is not to be wondered at if, in such circumstances, we should have taken a necessary precaution in sending a vessel to remove British residents from Baghdad, and in retaining a warship at Mohammerah, in spite of inspired Turkish protests. Whether there is any truth in the statement that an Ottoman Mission has set out for Kabul to plead the German cause in the ear of his Majesty Habib-Ullah Khan is at present doubtful; if there is not it will not be from any lack of will to undertake such an enterprise.

The fitness of the Ottoman Navy for war depends upon its steaming as well as its fighting capacity. If Germans have been introduced to improve the latter, our Constantinople correspondent points out that in the former the Turkish Fleet is not so fortunate. It appears that steam-coal is even now lacking, and is likely to be almost unobtainable in the near future. Men, gold, even aeroplanes in parts and submarines in sections, can come by rail to Turkey if neutral neighbours feel inclined to interpret their neutrality in a favourable sense, but coal is quite another matter by reason of its bulk. The expense of moving coal across half Europe by rail and river is considerable, moreover, the supply at the disposal of the Teutonic Powers is almost as limited as is the carrying capacity of the only available railway.

The offer of the Roumanian Prime Minister to resign fluttered many a journalistic dovecote, but the offer, possibly purely formal in view of the change of Sovereign, has had no political consequences, and has led to no reconstruction of the Cabinet. It is indeed difficult to understand why it should have done so. The parliamentary situation is not so precarious that the existing Ministry would be eager to sacrifice some of its members in order to win the support of the Opposition by the distribution of their portfolios. The majority of which Mr. Bratiano enjoys the support in the Lower House is immense, and the traditions alike of his family and his party are to stand on their own feet and eschew expensive and unsatisfactory political entanglements in party politics. As a result Roumania stands where she stood. A certain nervousness about the Danube restrains her for the moment from looking beyond the Carpathians, but it is possible that with goodwill the memories of Bucharest in 1913 may be so far obliterated as to permit King Ferdinand to think of Ardeal without having at the same time to observe his namesake to the south.

If to be feared is an attribute of national greatness, then Bulgaria has recovered much of the prestige which she enjoyed before the Second Balkan War. On the one hand we hear that the Turks are afraid to join the Teutonic Powers unless they provide a comparatively formidable force to protect the Thracian frontier against the victors of Lule Burgas; on the other, it is asserted that Roumania is still nervous about plunging into war as an ally of the Powers of the Triple Entente for fear the Bulgarians might seek to revise the Treaty of Bucharest *vi et armis*. These apprehensions are mutually irreconcilable, but there must be something peculiarly menacing in the quality of the neutrality of Bulgaria if it can exercise so considerable an influence on the divergent policies of her neighbours. Serbia alone pays no heed to the susceptibilities of Sofia, and in that, as we point out in another place, we believe that she consults the best interests neither of her Allies nor of her own future.

The action of the Powers of the Triple Entente in requesting the Egyptian Government to remove the German shipping which was cumbering the ports of access to the Suez Canal was, in spite of the "neutrality" of the Canal, an act foreseen and provided for in the Convention of Constantinople which governs the status of the Canal. That instrument, having prescribed the neutrality of the great highway of commerce, very wisely details the method whereby that neutrality may be enforced and the Canal kept clear of warfare and its effects in order that commerce may not suffer. Sheltering under the neutrality of the Canal certain German ships remained at Port Said, and apparently intended so to do indefinitely. The fact that Egypt was at war had no bearing on the case, but the fact that these vessels misused the Canal, built for transit only, as a port of refuge from the war raging outside was in itself, if not a breach of neutrality, at least an act likely to interfere with the free passage of other ships through the Canal. As such it was resented, and the Egyptian Government, as the internationally appointed policeman of the Canal, has "moved on" some maritime undesirables. They doubtless paid the penalty of their nationality when once they were beyond the three-mile limit, but that is another story, and has nothing to do with the neutrality of the Suez Canal. The fact remains

Digitized by Google

that the Canal was built for the transit of ships, and objection has very properly been taken to an attempt to turn it into a dock for laying up ships for an indefinite period.

The action of the Hellenic Government in announcing its intention of reoccupying Southern Albania was to be expected. Observers of Albanian affairs considered that such a step was the inevitable consequence of the election of Burhan-ed-Din Mpret and the resumption of power by Essad Pasha Toptan. It is indeed logical. Greece withdrew from South Albania at the request of the six Powers who had made themselves responsible for the formation and future of the Albanian State. The Epirote insurgents, officially discouraged from Athens, although they enjoyed the countenance of the Hellenic world, agreed to become Albanian subjects inasmuch as the Prince was a Christian and the six Powers would permit neither their union with Greece nor their independent existence. Wide privileges tending to the maintenance of their racial and religious separatism were guaranteed by the Convention of Corfu and everyone hoped for the best under the joint rule of the German Mpret and the International Commissioners of Control. These dreams vanished at the rude awakening which followed the vigorous propaganda of the Young Turks in favour of the establishment of a Moslem Mpret, and the unceasing rivalries of Italy and Austria-Hungary, who, in seeking to shape Albania to their own ends, undermined any authority which the Prince might have enjoyed had he been left to himself.

Now the Christian Mpret, like James II., has abdicated the throne by withdrawing himself from his realm, and a Moslem Grand Vizier reigns in the name of a Moslem successor. That alone is enough to inflame the scarcely reconciled Epirotes of Southern Albania into renewed activity. There has been plenty of fighting and raiding, and the re-occupation of the country up to the Gramala Line will at least put an end to civil war in those regions. It will also irritate the Italians. The reoccupation is announced as being temporary, but it will probably last until the end of the war, and it is highly probable that Europe, when faced with a *fait accompli* will, when the time for settlement comes, wash its hands of Epirus and regularize the action of the Government of Athens in return for some territorial concession elsewhere which may then be useful for assuaging the ambitions of another state which may be deserving well of Europe at the time. The Moslem Monarchy may establish itself in the north, and if Albania has finally to acquiesce in the loss of her Southern Provinces she can truly set them down as the price paid for Italian and Young Turk support in getting rid of her German dynasty.

The State trial at Serajevo has ended, as was to be expected, in a verdict of guilty against no less than sixteen of the defendants. The methods of the prosecution in Austro-Hungarian State trials of Jugoslavs have sometimes been curious, but in this case, as no political end could any longer be served, there is no reason to question the justice of the decision arrived at. The actual murderers of the Archduke Franz Ferdinand and of the Duchess of Hohenberg, being under age, have escaped the death penalty, which will be inflicted on five of the conspirators—and have been sentenced to twenty years' penal servitude. Murder is murder all the world over, and it is to be hoped that political considerations will not in the future be invoked on behalf of these assassins on the plea that they were tyrannicides, not murderers.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, October 11.

Marking Time.

There has been no great change in the situation during the past week. The Fleet continues to pay short visits to the Black Sea; the Army, thanks to continued requisitions, is being gradually supplied with what it requires—and its requirements are considerable—and the Government seems inclined to mark time, and if possible obtain concessions from belligerent states. It is said, though it is difficult as yet to guarantee the truth of this statement, that the Porte has decided to reply to the British Government's representations concerning the concentration of the 8th Army Corps on the Egyptian border that Turkey, having certain rights and interests to defend in Egypt, cannot withdraw its forces from the proximity of the frontier without concessions. Whether the Foreign Office is in a humour to submit to *chantage* of the nature indicated and whether the Porte has really taken this decision will be seen in a few days' time. For the rest, it need only be said that the retreat of the Russian armies towards the Vistula is interpreted here as a great success for the German arms, and that the Germanophiles have gained ground through the capture of Antwerp, which has produced a great impression in military circles here. Otherwise there is no great change for better or for worse.

An Unsatisfactory Situation.

The South of Anatolia has been devastated by a disastrous earthquake, which has wrecked the towns of Isbarta and Burdur and caused the death of at least 4,000 persons. Ismail Djumbalat Bey and other prominent officials have been sent to the affected area to undertake relief operations. The situation in Thrace is, from the economic point of view, most unsatisfactory. The whole adult population from twenty to forty-five years of age has been called out, with the exception of the *muhadjirs*, and nearly all the horses, ploughing and draught oxen, buffaloes, and mules have been requisitioned, with great quantities of supplies. In some cases, according to certain Europeans, even seed corn has been requisitioned. Here, too, commerce is at a standstill, and prices are high. Sugar especially is scarce.

Coal and the Navy.

The available coal supply is estimated at most as 15,000 tons of steam coal and the 150 tons per diem of Eregli coal, which is being mined under difficulties, the majority of the labourers employed there having been conscripted. Whether it will be possible to keep up even this supply as long as gold is tight and labour scarce is doubted in some quarters. In any case the operations of the Ottoman Fleet, should it undertake any, are likely to be seriously hampered for want of coal. The "Goeben," German officers and all, cannot do more than 15 knots on Eregli coal, and the "Breslau's" speed will be reduced by 50 per cent. if she is compelled to fall back on this source of supply, while Germany and Austria cannot send any large quantities of steam coal here by rail.

Press Puerilities.

The Press continues to spread the most extraordinary stories concerning the war and kindred matters. Thus we are gravely informed that only 1,000 Indian soldiers have reached Egypt, and they are, so a local sheet informs us, of such delicate constitution that they fall fainting on parade. Furthermore we are told that the Russian

Black Sea fleet may be expected to mutiny at any moment, in consequence, we may suppose, of the burning of Odessa by revolutionaries. It is certainly a singular thing that the many British, French, Russian, and even German travellers who have passed through here from Odessa of late should continue, with crass obstinacy, to deny the truth of the Gospel according to Wolff.

The Dardanelles.

The Porte has thus far given no sign as to its intentions with regard to the Dardanelles, which remain closed. The principal Allied Powers are not in the least likely to accept the six miles limit suggested by the Sublime Porte in a recent note, nor will they withdraw their squadrons from outside the Dardanelles as long as a single German officer remains on board the Turkish fleet. Letters and imports now reach us through Dedeagatch—Kuleli Burgas, while German and Austrian mails, with artillery and occasional officers, come by way of Sofia and Adrianople. It is too early yet to form any opinion as to the workings of the Post Office as regards foreign mails. If Oskian Effendi has a free hand there is nothing to fear, but one dreads the "Cabinet Noir" and the military Censors.

The Turks' Neighbours.

The death of King Carol of Roumania is the subject of much comment in Turkey, where the deceased monarch, despite the part he played at Plevna, has always been regarded with respect. It is, however, thought here that the Roumanian Government will not alter its policy for the present, but will mark time for months yet, hoping to obtain all it wants without having to fight. Fear of Bulgaria is also given as a reason for the recent "deconcentration" of numerous classes of reservists. In Bulgaria, in spite of the concentration of imposing Turkish forces in Thrace, less than 40,000 men are actually under arms. News from Macedonia gives the impression that the Serbs, though capable of defending their country with success, are too exhausted to undertake an offensive campaign with much vigour. Their losses have been heavy, as have those of their opponents.

The Greek population of Eregli has "emigrated of its own free will." The Metropolitans of Smyrna and Ephesus have been also induced to emigrate to Constantinople by His Excellency Rahmy Bey, Vali of Smyrna.

THE CONSTANTINOPLE VOLUNTEERS.

In the following list are given the names, with their ranks and regiments, of the Constantinople Volunteers:

Thomas Atkinson, Gunner, Royal Field Artillery.
Sydney Bond, Trooper, Royal Horse Guards.
A. Warden Baker, Lieutenant, 7th Battalion Royal Scots Fusiliers.
G. Brooks, Gunner, Royal Field Artillery.
R. Bond, Gunner, Royal Field Artillery.
H. H. Binns, Driver, Royal Field Artillery.
Alfred Cuming, Gunner, Royal Field Artillery.
Isaac E. Colley, Trooper, Royal Horse Guards.
J. Crawford, Private, 7th Battalion City of London Fusiliers.
C. T. Davidson, Gunner, Royal Field Artillery.
F. Fromant, Private, Grenadier Guards.
J. Higgs, Carabineer, 6th Dragoon Guards.
H. A. Keyser, Private, 7th Battalion City of London Fusiliers.
Hugh La Fontaine, Private, 7th Battalion City of London Fusiliers.
C. G. Michen, Royal Field Artillery.
G. Parker, Trooper, Royal Horse Guards.
T. Trenter, Trooper, Royal Horse Guards.
Arthur Whittall, Private, 7th Battalion City of London Fusiliers.
K. E. Whittall, Private, 10th Battalion Royal Fusiliers.
Roland W. Whittall, Private, 10th Battalion Royal Fusiliers.
C. Gont, 2nd Lieutenant, King's Oown Yorkshire Light Infantry.
G. M. Atkinson, Gunner, Royal Field Artillery.

Messrs. N. Cumberbatch, A. Duckering, and W. Hume have also left Constantinople, but the correspondent who forwards us the list has not yet received information as to the units to which they are attached.

LETTER FROM CAIRO.

(From Our Own Correspondent.)
Cairo, October 10.

Increasing Sympathy for Britain.

Considerable satisfaction seems to have been caused by the intervention of the British Government in the arrangement made by the Egyptian Government for the settlement of the impending financial crisis. The Council of Ministers requested the Prime Minister to convey through the British Agency the Egyptian Government's sincere thanks, and H.E. Rushdi accordingly called on Mr. Cheetham this week for this purpose. Turkey's military and other activities are attracting no little attention in the vernacular Press, which has adopted a most satisfactory attitude. Papers of such varying politics as *El Mokattan*, *El Moayad*, *El Ahram*, and *El Misr* proclaim as with one voice their recommendation that Turkey shall maintain her neutrality, and shall do nothing that might affect the friendly relations that exist between England and the Porte. In fact, the swing of the pendulum to which reference has been made in my last few letters has steadily continued in the direction of sympathy with Great Britain, and the Egyptian Moslems have evidently seen the wisdom of falling into line with their co-religionists in other parts of the world. Such being the case, *El Moayad* is right in considering the gift from the Egyptian Red Crescent to the British Red Cross "as a symbol of harmony between Islam and Egypt . . . and as a deed crowning the many manifestations of loyalty shown by the Egyptian nation towards England in these days."

During the past few days, as chance would have it, I have come into contact with a number of native officers, some permanently in Cairo and some on leave from the Sudan. One and all are keenly disappointed that their offer to serve side by side with British troops at the front has not been accepted. It has been in vain that the authorities have pointed out the peculiar difficulties that lie in the way of an acceptance of such services outside Egypt and the Sudan; they all persist in their request, which it would appear is prompted by a desire to testify to their friendship for England and also to give complete contradiction to the statements circulated as to the loyalty of the Egyptian Army.

We have been amused out here, and at the same time not a little annoyed, by the exaggerated and in many instances wholly untrue accounts that have appeared in Europe as to the situation in and around Egypt. Our annoyance has been concentrated on certain Home papers that should have known better; whilst our amusement has been derived from the German and Austrian Press, which has pictured Egypt in a seething state of unrest, and has reported divers acts of violence committed by the unemployed mob and the rebellious natives! The latter is, of course, but part and parcel of the German publicity programme, and consequently its continuation must be expected, but the offenders in the Home Press—and also certain individuals nearer at hand—should bear in mind that the exportation of irresponsible rumour is no less reprehensible than the propagation of designedly untrue versions of occurrences which they have been foremost in condemning in our German foes.

The Mixed Courts.

The Government has come to a definite decision as to the treatment to be meted out to the German and Austrian judges of the Mixed Courts and the Commissioners of the same nationality on the Public Debt Commission. It may be remembered that in recent letters I reported that German and Austrian Government officials were either being treated as having resigned, if they had not returned from leave, or were being gradually put on pension or otherwise dismissed; while their services were retained in some few cases, in positions where no harm could be done. The German and Austrian judges and Public Debt Commissioners are being dealt with on a much handsomer scale. The former are being granted leave of absence until the expiration of their contracts at the end of January next, and the latter for an indefinite period, all of them on

Digitized by Google

full pay. Although no official explanation has been given, it is understood that the reason for this exceptional treatment is the fact that these functionaries were nominated to their present posts by their respective Governments, though why, in existing circumstances, that should be an argument for preferential treatment is not quite clear.

It is to be noted that the date of the expiration of the Mixed Court judges' contracts is that of the completion of the quinquennial period for which the Tribunaux de la Reforme were renewed in 1910. As yet no negotiations have been opened up with the Powers for a further extension. Usually pourparlers are started much earlier than this owing to the necessity of obtaining the consent of the various Chancelleries to the reforms that the Egyptian Government wants to introduce from time to time. This year there were no such questions outstanding, and it was understood that the diplomatic negotiations were to be taken up this month. The present European situation has no doubt prevented action being taken, and it would not be at all surprising if when the negotiations are actually opened up a somewhat different basis of discussion is found to be submitted.

The Legislative Assembly.

According to the new Organic Law promulgated on July 21, 1913, the Legislative Assembly has to meet on November 1 every year, and the first session, which came to an end in June last, was prorogued until that date. This year November 1 falls in the middle of the Feast of Courban Bairam, so a postponement must take place. In view of the existing exceptional circumstances it is understood that the decree ordering the postponement will not for the opening of the second session until January 1, or perhaps later.

CAIRO, October 17.

The Holy Carpet.

The ceremony of the handing over of the Holy Carpet to the Emir-el-Haj took place on Monday amid the usual festivities, and by now the Mahmal is well on its way to, if it has not already reached, Jeddah en route for Mecca, where it should arrive about the 27th inst., in time for the celebration of the Feast of Courban Bairam. The Government's circular and the exaction of a heavy deposit have evidently had the desired effect; for although no actual figures have been published, it is understood that practically no one has applied for permission to proceed to the Hejaz. The restriction imposed this year will be beneficial, for while minimizing the risk of epidemics being introduced by returning pilgrims, it will relieve the Egyptian Government from the usual heavy expenditure in connection with the quarantine precautions. The news that cholera —presumably of the Asiatic type—is spreading in Galicia, and that a bad outbreak of typhoid is reported from Constantinople, seems to indicate that the above-mentioned economy effected by the Egyptian Government will be but a temporary one, since if, as is quite likely under war conditions, a cholera epidemic breaks out in Central Europe, more stringent quarantine regulations will have to be introduced on our Mediterranean seaboard. We in Egypt view the future, in so far as an epidemic in Europe affects us locally, with perfect equanimity; for the International Quarantine Board at Alexandria has such an efficient organization that there is little likelihood of the epidemic, whatever its nature, spreading to this country. During years when cholera and plague have raged at our very doors Dr. Ruffer and his able staff have kept us absolutely immune; and Egypt, if the worst happens in the West, should be one of the safest countries in which to reside during such a crisis.

German Intrigues in Egypt.

The ungrateful manner in which the leniency of the Egyptian Government towards German residents has been repaid is illustrated by the following case, the details of which, although known to a privileged few, have only just been made public. It appears that shortly after war broke out a German member of the Alexandria Police Force, named Mors, obtained leave to proceed to his native country—it is understood on full pay for the period of ordinary leave to which he was entitled under the regulations. On September 19 he suddenly returned to Alexandria viâ Constantinople, his explanation being that he had been rejected as unfit by the German military authorities. On the face of it his story appeared highly suspicious, as he certainly had not the appearance of a sick or delicate man, and his chiefs decided to place him under arrest. In the course of the subsequent search that took place, he was found to be in possession of incriminating plans and documents, and to have brought over with him a certain quantity of explosive material. A very extensive and careful inquiry has been made into this case, and although no information is available for publication as to what Mors' intentions were, there appears to be no doubt as to its serious nature, since he is to be tried before a British military court very shortly.

This is but one illustration of the cases of German espionage and suspicious actions that have come to the notice of and been handled by the authorities of late. The German and Austrian residents have been heard to complain of the order forcing them to register and of the subsequent placing out of bounds of many of the bars, restaurants, and other places of resort owned by subjects of those nationalities; they should, however, address their recriminations to those of their fellow countrymen who, like Mors, have by their actions been in the main responsible for the change in the attitude of the authorities towards enemy-subjects in Egypt.

The "Terriers."

Ever since its arrival the Territorial garrison has been hard at it, training and taking full advantage of the exceptional opportunities which Egypt offers for that purpose. The men are as keen as anything on their work, and are shaping exceedingly well. Those who have watched them are quite surprised at their progress, and on the almost daily occasion of their route-marches through the town many of us have mistaken them for "regulars," so smart has been their appearance.

In connection with the "Terriers" I may, perhaps, be pardoned if I draw attention to one not unimportant point. The free manner in which regular officers and men associate on the playing-fields without the slightest prejudice to discipline in barracks, on the parade ground, or on the field of battle has ever excited the envy and admiration of foreigners, who willingly admit that such things could not possibly be in their armies. The "Terriers" are now affording us a similar example, though from what one might call the opposite side of the medal and from a far more trying standpoint. Many of the rank and file come from the same social class as the officers; many of the latter but three months ago were calling the former by their nick-names on the cricket field, and were meeting at the same club table. To-day all that intercourse is at an end, and there has intervened the inexorable dividing line set up by military custom, which prohibits the meeting on equal terms of officers and rank and file or their frequentation of the same social institutions. At home or on the field of battle this barrier, owing to the surrounding circumstances, would not be felt, but out here in Egypt, where social amenities are the sole means of sweetening life, and constitute the only compensation for exile from family and friends, it is bound to touch those most concerned very closely. It is, indeed, but in keeping with the traditional British character that not a murmur is to be heard from those to whom the lines have not fallen in such pleasant places as to their comrades, and that an exceedingly strong spirit of discipline pervades all ranks. Nevertheless I feel that tribute should in this respect be paid to the "Terriers" now in Egypt.

THE LAW AND STATUS OF THE SUEZ CANAL.

On October 29, 1888, Great Britain, France, Russia, Italy, Spain, the Netherlands, Germany, Austria-Hungary, and Turkey signed the Convention of Constantinople, which was ratified on December 22 of the same year. This defined the international status of what had hitherto been regulated as a purely domestic affair between the Sultan and his Egyptian vassal. The first Article prescribes that the Canal

> . . . sera toujours libre et ouvert, en temps de guerre comme en temps de paix, à tout navire de commerce ou de guerre, sans distinction de pavillon. En conséquence, les Hautes Parties Contractantes conviennent de porter aucune atteinte au libre usage du canal en temps de guerre comme en temps de paix. Le canal ne sera jamais assujetti à l'exercise du droit de blocus.

The next two Articles refer to the Sweet Water Canal, which is equally exempted from the area of possible hostilities. In Article IV. it is laid down that as the Canal is to be open for traffic, even in time of war

> . . . aucun droit de guerre, aucun acte d'hostilité, ou aucun acte ayant pour but d'entraver la libre navigation du canal ne pourra être exercé dans le canal et ses ports d'accès, ainsi que dans un rayon de 3 milles marins de ces ports, alors même que l'Empire Ottoman serait l'une des Puissances belligérents. . . .

The Article concludes with provisions governing the use of the Canal by belligerent warships, which are to pass through the Canal as fast as is permitted by the ordinary regulations and may not remain in either of the ports of access for more than 24 hours. Article V. provides for the neutrality of the Canal so far as the embarking of troops or war-stores is concerned, but it allows a troop-ship, in the event of accident while in the Canal during war-time, to land its troops, with their equipment, provided that not more than 1,000 be landed at one time. Article VI. subjects prizes-of-war to the rules which apply to the warships of belligerents, and Article VII. permits Powers, while at peace, to maintain guard-ships, to the number of two apiece, at Suez and Port Said.

Article VIII. provides for the enforcement of these regulations and definitely makes the Egyptian Government responsible to the Signatory Powers for the maintenance of the freedom of the Canal. Although open to the shipping of all nations the Suez Canal is in no sense extra territorial—as by Article IX. of the Convention of Cairo concluded on February 22, 1866—before the Canal was built—between the Khedive Ismail and the Suez Canal Company, and confirmed by Imperial Firman of Sultan Abdul Aziz Khan on March 19 following, the Canal and its territory, is specifically subjected to the control of the Egyptian police.

> Le Canal maritime et toutes ses dépendances restent soumis à la police Egyptienne, qui s'exercera librement comme sur tout autre point du territoire de façon à assurer le bon ordre, la sécurité publique et l'exécution des lois et règlements du pays.

Thus it was logical that if Egypt was responsible for its ordinary police work, she should also be the natural guardian of the international rights and privileges of the Canal. Accordingly, it is laid down in Article VIII. of the Convention of Constantinople

> . . . En toute circonstance qui menacerait la sécurité ou le libre passage du Canal, ils [les Agents en Egypte des Puissance Signataires du présent Traité] se réuniront sur la convocation de trois d'entre eux et sous la présidence du Doyen, pour procéder aux constatations nécessaires. Ils feront connaître au Gouvernement Khédivial le danger qu'ils auraient reconnu afin que celui-ci prenne les mesures propres à assurer la protection et le libre usage du Canal . . .

This action is made obligatory on the Egyptian Government in Article IX.

The Convention is inspired throughout with the realization of the necessity for keeping the Canal free for traffic, and the prolonged stay of any vessel in the ports of access tends to infringe the spirit which guided those who drew it up. Thus it is obvious that in invoking the powers specifically accorded to the Egyptian Government in Articles VIII. and IX., and in directing them against German ships in the Canal, the Powers of the Triple Entente are in no way infringing the freedom of the Canal as laid down in Article I., but are preventing German ships from incommoding traffic by reason of their unduly protracted use of its waters. Even Germans cannot be allowed to obstruct the passage of the world's commerce through the Canal because they fear to come out on to the high seas. Suez and Port Said are not ordinary harbours. They are ports of access to the Canal. Had they been ordinary harbours German shipping would have been seized when Egypt first announced that she considered herself to be in a state of war with Germany. The action of Egypt in expelling these ships was rendered imperatively necessary, as in certain cases their commanders went so far as to commit hostile acts in the Canal. In such circumstances the German Press renders itself more ridiculous than usual when it accuses the Egyptian Government of violating the neutrality of the Suez Canal.

PORT SAID IN WAR TIME.

(From Our Own Correspondent.)

Port Said, October 10.

"An Armed Camp."

During the past few weeks Port Said has presented the appearance of an armed camp, while its narrow harbour has been crowded with British and French warships, transports bound for France, and empty troopships outward bound for another living cargo. The large open space near the Gouvernorat is covered with army tents full of disappointed soldiers chafing to get away to the front, while the Canal banks are alive with defenders. Since the outbreak of war the Turkish menace has been with us in more or less acute form. Interminable rumours fill the air, and our tough little divisions are waiting—ready for any emergency.

Six Turkish torpedo boats passed through the Canal recently, and after coaling here proceeded into the Mediterranean. While they were in port a courteous exchange of visits between the commander of the flotilla and the captains of the British and French cruisers took place.

Precautions in the Canal.

On the 4th all traffic was stopped in the Canal, and it was not resumed before the morning of the 5th. The only reason given by the Canal Company was "orders from Ismailia," but it is generally supposed that the presence of mines was suspected, and that vigorous sweeping operations were carried out. Nothing is left to chance.

A Busy Time.

A large number of British troopships has recently passed through in convoy and proceeded to the north-west under escort of British and French cruisers. Those whose business takes them on board the troopers cannot fail to be impressed by the striking efficiency of both the troops and those controlling them, and of the steamship companies, who at the shortest of notice have fitted their fleets to carry men, guns, horses, equipment, and stores a long journey under semi-tropical conditions the greater part of the way. Still more remarkable is the fact that men and horses have enjoyed the best of health, and appear to be in the pink of condition. The Indian troops are tough-looking warriors, who, one feels sure, will give a good account of themselves.

The hotels here are crowded with British officers, some of regiments stationed here or close by, and others of Indian regiments on their way, and from troopships in harbour.

The Native Attitude.

The local native behaves with commendable docility, although there have been a few displays of hooliganism among the very lowest class. These, however, are confined to the Arab quarter, and are easily dealt with by the police. Several thousand coolies engaged in coaling have been sent up-country recently owing to the lack of work. There is now sufficient work to keep employed all those engaged in discharging colliers and delivering bunker coal, and so long as the men have work to do they do not trouble much with other concerns.

The general attitude of the residents here is one of waiting and watching. Business is carried on by all firms except the Deutsches Kohlen Depot, the North German Lloyd, and the Austrian Lloyd Agencies. These, however, are still represented by a few haggard officials.

The neutrality of the Canal is being strictly preserved with the invaluable assistance of British troops and warships.

NOTES FROM CYPRUS.

(From a Correspondent.)

Cyprus, October 8.

A Disappointing Season.

The summer season at Mt. Troödos is about to end. The Government offices will move down in the course of a few days, and the High Commissioner is expected to return to Nicosia about the middle of the month. Families are leaving the hills daily. The season has been a disappointing one as regards visitors, and hotels have suffered accordingly.

Popular Agricultural Shows.

An agricultural show on an extended scale is to be held at Famagusta on October 31. Very good entries are anticipated. The High Commissioner will, it is hoped, attend. The prizes, of which there will be a large number, may perhaps be presented by Lady Goold-Adams. The organization of these agricultural and industrial shows in the different districts is unquestionably giving good results, and they are now very popular.

Taxation Problems.

There is some little difficulty in the collection of taxes. In consequence of numerous complaints, which are echoed in the Press, a special inquiry is being made by Government in the districts of Kyrenia and Nicosia into local circumstances, with a view to dealing leniently in the present time of hardship where any need exists. In a poor country like Cyprus there must inevitably be increase of distress in face of the financial situation. The position of the collectors, a very hardworking and deserving body of men, is no easy one; for while the payment of taxes must of necessity be enforced in the case of the well-to-do, it is often extremely difficult to ascertain to what category particular taxpayers belong. The High Commissioner, who, it is fully realized, has the welfare of the peasantry—and of all classes—sincerely at heart, will no doubt give such directions as will meet the difficulty.

The Island and the War.

Considerable numbers of fugitives continue to arrive from Syria and neighbouring coasts, the state of things being again lamentable. Turkey is regarded as practically dominated for the time being by Germany, and as "having no will of its own," but being blindly led to reduce its ill-fated provinces to further exhaustion for military purposes. One object is naturally supposed to be the invasion and "recovery" of Egypt.

It is anticipated that various articles of food will become scarce. The Greek papers continue to express ardent hopes for the success of the Allies, and all regard the war as a struggle in the cause of freedom, of respect of treaties, and of small States.

A Larnaca correspondent writes:—

On Saturday, October 3, the Khedivial s.s. "Tewfikieh" arrived at Larnaca with about 150 Christian refugees from Latakia. All the Christians in Syria are very nervous about the intentions of Turkey, in Syria in particular. They report that numbers of German officers in mufti are in all the large inland towns, who help with the anti-English propaganda, spread false war news, and are in close touch with the Turkish troops all over the country.

On Wednesday, October 7, the Khedivial s.s. "Prince Abbas" arrived from Beyrout with about fifty-one refugees. Many more had packed up and were ready to come, but the arrival of an American warship had restored confidence, and at the last moment many postponed their departure.

Once more Cyprus is proving a harbour of refuge for Christians in distress, as was the case in 1880 and on the occasion of the Armenian massacres. Fortunately, food is plentiful and living is cheap, and every effort is made to assist the refugees and recompense them for the discomforts to which they have been put in leaving their homes and belongings so hurriedly.

Messrs. Macmillan have issued at 6d. "The Austro-Servian Dispute," a paper reprinted from the Special War Number of *The Round Table*.

LETTERS TO THE EDITOR.

The columns of The Near East *are always open for the discussion of subjects of general interest to its readers. The publication of such letters must not be taken, however, as indicating that the views expressed by the writers are those of* The Near East.

Letters intended for publication MUST be accompanied by the writer's full name and address, not necessarily for publication, but as an evidence of good faith. They should be worded as briefly as possible and must be written on one side of the paper only.

SERBIAN IDEALS.

To the Editor of The Near East.

Sir,—Referring to my letter of the 9th inst., Ivan Mestrovitch is even younger than I thought. He was born in 1883. Also, by a slip, I put a hyphen instead of a comma between Hellenic and Byzantine.—Yours very truly,

Ernest H. R. Collings.

24, Gorst Road, Wandsworth Common, S.W.,

"BUSINESS CONDITIONS IN SALONIKA."

To the Editor of The Near East.

Sir,—In The Near East of the 25th ult. Mr. George N. Lionda makes the statement, as an example of my *mentalité spéciale*, that in my letter of July 25 I condemned certain steps taken by the syndicate of the insurance companies in Athens. As a matter of fact, I never did anything of the kind, for why should I? Neither the syndicate of the insurance companies in Athens nor in Salonika has any power to impose taxes, their sole mission being to watch over the interests of their companies and to see that the orders of the Government and of the authorities affecting them are conformed to. What I did say was that "Article 9 of a new law imposes . . . a tax of 2 per cent. on the premiums for the maintenance of a fire-brigade which does not exist here." But just before I mentioned that, according to our local newspapers, the Athens syndicate had written to ours in Salonika inviting the latter to impose a surtax of 5 per cent. on the present premiums, the proceeds of the same to be paid to our municipality, as in Old Greece, which invitation was acted upon, and the insurance companies began to collect this 5 per cent. from their customers on July 14 last. I have now, however, some reason to believe that our newspapers were then in error, and that the 5 per cent. really includes the 2 per cent. for the fire-brigade; but the matter is not quite clear. According to Mr. Lionda's *mentalité spéciale*, my "second point" is "also pitiful"; nevertheless, I do happen to know that, either directly or indirectly, fire-brigades have to be paid for by somebody. Although I am not an authority on the subject, I believe this is usually done, at least in England, out of the municipal rates, and I never heard of a Governmental tax being levied in that country to keep up local fire-brigades. Now, one of the first things our new municipality did was to put heavy octroi dues on almost every article that comes into the place, both from inland and abroad, plus licence duties on carters, porters, cabdrivers, pedlars, shoeblacks, etc. All this money was to be for the proper maintenance, and especially for the beautifying, of the town; but surely it is not unreasonable to think that some part thereof should be applied to objects of prime necessity, such as, for instance, the forming and maintaining of a fire-brigade for the protection of the property that already exists. To my mind it would be far wiser to spend this money on what is absolutely necessary and urgent rather than on costly parks, boulevards, etc., which most certainly are not at present, and may never be at all, needed, especially, too, in view of the dire distress and commercial stagnation prevailing throughout the country. It amounts to this: for the purposes of the town unnecessarily heavy octroi dues were first imposed by the municipality, for which object is also being collected from insurers, by virtue of a new law, an extra 3 per cent. (at least) on the premiums, plus an additional 2 per cent. for a fire-brigade.

Mr. Lionda's third paragraph is so vague and rambling that I pass it over, except that part about Salonika having no need for using any Latin characters at all. I suppose Mr. Lionda would quite scout the idea that both the Greek alphabet and the Greek calendar are altogether out of date and sadly need reforming. Mr. Lionda hails from the "Passage Benroubi." Now I doubt very much that the sound of the second syllable of the first word could be at all exactly represented by Greek characters, and it seems to me the second word would have to be written by the Greek equivalents of our Mpenroumpe. I wonder how Mr. Lionda would write "bon jour" in the Greek character? The first word would certainly have to be the equivalent of mpon, and the sound of the second could not be expressed at all. We now see some queer signboards in Greek, among them being "Splentit Palas," which is the nearest approach that can be made to splendid palace, owing to their being no d sound in the Greek alphabet. How many of the hundreds of millions using the Latin character would at the first glance recognize "Kiounar Lain" as Cunard Line? We have an "Agglo-Elliniki" Company, about which, at any rate here, there is nothing Anglo except a mutilated name; and I could cite scores of similar examples, English and French, to prove what I say.

As for the calendar, it has varied a whole day in the last few years, the 1st of January having been, not so long ago, our 13th, whereas it is now the 14th, the other days having jumped accordingly. And so, as Old Father Time passes on, the Greek Christmas would come to be celebrated at midsummer—but very many strange things will happen before then.—Yours, etc.,

Your Own Correspondent.

Salonika, October 14.

THE NEAR EAST BOOKSHELF.

TURKEY A HUNDRED YEARS AGO.

It is the custom of certain of our journals to reproduce each day extracts from their issues of a hundred years ago; and, with all due respect to the resourceful reporters, the enterprising correspondents, and the learned leader-writers who deal with current events, these records of the past are frequently the most interesting thing in the paper—or were before the outbreak of the war. In the same way, while modern books of travel in the Near East are numerous and often excellent, the reader with a contemplative turn of mind will often find more pleasure in the perusal of some long-dead traveller's reflections and reminiscences than in the most up-to-date volume of the kind. We are indebted to a reader of THE NEAR EAST for the opportunity of reading one of the most entertaining and suggestive of these old volumes; and though it will be impossible to do justice to the charm of the work in a short article, it can hardly fail to be of interest to many of our readers to reproduce some of the author's impressions.

The full title of the work referred to, as set out on its title-page, with customary variety of type, is:—

"The Present State of Turkey; or A Description of the Political, Civil, and Religious, Constitution, Government, and Laws of the Ottoman Empire; the Finances; Military and Naval Establishments; the State of Learning, and of the Liberal and Mechanical Arts; the Manners and Domestic Economy of the Turks and other Subjects of the Grand Signor; etc., etc. Together with the Geographical, Political, and Civil, State of the Principalities of Moldavia and Wallachia. From Observations made, during a Residence of Fifteen Years in Constantinople and the Turkish Provinces, by Thomas Thornton, Esq."

The second edition, with which we are concerned, "with corrections and additions," was printed in London "for Joseph Mawman, 22, Poultry," in 1809. It is worthy of note that the volume contains a really good map of the Turkish Empire, prepared by W. W. Macpherson.

The title-page seems to give at once some idea of the comprehensive nature of the work and of the author's qualifications for undertaking it. "A Residence of Fifteen Years in Constantinople and the Turkish Provinces," it must be granted, is no bad preliminary to writing such a book; and persual of his work leaves the reader with the impression that "Thomas Thornton, Esq.," was a man of sound judgment and sincerity of purpose, painstaking in research, and gifted with no mean literary ability. He took himself very seriously indeed; but that is a fault we can readily pardon him. In fact, if certain other writers on Turkey had only the same degree of conscientiousness it is very probable that English people to-day might be better instructed with regard to the Turk and his country than is actually the case. That he himself was acutely conscious of the harm that may be wrought by inaccurate statements, hasty generalisation, and the passing-on of mere heresay, is clearly indicated on the first page of his preface, where, referring to the "great number of books which have already been written on the Government and institutions of the Turkish Empire," he writes:—

> The accounts of different authors are, however, so various and discordant, that it appears no less difficult to reconcile, than impossible to credit, their relations. . . . Some travellers have avowedly neglected any research into the peculiar customs, manners, and opinions of the Turks, while others, less ingenuous, having observed them superficially and even falsely, have guessed at what they have not understood, and have described rather what they have imagined than what they have beheld.

It is to be feared that travellers of this class are by no means extinct yet!

In the Ottoman character the author found occasion for considerable comment, and his impressions, based on the curious mixture of apparent contradictions which composes the homogeneous Turk, are summarised in a striking passage:—

> We find them brave and pusillanimous; gentle and ferocious; resolute and inconstant; active and indolent; passing from devotion to obscenity; from the rigor of morality to the grossness of sense; at once delicate and coarse; fastidiously abstemious and indiscriminately indulgent.

Some aspects of the Ottoman he criticised in no uncertain terms, pointing out that opium smoking was largely indulged in, while certain types of the Turks set the tenets of Mohammed with regard to wine openly at defiance:—

> The practice of drinking wine is generally reprobated; but as drinking a large quantity entails no greater curse than moderation, those who have once transgressed, proceed without further scruple to perfect ebriety. Busbequius saw an old man in Constantinople, who, when he took the glass in his hand, summoned his soul to take refuge in some corner of his body, or to quit it entirely, and thus avoid the participation or pollution of his crime. I have frequently observed an habitual drunkard carefully remove his moustaches from defilement, and, after a hearty draught, distort his face, as though he had been taking medicine.

The mystical side of the average Ottoman's life according to Mr. Thornton was freely blended with sorcery and superstition, which in fact pervaded every phase of Turkish life at that period. The doctrine of predestination in no way deterred the Ottoman from seeking supernatural guidance, and the Sultan himself had the assistance of the Chief of the Astrologers, whose advice was sought on all important occasions. "This phantom," says the author, "still influences the public councils and interrupts the private happiness of all classes in this nation." Apart from the adventitious aid of soothsayers, omens and dreams greatly affected the Ottoman mind. In the most trivial occurrences omens were sought for and found. The first words of a Sultan on ascending the throne were listened for with the utmost eagerness, since the belief prevailed that his earliest utterances would afford a clue to his reign. Murad III. filled his subjects with terror at his accession by remarking:—"I am hungry, let me have something to eat"; for they foresaw famine and desolation indicated. Even the medical profession was not free from the prevailing taint of superstition, and medical practitioners were expected to possess superhuman foresight. One physician gained a great reputation through ascertaining the nature of a patient's food by the beats of his pulse; and in general the profession had recourse to the weirdest remedies, sometimes with successful results. One of the author's stories of a cure is well worth reproducing:—

> A pasha had honoured a European merchant with his intimate friendship: the merchant had a fit of the gout; the pasha had studied a little physic, and desirous of curing his friend, directed two of his domestics to give him fifty blows on the soles of his feet . . . . it soon effected a perfect cure.

This we can readily believe; but the heroic cure is not one that the gouty patient of to-day is likely to adopt.

One final instance of the fatalistic tendency of the Ottoman is worthy of narration. The author's house had been burnt, and a Turk paying a visit of condolence, said:—"A misfortune was predestined to you. Thank God! It was directed against your head; but it has fallen only on your property."

Turning to literature, we find that Mr. Thornton's inferences coincide in the main with those of other well-informed authorities. The literature of the period apparently bore the deep impress of Persian culture, and poetry was immeasurably superior to prose. While extreme grace and workmanlike technique permeated the poems, ludicrous exaggeration and obvious artificiality detracted largely from their merit. Turkish prose somewhat resembled the English heroic play, being generally bombastic and overflowing with unnecessary quibbles. The well-grounded reasons actuating the author's stringent criticisms of Turkish literature can only be understood after a perusal of his remarks concerning the level of education in the Ottoman Empire:—

> If we call the Turks an illiterate people, it is not because learning is universally neglected by individuals, for, on the contrary, the *ulema*, or theological lawyers, undergo a long and laborious course of study; the Turkish gentlemen are all taught certain necessary, and even ornamental, parts of learning; and few children, at least in the capital, are left without some tincture

W. N. WILLIS'S GREAT BOOK.

ANTI-CHRIST IN EGYPT

It is a vehement appeal to Christian England to save the children of Egypt from the open vortex of degradation and shame permitted—indeed, encouraged—by the Capitulation Laws which govern that country.

The chapter descriptive of Lord Kitchener as a civil administrator will be a revelation to even the most enthusiastic of that great General's friends and admirers.

Every voice that denounces the rampant riot of vice in Egypt will assist LORD KITCHENER in his GREAT IMPERIAL EFFORTS.

The Book may be ordered of all Booksellers, or direct from the Publishers, 2/4 post free, any address in the world.

THE ANGLO-EASTERN PUBLISHING Co., 41-50, Waterloo Rd., London.

of education. It must be acknowledged, however, that the objects of Turkish study . . . . do in reality only remove men further from real knowledge. . . . The telescope, the microscope, the electrical machine, and other aids of science, are unknown as to their real uses.

No consideration of the state of the Ottoman Empire would be complete without some reference to the constitution and the provincial administration. With respect to the former it is sufficient to say that Mr. Thornton rightly regarded it as of a rigid type, and therefore analogous to the constitution of the United States. Every student of comparative politics is familiar with the disadvantages of a rigid constitution, and it is inadvisable therefore to labour the point. The author viewed the provincial administration as an odious mixture of maladministration and peculation. "Governments of every description are sold at the Porte; they are held for the term of one year only, and at the ensuing *bairam* the leases must be renewed or transferred to a less parsimonious competitor." In point of actual fact the condition of affairs was precisely similar to that which conduced to the discontent in the Roman Empire. It was, however, possible for the inhabitant of Rome's provinces to appeal against the too-obvious misgovernment of a pro-consul, while in Turkey such an appeal would have been out of the question. The annual market at the Porte, where constantly increasing prices were realised for popular administrations, led to an unparalleled state of oppression in the provinces.

TANGIER TO TEHERAN.

I have referred on previous occasions to the special needs of Serbia at this time. Her soldiers are nobly enduring the terrible hardships of modern warfare without the considerable alleviation which an adequate medical service provides. It is pitiful to think that life or limb are lost in so many cases simply because the Red Cross workers are so very few and their supplies of surgical necessaries and drugs so miserably inadequate. It is therefore satisfactory to learn that a Red Cross unit of some forty or fifty members has just been despatched from Southampton, together with the equipment of a hospital of 250 beds. This detachment has been organised by the Serbian Relief Fund, with the assistance of the Order of St. John of Jerusalem, and is under the superintendence of Lady Paget. The Admiralty have made arrangements for the transport of the detachment to Malta en route for Salonika and Nish. I wish its members a safe and speedy voyage, and I hope that means will be found to equip and send out additional units in the near future.

***

With reference to the army order issued by the Crown Prince of Bavaria urging his men to take reprisals upon the British "for the cunning of the enemy and for all our sacrifices," I remember that the young man in question is held by some romantically minded folk in this country and in Scotland to be the heir of "the Queen over the water," for they assert that the Queen of Bavaria, as heir-of-line to King Charles the Martyr, is entitled to the Thrones of the three kingdoms, and that her son is *de jure* Duke of Cornwall and Rothesay. It is indeed a tragic destiny which makes a Jacobite the supporter of "a wee, wee German lairdie." The Kaiser talked about "restoring" the Saxon dynasty in Poland, until the Russians gave him something else to think about. Is he now contemplating a restoration of the Stuarts in this country? Even Louis XIV. could not do that.

***

Talking of restorations, I hear that the ingenious gentlemen in Berlin who have been negotiating with Italy have offered, very kindly, to recognise the dynastic claims of the House of Savoy to the Lusignan Kingdom of Cyprus. That really would be a restoration, as the Lusignan Monarchy barely survived the close of the Middle Ages, coming to an end in 1489, when the last Queen surrendered her crown to the Republic of St. Mark.

***

"Is Bulgaria still on the face of the earth, or has the whole country been swallowed by an earthquake?" writes a cheery correspondent. The reason for his query is, of course, the non-arrival of his letters. But perhaps by the time these lines appear in print he will be happy; for on Monday I received a batch of letters and papers from Bulgaria, and some were dated as recently as July 28.

***

I like the announcement made in the *Jeune Turc* that the notorious Salar-ed-Dowleh, who *had been in Germany*, had arrived at Kasr-i-Shirin *provided with arms and funds*. The *Jeune Turc* adds artlessly:—

> Salar-Ud Dovleh n'a pas cette fois l'intention de faire du mal à la Perse. On assure qu'il veut soulever des difficultés contre les Russes qui l'ont trompé à mai ites reprises.

The "cette fois" is delightful. After all, the ex-Shah's brother is evidently a good patriot. Poor Persia!

***

The Great War has been responsible for a good many ridiculous rumours, but none more ridiculous than one which has reached me from Syria. Where it was hatched I cannot say, though its stupidity and lack of real imagination lead me to suspect the Kaiser's deckers-out of telegrams; but the correspondents who have informed me of it report that it is generally believed by the rabble. It is to the effect that the Turkish Government is well prepared to block the Suez Canal, and regards the task as a very easy one. And this is how it is to be performed: "About 37,000 camels loaded with sand-filled bags are to be kept without water for three days, then driven to the eastern side of the canal, when, drawn by the sight of the water, the thirsty ships of the desert may be easily hurled therein." How simple it all is, to be sure. The forethought displayed in providing the 37,000 camels with sand-filled bags so well in advance deserves especial praise. But may I suggest that while they are about it the useful beasts might be utilised for drinking the canal dry, and thus making it possible for the Sultan's troops to emulate the example of the children of Israel—only, of course, travelling in the other direction?

***

Portents and prophecies are now in fashion. In the materialistic West the writings of mystical monks, old gipsy wives' warnings, apocalyptic combinations of numbers are studied with a simple faith unknown in ante-war times. Even in the East, where signs and wonders have a perennial significance to the native mind, the crop of strange sayings and portents is abnormal. One curious example comes from Egypt. According to the *Ahram*, widespread consternation prevails in the Mellawie district, and the general impression is that the end of the world is at hand, owing to the fact that a mule has given birth to a quadruped half mule and half donkey. The alarm seems out of proportion to the cause; for though it is extremely rare that a mule should bring forth young, the case is not unique. Not long ago the Cyprus correspondent of THE NEAR EAST reported a case in that island.

***

"It is," as a profound philosopher observed, "an ill wind that blows nobody any good," and if only the Turks have sense enough to keep Enver on chain until the Big Trouble blows over they ought to do very well out of the business. So far they have received as reward for not joining in the chorus of reprobation of the Kaiser and German *Kultur*: One large armoured cruiser (damaged), one small protected cruiser (more damaged), some large guns and ammunition (which—this time—may be what it seems, as the Germans fondly hope that it will be used against the enemies of the *Vaterland*), and some nine tons of gold. And the fact that they have been clever enough to secure all these things while Germany was still in a position to supply them argues that they have not yet quite lost the skill in driving a bargain that has characterised their statesmen for so long. But even so, I much doubt whether the gains can compensate for the presence in Turkey of some 3,000 of those "square-headed, snub-nosed, sentimental, parade-ground-drilled Teutons," of whom Sir Mark Sykes writes in his "Dar-ul-Islam." And now that the ineffable Baron Kuhlmann has arrived in Constantinople, I should think all decent Turks must be eager to return the guns and boats and all the rest of the bribes.

***

For some inscrutable reason, the landlord, like the mother-in-law, is usually regarded by the public as a fit target for ridicule and abuse, but just now the Press in Egypt is busy patting him on the back. And he seems to deserve it. For I learn that in Alexandria several landlords have notified their tenants that during the war they may pay their rent when and as may be convenient to them; while one has actually announced that any of his tenants who are out of employment need not pay during the whole time the war lasts. Such public-spirited action merits the fullest recognition, and I am not surprised to learn that a delegation has waited on these gentlemen to express the admiration and thanks of the townspeople for their generosity.

CORSAIR.

The proprietors of *The Financial Times* have arranged for an original competition. Briefly, competitors are required to trace on a specially prepared outline map of Europe the lines of the frontiers of the European States as fixed at the conclusion of the war. The first prize is £25, and other prizes are also offered. After satisfaction of the prizes, the balance derived from the sale of the maps will be handed to the Prince of Wales's Fund. The competition will afford an interesting occupation for long winter evenings when nothing better can be done, and competitors will have the satisfaction of knowing that they are contributing to a patriotic object.

THE PRESS ON THE NEAR EAST.

Bulgaria and Italy.

The Special Correspondent of *The Morning Post* in a communication dated Milan, October 23, published in its issue of October 23, makes some severe comments on certain diplomatic manœuvring in the Balkans. He says:—

In the meantime, that the poison of Austro-German diplomatic methods, once instilled, is hard to eradicate is proved by the efforts of some circles in Bulgaria to involve Italy in the Balkan diplomatic game and to play her off against Serbia and Greece. What backing, if any, the newspaper talk of an Italo-Bulgarian entente has in representative quarters is not clear, but it is certain that there is some reluctance to cease hankering after Kavala and Monastir, and to be content with the prospects of the Dobrudja and of the Kotchana and the Ishtip districts of Macedonia. Austro-German diplomacy, despite the German Emperor's vaunted affection for Greece, has notoriously been trying to ensnare Bulgaria with the bait of Kavala, and it seems doubtful whether even now the lesson of the second Balkan war has been thoroughly taken to heart; in any case the Consulta does not require to be told by Bulgarian any more than by English newspapers what Italy's interests are, and it is probably mildly amused at the attempts to involve her in trouble with Greece in order to help Bulgaria to retrieve the results of her own past errors.

In *The Morning Post* of October 26, a long article from the same Correspondent, under date of Milan, October 16, provides a comprehensive survey of the whole of the Balkan field. The various influences and rivalries at work are clearly explained.

Montenegro at War.

The Special Correspondent of *The Standard*, in a communication dated Nish, October 16, published in its issue of October 26, gives some account of the work being done by Montenegro. We quote below:—

In order to be able to appreciate the extent of the strain which the present war is making upon the resources of Montenegro, it is sufficient to adduce some figures. The whole population of Montenegro, including the regions which have been reannexed to it, only numbers 430,000 souls—i.e., the number of inhabitants of a middle-sized city. The troops of this miniature nation have many and difficult tasks to perform during the present conflict. They have to fight on the Dalmatian sea coast, they have to defend their southern frontier against a possible attack by the Albanians, they have to lead important operations in Herzegovina, and, finally, in combination with the Serbians, they have to act in Bosnia. And everywhere the heroes of little Montenegro gain victories of no mean order.

The Battle of Lemnos.

Mr. James Elroy Flecker, whose sympathies are well known to most of our readers, contributes to *The New Statesman* of October 24 an amusing article entitled "Forgotten Warfare." He describes as a spectator on the fringe of hostilities in the Levant during recent years certain warlike episodes. Here, for example, is a reminiscence of the Battle of Lemnos—"the one great effort made by the Turks to secure the mastery of the Ægean":—

A pretty sight it had been that morning to pass the Turkish fleet, cleared for action and lined across the entrance of the Dardanelles, while a little destroyer spluttered up from the west to give them news of the foe. It was one of those indescribable winter days on the Ægean, with a hot sun and a piping breeze: the water was all laced blue and silver, and the windmills of Tenedos whirled fit to break. "Tenedos dives opum," quoted to me the new Armenian Governor of Lebanon, to my great pleasure; yet how can the place ever have been rich? I agreed it was strange—that little windy rock looks as if it had never produced anything more planturous than stonecrop since the Creation.

We were near Mytilene when we heard the guns. Thrilling enough it was to me—fired with the glory that *is* Greece—this fight against the Unspeakable for that Greek and Christian sea. Not so, however, to the trio of American ladies aboard—for all that they were on their devout way from Athens to Jerusalem. Impossible to make these pious folk understand that Greece and Christianity were no mere phantoms of the past, but were still alive and, with excellent guns, even kicking.

At last, in despair of awaking interest and hoping to horrify, I said to one of them: "But men are killing each other over there, you know."

She put up her eyeglass at me.

"*Nonsense!*" she said, and walked down to lunch.

The article concludes as follows by suddenly jerking the reader forward from the past to the present:—

To think that it was with cheerful anecdotes like these that I had hoped, a white-haired elder, to impress my grandchildren! Now there's not a peasant from Picardy to Tobolsk but will cap me with tales of real and frightful tragedy. What a race of deep-eyed and thoughtful men we shall have in Europe after the war—now that all those millions have been baptised with fire! But for my little memories I can keep at least this distinction—the unearthly beauty of the East. I mean the adjective. A man may find Naples or Palermo merely pretty; but the deeper violet, the splendour and desolation of the Levant waters is something that drives into the soul.

Turk and Persian.

The Orient of October 14 translates from the *Ikdam* some observations regarding Persia, which will doubtless be of considerable interest to our readers:—

The events taking place to-day in Persia show that the Persians are determined, cost what it may, to free themselves of Russian domination in their country. Henceforth the Persian Government will not allow them to set foot in Meshed, the most sacred place in Persia, nor to curtail the powers of the Government in the control of internal affairs. In fact, the note sent by the Persian Cabinet to the Russians is very clear on this point. The object of the Persians is to get the Russians out of Iran, leaving that country to its rightful owners. The presence of the Russians constitutes an obstacle to the progress of Persia. The population has had its religious and national feelings very much hurt by seeing foreigners interfering with the internal affairs of the nation. The Persians saw in such interference a menace to their independence, and nobody could doubt that the country would one day be partitioned. For this reason the true patriots have been awaiting a favourable opportunity to save their country.

Between the Ottoman Empire and Persia there is community of religion and of interests. No one can deny that a free and independent Persia, not under foreign influence, is in the interests of both countries. Foreign intervention in Persia constitutes a menace to the existence of Turkey. The Ottoman Empire and Persia must mutually defend one another for these religious and political reasons.

It is, perhaps, rather late in the day for Turkey to discover the "community of religion and of interests." Perhaps she did so prior to the late Balkan wars, when her troops were credibly reported to have penetrated far into Persian territory. Of course, we do not suggest that that fact constituted any menace to Persian independence. But neither would we suggest that the substitution of the Turk for the Russian would assist "the progress of Persia," regarding which the *Ikdam* is suddenly so solicitous. As THE NEAR EAST has frequently pointed out, of the value to Great Britain of a strong and independent Persia there can be no doubt. But the *Ikdam's* platitudes in some subtle way bring to mind thoughts of the immortal Pecksniff. Perhaps the Persians may consider that a free and independent Turkey "not under foreign influence" would be more to their interest than a Turkey so obviously under the thumb of the Teuton, and that respect for her frontier would be more to the point than some of the humorous remarks of the Constantinople journal.

Turkey's Misfortune.

Giving expression to his "Thoughts on the War" in *The Winning Post* of October 24, Mr. F. G. Aflalo provides an explanation of all Turkey's extraordinary doings of late—her "bogus neutrality, this so-called 'purchase' of runaway German battleships, this coming and going of German officers and troops, this departure of Admiral Limpus and his English colleagues, and this mounting of heavy German guns at the Dardanelles." Briefly, Mr. Aflalo considers that it lies in the "nobbling" of the Turkish Press by the Germans, the extraordinary "make-believe" character of the Government, and—Enver Pasha. Readers of THE NEAR EAST

Digitized by Google

will not be disposed to differ from him. As to the Government, he writes:—

This is by no means easy to explain to readers accustomed to one or other of two recognised forms, monarchy or republic. The difficulty lies in finding some word to describe a Government that is a blend of monarchy and republic, with the iron rule of a military dictatorship over all. For it is something of this sort that has conducted the affairs of Turkey ever since Abd-ul-Hamid was pulled off the throne of Osman and his mantle fell on the Committee of Union and Progress, with its strong leavening of political soldiers of the Enver type. For a time things went very well. The Constitution satisfied millions of Ottoman subjects who had not the vaguest notion what it meant. . . . In short, it satisfied everyone except the old Sultan himself and such of his German friends, including the Kaiser, who had everything to gain by the indefinite continuation of his tyranny.

So all went merrily. The new Government made wonderful promises which, though the impossibility of fulfilment was obvious at the time to impartial observers with some knowledge of Turkish politics, augured well at any rate for honesty of purpose. And all might have gone merrily, even now, but that the new Sultan, whom I last saw on the day of his investiture at the Eyub Mosque, soon became a mere cipher in the hands of a military camarilla. So long as this was presided over by the veteran Generalissimo, Mahmud Shevket, no great harm was done even by a form of government so undesirable for a free country. But Mahmud Shevket was assassinated. It is a way that straightforward statesmen have in that land. From that time on, the councils of Turkey have been poisoned by dreams of adventure which were sedulously fed by Germany through her military and other agents at Constantinople. The chief offender has been Enver Pasha, a man in no way remarkable, but destined by his youth and energy and predilection for everything German to overrule saner counsels and lead his country by the nose, as the Kaiser has led him ever since he served his time in a German regiment.

Movement of Troops in Palestine.

The Cairo Correspondent of *The Railway Gazette*, writing on September 23, says:—

In a country very adjacent to Egypt also, the railways have been moving considerable bodies of troops—we refer to Syria and Palestine and the troops have been Turkish levies. From all accounts, however, there has been a distinctly comical side to this movement. Distracted between the German pressure being exercised at Constantinople, and the varying fortunes of the conflict in Europe, mostly favourable to the Allies, however, the Turk has changed his mind a dozen times. At one moment the troops were to invade Egypt, and they were all hurried down to Jaffa. Then they were intended to operate against Greece and were packed off from Jaffa. More recently we have heard that they have gone away north via Damascus. Railway transport was "paid" for by means of I.O.U.'s of highly problematical value, and, in this connection, the report just to hand that the Jaffa-Jerusalem Railway has stopped its services, owing to there being no locomotive coal, is amusing.

THE WAR.

PRESS AND PUBLIC OPINION.

Our Debt to Serbia.

In a leading article under the heading of "Help for the Serbians," *The Times* (October 24) urges the strong claims which the Serbians have upon us. Referring to their pressing need of medical supplies and assistance, the article continues:—

The Serbian peasants are a hardy race, and with proper medical treatment a high proportion of their wounded would make a good recovery. But the want even of the most elementary necessaries for such treatment is very great. Serbia at the best of times is poor. She is suffering now from the financial exhaustion caused by two successive wars. She cannot procure these necessaries herself. She wants blankets and sheets, hot-water bottles, flannel shirts, and slippers, to say nothing of bandages, lint, and other simple surgical appliances for such hospitals as she can improvise. She asks wealthy England to assist her in saving her soldiers from the avoidable pain they have now to undergo. On the ground of humanity alone she deserves a liberal response. But she is also entitled to our aid in virtue of her services in the field to the Allies. She has materially assisted them by the highly effective diversion she has made in their favour.

By sending gifts and subscriptions to the Serbian Relief Fund something can be done towards paying the debt.

The Slav's Fight for Freedom.

In an article entitled "What Russia Wants," contributed to *The Westminster Gazette* of October 20, Mr. Neville Forbes says:—

The war against Germany and Austria is thoroughly popular because the Russian people dislike and mistrust the Germans and the Austrians. Nobody likes being exploited, and Germany has always exploited Russia, politically and financially; the Russian people, even the peasants, know this, and resent it. Russia's fight in defence of Serbia is really the answer of the Slav to centuries of exploitation by the Teuton. Germany and Austria have always shut off Russia from free communication with the rest of Europe; it was in their interest to do so, and it was also in the interest of the ruling class in Russia to permit it, but the time has arrived when it is in the interest of the ruling class to let in the light.

Turkey and Islam.

An article under the heading of "L'Islam et la Triple-Entente," in the *Gazette de Lausanne* of October 16, aptly turns the tables on the *Hablul Matin*. After quoting from an article in that journal of an extremely pro-German character, in which is drawn "a sinister picture of French, English, and Russian oppression in Morocco and Algeria, in Egypt, in Persia, in Turkestan, in the Caucasus, and even in India," the writer says:—

La thèse du *Hablulmatin* paraît toutefois difficile à soutenir en ce qui concerne ce dernier pays. N'est-il pas absurde de parler du régime draconien imposé par le gouvernement britannique aux Indes alors qu'un article aussi violent que celui du *Hablulmatin* a pu librement paraître. Nos lointains confrères du *Hablulmatin* devraient venir exercer leur profession en Europe, dans les pays belligérants ou même dans les autres. Ils auraient affaire à un contrôle autrement rigoureux.

Further it is pointed out in a spirit of gentle banter:

L'*Hablul matin*, au surplus, n'est pas encore le khalifat. Jusqu'à présent la pression exercée par l'Allemagne sur Constantinople afin de décider les chefs spirituels de l'Islam à décréter la guerre sainte n'a pas abouti. L'entrée en campagne de la Turquie obtiendrait peut-être ce résultat. La Triple-Entente en serait certainement atteinte, sinon très sensiblement empêchée. Mais encore une fois, les choses n'en sont pas là. Un soulèvement générale d'Islam n'est pas à craindre pour l'avenir immédiat. On est trop prudent à Constantinople pour risquer une si grosse partie avant d'avoir des chances sérieuses de la gagner. Et les opérations guerrières n'ont pas donné jusqu'à présent des indications assez précises ni dans un sens ni dans l'autre pour que les grands manitous de l'Islam se décident à brûler leurs vaisseaux.

A Guilty Conscience?

In the *Gazette de Lausanne* for October 16 the state of mind of the German public is commented on as follows:—

Il est difficile pour des neutres, restés de sang-froid, de comprendre l'état d'esprit qui règne actuellement en Allemagne. On constate une nervosité, une susceptibilité, un hérissement qui présentent plusieurs caractères de la suggestion collective, de l'hallucination, pour ne pas dire plus. Toute parole d'improbation, toute critique si légère, si modérée soit-elle, sont ressenties outre-Rhin comme un outrage ou un acte d'hostilité et y provoquent instantanément l'injure et la menace.

The Victim.

The Outlook for October 24 has a leading article, under the heading of "The Humbling of Austria," which is well worth reading. The article shows how the Dual Monarchy has been sacrificed by the Wilhelmstrasse throughout. The following is an extract:—

The wooing of Turkey, the Bagdad railway, were all part of the grandiose scheme of Teutonising the Near East and reviving the fertility of the Euphrates valley for the greater glory of Prussia. The Austrians might share in the fleshpots no doubt, but it would be at the pleasure of their masters, and as part of the Germanic Confederation. This, we hold, is the best that Austria-Hungary could anticipate—loss of independence in exchange for freedom from responsibility and from economic embarrassment. Final defeat means the same thing without the advantages. Beggared in power and purse, shorn of all her non-German elements, Austria from very impotence must enter any regrouping of the German States upon which the conquering Powers may agree. That is the logical conclusion if the war is fought to the bitter end. Austria as an empire will have ceased to exist. Her land forces will have become indistinguishable from the Kaiser's. There will be no discrimination in apportioning the blame, the penalties, and the indemnities. But should the dupe suffer in the same degree as the instigator? Is this supreme and useless sacrifice necessary on the part of an historic Power which has never shared in the blind hostility of Prussia towards us, and certainly never sought to quarrel with us?

LONDON SCHOOL OF ORIENTAL STUDIES.

The reconstruction of the London Institution and the erection of a new block (opening into Eldon Street) for the London School of Oriental Studies will, we are informed, shortly be commenced. That this work should be proceeded with now, in spite of the war, is highly satisfactory, and all concerned are to be congratulated. The appeal for an endowment fund has been somewhat overshadowed by the war. Substantial support has been given and promised both to this fund (£100,000), and to the £14,000 a year required for the school's upkeep. The Government has promised £4,000 and the Indian Government £1,250 a year respectively. The London County Council Educational Committee recommend an annual contribution of £2,000, while the City Corporation has promised £1,250 and the Mercers' Company £1,000, payable respectively in sums of £250 and £200 a year; and smaller sums have been promised by Sir Montague Turner (chairman of the Mercantile Bank of India) and others.

PERSONAL & SOCIAL

CALENDAR OF THE WEEK.

Showing Concordance of the Gregorian, Julian, Moslem, and Jewish dates.

Gregorian. New style.	Julian. Old style.	—	Moslem.	Jewish.
1914. Oct.	1914. Oct.		1332 Julhijja	5675. Hesvan
30	17	Friday	10	10
31	18	Saturday.....	11	11
Nov.				
1	19	Sunday	12	12
2	20	Monday	13	13
3	21	Tuesday	14	14
4	22	Wednesday	15	15
5	23	Thursday	16	16

To-day is the birthday of H.I.R.H. the Archduchess Helena of Austria-Tuscany.

To-morrow is the birthday of her Majesty the Queen Dowager of Denmark, sister-in-law of her Majesty the Queen-Mother and of the late King of the Hellenes.

Monday is the birthday of the Lady-Abbess of the Convent of Martha and Mary in Russia, widow of the late Grand Duke Serge of Russia, and sister of her Imperial Majesty the Tsarina, of H.R.H. Princess Henry of Prussia, and of H.G.D.H. the Princess (Louis) of Battenburg.

Tuesday is the birthday of H.R.H. the Duke of Brabant, eldest son of his Majesty the King of the Belgians.

Thursday is the birthday of H.R.H. Princes John Constantinovitch of Russia, the recently widowed daughter of his Majesty the King of Serbia.

We deeply regret to record the death, from wounds received in action, of H.S.H. Prince Maurice of Battenburg, youngest son of H.R.H. Princess Henry of Battenburg, brother of her Catholic Majesty the Queen of Spain, and nephew alike of the First Sea Lord and of the late Prince of Bulgaria.

H.S.H. the Prince of Carolath-Beuthen, who is an officer in the 3rd Uhlans, is reported to be wounded.

A telegram from Teheran says that the Shah, accompanied by the Vali Ahd and the Russian Minister, is now at the summer residence of the Russian Legation.

According to reports received from Salonika, the silver wedding of the King and Queen of Greece was celebrated with the utmost enthusiasm throughout Hellenic Macedonia.

Mass was celebrated in Berne on Saturday for the late King of Roumania, and was attended by the President and other members of the Swiss Government and by the Diplomatic Corps.

H.E. the Serbian Minister, who has lately been confined to his room through illness, was much better at the beginning of the week, and able to go out.

We regret to learn that Mr. Guerguieff, a Democratic deputy to the Sobranje, has been assassinated at Strumitza.

The Orient (October 14) reports:—
According to the *Tasfir-i-Efkiar*, the Khedive of Egypt will prolong his stay in Constantinople, and for this reason 150 cases of household effects from his palace in Cairo have been sent here under the direction of the commandant of the palace.

Lord Kitchener has telegraphed to Prince Mohamed Ali Pasha thanking him for the gift of £E1,000 the Egyptian Red Crescent has made to the British Red Cross.

Sir Alexander Baird is still actively engaged in recruiting, and in addition to his various duties in London is spending much energy in and about his Scottish home, where he is raising men for the Naval Brigades. His daughter, Mrs. Clarke, who is a fully qualified hospital nurse, is in charge of No. 18, Cadogan Gardens, which has been lent by Lady Mount Stephen to the Government. Miss Nina Baird, Sir Alexander's only unmarried daughter, is devoting her time to organising and lecturing work.

A Red Cross medical and surgical unit, under the superintendence of Lady Paget, left Southampton yesterday by the steamer "Dongola" en route for Malta, whence it will proceed to Salonika and Nish. Professor Morrison, senior surgeon to the Queen's Hospital, Birmingham, is surgeon-in-chief of the expedition, which consists of some fifty members. The Serbian military authorities have assigned a hospital of 200 beds for the work of the unit. Lady Paget is accompanying the party.

Mr. Alexandre V. Georgevitch, Secretary of the Serbian Legation, London, who has been confined to his room by indisposition, is stated to be much better.

Judge Cator, of H.M. Supreme Consular Court for the Dominions of the Sublime Ottoman Porte, was expected to arrive in Egypt on the 19th inst. from Constantinople.

Mr. Hadjimischeff, the newly appointed Bulgarian Minister in London, is expected to arrive shortly in London.

Rear-Admiral the Hon. Horace L. A. Hood, C.B., M.V.O., D.S.O., who is in command of the naval forces operating on the Belgian and French coasts in support of the Belgian and Allied Forces on land, served with distinction on the Nile during the operations in the Sudan, 1898.

The ceremony of consecrating the Rev. Rennie MacInnes as Bishop in Jerusalem was performed on Wednesday in Westminster Abbey. There was a large congregation. Among those taking part in the service were the Bishop of London, the Bishop of Chichester, the Bishop of St. Albans, the Bishop of Chelmsford, the Bishop of Barking, Bishop Taylor-Smith (Chaplain-General to the Forces), Bishop Montgomery, Bishop Welldon, and Bishop Ryle (Dean of Westminster). The Bishop of London, in an address, paid a tribute to Bishop Blyth, and said that they believed the new Bishop to be singularly fitted to carry on the work.

Professor and Mrs. Panaretoff paid a short visit to Sofia at the end of last month, where they received an ovation from former members of Robert College. They returned to Constantinople on October 11.

Prior to his departure from Khartoum for the front, Miralai Grant Bey was entertained by the officers and employees of the Military Works Department at a tea party held at the Egyptian Officers' Club.

Mr. and Mrs. L. Rickards, whose marriage was celebrated in London on the 6th inst., have arrived in Alexandria this week.

The Imperial Ottoman Bank continues to add to its Roll of Honour.
Colonel the Hon. H. A. Lawrence and Major Viscount Goschen, both now on active service, are directors of the bank.
During the week Mr. James Proctor, manager of the bank's Manchester office, and Mr. Frank Fisher, of the London office, have been approved for commissions in the King's Royal Rifles. Mr. H. D. Murrane, of the 6th Battalion Royal Lancashire Regiment, was recently gazetted Second Lieutenant. One member of the Egyptian staff has already joined here for service abroad, and two others are on their way home from Egypt for the same purpose. In addition, seventeen men of the London office have joined the Colours, and another member of the London office, Mr. Armand Garreau (erstwhile Captain of the London-French Rugby Football Club) reports himself as "well, but tired," in the trenches in France. This is quite a creditable Roll of Honour.

Mr. F. S. Smith, chief cashier, and Mr. J. B. Kiddell, chief stock accountant, of the Anglo-Egyptian Bank, Cairo, are amongst the volunteers who have answered to Lord Kitchener's call.

Among other Egyptian Government servants who have been seen lately in khaki and in England awaiting their summons to the front have been Colonel Garner, of the P.W.D., who is anxious to rejoin his old friend, Colonel Sloggett, in Paris, and Mr. F. Newhouse, of the Irrigation Service, who has joined the Intelligence Department of the Expeditionary Force.

APPEAL FOR THE WOUNDED.

We have received from Nurse Wheatley, formerly in charge of the Turkish Nurses' organisation, and at present at the front with our Expeditionary Force, an appeal for newspapers, cigarettes, and matches for British wounded. Readers of "The Near East" can either send contributions to the Editor, "The Near East," Devonshire Square, E.C., or to Nurse Wheatley, No. 5, General Hospital, Overseas Expeditionary Force, Army Post Office, G.P.O., London, E.C.

WHERE TO STAY.

LAUSANNE-OUCHY (Switzerland).

SAVOY HOTEL.
Near the lake, with splendid park.

CECIL HOTEL.
In the town and 5 minutes from the station.

Two First-class Family Hotels. High-class Cuisine. French Chef.
J. SUMSER, Manager-Proprietor.

Sofia (Bulgaria).

GRAND HOTEL BULGARIE
(opposite the Royal Palace).
First-class Hotel. Entirely renovated and beautifully situated in the centre of the city, near Post Office, Theatre, Museums, Banks, etc. Electric Light. Central heating. Baths. Garage. Telephone. Garden. French Restaurant. Good wines. Café. Foreign newspapers. Most frequented by English and American Visitors. Interpreter meets all trains. Rooms from 4 frs.

Cyprus.

THE CYPRUS HOTEL CO.
Open all the Year round—
LIMASSOL (Olympus Hotel).
FAMAGUSTA (Savoy Hotel).
For Summer Seasons—
PLATRES (Platres Hotel). 4,000 ft. from the sea level. Opens from May till Oct.
TROODOS (Olympus Hotel). 6,000 ft. from the level of the sea. Opens from May till Oct.
Perfect Situation. French and English Cuisine. Moderate Terms. Also Excursion to Mount Troodos.
For Tickets and further particulars apply to—
NAJEM HOURY, Limassol, Cyprus
(Proprietor of the Army and Navy Stores).
Head Office: Najem Houry Stores, Limassol, Cyprus.
Branches: Polymedia, Troodos, Nicosia, Famagusta, Larnaca, and Platres.
All arrangements for Transport by Carriages, etc. are made by the above Firm.

Bucharest, Roumania.

GRAND HOTEL DU BOULEVARD.
The Rendezvous Hotel of the Diplomatic World and Distinguished Visitors to Roumania.
Entirely renovated, with all Modern Comfort. Unrivalled Cuisine.
FAMOUS ROUMANIAN BAND.
Admirably situated in the very centre of the Town.
LUCIAN BERTOLA, Proprietor.

MASPERO FRÈRES LTD
CAIRE EGYPTE
CIGARETTES EGYPTIENNES

Digitized by Google

Mr. Hill, Chief Inspector of the Egyptian Ministry of Justice, is mentioned as a likely successor to the late Judge Wakeman Long as Judge of the Native Court of Appeal.

The Rev. Thomas Edward Wilkinson, formerly Bishop of Zululand, and for twenty-five years Bishop-Coadjutor of London for Northern and Central Europe, died last Friday at Khartoum, Sudan, where he was attacked with dysentery. Bishop Wilkinson was making a journey from Cape Town to Cairo. He was aged seventy-six.

General Sir Charles Douglas, G.C.B., Chief of the Imperial General Staff, who died last Sunday, served in the Sudan campaign of 1884-85.

Major Peter Martin Connellan, who has been killed in action, served with the Delimitation Boundary Commission in the Aden hinterland.

Major Ronald Anthony Markham, who died in hospital at Boulogne on October 25, served with the Nile Expedition in 1899, and took part in the first advance against the Khalifa, receiving the Egyptian medal with clasp.

Major Paul Alfred Charrier, who has been killed in action, was present during the operations in Somaliland as special service officer on the staff, 1903-4, and received the medal with clasp.

Captain Norman Jerome Beauchamp Leslie, Rifle Brigade, who has been killed while serving with the British Expeditionary Force, was A.D.C. to the General Officer Commanding in Egypt from 1908 to 1910.

Among the wounded in the casualty lists of October 1 is Captain P. A. Kennedy, of the Rifle Brigade, who will be well remembered in Egypt.

Captain Harry Holdsworth Kelly, Royal Engineers, whose death in action is announced, was employed with the Egyptian Army from November, 1903, to November, 1913. In 1910 he was present at operations in the Atwot region and had the Sudan medal.

Mr. R. W. E. Hampe Vincent has died in Switzerland at the age of seventy-four. In 1883 Mr. Vincent was Deputy Inspector-General of Police in Egypt. From 1893 to 1899 he was Commissioner of Bombay Police.

Our Cairo Correspondent, writing under date of October 10, pays the following tribute to the late Judge Wakeman Long, whose death we announced last week:—

"Universal regret was expressed at the sudden death this week of Mr. R. J. Wakeman Long, Councillor of the Native Court of Appeal. Judge Long had been ailing for some time, and his demise was not altogether unexpected. He was one of the best-known and most popular residents, and before being raised to the bench he had been for some time in practice as a solicitor in Alexandria. Judge Long was one of those men whose personality and sound judgment are an invaluable asset to whatever service they may belong and in whatever sphere they may move. The few years he spent in Tanta, before coming to the Cairo Court of Appeal, proved his worth and showed what influence for good such a man can have over his native fellow-residents.

Another correspondent writes:—By the death of Judge Wakeman Long the Government Service of Egypt loses a very able administrator of its legal code, while the British community of the country mourns the loss of one of its most kindly and popular members. . . . Unfortunately for many years past his strength had been sapped by constitutional delicacy, which neither his early life in Deal, nor subsequent sojourns in Switzerland, nor his later years in the climate of Egypt have been able to arrest, though few of his official associates realised under what tremendous disadvantages his professional duties were performed, or the difficulties under which he laboured at his post.

APPOINTMENTS, PROMOTIONS, ETC.

Mr. Thrasybulos Anghelopoulos has been appointed Prefect of Janina. Mr. Anghelopoulos will act provisionally as Governor-General of Epirus.

Colonel Bojovitch has been appointed Military Attaché to the Servian Legation in London.

The *Jeune Turc* announces a number of Ottoman consular appointments:—

Rifaat Bey to be Consul at Resht in Persia.

Ali Kemal Bey to be Consul at Bushire, in Persia.

Ferid Halid Bey to be Vice-Consul at Rustchuk, in Bulgaria.

Munif Bey to be Vice-Consul in Belgrade. He will probably carry out his duties at Nish.

Nasr-Ullah Bey to be Chancellor of the Consulate at the Piræus.

Nurulak Bey to be Chancellor of the Consulate at Monastir, in Serbia.

Suleiman Server Bey to be Chancellor of the Consulate at Geneva.

Ahmed Muhi-ud-Din Effendi, Cadi of Nicosia-Kyrenia, has been appointed to act as Ordinary Judge of the District Court, Nicosia, during the absence of M. Sami Effendi, or until further orders.

Our Sofia correspondent, writing under date of September 21, says with reference to the resignation of Major-General Clement Boyadjieff, hitherto Bulgarian Minister of War, and the appointment of Lieutenant-General Fitcheff as successor, General Boyadjieff himself expressed the wish to take up active military duties with the Army, where he felt he would be more useful. The new War Minister, who was Chief of the Staff during the two Balkan Wars, is one of the ablest Bulgarian Generals and a pupil of General Savoff.

Mr. Robert Greg, of the British Agency, Cairo, has been temporarily acting for Mr. Milne Cheetham during the latter's indisposition.

Bimbashi the Hon. J. N. Bigge, aide-de-camp to the Sirdar, is struck off the strength of the Egyptian Army with effect from October 1, 1914.

Mr. W. B. Heard has been appointed to act temporarily as Consul at Port Said, where Mrs. Heard hopes shortly to join him.

Among the names of gentlemen announced in the *London Gazette* of October 23 as having been appointed temporary second lieutenants in his Majesty's Army we notice that of Mr. Evelyn Louis Blech. Mr. E. L. Blech is the eldest son of Mr. E. C. Blech, C.M.G., until lately his Majesty's Consul-General at Port Said, and now Librarian and Keeper of the Papers at the Foreign Office. After being five years at Marlborough, where he passed through the O.T.C., Mr. E. L. Blech was about to take up residence at King's College, Cambridge, when the outbreak of the war induced him to apply for a commission.

It is stated that an Imperial Iradeh has been issued appointing the German Admiral Suhon to the command of the Turkish Fleet and thirty German Commanders to the command of Turkish warships.

DOMESTIC ANNOUNCEMENTS

BIRTHS.

VON DUMREICHER.—On October 21, at Dipperhall Grange, Farnham, Surrey, the wife of André von Dumreicher, Ain el Shams, Egypt, a son.

HIBBERT.—On October 24, at Bedford, the wife of Sidney Hibbert, Egyptian State Railways, of a son (stillborn).

MARRIAGE.

PLUNKETT—MARTIN.—On October 26, at St. Paul's, Knightsbridge, Lieutenant-Colonel E. A. Plunkett, Military Attaché at Sofia, Athens, etc., son of Lieutenant-Colonel G. T. Plunkett, C.B., of Belvedere Lodge, Wimbledon, to Grace Mary, eldest daughter of T. Morgan Martin, M.B., of Sydney, New South Wales.

WHERE TO STAY.

Cairo's Hotels de Luxe.

SHEPHEARD'S HOTEL.
Open all the year round.

SEMIRAMIS HOTEL.
Splendid position on the East Bank of the Nile.

GHEZIREH PALACE.
Formerly the Palace of the late Khedive Ismail.

GHEZIREH CASINO.
In pure Moorish style, with a permanent Restaurant Francaise, is situated in the immediate neighbourhood of Ghezireh Palace.

UPPER EGYPT.

Luxor.
The Winter Palace. The Luxor Hotel.
The Karnak Hotel.

Assouan.
The Cataract Hotel. The Savoy Hotel.
The Grand Hotel.
Are the Finest on the Nile.

Cairo.

HOTEL D'ANGLETERRE.
Comfortable and Quiet. Near Opera Square.

GRAND CONTINENTAL.
Central Situation. Opp. Esbekieh Gardens.

SAVOY HOTEL.
Most Fashionable Hotel in Egypt.

MENA HOUSE HOTEL.
At foot of the Great Pyramids.

GRAND HOTEL, HELOUAN.
Excellent Family Hotel, adjoining Golf Links.

HOTEL DES BAINS, HELOUAN.
Opposite Sulphur Baths Establishment.

HOTEL CASINO, SAN STEFANO.
Near Alexandria. Favourite Bathing Resort.

CAIRO.

HELIOPOLIS PALACE HOTEL.
The most luxurious and comfortable Hotel in the world.
Connected with the centre of Cairo by the Electric Metropolitan (10 minutes' journey).
Altitude, 40 metres above the Nile valley.
Splendid view over Cairo.
GOLF, POLO, CRICKET. HIPPODROME in vicinity of Hotel.
Under the same management—
HELIOPOLIS HOUSE,
A first-class Family Hotel, with moderate terms.

Alexandria.

MAJESTIC HOTEL.
Every modern comfort and luxury. Private apartments with bath-rooms attached & combined suites.
150 ROOMS AND SALOONS.
Hot and cold water in each bedroom. Large and luxurious dining rooms. American bar and restaurant stocked with best wines and liquors. Garden terrace. Verandah. Lift. Motor Car, Guides and Interpreters meet all trains and ships on arrival.
Moderate and Inclusive Terms

Alexandria.

CARLTON HOTEL, Bulkeley.
Just outside Alexandria. Half-way to San Stefano.
Ramleh's Fashionable Hotel.
Patronised by the Elite.
Open all the year round. Visitors from Cairo alight at Sidi Gaber Station and thence drive to Bulkeley in five minutes. Full Pension P.T. 50 per day.
C. AQUILINA, *Proprietor.*
(Late of Messrs. Thos. Cook & Son.)

Alexandria.

WINDSOR HOTEL (*Facing the Sea on the New Quay*).
Most delightful and healthy situation of any Hotel in Alexandria. Electric Light throughout. Daily Concerts on Verandah. Meals served *al fresco*. French Cuisine and English Management.

SERBIA'S SUCCESS AND DANGER.

By no means the least gratifying feature in the thwarting of the ambitious plans of Germany and Austria-Hungary has been the signal success that has attended the operations of the Serbians and Montenegrins against the troops of the Dual Monarchy. Their achievements are the more significant in view of the very scanty attention which the German and Austrian general staffs must have thought it necessary to give to the campaign on their southern frontier when they made their elaborate preparations for this war. A rapid advance on Belgrade, the capture of the capital and a substantial defeat of the Serbian Army would seem to have been all that the military authorities of Austria-Hungary imagined would be required to reduce Serbia to submission. It was only one, and not the least, of the miscalculations which led the two central States lightly to provoke a European conflagration. The rapid advance took place, but it was not quite rapid enough to forestall the Serbians. Belgrade was bombarded, but not taken, and the Serbian Army showed itself quite capable not only of checking the invasion of the Austro-Hungarian troops, but also of inflicting upon them substantial defeats. All too soon for the Dual Monarchy came the appreciation of the menace on its eastern frontier. The forces operating against Serbia had to be weakened in order to strengthen the army opposing the Russians, and the Austrian Government sought to hide its discomfiture by the foolish bravado of an announcement that a punitive expedition would suffice for the future to deal with the Serbians. To this challenge an effective reply was soon forthcoming. Serbian armies crossed the Save and Drina. Despite temporary checks, Serbians and Montenegrins have advanced into Bosnia and Herzegovina, and the danger threatening Serajevo has been grave enough to compel the Austrians to reinforce their troops in this quarter. The punishment inflicted upon the Austrian forces has been severe, but the Serbians have not gained their victories without suffering heavy losses themselves. They are fighting an enemy who, in spite of being hard-pressed elsewhere, commands resources in men and material out of all proportion to those which Serbia can put into the field. The longer, therefore, the war continues and the further Serbian armies are called upon to advance into Austrian territory, following up their successes, the more serious the strain imposed upon the small State. The good work that Serbia is doing has a useful bearing on the course of the great war, but it is not in itself a determining factor.

This anomalous character of the Serbian campaign requires to be taken very seriously into consideration at this stage of the world-struggle. The defeat of Germany and Austria-Hungary can only be brought about by the Powers of the Triple Entente. Individually and collectively they are prepared to carry on the war for an indefinite period, until such time as their enemies acknowledge themselves beaten. Whether Serbia can view with the same equanimity an indefinite prolongation of the war is an open question. Even if she can, the nature of her operations will cause her to carry on the conflict at an increasing disadvantage, while her allies count on finding themselves, as the war goes on, in a more and more favourable position compared with the Central Powers. At any moment Austria-Hungary might decide that it was in her interest to run the risk of uncovering her eastern side in order to deal the Serbians an overwhelming blow. When we recall the empty triumphs won by Germany at Brussels and Antwerp, such a possibility cannot be altogether disregarded. There are two ways in which Serbia can guard against this very real danger. She can restrict her operations in such a way as not to impose too great a strain on her resources. By so doing she surrenders the advantage of the offensive and stultifies her whole campaign. The alternative is to make it practically impossible that Austria-Hungary should at any time be able to spare any considerable reinforcements for her southern troops, by keeping all her available forces more and more occupied elsewhere. It becomes necessary, therefore, that Serbia should cease to regard her operations as an isolated campaign, in which she profits by Austrian preoccupations in other directions, but is not required to bring either her strategy or her general policy into line with the requirements of her allies. If the armies of the Triple Entente should be defeated at the hands of Germany and Austria-Hungary, Serbia will lose her independence. She has good reason, therefore, to realise that her future is entirely bound up with the cause of her allies, and she ought to be ready to make sacrifices for the success of that cause. If it is not enough, as we have seen, even for her own safety to keep a few Austrian army corps occupied near Serajevo, this work can hardly be an adequate contribution to a cause on the success of which her very existence as a State depends. Something else still remains for Serbia to do, and although it is a small thing, it can exercise a very potent influence on her own destiny and help the cause of the Allies.

The last chance that Austria-Hungary has of increasing the pressure she can bring to bear upon the Serbian Army would disappear if Roumania were to take the field against her. One of the chief causes—if not the only one—that holds Roumania back is the unsatisfactory situation in the Balkans. There can be no certainty, in the event of an indefinite prolongation of the war, that Bulgaria will continue to adhere to her self-denying ordinance and refrain from striking a blow on behalf of her legitimate aspirations. She might entertain no animosity against Roumania, and her concern might be entirely in the west and south; but Roumania would be expected to come to Serbia's assistance, and so would have a war on two fronts, even if she were not herself menaced by Turkey as a result of Bulgaria's action. So long, therefore, as the position in the Balkans is indeterminate Roumania is delayed in taking action against Austria-Hungary, and Serbia remains exposed to the menace of a sudden accession of strength to the Austro-Hungarian forces opposing her. This Balkan difficulty can be disposed of in a very short time if Serbia will take a statesmanlike view of the situation. She is the main obstacle to the realisation of Bulgaria's aspirations. The errors of Bulgarian diplomacy and the fortunes of a war in which the Bulgarians were hopelessly outnumbered enabled Serbia to take certain territory which she had previously recognised as Bulgarian. She defended her claim on the ground that she had herself been robbed of territory in another direction. The Serbians now stand to gain more territory than they could ever have anticipated outside their dreams. Compared with it the amount that they would have to surrender in order to satisfy Bulgaria is altogether insignificant. By making the offer spontaneously they will do nearly all that is required to regulate the situation in the Balkans and to enable just that additional pressure to be applied to Austria-Hungary which will prevent her from increasing the force now operating against the Serbians in Bosnia. It is possible that Bulgaria might still hold out for the surrender of some territory by Greece. She may not obtain all she aspires to in this direction, but it is possible that Greece in turn would be willing, for the sake of settling the Balkan question, to make concessions in the north in return for an extension of territory in Albania. The first step, however, must come from Serbia, for her position, in spite of her successes, is one of danger, and she owes it to the Allies who are fighting for her cause no less than for their own, to make the small sacrifice entailed for the speedier success of the Allied Armies.

THE PENSION SCARE.

By NIKATS OF ROVINO.

(Translated from the Serbian by Elizabeth Christitch.)

Few of us in this world but have some secret dread. It may be lightning, storm, fire, snakes, sorcery, cholera, accidents, poverty, or vampires. Jovan Kuyungitch, Montenegrin brigadier, famous remover of Turks' heads, was indifferent to all the above; but he feared something else. He lived in dread of being pensioned. He is now ninety-three, one of the last of the Serbian Pleiades who considered the gun and the gousla (one-stringed guitar) the noblest calling of mortals. Jovan participated in sixteen Turco-Serbian wars, from 1848 to 1913, and was wounded seven times. He is still hale, scarred, rugged, and stubborn. In 1905, when King Nikola granted a constitution, he was much perplexed as to what it might mean. He worried over the new laws that interfered with everything. There were rules for the hunt, for fishing, and what not; but when it came to putting men of worth and valour such as Commanders Simovitch and Kovatchevitch on the retired list he was very wroth.

"We will soon be handcuffed with sausages, I suppose," he grunted, "and forbidden to eat them."

At last the day came when his own name stood in the retired list of the official gazette, *Glas Tsrnagorska*.

"I, to be flung into the middle of a pension!" he said, bitterly. "At my age! After my services! Who foresaw this? Have I deserved it?"

He went home from the *mehana*, where the paper had been read to him, and called from afar to his sons:

"Arsenia, Nikola, saddle my horse!"

In a few minutes he was galloping on the road to Cettinje. After three days' journey he reined up outside the War Ministry. But here, too, were changes. He was asked his business and made to wait. The Minister came out to meet him, however, embraced him as a dear old comrade, and led him inside.

"Was it you that threw me into the pension?" asked Jovan.

"What? *You* in pension? Never!"

"It is printed black and white in the *Glas Tsrnagorska*."

"Nonsense! Let me see."

He took the paper from Jovan's hand and studied it carefully.

"Sure enough! The Finance Minister is responsible for this, or—it may be the Home Minister."

"And who are they, in God's name?"

"Why, Pera and Maxim, your old comrades. They are Ministers now. That's the Constitution, you know."

"Worse luck! Nothing but trouble has it brought us."

Jovan set out for the house of the Minister of Finances, who denied any knowledge of the pension catastrophe. He fared no better with the Home Minister. Each made the sign of the cross in astonishment at the news Jovan brought, and finally he decided to refer to the King himself.

"Welcome, welcome, my old wolf! All good be your portion," was the King's greeting.

"Nothing good brings me, Gospodar, but disgrace and sorrow."

"How so, my friend Jovan? Tell it all to me."

Jovan then set forth how after sixty years' war service and the goodly array of Turks' heads to his credit he was condemned to pension.

"It will never find me alive," he declared.

The King listened attentively, and then tried to soothe and explain.

"New times have arisen, my friend," he said, "and we must go with the times. We old men must give the young ones their chance You, Jovan, deserve a rest. You have served me well, and the whole country knows it and honours you. None other than your own sons will be allowed to fill your post. I promise it."

The brigadier listened patiently, and then looking the monarch straight in the face answered him:

"All that you say is true and right, but I want to know one thing: Are you, Sire, the ruler of Montenegro, or is it now Prince Danilo?"

King Nikola frowned and replied, sharply: "I am the King, of course."

"Thanks to God you are. And so am I brigadier. But when your son is king, I say, then let my Arsenia be brigadier."

King Nikola was silent for a while, and then said:

"Very well, Brigadier Jovan. You are a just man, and I'll see to it you never get a pension while I'm alive."

This was many years ago, and Jovan has never since known fear, not even when a bomb carried off his left hand at the siege of Scutari.

SERBIAN DETERMINATION.

H.E. the Serbian Minister has addressed to *The Times* a letter in which he expresses his deep gratitude, and that of the Serbian nation, for the sympathy and help shown to them by the Press and people of Great Britain. "Serbia," His Excellency goes on to say, "is in a way the Belgium of the Eastern theatre and was menaced with a like fate. Heartened by the powerful assistance of Russia, Great Britain, and France, with whom she is proud to be fighting side by side in a common and just cause, she has detained, beaten in several battles, and is keeping at bay superior Austrian forces, resolved to fight on to her last man.

"M. Pashitch, our Prime Minister, has already telegraphed the heartfelt thanks of the Serbian people to the Serbian Relief Committee, comprising such noble names as those of the Bishop of London, Cardinal Bourne, Lord Roberts, Earl Curzon, Mr. Lloyd George, and others, ladies and gentlemen, who have so unselfishly and so untiringly worked to help my country. Serbia will never forget the splendid generosity of the British people, especially at a moment when they have to meet such heavy demands for their own valiant Navy and Army, as also for the cruelly stricken Belgian people."

RED CROSS FOR SERBIA.

An appeal is issued by the Bishop of London, Cardinal Bourne, Field-Marshal Earl Roberts, Lord Curzon of Kedleston, the Bishop of Oxford, the Right Hon. D. Lloyd George, Dr. Campbell Morgan, and others as office-bearers of the Serbian Relief Fund, in the course of which they say:—The response to our initial appeal has been so encouraging as to justify the committee in immediately preparing an expedition for the Serbian front, and Lady Paget has placed the committee under a deep obligation by consenting to lead it. We hope, therefore, during the next week (in combination with the St. John Ambulance Association) to despatch to Serbia a first unit consisting of surgeons, nurses, wardmaids, dressers, and orderlies, with proper equipment and stores, and the Serbian Government has already gratefully accepted their services and placed a hospital at their disposal. It is hoped to follow this up with other units as fast as the funds can be collected. In view, however, of the heavy cost of maintenance (heavy despite the most rigid economy), the complete uncertainty as to the duration of the war, and the prospects of large overflow work in the event of prolonged hostilities, funds are most urgently needed. In the majority of cases the staff have generously offered their services for nothing, but owing to the distance and the abnormal state of Continental traffic, even the travelling expenses of each expedition amount to a heavy item. Any help, whether in money or in kind, will be most gratefully received and acknowledged. Cheques should be sent to Sir Edward Boyle, Bart., hon. treasurer, Serbian Relief Fund, 22, Berners Street, London, W., or to the account of the Serbian Relief Fund at the London County and Westminster Bank, Limited, 1, St. James's Square, S.W. Parcels of clothes, etc., should be addressed to Lady (Ralph) Paget, c.o. the Serbian Legation, 195, Queen's Gate, London, S.W.

GREAT BRITAIN AND GREECE.

We have received the following from an esteemed correspondent writing from Athens:—

I would wish to call the attention of British manufacturers and exporters, and also of the British Government, to the following important question.

With the outbreak of the European War it was generally believed by everybody in Greece that the whole of the trade which had hitherto been carried on with Germany would at once fall into British hands; and very likely you in Great Britain took this view. In Greece, where, I dare say, hardly anyone sincerely sympathises with Germany and her Ally, it was hoped, as sincerely as in Great Britain, that this expectation would be realised; but, unfortunately, in spite of these mutual desires, and although the ground was most suitable, the circumstances in all respects favourable, and only a slight effort was needed from your side, the British manufacturers and exporters have placed every difficulty in the way of accepting and executing orders from Greece. Some refuse business altogether, and others make business impossible by asking for payment with order, or against bill of lading with a bank in London. Such terms are not justified. They would perhaps be so if Greece was at war, but such terms were not asked during the Balkan war. British manufacturers and exporters would perhaps be justified in refusing credit under the circumstances, and in asking for cash against bill of lading on this side—but nothing further.

On the other hand, German manufacturers and exporters have so far done all in their power to forward all goods which had been ordered before the war, either per parcels post, when this was practicable, or else by steamer viâ Holland, or viâ Trieste or Venice, or even through Brindisi. Moreover, for such goods they did not ask cash payment, but allowed the same terms as before; at the same time they endeavour by all possible means to retain their customers ,and continue submitting quotations for prompt and later delivery; for delivery during the war, they promise to have the goods forwarded by parcels post if possible, or by steamer through Holland, Trieste, Venice, or Brindisi.

In more than one case, when the customer expressed his doubt of the possibility that such orders could be forwarded, the supplier did not hestitate to propose a penalty clause.

My candid opinion is that British manufacturers and exporters are mistaken if they think that their Continental competitors will lose the business without any attempt being made to deprive them of it. Unless British firms make up their minds to work hard, and on more reasonable terms, Greek buyers will be compelled not only to renew, but even to extend, their connections with the German firms. In short, it will be a pity if British firms let such an opportunity slip through their fingers for want of a little energy and common sense. There is still time to gain the market, but action must be taken at once, and with vigour. Greek merchants would consider themselves only too happy should they see the trade taken over by British firms.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The Egyptian crop and all pertaining thereto is still under discussion. Reports as to the size of the new crop, due in November, vary considerably. We have optimistic reports—and others, exactly as in previous years. The optimistic note has been in the ascendancy lately, but this week Messrs. Reinhart's report is far from cheerful, and as for *The Egyptian Gazette*, it published a scathing comment on the 17th reminding the Government of the campaign last year in favour of strict Governmental measures against the boliworm, which has been very active again this year, and which has "enormously simplified" the problem of the financing of the cotton crop. For "by the time the Ministry of Finance has elaborated the scheme for moving the crop, Egypt's production of cotton will perhaps be hardly more than sufficient for this year's very reduced requirements." We refer on our cotton page to these two articles, and to an interesting article published towards the latter part of the week by Professor Lawrence Balls in *The Manchester Guardian*.

***

Financial or, for that matter, commercial news from Turkey is scarce and not promising. We publish on another page the balance-sheet of the Public Debt Administration, showing gross receipts for February, 1913—February, 1914, to be £T5,442,694, as against £T4,553,863 for the corresponding period of the previous year, or an increase of £T888,831; the net sum available for distribution is £T4,385,914.16, as against £T3,743,334.39 for last year. Further comments concerning the administration of the Debt are out of time, pending the publication of Sir Adam Black's report, which, I believe, is shortly due. It says a lot for the elasticity of Ottoman economics, however, that in spite of years of war the returns, even if we include provisional surtaxes and the Tripolitan tribute, are favourable. The praise due to the administration of the Debt is in no way lessened by the above remark. I hope soon to have an opportunity to go more thoroughly into the figures as published.

***

Regarding the abolition of the Capitulations—that is to say, more particularly the imposition of a tax on foreigners and the increase of the import tariff, no definite information is available, but the prevailing opinion is that even if these financial measures have not been introduced (as is likely), they are bound to come sooner or later. I do not know whether sane foreign business men in Turkey are so averse to the introduction of these measures as is generally made out here. Similarly, the opinion is gaining ground that after all Turkey is not so eager to pay lip and arm service to Germany as some people would have us believe, and that the German position in Stamboul is as precarious as it is on the Yser. I should not be at all surprised to see Enver Pasha "downed" and the Entente Party come into power before very long. This would be decidedly to Turkey's advantage. But, leaving aside this purely political aspect, a question which occurs to me is: If the Customs dues are increased by 4 per cent., must not the increased returns be included in the Public Debt Administration's accounts (as happened recently when the dues were increased by 3 per cent.), as well as the increase arising from the proposed general application of the temettu? It is a question of some interest, which I hope to see defined shortly. It will not be amiss to hope that the Turkish Government will agree to some such procedure, for, when all is said and done, there is no better financial institution in the country, and none that has shown itself to be more friendly to Turkish interests, while at the same time safeguarding the interests of the Ottoman bondholders. I may mention that Djavid Bey estimates the increase in revenue from the imposition of the proposed 4 per cent. surcharge on the Customs dues at £T1,300,000 to £T1,500,000 per annum. No figures are available concerning the possible revenue for the proposed general application of the temettu.

***

If there is one poor country completely "off the map" at the present moment it is Bulgaria. To be in Sofia now is almost equivalent to being at the Antipodes, or farther away. I refer, of course, to the postal arrangements. I used regularly to receive the *Écho de Bulgarie*, but except for an occasional stray number no trace of that useful publication is now forthcoming. The treatment meted out to our correspondent in Sofia is not a whit better. We had not heard from him for months, and this week we received three letters, the most recent of which was dated September 19. He tells us that he has been writing regularly, so what has become of his other letters heaven alone knows. But better still is the fate of the Agence Télégraphique Bulgare. In normal times I received their news sheets twice or three times a week from Sofia, but now all that has changed, and yesterday morning I received an odd one, dated July 15!

***

This is unfortunate, and can do Bulgaria no good. Her friends, the Germans and Austrians, should bear this in mind. Some few weeks ago I pointed out that it would be greatly to Bulgaria's advantage to make herself independent of her neighbours (and of the Dardanelles) by linking up a port on the Ægean with Malta, for instance. From the foregoing it will be seen that some such arrangement becomes imperative. The difficulty is, I know, the lack of direct railway communication between Sofia and the southern coast, but this could be overcome by motor traction, and, pending the creation of Porto Lagos, Dedeagatch could be made use of. It is the only remedy to the actual situation that I can think of. The route via Nish-Salonika is by far too erratic to be useful, but in spite of this I see that it is generally made use of by Sofians. More practical than the latter, and pending the creation of a Dedeagatch service, would be to send letters, etc., either via Bucharest or Constantinople. We do get mails from these two capitals with more or less regularity; compared with the Sofia service they are not short of excellent. However, after all, is it not possible that it is the plan of the enemy to keep Bulgaria isolated for reasons best known to themselves? Such isolation could easily be worked at Constantinople—a circumstance to which I wish to call the attention of the Bulgarian Government.

***

Even if oil is an important factor in modern warfare, coal has not lost all its old significance. There is a considerable shortage in Vienna and Austria generally speaking, whereas our Constantinople correspondent's reference to coal for the "Goeben" and "Breslau" makes pleasant reading. If the speed of these two boats is considerably reduced, they will fall an easy prey to the Russian Fleet in the Black Sea or to the Anglo-French Fleet in the Ægean, and thus will end, "coal and steamless," the farcical episode of the "Goeben" and "Breslau." It would almost seem that, though Germany has a great supply of unasked-for commanding officers to be given away cheap to her one friend and her one ally, she can give them neither coal, oil, nor grain.

***

The news that Roumania has prohibited the exportation of oil has created a most favourable impression here, where it was generally recognised that Germany and Austria were drawing their supplies from the Roumanian oilfields. As a matter of fact, the current issue of the *Moniteur du Pétrole Roumain* emphasises the recent enormous exports of oil via Predeal as against the complete stoppage of sea transport owing to the insecurity of the Dardanelles. So heavy have the exports been that the line for a time being became congested, and all traffic was interrupted. Incidentally it may be mentioned that Bulgaria, who always has been a purchaser of Russian oil, has been acquiring large supplies of Roumanian oil. I hope that when the prohibition law has been repealed Bulgaria will continue to be one of Roumania's clients.

***

I referred in the preceding paragraph to the congestion of the line at Predeal. It is only right to add that heavy exports of grain to Germany and Austria helped to congest the traffic. From which it will be seen how valuable to Germany is Roumanian neutrality. However much we regret it, we cannot blame Roumania as a neutral from disposing of her products as seems best to her, but I should like to point out that, supposing Roumania is called on sooner or later to strike a blow for those of her blood who are slaves in Transylvania, she will regret having fed the enemy and helped him to move his howitzers against her sons. She is certain to realise this sooner or later, and it would, therefore, not come as a surprise to me to hear that grain will shortly be added to the list of Roumania's prohibited exports. It is to be regretted from the point of view of the country's export trade, but in these days of Prussian world-wide Imperial aggression on smaller States other considerations must be foremost.

War on German Trade.

SADDLERY AND HARNESS.

In continuation of our series of extracts from the bulletins issued by the Board of Trade, we give this week particulars from the same source of the openings for trade in saddlery, harness, and other leather wares (exclusive of boots, shoes, gloves, and machinery belting already analysed in these columns) which present themselves in the Near East:—

In 1912 Germany exported leather wares, exclusive of boots, shoes, gloves, and machinery belting to the value of £2,485,900, Austria to that of £161,650, and the United Kingdom to £1,128,300. The exports of saddlery and harness from the United Kingdom largely exceed (£445,500, as against £148,400) those from Germany and Austria-Hungary combined. On the other hand, the exports of other leathern wares from this country (£682,800), though larger than those from Austria-Hungary, are much smaller than those from Germany.

The following figures for 1912 show Germany's exports to various Near Eastern countries:—

Saddlers' goods, travelling bags and hand bags of leather: Roumania, £1,500; Bulgaria, £50; Turkey, £5,600; and Egypt, £650.

Trunk-makers' wares, purses, cigar, etc., cases, fitted cases for sewing and for travelling, chatelaine bags of real or imitation leather: Roumania, £16,000; Bulgaria, £650; Greece, £900; Serbia, £1,000; Turkey, £31,900; and Egypt, £4,100.

Tents, cleaning cloths, etc., of leather of all kinds, of raw hides, etc., of coarse spun materials, or of ropemakers' work, embroidery on leather, wall hangings of leather: Roumania, £9,800; Bulgaria, £5,300; Greece, £9,100; Serbia, £2,300; Turkey, £69,200; and Egypt, £2,500.

Leather goods of other sorts (not included in previous bulletins): Roumania, £1,000; Bulgaria, £150; Greece, £150; Serbia, £50; Turkey, £1,000; and Egypt, £550.

The total for Germany for the above-mentioned countries is £173,450, of which Turkey alone imported to the value of £107,700, followed by Roumania by close on to £20,000.

For all classes of these goods Austria's principal markets are the various countries of South-Eastern Europe and the Levant, but principally Roumania. The following are the figures for 1913:—

Saddlery and harness: Roumania, £13,600; Bulgaria, £3,500; Greece, £100; Serbia, £2,300; and Turkey, £400.

Trunk-makers' wares: Roumania, £5,700; Bulgaria, £1,350; Greece, £400; Serbia, £600; Turkey, £3,100; and Egypt, £700.

Leatherwares not specially mentioned: Roumania, £5,550; Bulgaria, £900; Greece, £250; Serbia, £650; Turkey, £600; and Egypt, £300.

Leather wares with mountings of gold and silver: Roumania, £750; Bulgaria, £300; Greece, £100; Servia, £100; and Turkey, £150.

Miscellaneous leather wares for technical purposes (including welting leather for boots and shoes, saddle leather cut out for bicycle saddles, blocked raw hides not further worked, travelling buckets, weavers' picker bends, cogged wheels, sockets, washers and rings for packing and the like): Roumania, £1,150; Bulgaria, £150; and Turkey, £150.

The total Austro-German trade can be estimated therefore at about £220,000, a certain proportion of which ought easily to fall to British manufacturing exporters.

The following table shows the imports of various Near Eastern countries from Germany, Austria, and the United Kingdom:—

SADDLERY.

	From Germany.	From Austria.	From U.K.
Roumania	£1,500	£13,600	£2,000
Bulgaria	50	3,500	—
Greece	—	100	100
Serbia	—	2,300	—
Turkey	5,600	400	2,900
Egypt	650	—	6,300

OTHER LEATHER WARES (EXCEPT BOOTS AND SHOES, ETC.).

	From Germany.	From Austria.	From U.K.
Roumania	£26,800	£13,150	£900
Bulgaria	6,100	2,700	100
Greece	10,150	750	2,900
Serbia	3,350	1,350	—
Turkey	102,100	3,900	6,400
Egypt	7,150	1,000	8,200

The following are particulars concerning certain Near Eastern markets:—

Egypt.

The following were the values of the imports of leather manufactures (excluding boots and shoes) into Egypt from the under-mentioned countries in 1913:—

—	U. K.	Germany.	Austria-Hungary.
	1913.	1913.	1913.
	£E.	£E.	£E.
Saddlery	5,599	79	225
Leather manufactures (*maroquinerie*)	4,393	3,218	8,455
Other leather goods	19,021	2,685	842

Serbia.

An Austrian Consular report for the year 1911 states that the bulk of saddlery of all kinds imported into Serbia comes from Austria-Hungary and more particularly France. This refers to better class goods, with metal finishings and accessories. Common harness is manufactured in the country. The importation of better class pocket articles of leather has increased greatly. Ladies' purses and handbags of the best quality come from France, but Austria-Hungary and Germany supply practically all the cheaper class of goods. Trunks are supplied principally by Germany.

Greece.

The Austrian Consul-General at Salonika reports that Austria-Hungary supplies the bulk of the imports in purses, ladies' handbags, travelling bags, tobacco pouches, etc.; all of medium grade and cheaper qualities.

Turkey.

The Austrian Consul-General at Constantinople calls attention to the growing trade in leather goods of the cheaper class from Austria-Hungary and Germany. Finer goods are not in great demand.

H.M. Vice-Consul at Smyrna, in a special memorandum on the leather trade of Smyrna, drawn up in 1913, states that all better class harness, saddlery, etc., is imported ready made from Europe, but that the consumption is insignificant. In the trade in leather trunks and bags, the United Kingdom stands first in the list of supplying countries, whilst in the import of purses, small handbags, etc., Germany and France lead the way. There is a considerable demand for German and Austrian fancy leather goods.

An Austrian Consular report from Beyrout states that in 1911 leather purses were imported from Germany; Austria-Hungary, and France, to the value of about £3,000. Ladies' belts come almost exclusively from Germany and Austria-Hungary, which countries also send a large proportion of the total importation of razor-strops.

Bulgaria.

A German Consular report states:—

"Imports of good quality fancy leather goods come from Germany and Austria; the commoner articles are made in the country, and the high tariff makes it impossible for the importer to trade in them."

WOOLLEN BELTS.

A well-known Bradford firm have a large quantity of long woollen belts, known in Turkey as "Kouchak," to dispose of. These would, in present circumstances, be acceptable to soldiers in the field, and would be suitable, for instance, for the Serbian Army. For further particulars apply to the offices of THE NEAR EAST, Devonshire Square, E.C.

MANCHESTER EXPORTS.

The Manchester Association of Importers and Exporters has just issued to its members a valuable booklet containing statistics showing the principal exports in 1911 of goods from Germany to the chief countries of the world in pounds sterling and in marks. The figures in reference to the countries of the Near East are given as under:—

Roumania	£4,550,000
Egypt	2,100,000
Bulgaria	1,150,000
Serbia	1,050,000
Greece	850,000

DECLARATIONS OF DESTINATION.

In accordance with a recent official notification, declarations of ultimate destination will be required until further notice in respect of all British exports (except for goods exported under *license*), without regard to value of consignments, to any foreign port in Europe or on the Mediterranean or Black Seas, with the exception of those of Russia, Belgium, France, Spain, and Portugal. Goods, wares, or merchandise sought to be exported will not be allowed to be shipped until the declarations in the form prescribed have been lodged with H.M. Customs.

Declarations may be made before the Secretary or Assistant Secretary of the London Chamber of Commerce (Inc.), 97, Cannon Street, London, E.C., from whom particulars are obtainable.

TRADE WITH MOROCCO.

"Within living memory" (says the Tangier correspondent of *The Morning Post*) "Anglo-Moorish commerce has never had a more hopeful outlook, thanks to the extinction of German competition, especially in such articles as green tea and trashy imitations of Birmingham wares. Without any breach of confidence, I may add that among the first indications of renewed enterprise are the negotiations now proceeding for the inauguration of a first-class British motor service, which promises to lack nothing that energy, money, and skill can furnish."

SILK KHAKI.

"There is a serious proposal," says *The Manchester Guardian*, "to clothe the army in silk. It is, indeed, something more than a proposal, for the matter has been discussed with the War Office, and an order has been given for cloth for a battalion of the Yorkshire Regiment. It is a homely looking material, made from tussah yarn, wool, and worsted. Its principal drawback is that it costs 1s. per yard, or 3s. 6d. per suit, more than ordinary khaki, but, on the other hand, it is said to have the great advantages of lightness and durability, the strain it will bear being nearly double that of the material now used. Its adoption would expedite the clothing of Kitchener's New Army, and, in the meantime would also give much-needed employment to a number of silk trade operatives, while relieving the pressure upon the woollen industry."

BRITISH TRADE IN TREBIZOND.

Mr. Consul Satow, at Trebizond, reports that, as compared with 1912, there is a decrease in the imports of £187,500, those from the United Kingdom being stated to have fallen off by about £20,000. The chief imports from the United Kingdom include copper, tin, bedsteads, safes, machinery, oils, and paints. The United Kingdom has also a share in the importation of canvas, galvanised iron pipes and sheets, iron, and enamelware. In 1913 almost all the copper imported came from the United Kingdom. Tin comes chiefly from the United Kingdom, iron from Belgium, and steel in bars from Austria-Hungary, vid Trieste, at prices ranging from £1 9s. 9d. to £1 14s. 9d. per 220 lbs., with 2½ per cent. discount against documents. Steel of a harder quality comes from France, c.i.f. Trebizond, at £3 4s. per 220 lbs. Edge tools and saws come chiefly from France, files from Germany, the United States, and France.

Barbed wire comes chiefly from Belgium and the United States at c.i.f. prices so low that British manufacturers apparently cannot compete. About 17,000 rolls are sold annually. Russian trade with the interior, vid the Caucasus, appears to be increasing, and petroleum, iron, agricultural machinery, and matches, which formerly passed through Trebizond, now take the direct route.

The Board of Trade desire to point out to British manufacturers and merchants who wish to obtain information in regard to trade matters in the colonies or foreign countries that it is desirable that applications should first be made to the Commercial Intelligence Branch, as above, before communications are addressed to the Board of Trade correspondents or to H.M. Consular officers abroad. By the adoption of this course much delay will be avoided by the inquirer in cases in which the Commercial Intelligence Branch is already in possession of the required information.

Egypt Cotton Problem.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, October 17.

The liquidation of outstanding cotton and cotton-seed contracts, which was especially excluded from the extension of the moratorium for commercial affairs, was on the same day fixed by Ministerial *arrêté* for the 21st inst., and the special Commission, appointed on September 17, will have power to act as and in the place of the ordinary Merchandise Commission, which was suspended, as was reported at the time. It is believed that the liquidation will not give rise to as much difficulty as was expected.

The Difficulty of Cotton Rents.

The limitation of the cotton area in 1915 to one million feddans, and to one-quarter, with some few exceptions, of any one holding, has given rise to an unforeseen difficulty, not as regards the limitation, but as regards the fellaheen tenants. The latter pay rent to their landlords on the basis of the area planted by them with cotton; the more the landlord allows to be planted and the more the tenant agrees to plant, the higher the rental, and consequently the greater the sale-value of the land becomes.

Many of the leases are made for a term of years, and now that the tenants are forbidden by law to plant more than one-quarter, which is invariably much less than that agreed upon between them and their landlords, they stand to lose on the deal. The landlords are averse to reducing the rents, since that would react on the sale-value of their estates. The question will require very careful consideration, but it is evident that something will have to be done by the Government, as it is quite unjust that the fellaheen tenants should be made to suffer by a measure that has been introduced for the benefit of the agricultural population as a whole.

GOVERNMENT'S DIFFICULT POSITION.

Writing in the *Manchester Guardian* on October 26, Professor Lawrence Balls stated that two significant points seem to have been missed in the controversy which the Egyptian Government has provoked by its decision to reduce the cotton area. One of these is that the Government "had no alternative; it could afford nothing else. In the Financial Advisers' Note it is stated that 'the preliminary proposals to purchase a portion of the crop were found impracticable and financially unsound,' and this is the kernel of the matter. The financing of the previous year had been a delicate task, and the effects of the outbreak of European war in 1914 may be deduced from the results within the Government service; that a Government should itself be obliged to increase unemployment under such circumstances in a rich country is almost without precedent."

It is clear that the "Egyptian Government has been obliged to economise most strictly. Presumably therefore it has no available credit with which to purchase the surplus crop, or to make advances on cotton in store, to the amount of about £10,000,000. The alternative was to let the price of cotton fall, which would have done much good in the long run, but in the meanwhile would have had serious disadvantages."

However, adds the author, the price will fall in any case. "The reduced Egyptian area does not mean that Egyptian prices will stay high of compulsion, for the reduction is insufficient to pull Egyptian out of step with the American crop, under the conditions of trade which will probably obtain." It is obvious therefore that "the Egyptian Government was between two stools, and could do nothing other than what it has done; its action is even altruistic, for it will, presumably, have to remit taxation on the prohibition areas, it will lose the export duty, and if no cereals are exported it will lose the duty on imports which the cotton pays for, the freightage of the cotton which the State railways would otherwise have carried will be lost, and it will have the trouble of administering the Decree, which is no light matter.

Admittedly, "the position would seem to be peculiar, and Sir Charles Macara's comments well merited. A better solution might have been found if the matter had been treated as a technical problem in the economics of the cotton trade, and not as a purely financial affair. It may seem strange that the delegates sent to Lancashire should not have included a grower and a merchant proper. Although the Egyptian Government had no alternative to its own action, one cannot but think that a more deliberate consideration might have brought external assistance, through Sir Charles Macara's project of establishing reserves."

Undue Haste.

This brings the author to the second point, "namely, the haste with which the decision in question was taken, so contrary to the usual bureaucratic procrastination. The first special meeting of the Commission with the Lancashire people was held on September 1, only one member being then present, and the Decree was promulgated on September 23, only three weeks later. Less important matters have been known to take much longer. There would scarcely seem to have been such need for haste in legislating for a crop which will not be sown until March and April.

Conclusion.

The following conclusion arrived at by the well-known expert on Egyptian cotton cultivation is worthy of the most careful consideration, and it is to be hoped that it will not fall on deaf ears. The writer says,—"The warnings which have been proffered to Egypt, as to the way in which she will be boycotted, will leave her cold. Egypt believes that the world cannot manage without Egyptian cotton. Therein she is wrong. On the other hand, there is no other country which is quite so perfectly suited to the production of the fine cottons, when properly handled. One would like to see a huge co-operative society founded with fellaheen and spinners as partners. As matters stand at present the isolated action of the Egyptian Government may not save the price from falling, but it certainly will give the Sea Islands, West Indies, Brazil, Peru, South-western States of America, the Punjab, and Mississippi such an opportunity as they had never anticipated for tiding over bad times. Egypt was within an ace of establishing a monopoly. Ten years hence she may again have struggled up to the same position!"

THE NILE FLOOD.

From the latest Survey Department chart to hand, the White Nile flood appears to be at the same level as last year. The Blue Nile is turbulent and the level is much above the average. At the junction of the two at Khartoum the river is 35 centimetres above the normal height, and it is the same at Atbara. At Wady Halfa the river is normal. In the Assuan Reservoir the level is 65 centimetres above that of last year, though the normal has not yet been reached. Downstream the level is normal, but at Cairo the Roda nilometer registers a slight fall.

PESSIMISTIC CROP REPORT.

Bollworm Depredations.

Referring to Messrs. Reinhardt's report for the week ended October 8, *The Statist* regrets to say that it is much less favourable than the reports that have previously reached that paper. "Crop news," says the report, "is distinctly bad." The paper alluded to then continues:—"From the official report for September it appears that the damage done by insects, fogs, and overwatering during the second fortnight of September will be about 20 per cent. This is enormous if the ideal conditions and prospects right up to the beginning of September are borne in mind. The Government has not as yet issued an estimate of the acreage planted, but basing ourselves on our own estimate of 50,000 feddans increase over 1913 the prospects, as given by the Government report referred to, point to about 6½ million cantars as final yield. Though not unfavourable to the cotton plant, the temperature in Lower Egypt has been somewhat irregular, with several cool nights and days. Boll worm has been reported everywhere, and in some localities the pink boll worm is reported in large quantities. Some very heavy fogs and mists have been reported. Damage somewhat greater than last year has, in consequence, been reported. The first picking has begun, and should have been as early as last year had not the general situation caused delay. The results seem to be about equal to last year. The second and third pickings will apparently give an inferior yield to last year. In Upper Egypt and Fayoum the temperature has not been favourable, being colder than usual. Frequent mists and boll worm have caused some damage to the first and second pickings.

On October 10, *The Egyptian Gazette* referred to the depredations of the boll worm and its triumphant march throughout the provinces of Upper and Lower Egypt," and added sarcastically that "it is an ill wind that blows nobody any good, and the problem of the financing of the cotton crop will be enormously simplified by this energetic little insect, since, by the time the Ministry of Finance has elaborated the scheme for moving the crop, Egypt's production of cotton will perhaps, thanks to the inaction of the Government last year, be hardly more than sufficient for this year's very reduced requirements." The same journal concludes its editorial by saying:—"In our issue of November 8 last year we reproduced an article from the *Journal* of the British Chamber of Commerce, in which attention was dawn to this matter, and it was stated that in spite of the circulars, inspectors, and fatherly advice, the infested boll was being hoarded on the cotton sticks on the top of the fellaheen's houses, where the grub would remain, snug and secure, until next year when it thinks fit to emerge as a moth and multiply a thousandfold. We were subsequently informed that a legislative project had been elaborated to deal with the matter, which was to be submitted to the Legislative Assembly, but despite the fact that the entire fabric of Egypt's prosperity was threatened, nothing was done until it was too late, the cotton crop then being planted, and it was only last summer that it was thought desirable to introduce legislation."

MANCHESTER MARKET.

(From Our Own Correspondent.)

Manchester, October 28.

The rather improved tone in the market is being fairly well maintained, but any big buying does not appear to be near at hand. Traders welcome the better tone, and certainly in one way and another the turnover shows a slight expansion compared with recent previous weeks. It is evident some buyers are now tempted by the low prices ruling to operate more freely. There is too much uncertainty as to raw cotton prices for a large trade to take place, and operators are nervous as to committing themselves very far ahead. Some advices relating to the Egyptian crop are not so favourable. Merchants complain of the very low prices ruling in certain descriptions. There are now indications of a record output in American cotton this season, the ginners' report just to hand being very favourable. In some respects the outlook in cloth for Egypt is a little more encouraging. Here and there goods have been taken on a rather freer scale, and inquiry has not been altogether absent. There is, however, plenty of room for improvement with regard to the Near Eastern outlets generally. There are no signs of India buyers entering the market with any vigour, and, owing to big shipments and increasing stocks on the other side, it is feared that a further period of waiting will have to be experienced by manufacturers. The demand for China has shown a little expansion, and in addition to miscellaneous cloths being sold, certain styles of shirtings have been purchased. The reports from Shanghai, however, are very mixed. Rather more activity has again prevailed in cloth suitable for dyeing. Shirtings, as a whole, remain flat. In home trade circles khaki drills have again been active, and makers are pressed for deliveries. Rather more business has come round in white goods. Although the orders have been unevenly divided, a larger turnover has transpired in home American yarns. The bulk of the demand has run on the coarser numbers, and certain producers are now able to hold more firmly to quotations. It is said that some of this business has been of a speculative character. Some low offers have come through in bundle yarns for India. In Bolton spinnings things are no worse, but no appreciable increase of business can be recorded.

GERMANY'S COTTON SUPPLIES.

It is understood that the Egyptian Customs Administration has under consideration an important project with regard to the exportation of cotton from this country to Switzerland and Italy, says the *Egyptian Gazette*. It appears that the consignments of certain export firms here to Switzerland and Italy are really intended to be delivered to German manufacturers. In future it will be necessary for exporters to present documents to the authorities of the Customs here to prove that their goods are really going to Italian or Swiss manufacturers. The exporter will also be asked to pay a deposit of fifty per cent., which will be reimbursed on the receipt of certificates from British Consuls in Italy or Switzerland showing that the goods are not going to Germany.

MESSRS. DAVIES BENACHI'S REPORT.

Messrs. Davies, Benachi, and Co. report from Alexandria (October 14) that cotton receipts from August 1 amount to 135,614 cantars, as against 1,603,290 cantars for the corresponding period of last year. The stock is estimated at 783,000 cantars, as against 1,433,000 cantars in 1913. Total shipments amounted to 28,738 cantars (11,852 cantars to Great Britain), as against 119,241 cantars for the same period of 1913.

Near East Markets.

SPECIAL REPORTS.

The following information is compiled from the weekly bulletins received at the London office of the Imperial Ottoman Bank from its correspondents in the Near East :—

Mossul. September 1.

The following are extracts from the monthly report for August :—

The pessimistic news as to the condition of the gall-nut crop has just been confirmed. Reports from the Zakho and Akra districts are especially bad. It is everywhere the same story, viz., if the crop is not abandoned altogether it will be delayed in consequence of the shortage of labour caused by the mobilisation. In addition, owing to the monetary stringency here, no business at all is being done in this article.

Business here has been practically at a standstill during the month of August, the fast of Ramazan, the outbreak of war in Europe, the declaration of a moratorium in Turkey, and the general mobilisation followed by arbitrary and exacting requisitions—all has contributed towards paralysing our market, and this situation, aggravated by the money stringency, grows worse every day.

Angora. September 20.

The following are extracts from the monthly report for August :—

The general mobilization and the military requisitions have rudely dissipated all the hopes which had been founded on the new crops. These are this year of good quality and yield, and might have afforded to both farmers and merchants some compensation for the losses occasioned last year by the consequences of the Balkan wars. In many districts the crops have been only partially gathered in either from lack of labourers or owing to the fear of requisition, and it would be disastrous if the heavy rains surprise the farmers before they have completely harvested their crops.

The commercial situation is deplorable. In consequence of the exigencies of the general mobilization, military requisitions, which have included cereals, flour, wool, animals, and transport material, have arrested business to such an extent that most of the shops are closed. The prolonged interruption of communications with the capital and the impossibility of exporting or importing merchandise have increased distress by greatly augmenting the dearness of necessaries. Payments for exemption from military service have been made at great sacrifices, and to raise sums for this purpose many have pledged securities, jewellery, etc., at absurd rates of interest. The seizure of transport animals has prevented the arrival of goods from the interior in anything but insignificant quantities. In brief the situation could hardly be worse.

Serres. October 10.

The following are extracts from the monthly report for September :—

The gathering of the tobacco crop has come to an end; the crop is to all appearances very abundant. It seems certain that holders will have difficulty in making their first sales, owing to the shortage of money.

On the other hand, the cotton and maize crops are poor, and the latter has suffered severely from the ravages of rats.

The prevailing drought has been unfavourable to agriculturists since they have been prevented thereby from preparing the fields for sowing wheat and barley.

The money stringency has paralyzed all commercial activities.

With reference to the use of sesame seed, it is stated that two-thirds of the world's production (says *The Agricultural News*) goes to Marseilles for oil extraction, largely used for making soap, in perfume, and for burning in lamps. It is also extensively used in certain places, *e.g.*, Egypt, as a substitute for olive oil. As is well known, the residual matter, or cake, is employed as a cattle food, in which connection it has been observed to have a great influence upon the butter and fat of dairy cows.

CONSULAR REPORTS.

Dates.

The United States Consul at Baghdad writes on August 29 :—

The date crop of this consular district has now sufficiently matured to warrant the growers in building the date-packing sheds and collecting the people to gather the crop. Many men have recently left this district on account of the mobilisation of the Turkish army, but as most of the date crop is gathered by those who come into the cities from the outlying villages, there seems to be no shortage of labour. The size and quality of the crop this year are better than usual, and the growers anticipated a very successful season. However, recently the British steamers running between Busrah and Bombay have been discontinued on account of the war.

PRODUCE REPORT.

Currants. London, October 29.

About 1,800 tons were brought last week, consisting of all qualities, but including very few Provincial. This latter growth is much neglected here this season on account of its comparative dearness. There has been a good demand for all other qualities, but except in Vostizza no advance is reported. Apart from some poor parcels of Provincial all growths continue to arrive in excellent quality. Even the rain-damaged fruit is for the most part so well prepared as to be very desirable.

From Liverpool it is reported that there was a good demand for Vostizza at 28s. to 31s., and for shade dried up to 37s. Gulf and Patras sold well at 26s. to 28s., being cleared at these rates. Up to last week the arrivals are about 4,000 tons short as compared with same period last year.

Sultanas.

The 120,000 boxes which arrived by "Antæus" and "Edenhall" were much less, quantity than was anticipated. The demand has been large, and prices have advanced 1s. to 2s. per cwt. for common and fine, medium remaining practically unchanged. The few Greeks that have arrived per "Joshua Nicholson" were sold at from 38s. to 56s.

The Liverpool market is almost cleared of arrivals per "Tyria," and further supplies are due this week per "Asturian." Last sales of good to fine grades showed an advance of 2s. to 4s., old fruit from 26s. to 35s. is now good value. The position at present is very uncertain, but consignments are sure to be light, and the prospects are for higher prices in the immediate future.

Figs.

The "Antæus" and "Edenhall" have brought 1,800 skeletons and 90,000 bags naturals. Prices for layers are maintained. Naturals are somewhat slow. The Liverpool market is cleared. The "Asturian" will bring the next supplies, for which an active demand is anticipated.

Coffee.

The fair supplies offered at auction this week met with a better demand at steady prices to 2s. advance for washed Dumont. Mexican mid. sold at 62s., and good bold at 71s. 6d. Costa Rica low mid. 62s., and fair bold 68s. to 70s. Washed Dumont, small to bold, 52s. 6d. to 63s. 6d. Uganda, small, 45s. 6d. to 46s. 6d., and mid. at 53s.

Seeds.

Linseed is firm but quiet. Rapeseed remains idle, and cottonseed is firmly held, London-Egyptian f.a.q. loading and November shipment quoted £7 6s. 3d. per ton. Hungarian and Danubian haricot beans are held for 90s. to 95s. Canary seed is practically unchanged, and hempseed is offered at 35s.

Oilcakes.

Linseed Cake.—There is still a total absence of any speculative inquiry, the trade being, generally, purely of a hand-to-mouth description. Best London-made find a more ready sale at £8 10s. to £8 15s. Cotton Cake.—Arrived parcels of Egyptian meet a good inquiry, and quotations are well maintained at £5 8s. 9d. to £5 10s., while for October shipment there are sellers at £5 6s. 3d. to £5 7s. 6d. ex ship, and November shipment at £5 5s. ex ship, with English makes fully as dear at £5 13s. 9d. to £5 15s., and Bombay at £5 per ton.

Digitized by Google

GREEK TOBACCO.

No statistics are available, says a writer in *The Financial News*, as to the number of acres under cultivation or of men employed in the tobacco industry in the newly acquired provinces of Greece, but it is well known, from figures in the possession of the Ottoman Régie, that the quantity of tobacco which came under the supervision of that august body exceeded 100,000,000 English pounds, of which fully one-half was produced in European Turkey, the remainder, and that only of the commoner sorts, being raised in Asia. The whole of the European-grown tobacco is raised in the portion of the Ottoman Empire which has now passed out of her hands, and it is generally assumed that of the 50,000,000 lb. grown in Macedonia and Thrace three-fifths is produced in the provinces which now acclaim King Constantine as their monarch. The figures given by the officials of the Régie by no means represent the actual quantity of tobacco either grown or sold; for there was an immense trade done in contraband leaf, and this was openly winked at by the Ottoman officials and warmly encouraged by the people themselves, to whom the very name of the Régie was anathema. Of the tobacco-producing regions, that of Xanthi, where some of the finest leaf is grown, is under Bulgarian rule; but the officials in Salonika assure me that they calculate on an annual production, in the newly conquered provinces, of upwards of 70,000,000 lb. The last figures furnished by the Customs authorities at Cavalla and Salonika show that in the year 1912 tobacco of a value of close on £3,000,000 was exported from those two ports:—

	Tons.	Value.
Cavalla	13,094	£2,430,000
Salonika	5,795	380,000

Here then we have an export from the two Macedonian ports of no less than 41,555,800 lbs. Principal purchasers were:—

	Lb.
Austria-Hungary	18,700,000
The United States	7,970,000
Egypt	1,540,500
Italy	1,442,000
Great Britain	1,410,000

The figures for Egypt and the United Kingdom, however, by no means represent the actual quantities of tobacco purchased by those countries. For instance, Egypt purchases no less than 1,000 tons of inferior tobacco from one district in Thessaly alone.

The following description of the Cavalla tobacco plant is culled from an interesting article which appeared in *The Financial News* of October 19:—"By the middle of July the plants are ready for the harvest, having shot up to a height of from 2 ft. to 3 ft., the leaves being from 2 ins. to 8 ins. or 9 ins. in length. There are, as a rule, eight groups of leaves on each stalk; the two lower are of little value, and never reach the better markets of the world. They are, however, bought up readily by German and Dutch purchasers at prices varying from 2d. to 4d. a lb., and, doubtless, manufactured into those cheap cigars which poison the air in the beer-halles of Northern Europe. The next three rows of leaves are known in the trade as basma, and these, though not of the highest quality, are readily sold to British buyers by the Dresden merchants. The three upper groups of leaves are known as dubec, and these fetch the highest prices, and are, as a rule, purchased by Russia and Roumania, which two countries are known as buyers of the highest grades of tobacco, though Austria-Hungary also is a keen competitor for the dubec.

EGYPTIAN CIGARETTE TRADE.

"The Egyptian cigarette export trade has been ruined by the war,' says *The Egyptian Gazette*, "and the sole manufacturing industry of any importance is absolutely paralyzed. A large number of cigarette-rollers have left Egypt for Greece, where they will be employed by the Hellenic Government, which has set up a monopoly. Owing to the trade in Egypt being at a standstill, and the skilled workers having been taken by Greece, there is a genuine danger that when the trade attempts to revive it will find a serious competitor in Greece. In face of such competition, and of the heavy taxation imposed by the Government, it looks as if the Egyptian cigarette industry is destined to extinction. Could not the Government afford some protection to the industry instead of crushing it under revenue charges?"

EGYPTIAN GOVERNMENT ACCOUNTS.

(From Our Own Correspondent.)

Cairo, October 9.

The first statement of the Government accounts covering a period since the outbreak of war has been published this week. It shows the figures up to the end of August. The revenue amounted to £E6,114,730, and the expenditure to £E7,540,786, as against £E6,036,898 and £E8,043,790 respectively during the same period last year. On these figures the current year shows a net improvement of £E580,836.

This comparison is, however, neither a fair nor a true one, as the period ending July 31 this year was so much better as regards revenue than that of last year. A closer analysis is necessary if one wants to obtain an accurate idea of the actual position. A comparison of the improvement, or otherwise, under each head registered at the end of July and August this year and last year or, in other words, a comparison of the receipts during August, 1914, and 1913, gives the following net result:—

	Difference on the Month.
Land Tax	£E– 50,523
Customs	– 65,158
Tobacco Dues	– 21,676
Ports and Lights	– 13,799
Legal Dues	– 26,951
Railways	– 40,775
Telegraphs	+ 5,490
Post Office	– 7,413
Rent of Government Land	– 1,927
Divers Receipts	– 9,610
Sale of Land	– 15,233
Sundry Items	– 14,282
Total	£E–261,857

Under practically every head, with the exception of telegraphs—which is perhaps explained by the abnormal rush which ensued during the early days of August, as a natural result of the outbreak of war—a falling off has been recorded.

This was but to be expected owing to the practical stoppage of all external trade brought about by the Decrees forbidding export of foodstuffs and defining contraband issued by Egypt and other countries in the early days of the war. September will probably show a similar, if not greater falling off than the £261,857 suffered in August, but there is reason to hope that from now onward, although normal receipts cannot be expected, a marked reduction in the decrease will be recorded owing to the relaxation of the various embargoes and the throwing open of the seas, in addition to the facilities afforded for moving the crop.

The authorities have been quite right to prepare for a deficit in receipts, which the above plainly foreshadows, and the expenditure side, which even in August showed a marked reduction, will undoubtedly help to attenuate the effect of a shrinkage in revenue, thanks to the economy which has now been ordered in all departments.

AUGUST TRADE IN EGYPT.

The Egyptian Gazette publishes the following extracts from Egypt's August trade returns, showing the effect of the first month of the European war:—

Compared with August, 1913, there has been a falling off of imports into Egypt of £E769,998 and a falling off in exports of £E805,253. Tobacco imports have fallen off by £E25,866, and cigarettes by £E19,610.

A feature of the returns which will attract some interest is the figures for trade with Germany and Austria. Egypt imported from Germany goods to the value of £E124,658, as compared with £E132,367 in 1913, and exported to Germany goods to the value of £E17,347, as compared with £E136,040. No cigarettes were exported to Germany. The imports from Austria-Hungary were valued at £E61,967, compared with £E135,121, and the exports at £E5,800, compared with £E95,345. Both imports from and exports to Norway have increased. Imports to and exports from England have fallen off by nearly a half, and the decrease of our trade with France is much greater even than this, the slump in exports being as remarkable as in the case of Germany.

NEWS FROM ALL SOURCES.

Owing to the considerable increase in the business of the Royal Exchange Assurance Corporation, and to the fact that, for some years past, accommodation has had to be found for some branches of the fire department away from the head office, the directors have acquired the freehold of No. 11, Cornhill, E.C., and propose to concentrate the whole of the fire business at that address on and after November 2 next.

The export of petrol is prohibited by the Roumanian Government.

A Reuter telegram from Lemberg states that a number of Galician settlers in Canada have sent a telegram rejoicing at the freeing of their country from the Austrian yoke, and adding that they are enlisting in the British Army.

A Russian prize court has been established at Sebastopol.

The Bulgarian moratorium ends on November 7.

The Egyptian *Journal Officiel* for September 26 contains a notice to the effect that the exportation of dates from the Oasis of Siwa is to be allowed as an exception to the general prohibition.

On October 7 a new section of the Baghdad Railway, from Istabolat to Samara—21 km.—was opened to traffic. It is a prolongation of the Baghdad-Istabolat section.

With a view to promoting the commercial relations between Egypt and Spain, it has been decided to hold an exhibition of Spanish industries in Cairo.

Following the announcement made at Washington that cotton shipments are not to be subject to seizure, it is reported that representatives of German interests are making large purchases of cotton in New York, which will be shipped viâ Italy.

The Egyptian Ministry of Agriculture has devised a scheme for the distribution of cotton seed which is to be given on credit to small cultivators, or against cash to those who are not entitled to receive it on credit.

An order has been issued by the Ottoman Ministry of Agriculture, Mines and Forests and the Ministry of Interior that hereafter only Ottoman subjects shall be employed in the mines of the country, foreign technical employees alone being allowed.

The Greek steamer "Assimacos," with a cargo of coal for Braïla (says *Syren and Shipping*) has been lying at Piraeus for over two months, her owners not considering it safe for her to proceed through Turkish waters under present conditions. It is now reported that spontaneous combustion has taken place in her cargo: this, naturally, may mean a serious claim. Her hull is insured in London for £16,000.

Engineering Notes.

Agricultural Machinery.

The latest information given by the Board of Trade in connection with the present trade campaign deals with the important subject of agricultural machinery exported from Germany, Austria-Hungary, and the United Kingdom. For the first-mentioned the year 1912 is taken, and for the two latter countries the year 1913. In those years Roumania bought from Germany agricultural machinery to the value of £215,900, from Austria-Hungary to the value of £64,750, and from the United Kingdom to the value of £17,000; Greece, £1,800 from Germany, £1,730 from Austria-Hungary, and £6,000 from the United Kingdom; Bulgaria £69,350 from Germany, £20,450 from Austria-Hungary, and £5,000 from the United Kingdom; Serbia £20,300 from Germany, £9,810 from Austria-Hungary, and nothing from the United Kingdom; Turkey £23,050 from Germany, £3,340 from Austria-Hungary, and £17,000 from the United Kingdom; Russia £938,200 from Germany, £315,800 from Austria-Hungary, and £1,103,000 from the United Kingdom. The above figures show that in the Balkan States, including Turkey, we are doing less trade than Germany, while in Russia, the biggest European market for agricultural machinery, our share of trade is larger than that of Germany and more than three times as large as that of Austria-Hungary; and as Southern Russia includes the vast and richest agricultural districts of the Empire, more than half of the above sum may be calculated as from Southern Russia.

Necessary to Act Now.

A unique opportunity presents itself to British engineer manufacturers for the capture of a great part, if not all, of the above German and Austro-Hungarian trade in the Near East. But they must act now. This is the season when agriculturists and landowners realise the value of their crops in money and decide as to the kind of machinery and implements they require for the approaching sowing season and for the treatment of the next crops. It is probable that some manufacturers are influenced by repeated statements that long credit is expected by buyers in the Near East, and that by giving such credit the Germans succeeded to a certain extent in securing those markets. Such statements are misleading, and naturally may tend to discourage the necessary efforts on the part of British manufacturers to do business there. But, as we have often pointed out in these notes, the success of the Germans in the Near East is due to their systematic energy and to the methods of dealing through and with their agents. Where credit is given full security is required and obtained. They select agents or representatives of good standing and capable of assuring themselves as to the trustworthiness of buyers. To such agents, as a rule, the credit is given, and not directly to the average buyers. British manufacturers, on the other hand, are not so careful in the selection of agents, and that is strengthening the position of their competitors. But wherever the British firms are well and substantially represented they have an advantage. Thus, while in the Balkan States and Turkey the Germans are doing, according to the official reports, excellent business by giving credit, etc., the German Consul-General at Cairo, in his report for 1912, indicates certain difficulties affecting the development of business in agricultural machinery in Egypt, which is none the less steadily increasing. Long credit and extended periods of instalment payments have to be granted, and, according to the report, German manufacturers seem to have been somewhat discouraged by this circumstance!

Openings for British-Made Agricultural Machinery.

Roumania is the best market for agricultural machinery in the Balkan States. Threshing machines used formerly to be the monopoly of British firms, but they are now being driven from the market by German and Austrian competition. Under present circumstances the position will be regained. The steam engine burning straw for fuel is still in favour, and iron wheels, instead of wooden on engine and threshing machine are preferred in most districts. Motor ploughs are steadily taking the place of steam ploughs, and are supplied by Germany and America. A great demand for agricultural machinery of all kinds in the new territory is anticipated. Ploughs are imported at Constantza, mainly from Germany, but none from the United Kingdom; reapers from America and a few from Germany. Reapers of British manufacture are said to require six horses, and, consequently, to be too heavy for local requirements, as only four horses are used for the purpose. This heavy type of British reaper has been replaced by the light American reapers, now so popular in the Balkan States.

Serbia.

In Serbia sowing machines, hay-presses, small threshing machines, etc., have been supplied by Austria-Hungary; other or larger agricultural machinery by Germany, America and England. In 1911 170 steam threshing machines were imported, chiefly from Great Britain; 150 harvesting machines were purchased from America, but forward orders were given to Germany and Austria.

Greece.

In Greece threshing machines are imported from Great Britain, binders from America, ploughs from Germany, and other machinery from Austria-Hungary. The greater demand for ploughs is satisfied by home production. The prospects for business in agricultural machinery for the district of Salonika are excellent. An American Consular report states that unquestionably the best method of ascertaining the prospects of that market is to send out representatives to canvass the field thoroughly and, if found satisfactory, to select agents. Salonika merchants are opposed to dealing with European or Constantinople agencies of foreign concerns. They prefer to deal directly with the manufacturer. This is true, we have often pointed out in these columns, not only for Salonika, but almost for every district in the Near East.

Bulgaria.

In Bulgaria steam threshing machines are now popular, and are frequently purchased by small groups of farmers sharing the expense of a machine for their common use. Machines of from 4 to 10 and 12 horse-power, fitted with a straw-cutting apparatus, are most in demand. Mowing machines are supplied by America, sowing machines by Germany and Austria, binders by America, and ploughs by Austria-Hungary, in the face of the most active competition by German manufacturers. The whole of the business in agricultural machinery of the expensive varieties in Bulgaria is carried on by dealers possessed of strong financial resources, enabling them to accept long credit, carried sometimes over several years, to the actual purchasers. Large stocks of reserve parts have to be carried, and this fact, of course, serves to establish an enduring connection between dealer and customer. This long credit system, often mentioned in official and other reports from various parts of the Near East, creates the belief that such terms are demanded from or allowed by the manufacturer.

An enormous trade in agricultural machinery, in traction engines, steam rollers, power-driven ploughs, and in fencing-wire, barbed-wire and wire netting, is done annually in almost all parts of the Old and New Worlds. For many years (says *Engineering*) Great Britain has enjoyed a very large share of this trade, but during the last decade Germany has extended enormously in this direction, and this extension has largely been at the expense of manufacturers in the United Kingdom. Let us take, for instance, the import of road traction engines and steam rollers into Egypt, under British control, last year and the year before last. So recently as 1912, British and Germans, who held the whole import trade in this particular type between them, sent almost exactly equal amounts. In a short twelve months, the position had, however, completely changed, Germany serving forty times as much as Great Britain, or 94 per cent. of the total import.

THE CAR IN THE NEAR EAST

The Motor, in an article on cars abroad, gives the following particulars concerning some Near Eastern countries:—

Egypt.

Until just recently the French had held the lead in the exportation of cars to Egypt, but latterly England has had a little larger share, whilst great efforts have been made by Germany and the United States. Those who know their Egypt only from a few years ago would be surprised at the extent of roads now available for motor-car use, due, of course, to the great activity lately shown by the Government. For instance, Alexandria and Cairo are now linked up by a good main road, and the construction of other similar thoroughfares in the Delta has been undertaken. It is considered that there is a good opening in Egypt for a well-made cycle-car at about £100. Egypt is a country to which it would probably pay English motor manufacturers to send out a capable observer to study the conditions and market requirements.

Roumania.

Although of quite recent date, the use of motor-cars in this country is growing largely. Here again England is "off the map" so far as supplying the motor market is concerned, the chief countries selling cars in Roumania being France, Germany, Italy, and Belgium. The requirements of the local users are light, cheap cars rather than expensive and heavy vehicles, and it is considered that the Roumanian market is quite an important one, well worth studying. One sign of English activity is to be seen in the establishment of a branch repair works for a certain English firm. Cars are usually sold for part cash, the remainder, perhaps three-quarters or half of the purchase price, being secured paper, which is readily discountable at the local banks. Any English manufacturer contemplating entering this market on a large scale should undertake the trouble and expense of sending his own representative, as the few local dealers have as many lines as they can handle with success.

Turkey in Asia.

So far as Turkey in Asia is concerned, the motor trade is not as yet enormous, but great interest in future possibilities is evident. Until the roads are put in better condition it is not likely that a very large trade can be done, but the Syrian market merits attention, as this is likely to grow in the near future.

THE CAIRO MOTOR CO., Ltd.
The Largest Motor Depot in the Near East.
SUPPLIERS OF
Motor Cars, Cycles, Launches, Marine Sets, Evinrude Motor Attachments, Dunlop Tyres & all Motor Accessories.
Head Office: RUE SOLIMAN PASHA, CAIRO, EGYPT.

Clearing the Suez Canal.

British Prize Court in Egypt.

(From Our Own Correspondent.)

Cairo, October 17.

All arrangements have now been made in connection with the holding of the Prize Court, which was recently authorised by the British Government. Only one Court will be held in this country—at Alexandria, where it will sit at the Arsenal. Judge Grain, of the Supreme Court for the Ottoman Dominions, will be the judge, Mr. A. S. Preston will act as procurator, and D. Morice Bey, as Marshal. The Court will first deal with the prizes at present in Alexandria—subsequently with all those that may from time to time be brought into that port—but it will also be called upon to deal with the status of the enemy ships stationed at Port Said and Suez, as also at Alexandria, and which declined to leave within the days of grace. The most interesting questions will be those connected with the two canal ports, and important precedents will very probably be established, as this is the first occasion where the interpretation of the Suez Canal Convention has been called into question under such peculiar circumstances.

Judge Cator is expected to arrive in Alexandria shortly from Constantinople. He will sit with Judge Grain on the Bench of the Prize Court.

Enemy Vessels in Egyptian Waters.

According to information received by the Liverpool Underwriters' Association the following twelve enemy vessels were at Port Said :—

Vessel.	Tonnage.	Line.
Gutenfels	5,528	Hansa
Werdenfels	4,504	Hansa
Helgoland	5,666	Norddeutscher Lloyd
Concadoro	1,793	A. Giancovich & Co.
Rabenfels	4,678	Hansa
Anna Rickmers	4,083	Rickmers
Rostock	4,957	Deutsch-Australische
Barenfels	5,398	Hansa
Derfflinger	9,144	Norddeutscher Lloyd
Pindos	2,933	Deutsche Levante
Lauterfels	5,811	Hansa
Koerter	5,440	Lloyd Austriaco

The three German vessels named below were at Suez :—

Lützow	8,826	Norddeutscher Lloyd
Goslar	4,331	Deutsch-Australische
Annaberg	4,463	Deutsch-Australische

And the Austrian—

Marquis Bacquehem	—	—

[*The Financial Times* estimates the value of the above ships at £750,000, exclusive of cargo.]

Seven enemy vessels were already at Alexandria, as follows :—

Andros	2,991	Levante Contor
Emil	2,991	"Union"
Achaia	2,733	Deutsche Levante
Istria	4,221	Hamburg-Amerika
Paros	—	—
Südmark	5,113	Hamburg-Amerika
Haidar Pascha	3,424	Deutsche Levante

The British Chamber of Commerce of Egypt will be glad to assist British owners of cargo shipped by these vessels in any way possible, and to advise them as to the necessary steps to be taken to protect their interests.

Clearing the Canal.

As was to have been anticipated, the Government's communiqué clearing the Suez Canal of enemy "loiterers" created the greatest satisfaction here, and has been ably commented on in the Press. We reproduce below some opinions from representative papers, and at the same time call our readers' attention to the special article on the legal aspect of the question published on another page of the current issue.

Yorkshire Post.—The case of the German and Austrian ships which have taken shelter in the canal from the risks of capture is not contemplated by the Suez Canal Convention, and the Germans have shown a certain slimness in trying to avail themselves of the omission. They are proceeding on the assumption that the canal is like a neutral port, which the merchantmen of an enemy are entitled to use in the ordinary course—or to lie up in, if they like, for the whole duration of the war. These German refugees cannot be permitted to block the canal by their mere presence, any more than by blowing it up. If they can stay there indefinitely, so may any number of ships, and navigation can thus be brought to an end. To allow this would be absurd. The course is clear for them, and they are given a sporting chance at each end of the canal by the proviso that there must be no blockade of the egress and ingress. The canal is a waterway, not a place to lie up in; and the Egyptian Government are entitled to see that it is put and kept to its right use.

Newcastle Chronicle.—The Suez Canal is a waterway pure and simple, and it is not less than an outrage to use it as a harbour of refuge. We trust the authorities are wide awake to the danger of the waterway being tampered with. It would be the easiest thing in the world for a vessel, loaded, say, with cement, to be sunk in the canal, and thus cause serious delay and inconvenience.

South Wales Daily News.—Several of the ports of the canal have not been accessible to other ships since the war began, and this has led at times to a complete block of traffic, entailing great delay and expense to shipping. The Egyptian Government have international sanction for whatever action they may deem necessary to terminate this congestion. A further misfortune, due directly to the partial paralysis of traffic, has been the dismissal of a large number of persons from various forms of employment connected with the operation of the canal, and the authorities at Port Said have been obliged to take steps for their partial relief. The Suez Canal, like the Panama Canal is an international highway, open in time of peace and time of war alike to the merchantmen and the warships of all nations, but on certain conditions. The Panama Canal Commission have been consulted, and have replied that no ship will be allowed to remain in the Panama Canal for more than twenty-four hours without special permission.

The Daily Telegraph (October 26).—It has been ascertained that certain German and Austrian vessels carrying British goods left the canal, put out to sea, and were captured and taken to Alexandria as British prizes, to be dealt with by a British Prize Court there, such vessels being destined with their cargoes for India. It appears that the usual procedure of a British Prize Court is that the cargo of a captured prize is not discharged until the vessel itself has been dealt with by the Court, with the result that after such discharge the cost of re-stowing, re-shipping, and freight to destination falls on the owners of the goods, who have, in addition, to send documents of title—in this case to Alexandria—and engage an agent to claim ownership. It has therefore been suggested to His Majesty's Government that in the case of the steamship "Barrenfels" and the steamship "Gutenfels," those vessels should be removed from the jurisdiction of the Prize Court by the process of an Admiralty requisition, and in the event of this suggestion being adopted the committee will be able to arrange for fresh crews being sent out to work the ships in question on to their destination in India, the general expenses for so doing falling on the owners of the cargo on an average basis, the prizes being available afterwards. It is understood that the authorities consider this idea practicable.

DELICIOUS COFFEE.
RED WHITE & BLUE
For Breakfast & after Dinner.
Wholesale, of Hanson's, London, England.

Official Notices.

The following two notices were published in Egypt on October 13 :—

In Prize.

Notice is hereby given that H.B.M. Supreme Court for the Dominions of the Sublime Ottoman Porte has been constituted as a Prize Court to exercise Prize Jurisdiction in Egypt.

Due notice will be given by advertisement of the times of the sittings of the Court, which will be held at the Arsenal, Alexandria.

Alexandria, this 12th day of October, 1914.

Peter Grain, Judge.

In Prize.

Owners and others interested in cargo in ships, in respect of which Prize proceedings are or are about to be instituted should communicate with H.M. Procurator in Egypt at his office, 17, Rue Nebi Daniel, Alexandria.

Due notice will be given by advertisement of the names of the ships in respect of which Prize proceedings have been instituted.

Alexandria, this 12th day of October, 1914.

Arthur S. Preston,
H.M. Procurator in Egypt.

Shipping Intelligence.

The "Belgian King."

In connection with the loss of the "Belgian King," reported in last week's issue of The Near East, *The Orient* (Constantinople) writes on September 30 :—

"The British steamer 'Belgian King,' Captain W. R. Aikman, one of the vessels bought by the Gumushian Steamship Company, of Constantinople, and which made trips along the shores of the Black Sea, left Trebizond a week ago last Sunday, September 20, with a cargo of about 3,500 sheep and 400 head of beef, and perhaps 150 passengers, but with no ballast nor any cargo in her hold. About ten or fifteen miles west of Trebizond the steamer was listing badly; there was no storm, but on the slanting decks the cattle were thrown from side to side of the ship. The captain tried to get the animals taken below, as their presence on that deck made the ship top-heavy. But this proved impossible; and within a very short space of time the steamer listed over and turned turtle. Had it not been for the timely help of the Russian Steam Navigation Company's steamer 'Evghenia,' which had left Trebizond about the same time, and was quickly put about to give aid, the whole party would have gone to the bottom. The Russians gallantly did their utmost to save the shipwrecked persons, and were able to rescue about a hundred passengers and officers and sailors. The vessel sank very quickly, and all else, including the mail, the sheep and oxen, and, most unfortunately, a large number of lives were lost. The rescued passengers and crew were brought by the Russian steamer to Constantinople on Thursday, the 24th. A telegram from the Vali of Trebizond to the Minister of Interior expressed great admiration for the gallant and heroic rescue work of the Russian crew."

Freights.

From the Mediterranean there is but little business doing. Alexandria will pay about 8s. per ton to the United Kingdom for cottonseed and general cargo, but the demand is very limited.

Reported Shipping Alliance.

There is substantial foundation for the report that an alliance between Liverpool and New York shipowners has been formed with a view to the capture of Germany's shipping trade, particularly with South America. The proposal, says *The Manchester Guardian*, has been under consideration for some time, and the details of the scheme are now being worked out.

Oil Steamer Mined.

The steamer "Shiraz," flying the Persian flag, is reported in a Lloyd's telegram from Varna, the Bulgarian Black Sea port, to have collided with a floating mine and sunk off Euxinograd. The "Shiraz" was laden with cases of petroleum, and was bound from Kustenje for Constantinople.

The Egyptian Loan.

(FROM OUR OWN CORRESPONDENT.)

CAIRO, October 17.

With regard to the Treasury bills that are to be issued in Egypt, various misleading statements have been circulated during the past week. These bills will be discounted by the National Bank of Egypt at a rate fixed between it and the Government. The process will be credited to the latter's account, where it will bear interest at the same rate as the ordinary Government balances. The bills will be lodged by the National Bank of Egypt as security for bank notes that will be issued for their value. It is by no means certain, as so many affirm, that the Government's loss will be heavy, and the Bank's profit great. Everything will depend on the bank rate and the period during which the extra notes will be in circulation, and over which the major portion of the liquidation of the cotton situation will be extended.

It should be pointed out that, although the Government has obtained power to issue bills up to £5,000,000 in Cairo and in London, the total of its borrowing power in both places is limited to £8,000,000. The amount of bills issued in any one of these two centres at any one time may never exceed £5,000,000, but the exact proportion in which the £8,000,000 will be divided up between London and Cairo will vary from time to time according to the exigencies of the situation.

One of the first transactions the Government will in all probability execute with the assistance of the National Bank of Egypt will be the payment in London and Paris of about £E1,600,000 for account of the Caisse de la Dette Publique, which had to pay the privileged coupon on the 13th inst and the Unified on November 1. The money will be paid from the proceeds of the Government bills in London, and the Caisse, which, of course, holds the equivalent amount here from the revenues paid into it, will deliver that sum at the National Bank of Egypt in Cairo.

ANGLO-EGYPTIAN BANK.

Satisfactory results were secured by the Anglo-Egyptian Bank in the financial year to August 31 last, profits having been apparently maintained at the high level reached in 1912-13. The dividend, which has been 15 per cent. since 1906-7, is maintained at that rate less income-tax, and, while no further contribution is made to the reserve fund, to which £20,000 was transferred last year, the carry-forward is increased by £25,000 to £77,000. The reserve fund at £680,000 exceeds by £180,000 the amount of the bank's paid-up capital.

TURKISH COMPANY PROMOTIONS.

At a recent sitting of the London Bankruptcy Court, before Mr. Registrar Brougham, the public examination was held of Mr. Sanford Reich, company promoter, of Bank Chambers, High Holborn, W.C. The debtor stated that in 1909 he came to England and commenced business as a company promoter. He formed the Asia Minor Syndicate, Limited, to construct a railway in Turkey in Asia, but the flotation was unsuccessful, for the reason that the German Government would not allow any contract to be signed between the Turkish Government and an English company. Other promotions included the Anglo-Ottoman Syndicate, Limited, which was formed to make loans to the Turkish Government, and the London Bosphorus Company, Limited, to make loans to the Municipal Council in Constantinople. The debtor admitted that he had lost £38,000 on the Cairo Stock Exchange.

JAFFA-JERUSALEM RAILWAY.

The Cairo correspondent of *The Railway News* says that the receipts of the Jaffa-Jerusalem Railway for 1913 have recently been published. They amount to 13,000,000 frs. The company distributed 4.0625 frs. per share on the original shares of the nominal value of 500 frs. each, and on each bond of the nominal value of 500 frs. a dividend of 33.9584 frs. The company is believed to have a very large reserve fund, but, curiously enough, the report omits all mention of the amount.

MORATORIUM TABLES.

We are able to reproduce below, thanks to the courtesy of the Imperial Ottoman Bank, tables of the Turkish and Egyptian moratoria. They will be useful guides to trade s and others having dealings with the above-mentioned countries:—

EGYPT.

I.—Negotiable Values (including Bills) dated before August 4.

Instalments (in per cent.).

Due On or Before	Nov. 15.	Nov. 30.	Dec. 31.	Jan. 31.
Nov. 15	15	25	30	30
Nov. 16/30	—	40	30	30
Dec. 1/31	—	—	70	30
Jan. 1/31	—	—	—	100

II.—Non-negotiable Commercial Debts dated before August 2.

Instalments (in per cent.).

Nov. 15.	Nov. 30.	Dec. 15.	Dec. 31.
25	25	25	25

III.—Bank Deposits Payable on August 8.

Instalments.

Nov. 1/16.	Nov. 16/30	Dec. 1/15.	Dec. 16/31.	Jan. 1.
25% of balance* as per Nov. 1	40% of remainder.	60% of remainder.	80% of remainder.	Balance.

*15% of the deposit was payable under previous moratorium notices.

TURKEY.

Debts due between	Payments.				
	Sept.	Oct.	Nov.	Dec.	Jan. 3
Aug. 3-Oct. 3	13th—5 p.c.	4th—5 p.c.	14th—5 p.c.	—	balance
Oct. 4-Dec. 3	—	date due 5 p.c., month later 5 p.c.			balance
Dec. 4-Jan. 3	—	—	—	latedue —5 p.c.	balance

Interest at 7 per cent. on balance unpaid.

COMPANY RESULTS, &c.

EGYPTIAN DELTA LIGHT RAILWAYS.—Receipts for the ten days ended September 30 amounted to £E3,611, a decrease of £E4,321 compared with the corresponding period of last year.

PIRÆUS ATHENS PELOPONNESUS RAILWAY.—The directors have declared an interim dividend of 2 frs. per share (at current rate of exchange), less tax.

Coupon No. 52 is payable on and after 28th instant at the Bank of Athens, 22, Fenchurch Street, E.C.

SOCIETE ANONYME AGRICOLE ET INDUSTRIELLE D'EGYPTE.—The meeting which was to have been held on the 15th inst. has been adjourned *sine die* owing to the state of affairs in Belgium, where the company has its registered offices.

SOCIETE GENERALE D'ASSURANCES OTTOMANES.—The annual meeting was held in Constantinople on the 14th inst.

SUEZ CANAL.—The traffic receipts of the Suez Canal for the 26th inst. amounted to 340,000 frs., against 420,000 frs. last year.

THE DROGUERIE CENTRALE D'ORIENT, LIMITED.—Profits for 1913-1914 amounted to £T9,972.12¾, and net profits to £T4,400. £T440 have been placed to the statutory reserve and the remainder distributed at the rate of 6 per cent. on the ordinary shares. The annual general meeting was held on August 28 last.

WHEN WILL THE STOCK EXCHANGE RE-OPEN?

(BY OUR CITY EDITOR.)

It is now well understood that Mr. Lloyd George has prepared a scheme which he hopes will enable the Stock Exchange to re-open as soon as the moratorium ends. The delay has come about because the Chancellor did not wish to give help to the Stock Exchange which was not equally available to the rest of the trading community. He wished to protect the broker and the jobber, but he also had to think of the client, and he could not help him unless he extended his aid to the general trader who might never have done a deal on the Stock Exchange in his life.

Those whose capital has been tied up because they could not get in any money owing on the Continent have, whenever they have had bills against the debts, been able to discount them at the Bank of England and obtain a release of the locked-up funds in full. This was a reasonable scheme and the taxpayers will have to meet any loss that may accrue. It was not ideal because a landowner who never traded in his life will be called upon to make up his share of a loss incurred by a person he has never seen, does not know, and cannot control. Nevertheless, the acceptance business is so important and the re-establishment of exchange so equally urgent that Mr. Lloyd George's scheme got little or no criticism. He acted in a panic, not perhaps very wisely, but, at any rate, with the honest intention of during the best for the City. This exchange remains difficult, and that he probably helped the German as almost as much as he did the Englishman was the result of ill-considered action taken in a moment of stress.

Having helped holders of bills he is now called upon to help traders and the Stock Exchange. He has now grown more cautious, and, as far as his intentions are known, he does not intend to come forward with a 20s. in the pound grant in aid. He will only help to the extent of 75 per cent. And in each case those who require help must prove that their troubles are due exclusively to the war. A firm that was in difficulties before the war began will therefore get nothing at all. But whether any loss since the war will be considered is uncertain.

The weak point in the scheme is the ridiculous disparity between the aid given to holders of bills, and this to be extended to the ordinary trader. The man who did his business with bills may lose nothing, the trader who had open accounts on his books may lose 25 per cent.

The banks met the Chancellor in the fairest manner. They agreed to continue all Stock Exchange loans for one year after the signing of peace. The minimum rate of interest was fixed at 5 per cent., but in the event of the Bank rate suddenly jumping up the banks had the right to increase the interest. The stipulation that their interest should be paid fortnightly was also made. But the banks agreed not to ask for any more cover, whatever the price of the securities might fall to. The price of the stocks was to be paid at end of July prices. This really seems an excellent arrangement, but it is not yet sure that it will be accepted. However, the banks fully realise that under no circumstances can they call in loans, and they have one and all agreed not to do this.

No one can say that Mr. Lloyd George's suggestions are sound. They are merely the best that can be arranged under circumstances of immense difficulty. They will probably be announced in a few days—perhaps before these lines are in print.

The Government must now begin to make arrangements for a War loan. It cannot go on borrowing on short-dated bills. The Chancellor is thus putting himself into the hands of the banks, who will never be able to resist the temptation to push up rates when the bills fall due. The various markets in which prices have not been fixed seem to depend for their activity more upon the weather than anything else. Prices go up on a fine day and droop in a shower of rain. Victories or repulses have an equally quick result. But the business done is so small that hardly any brokers are paying expenses or even lunch money. Kaffirs have been sold on the South African news, which is not as bad as it appears; nevertheless it would require great courage to buy gold mining shares at the moment.

ROUMANIAN OIL NOTES.

(From the *Moniteur du Pétrole.*)

The present daily output of various fields is as follows:—Steaua Romana, 93 wagons; Astra Romana, 122 wagons; and the Roumania Oilfields, 45 wagons. The total output is estimated at 450-470 wagons per diem.

The Roumanian Consolidated Well No. 1 at Baicoi-Fierbatori has been re-opened, and was producing towards the beginning of October about 35 wagons per diem.

In August the above company's output was 5,452 tons, as against 8,029 tons in June, and 9,525 tons in July. The following are the corresponding figures for some of the leading companies:—Steaua Romana, 24,467 tons, 31,748 tons, and 28,848 tons; Astra Romana, 38,160 tons, 42,184 tons, and 40,716 tons; Romano-Americana, 30,631 tons, 29,581 tons, and 29,691 tons; and Orion, 6,773 tons, 4,179 tons, and 6,159 tons. Roumania's total output in August was about 137,000 tons, as against 148,722 tons in June, and 148,565 tons in July.

The Roumanian Consolidated Oil Co., Limited, has acquired from Mr. G. L. V. Criveteanu, for 5,500 frs., a concession at Moreni.

The London offices of the Roumanian Consolidated Oil Co., Limited, have issued the following communiqué:—"Telegraphic and other communication between this country and Roumania is still uncertain and frequently interrupted and delayed. The company will resume weekly published reports as soon as possible. The production for the three months ended September 30 last was 21,128 tons."

EGYPT'S COAL IMPORTS.

According to Messrs. R. J. Moss and Co., the importation of coal into Egypt from January 1 to October 15, 1914, was:—

	Tons.
Welsh	466,158
Newcastle	183,619
Scotch	122,867
Yorkshire	94,801

The British loan of £5,000,000 for the benefit of agriculture in Egypt is, it is reported by Reuter from Cairo, occupying the attention of the Porte, which contends that the authority of Turkey is required before any loan can be made to Egypt.

THE GREEK DEBT.

The Council of Foreign Bondholders has issued the following information compiled from figures published by the International Financial Commission at Athens with regard to the revenues assigned under the Law of Control for the service of the Greek Debt from January 1 to August 31, 1914 (new style: January 14 to September 13, 1914):—

—	Monopolies, Tobacco, Stamps, Stamped Paper, Naxos Emery.	Piræus Customs.
	Drachmæ.	Drachmæ.
Gross Receipts, Aug., 1914	2,765,870.70	1,454,530.00
Do. do. do 1913	2,271,615.11	1,961,343.75
Estimated Receipts for 8 months (Law of Control)	19,266,666.67	7,133,333.33
Actual receipts for 8 months, 1914	25,045,689.90	18,809,703.82
Do. do. do. 1913	18,522,638.98	15,816,815.62
Difference between estimated and actual receipts for 8 months 1914	+ 5,779,023.23	+ 11,676,370.49
1913	— 744,027.69	+ 8,683,482.29

Note.—Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos emery 49 1-5 per cent. is applied towards increasing the minimum rates of interest and sinking fund of the External Gold Loans of 1881 to 1893. The receipts in gold from both Naxos emery and the Piræus Customs are converted into drachmæ at par when the average rate of exchange for the month is par or below par, but when the average rate for the month is above par the conversion is made at that average rate.

The Cyprus Gazette (Extraordinary) of September 21 contains a Proclamation ordering the Cyprus Currency Commissioners to issue not more than 3,400 notes of the value of £5 each, and 18,000 notes of the value of £1 each. A further Proclamation prohibits the export of these notes from Cyprus without the written permission of the proper authority.

Khedivial Mail Line.

FIRST-CLASS BRITISH MAIL STEAMERS.

GREECE-TURKEY MAIL SERVICE.

Shortest and most picturesque sea passage between Europe and Egypt. Fast steamers in connection with the Orient express train-de-luxe from Paris, Ostend, Vienna, Berlin, and Budapest leave Constantinople every Tuesday afternoon for Smyrna, Piræus and Alexandria. Return from Alexandria every Wednesday afternoon via same ports.

Service between TURKEY, SYRIA & EGYPT.

Fast steamers leave Constantinople every Saturday for Gallipoli, Dardanelles, Mitylene, Smyrna, Chios, Rhodes, Mersina, Alexandretta, Tripoli, Beyrout, Caiffa, Jaffa (for Jerusalem), Port Said and Alexandria. The voyage takes ten days.

Departure from Alexandria every Saturday, and from Port Said every Sunday, for above ports.

CYPRUS SERVICE.

Fast steamers weekly from Alexandria on Tuesday afternoons, and from Port Said on Wednesday mornings, for Famagusta, Larnaca, Limassol and Paphos.

SUDAN MAIL (SUMMER) SERVICE.

Steamers leave Suez Docks fortnightly on Friday, at 5 p.m., for Port Sudan, whence trains may be taken for Khartoum. Calls made at Suakim as required.

RED SEA COASTING MAIL SERVICE.

Steamers from Suez Docks every Monday evening, at 5 p.m., for Jeddah, calling one week at Tor, El-Wedj, Yambo and Jeddah; and in the following week at Jeddah, Port Sudan, Suakim, Massowah, Hodeidah, and Aden.

For information apply to the Company's London Office, 37, Bishopsgate, or at Alexandria, Constantinople and Suez. Passages may be booked at Company's Agencies at all ports called at, or from the principal Tourist Agencies.
